CDC INDICATORS AND THRESHOLDS FOR COMMUNITY TRANSMISSION OF COVID-19 TO GUIDE MASKS FOR PUBLIC INDOOR SETTINGS BASED ON VACCINATION STATUS

Indicator	Low transmission	Moderate transmission	Substantial transmission	High transmission
Daily case rate	< 1.5	1.5–6.9	7–13.9	> 14
Test positivity	< 5.0%	5.0%–7.9%	8.0%–9.9%	≥ 10%
Unvaccinated	Mask Required	Mask Required	Mask Required	Mask Required
Fully vaccinated	Mask Optional	Mask Recommended	Mask Required	Mask Required

* Statewide / ** Vaccine Equity Metric goal of 4 million doses

HOSPITAL STATUS

- Two hospitalizations over the weekend ending 8/8
- One case transferred to Renown
- Both cases were unvaccinated
- Both cases were visitors

VALENCIA STATE LABORATORY ERROR

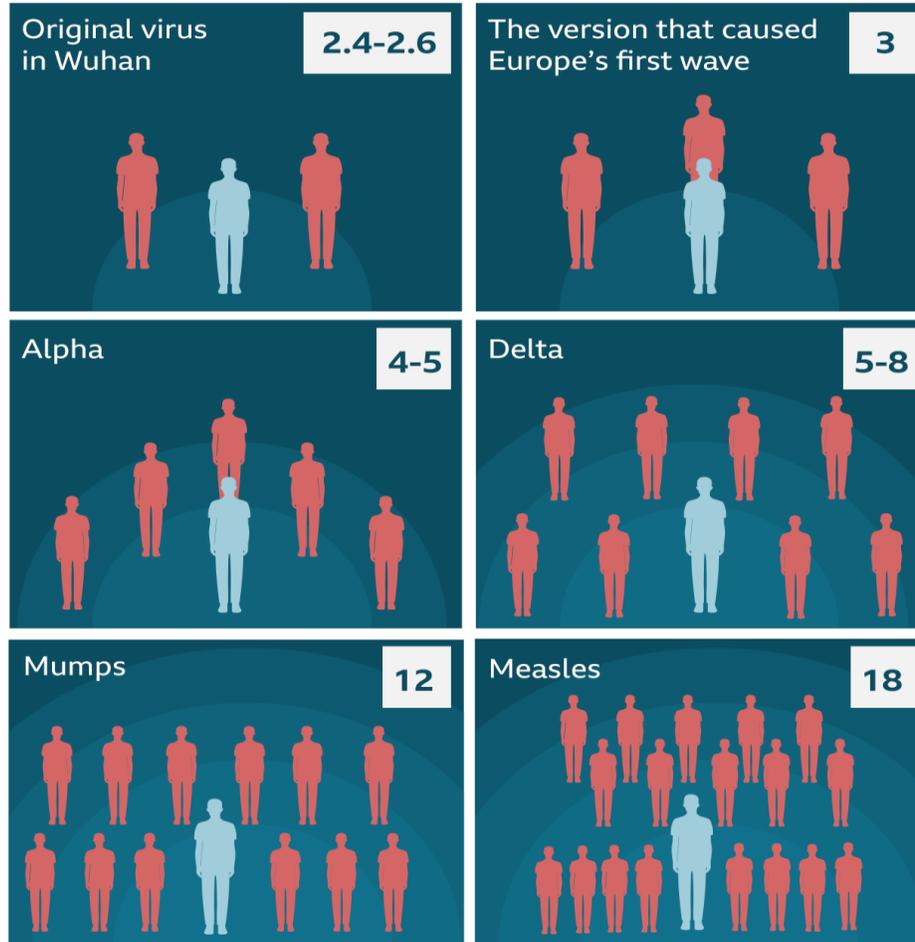

- On 8/5 Mono County was sent erroneous lab results (collected 8/4) with a high positivity rate causing the unnecessary closing of businesses and isolation orders.
- Lab tech failed to follow protocols.
- The error was caught 11 hours after the results were released.
- Mono County was notified by the state the morning of 8/6.

WHY WE NEED TO MASK

- The Delta variant is the dominant strain of COVID-19 and a strain of concern.
- The COVID-19 vaccines are less effective in preventing infection with an efficacy rate of 64% - 79%. Mono County joins the rest of the nation in experiencing an increasing rate of breakthrough cases.
- Vaccinated and unvaccinated individuals have the same viral load and can both transmit the virus to 5 to 8 others.
- The Delta variant is twice as transmissible and causes more severe disease.
- Numerous positive COVID-19 cases among our visitors

How the R0 numbers of Covid-19 variants and other diseases compare

The more contagious, the higher the R0 number

BBC

VACCINE EFFECTIVENESS IN THE FACE OF THE DELTA VARIANT

- The current vaccines are less effective at preventing infection and symptoms of COVID-19 and, the Delta variant.
- Breakthrough cases are on the rise.

WHY VACCINATE?

- The vaccine is the best way to prevent severe illness, hospitalizations, and death.
- The vaccines are 81% - 96% effective in preventing severe illness, hospitalizations, and death.
- The best way to prevent illness in unvaccinated populations such as those under 12 years of age and those with certain health conditions.

SCHOOL OPENING

- Schools in Mono County open for in-classroom learning on 8/19.
- Masking is required by CDPH and Mono County.
- Public Health is coordinating with the schools to provide best practices, contact tracing, and testing.
- 94,000 pediatric cases last week nationally

COVID-19 TESTING SCHEDULE

- OptumServe, Mono County Medics, and Mono County Public Health each provide COVID-19 testing in Mono County.
