Subject: Memorial Hall Remodel

Greetings,

In a time when faith in our government seems to be waning a bit, I would like to take time to express appreciation to the Public Works facilities and office staff for their professionalism, cooperation and craftsmanship that has been displayed during our remodel project of the Memorial Hall.

Although we have a good set of engineered drawings helping us through this project, we have been met with a few challenges that required additional input. The Public Works staff has worked closely with the CSA, and together we have made some important decisions that will improve the functionality of this building. Since this remodel is being funded by the CSA, we are playing an active role in monitoring the work as well as the financial aspects of the job and are very pleased with the project's progress.

On behalf of myself and the rest of the CSA board, I want to thank you for your service to our community.

When this project is completed, we should have a fully ADA compliant building with an updated multipurpose multimedia room that will provide endless opportunities to meet community needs.

Sincerely,

Steve R. Noble
