I. INTRODUCTION

SCOPE AND ROLE OF THE LAND USE ELEMENT

The purpose of the Land Use Element is to correlate all land use issues into a set of coherent development policies for the private lands in the unincorporated area of the county. The goals, policies, and actions of the element relate directly to other elements and issues addressed in the General Plan. Although all general plan elements carry equal weight, the land use element is generally considered the most representative of the general plan, and in practice, is the most visible and often-used element. Mono County's first Land Use Element was adopted in 1968 and last updated in 1993. This element supersedes and replaces the 1993 document.

The county's Master Environmental Assessment (MEA) summarizes existing land uses in the county, and outlines the plans, policies, and regulations currently affecting land use in the county. The Issues section of this element identifies and analyzes opportunities and constraints which influence the future development potential of the county's unincorporated areas. The Issues section first addresses countywide issues and then focuses on issues that are applicable to individual community areas in the county. The Policy section establishes directives to guide growth, development and use of land in the unincorporated area through the year 2020; it also addresses countywide policies as well as policies for specific community areas.

LEGAL FRAMEWORK

Government Code § 65302(a) requires that the land use element designate the proposed general distribution, general location, and extent of land use in the county for housing, business, industry, and open space, including agriculture, natural resources, recreation and enjoyment of scenic beauty, education, public buildings and grounds, solid and liquid waste disposal facilities, and other categories of public and private uses of the land. In addition, the land use element is required to include standards of population density and building intensity recommended for the territory covered by the plan, and to identify areas subject to flooding and areas zoned for timberland production (TPZ lands).

Each required issue is addressed in this element, to the extent that it is relevant in this context. Otherwise it is discussed in other elements as follows:

- Distribution of housing, business, and industry. (See the Housing and Land Use Sections of the MEA.)
- Distribution of open space, including agricultural lands. (See the Land Use Section of the MEA.)
- Distribution of mineral resources and provisions for their continued availability. (See the Mineral Resources Section of the MEA, and the Conservation/Open Space Element, "Mineral Resource Policies.")

MONO COUNTY GENERAL PLAN

- Distribution of recreational facilities and opportunities. (See the Outdoor Recreation Section of the MEA, and the Conservation/Open Space Element, "Outdoor Recreation Policies.")
- Location of education facilities. (See the Community Services and Facilities Section of the MEA.)
- Location of public buildings and grounds. (See the Community Services and Facilities Section of the MEA.)
- Location of future solid and liquid waste facilities. (See the Community Services and Facilities Section of the MEA, and the Mono County Integrated Solid Waste Management Plan.)
- Identification of areas subject to flooding. (See the Flood Hazards Section of the MEA, and the Safety Element, "Flood Hazard Policies.")
- Identification of existing Timberland Production Zone (TPZ) lands. (Currently, there is no TPZ land designated in Mono County.)

AREA PLANS

In addition to the countywide Land Use Element, land use in community areas is governed by Area Plans. Area Plans possess the same regulatory authority as the countywide land use policies, serving to further refine those policies to address the needs of a particular community or area. An Area Plan must be internally consistent with the county General Plan, but need not address all the general plan issues required by Government Code Section 65302, as long as the county General Plan satisfies those requirements.

Area Plans have been adopted for every major population center in the county with the exception of Paradise. Those policies are included in this land use element, and are considered when reviewing development proposals in those areas. General environmental information for the Area Plans is contained in the county's Master Environmental Assessment (MEA).

SPECIFIC PLANS

Specific Plans are intended to function as implementation mechanisms for the General Plan and as a standard-setting mechanism for detailed land use designation, subdivisions, and use permits. A specific plan must be consistent with the General Plan and, once adopted, becomes a part of the General Plan. Mono County currently has a number of adopted Specific Plans: the Conway Ranch development in Mono Basin, Lakeridge Ranch in Crowley Lake/Hilton Creek, Arcularius Ranch in the Upper Owens Area, and the Tioga Lodge in Lee Vining. The land use policies for some of these documents are summarized in this element.

AIRPORT LAND USE PLANS

Land use in the area adjacent to public airports is governed by Airport Land Use Plans (ALUPs). An Airport Land Use Plan was adopted in 1986 by the Airport Land Use Commission for the Mammoth Lakes Airport (renamed Mammoth Yosemite Airport). As part of the current General Plan update, Airport Land Use Plans have been developed for the Lee Vining and Bridgeport (Bryant Field) airports. Land use policies for each of the airports are included in this element.

II. ISSUES/OPPORTUNITIES/CONSTRAINTS

This section identifies and analyzes issues, opportunities and constraints which affect the future development potential of the county's unincorporated areas. This section also summarizes the issues, opportunities, and constraints pertaining to land use in each of the Area Plan areas, and for the Bridgeport and Lee Vining Airport Land Use Plans (ALUPs). Many of the environmental constraints governing development are addressed in the Conservation/Open Space Element; this section of the Land Use Element summarizes those concerns in light of their relevance to the development of land use policies. Issues pertaining to the Conway Ranch Specific Plan and the Mammoth Lakes Airport Land Use Plan are discussed in detail in those documents.

COUNTYWIDE ISSUES/OPPORTUNITIES/CONSTRAINTS

1. Certain areas of the county are experiencing increasing development pressures; Antelope Valley from the Gardnerville/Carson City area, Chalfant from the Bishop area, and the Long Valley communities from the Mammoth area. Although the countywide growth rate over the next 20 years will probably be close to that projected by the State Department of Finance (1.3% annual average during the 1980s and 1990s), and the unincorporated area will probably continue to house approximately 50% of the total county population, the population distribution in the unincorporated areas may shift over that timeframe from the population distribution recorded in 1980.
2. Many county residents do not work in the community in which they live. Residents in the Antelope Valley commute to work in Bridgeport and in Gardnerville, Minden, and Carson City in Nevada; residents of the Tri-Valley area commute to work in Bishop; and residents of Long Valley, June Lake, and Benton commute to work in Mammoth Lakes. Bridgeport is the only unincorporated community with a large portion of its residents working in the community. The separation between jobs and housing may continue in the future due to the nature of the county's economy and the limited potential for future economic expansion in many areas of the county.
3. The present trend toward separation of jobs and housing could be affected in the future by the development of additional ski areas or other large scale development, such as mining. For example, the development of additional alpine ski areas beyond the planned buildout of Mammoth Mountain, June Mountain, and the development of Sherwin Bowl would require associated urban development to support the ski area development. The maximum population at one time resulting from buildout of all existing and proposed ski areas or similar large-scale development projects could be accommodated, theoretically, by developing Long Valley, Swall Meadows, the Tri-Valley area, and the Mono Basin area to their current projected buildout capacities. However, accommodating a large ski area population in those areas is probably not feasible; it would increase traffic and associated impacts substantially, and the economic viability of new ski areas would depend on developing support facilities closer to the ski areas. Similar impacts to local infrastructure and to the environment would

result from other large scale development. Such impacts would be analyzed in detail during the environmental review process for a proposed project.

The expansion of existing communities or the development of new communities is currently limited by land ownership; acquiring the land necessary for development would require working with the Forest Service or BLM to designate lands for a land trade or purchase and could be a costly and time-consuming process. Acquiring land from LADWP is limited by the City of Los Angeles' charter which prohibits the selling of water rights on their land. In effect, this means that any land released by LADWP for community development must be served by an existing community water system.

4. Land use within the unincorporated area of Mono County is highly constrained by land ownership. Approximately 94% of the land in the county is publicly owned; 88% is federally owned; and the remainder is owned by the state of California, the Los Angeles Department of Water and Power, or Native American tribal groups. The majority of private land within the county is concentrated in community areas, with the remainder dispersed throughout the county in small parcels. Within existing community boundaries, some communities have limited land available for additional development; expansion of some communities beyond existing boundaries is limited by the public ownership of surrounding lands. Development of new communities throughout the county is limited by the lack of large concentrations of private lands outside of existing communities; those parcels of private land that are large enough for development are in many cases agricultural lands and are not available for development.
5. Mono LAFCO policies discourage the designation of land for urban expansion before there is a demonstrated need for such expansion; these policies also promote the expansion of existing communities instead of the development of new communities.
6. Land use planning in the county is fragmented due to the pattern of land ownership. The federal land management agencies have planning authority on federal lands; the Town has planning authority for the incorporated area; and state agencies have planning authority on state lands. The County has only limited environmental authority on the federally owned lands managed by the Forest Service and the BLM; i.e., for minerals development, the County is the lead agency for compliance with the requirements of SMARA (Surface Mining and Reclamation Act). The County has planning authority on LADWP lands and any development on those lands must comply with CEQA and the County's environmental review process. Development on LADWP lands is a key issue since much of the land that LADWP owns is environmentally sensitive; e.g., wetlands and critical wildlife habitat.
7. Land use patterns in the county are influenced by land ownership and topography. Residential and commercial uses are generally concentrated in small communities located in the valleys; the valley floors are generally used for grazing and croplands; mining, grazing, and timber harvesting generally occur in the mountains; and recreational uses are dispersed throughout the county. Existing land use patterns countywide could be affected by Forest Service and

BLM policies on land exchanges, by future proposals for land banking or land conservation, by potential new town developments, and by LAFCO and General Plan policies concerning agricultural preservation and community expansion.

Existing land use patterns could be changed by "new town" developments located outside of existing communities. A few parcels of private land throughout the county are large enough to be developed in this manner, although infrastructure and service costs could be prohibitively high in some areas. In addition, many of the large parcels of privately owned land in the county are used for agriculture.

Additional issues that could affect land use patterns within and adjacent to community areas include the potential for redevelopment, the potential for mixed use development, existing land division patterns, and the existing land use designation.

8. The availability and cost of infrastructure (water, sewer, fire protection, and roads) influences development patterns throughout the county. Most of the land available for residential development requires septic systems and individual wells. Some areas of the county have small community water systems but still require individual septic systems; other areas have community sewer systems but require individual wells. Only three unincorporated communities, Bridgeport, Lee Vining, and June Lake, have both community water and sewer systems serving individual parcels. These parcels are typically ready for immediate development without additional infrastructure costs. Infrastructure costs for sewer and water systems in some areas of the county, such as the Long Valley communities, are currently rising as wells are running dry and deeper replacement wells are being drilled at considerable expense.

Water quality requirements are affecting both community water and sewer systems and individual homeowners. Recent changes in the Lahontan Regional Water Quality Control Board's water quality regulations have set a maximum of two dwelling units per acre in areas which have community water systems but which require individual septic systems. As a result, the minimum lot size in such situations is slightly over 20,000 square feet. The minimum lot size when both individual septic and water systems are required is 40,000 square feet. In some areas in the county where individual lots are 7,500 square feet, these requirements make it necessary to have more than one lot to build a house.

The lack of improved roads throughout the county also affects the potential for development. The main thoroughfares in the county are US 395, US 6, and State Routes 120, 158, 167, 108, and 89. Each of the community areas has a road system; some of these roads are improved, some are not. Some roads in community areas are included in the county road system; some are not. Those that are not are often unimproved. Outside community areas, numerous single-lane and two-lane dirt and gravel roads exist as a result of mining and logging activity. Many of these roads are used by off-road vehicles.

9. There is a countywide need for additional land designated for industrial uses, particularly for those industrial uses that are land intensive, visually

obtrusive/offensive, and potentially noisy or dirty; e.g., wood lots, lumber yards and other materials storage areas, batch plants, areas for heavy equipment storage, etc. Most of these uses will be localized and concentrated in a specific area; the county lacks feasible sites for extensive heavy industrial development due to environmental constraints and distance from population centers and supplies.

There is also a need to designate a site for a household hazardous waste transfer facility in the Mammoth vicinity. Such a facility would require about 1/4-acre of land, and should be close enough to town for easy use by residents, have convenient access for transfer trucks, and be a safe area for storage of hazardous materials.

10. The county's Regional Planning Advisory Committees and community planning groups have generally expressed a desire to maintain the rural recreational attributes of the county, to preserve the small town character of existing communities, and to protect the county's natural resources. The overall attitude is that growth should be contained in and adjacent to existing communities, that agricultural lands should be protected for their open space value, that the protection of scenic resources is a critical concern, and that the use and development of resources should be regulated in a manner that allows for development but that protects the resource.
11. The presence of significant environmental concerns will have a critical effect on future development and land use in the county. Environmental concerns focus on natural resources, cultural resources and natural hazards. A key issue affecting development in the county is the conservation of a variety of natural resources, including wetlands, special status species (both plants and animals) and special habitats, wildlife habitat (in some places critical), fisheries and aquatic habitats, visual quality, surface and groundwater resources, cultural resources, and mineral resources. The presence of significant natural hazards also affects development. Natural hazards in the county include fault zones, flood zones, volcanic hazard areas, steep slopes, fire hazard areas, debris flow areas, and avalanche-prone areas. Information on the county's environmental resources and natural hazards is contained in the **MEA**, along with maps showing the location of those resources and hazards.
12. Economic concerns focus on the need for development projects to "pay their own way" and on the need to provide for local economic growth. Most of the services and infrastructure in the county are provided either by the County or local Special Districts. All of these agencies have been hard hit by lower property tax revenues and increasing service demands. The County must ensure that development does not adversely impact service agencies.

There is also a need to provide for local economic growth by creating jobs for local residents. Many of the county's residents are unable to work in the community in which they reside and many of the area's younger residents must leave the area in order to find work. Lack of year-round employment in the tourist and recreation industry – the dominant industry in the county – is the primary cause of employment instability. How to plan for and encourage a

diversified economic base in order to provide stability in the job market is a concern, as is the need to maintain a balance between economic growth and environmental concerns.

ISSUES/OPPORTUNITIES/CONSTRAINTS FOR COMMUNITY AREAS

This section lists issues and constraints which apply to specific planning areas throughout the county. These issues are in addition to the general countywide issues, opportunities, and constraints discussed above.

ANTELOPE VALLEY

1. There is a significant amount of privately owned high-quality agricultural land in the Antelope Valley. There is a desire to maintain this land in agricultural uses in order to preserve the area's scenic qualities. Increasing development pressures could affect the use of the agricultural land in the Valley.
2. Residents in the Antelope Valley are interested in preserving the existing rural character of the communities and the Valley as a whole.
3. The BLM, in its Resource Management Plan, has identified privately owned land in the Valley for potential acquisition and has identified a smaller amount of federal land for disposal into private ownership. Residents of the area are concerned about a potential loss of private land and would like to implement a policy of no net loss of private land in the Valley.
4. There is the potential to enhance the natural resource-based recreational opportunities in the area, particularly by developing additional recreational facilities and opportunities at Topaz Lake. In planning for additional recreation at Topaz Lake, there is a need to designate a boat launching area to provide boat access within California and to designate restricted boating areas to protect critical water bird nesting and rearing habitat. The Walker River Irrigation District is currently working cooperatively with other agencies to develop a recreation management plan for Topaz Lake.
5. Much of the Valley is in the floodplain of the Walker River and may also contain wetlands.
6. Sewage disposal may become a constraint to additional development in existing community areas. Currently, individual septic systems are in use throughout the Valley.
7. There is substantial local interest in protecting the surface and groundwater resource in the Valley.
8. Seismic hazards are situated in several areas of the Valley, including along the western portion of the US 395 corridor.

9. There is a need to preserve critical deer migration corridors and winter habitat, particularly along the western portion of the US 395 corridor.

SONORA PASS

The primary issue within the Sonora Junction Planning Area is the continued successful integration of private property use with activities such as recreation and military operations associated with the USMC Mountain Warfare Training Center. There is an opportunity to develop policies that ensure there will be minimal or no impact from military training or operations that occur near private land, and if impacts were to occur, to provide for their disclosure.

SWAUGER CREEK

1. The central concern in the Swauger Creek area is regulating development, including residential land uses, in order to preserve the natural resources in the area. Residents in the area are also interested in preserving and enhancing wildland recreational and research values in the surrounding area.

The open space environment of the area should be recognized as a valid natural resource, and its enjoyment a form of recreation in the true sense of the word. The landowners of the area recognize that this natural environment, its peace, quiet, low density, and natural surroundings are some of the values that brought them to this area, and that the preservation of viewsheds in general, and of certain specific visual groups in particular, is an important component of a land use plan for the area. The landowners feel themselves to be the trustees of the resource values of the area, and as such, to be responsible to future generations for the quality of their stewardship.

BRIDGEPORT VALLEY

1. There is a significant amount of high-quality agricultural land in the Bridgeport Valley, all of which is privately owned. There is a desire to maintain this land in agricultural uses in order to preserve the scenic qualities of the land. Much of the agricultural land may include wetlands; a wetlands delineation study has been completed for portions of the Valley. There is a need to address potential impacts to surface waters from grazing and irrigation and associated impacts to fisheries and wildlife.
2. There is local interest in preserving the small town character of Bridgeport.
3. There is an opportunity to enhance the recreational opportunities available at Bridgeport Reservoir and to protect the wetlands and associated natural resources in the surrounding area. When considering recreational opportunities at the Reservoir, there is a need to designate restricted boating areas to protect critical water bird nesting and rearing areas.
4. There is an interest in protecting the groundwater resource in the Valley.
5. There is a need to expand PUD services to accommodate the local and recreational demands of the surrounding area (particularly sewage disposal).

MONO COUNTY GENERAL PLAN

6. There is an interest in maintaining desirable water conditions in Bridgeport Reservoir, the East Walker River and its tributaries (e.g., reservoir level, in-stream flow and water quality).

MONO BASIN

1. The extremely limited private land base throughout Mono Basin and especially in Lee Vining limits potential community expansion in the area. In Lee Vining, there is some potential for land exchanges or purchases either with the USFS or the LADWP.
2. Residents of Lee Vining would like to see some affordable housing developed in the area, either rental units or single-family units.
3. Residents of Mono City are concerned about the expansion of their community beyond the current limits of the subdivision. They are concerned about possible impacts to visual quality and to the deer herd in the area. The impacts from increased traffic levels are also a concern.
4. Both in Lee Vining and Mono City there are some concerns about the water supply systems. The Mono City system has enough to supply the lots in the existing subdivision but not to supply additional development beyond that level. The Lee Vining Public Utility District (PUD) is currently in the process of improving its supply in order to serve additional development and to meet new water quality standards established by the state.

JUNE LAKE

1. Issues for the June Lake Area are discussed in the **June Lake 2010: June Lake Area Plan**.

MAMMOTH VICINITY

1. Preservation of visual resources, especially in the US 395 viewshed, is a key concern. US 395 from the Benton Crossing Road to the intersection with SR 203 is a state-designated scenic highway. The visual corridor along US 395 has been identified in both the county General Plan and the Inyo National Forest Land and Resource Management Plan as an important viewshed for the traveling public.
2. The Town has a current need for additional land designated for land intensive industrial uses and for affordable housing. Industrial uses such as wood lots, lumber yards and other materials storage areas, areas for heavy equipment storage, etc. typically do not require large structures, may be visually obtrusive/offensive, and may be potentially noisy or dirty. There is an opportunity for the Town and the County to work together on regional affordable housing needs. The Town and County are also considering an appropriate site for a household hazardous waste transfer facility in the area.

3. The Town of Mammoth Lakes currently has an insufficient water supply to support the level of growth established in the Town's General Plan. Future activities to obtain additional water supplies from areas outside of the Town's boundaries may impact resources and values on those lands.
4. There is very little privately owned land in the Mammoth Vicinity Plan area. Significant parcels of private land occur along Hot Creek and in the valley west of Crowley Lake. The LADWP owns large parcels of land in the Casa Diablo/Hot Creek area, at the Whitmore recreational area, and adjacent to Crowley Lake. The LADWP has no formal planning documents for those lands.
5. The Mammoth Lakes Airport Land Use Plan (ALUP) establishes a comprehensive land use plan which defines the type and pattern of future development on private and public lands in the Airport Land Use Planning Area. The plan was prepared jointly by the Airport Land Use Commission and the Inyo National Forest, and is more specific than either the county General Plan or the Inyo National Forest Land and Resource Management Plan.
6. The Mono Local Agency Formation Commission (LAFCO) has adopted a sphere of influence for the Town which is coterminous with the existing Town boundaries. Two conditional sphere areas were also designated which may be activated if and when certain conditions are met. These conditional sphere areas consist of an area adjacent to the northeast portion of the Town where future recreational development is planned, and an area of less than 300 acres situated at the Mammoth Yosemite Airport. The County has transferred ownership of the airport to the Town. The conditional sphere areas contain sensitive wildlife resources (i.e., mule deer and sage grouse habitat).

UPPER OWENS

1. All landowners agree that agricultural uses, including aquaculture, should be continued. There appears to be support for continuing current grazing management practices; some landowners are fencing riparian areas, those who are not have observed no problems caused by grazing. Some landowners question the long-term viability of grazing the area due to the high market value of privately owned land, coupled with the low cash flow generated by agriculture; the value of the area for domestic water purposes may also constrain future grazing. Other landowners believe agriculture can be viable well into the future. There appears to be a consensus among the private landowners that agricultural uses are compatible with the recreational use of the area.
2. Some landowners believe that the unique recreational value of the Upper Owens is more valuable than the potential recreational value that could be created by ski area expansion between Mammoth and June. These unique environmental and recreational attributes of the area need to be recognized and considered when reviewing development projects that could impact the area. Some landowners believe that there is a growing need for winter access to the area. The majority of the landowners believe the area should focus on resort rather than community development. Resort development shall be of the type that attracts people for a limited time, not the type that promotes year-round occupancy. Some landowners

MONO COUNTY GENERAL PLAN

believe that the historical land uses of agriculture, recreational fishing and aquaculture should take precedence over any new land use. There appears to be less use of the river by some landowners for fishing purposes.

3. There is a growing need for winter security. Vandalism occurs in the winter and at times during hunting season. If urbanization occurs, the demand for urban services will increase, and urban/rural conflicts will result. There is currently no plowed winter access to the area, and no phone or electrical service to some of the properties. The area also lacks structural fire protection and other similar services.
4. There is considerable concern that fluctuating flows from the Mono Basin will impact the Upper Owens fishery and riparian areas, and that decreased flows have inhibited fish from traveling upstream from Crowley Lake. Upper Owens landowners believe that it is imperative that consistent flows be maintained from East Portal to Crowley. There is some concern that resort visitors may impact the water resource.
5. There is a considerable concern that water transfer projects from the Upper Owens and/or its watershed will negatively impact the area. There is concern about development of a fish hatchery at Big Springs; the Board of Supervisors has formally opposed such a proposal. There is also concern about the direct and indirect impacts that future ski area development may have on the area.
6. The Upper Owens area provides sensitive habitat for mule deer, bald and golden eagles, and numerous other wildlife species.

LONG VALLEY

1. There is a desire to develop a self-sufficient community in the Long Valley area and to avoid being perceived solely as a "bedroom" community for Mammoth.
2. There is a need to provide services and commercial uses for residents. Existing services, such as water supply and fire protection, need to be upgraded in order to provide for additional development. Crowley Lake/Hilton Creek may need a community water system sometime in the future. There is an opportunity to consolidate existing service entities, such as several mutual water systems, the Birchim Community Services District, and the Hilton Creek Community Services District, in order to provide more cost-effective and efficient services. Long Valley residents are also interested in revitalizing community-oriented commercial uses in Crowley Lake/Hilton Creek, such as a small cafe, and in providing some professional offices, such as a medical/dental office and a lawyer's office.
3. In order to support the additional services and commercial uses desired by residents, there is local interest in providing some additional employment in the area, potentially including some light manufacturing.
4. There is a desire to provide additional recreational development at Crowley Lake and throughout the area. There is a need, when considering additional recreational development at Crowley Lake, to designate restricted boating areas to protect critical water bird nesting and rearing habitat. Within the communities, particularly Crowley Lake/Hilton Creek, there is a desire to develop additional neighborhood parks and a trail system connecting the parks and the communities.

5. The Long Valley area includes important wildlife habitat; i.e., mule deer migration corridors.

WHEELER CREST

1. The main concern in the Wheeler Crest area is preserving the aesthetic beauty and tranquility of the area while still allowing for development of the many privately owned parcels in the area. The focus of development is to be single-family residential development.
2. The Wheeler Crest area contains vital deer wintering and migration habitat.
3. There is a need to minimize the effects of additional single-family and Accessory Dwelling Unit development on deer and wildlife corridors while facilitating the maintenance of a structure's defensible space for wildland fire protection purposes.

TRI-VALLEY (BENTON/HAMMIL/CHALFANT)

1. The proliferation of residential development in the Tri-Valley is inherently incompatible near agricultural areas and may compromise ongoing agricultural operations.
2. There is a desire to maintain and enhance agricultural uses in the Tri-Valley.
3. The Tri-Valley area is experiencing increasing pressure for residential development. Residents in the Tri-Valley are concerned about that pressure and would like to retain the current rural-residential character of the area.
4. Parts of the Tri-Valley area are subject to flooding.
5. Winter closure of SR 120 hinders access and safety to and from the Tri-Valley area.
6. Limited turnout lanes in community areas along US 6 and the need for passing lanes create safety issues in the Tri-Valley area.
7. There is a need to make US 6 in Mono County a daytime headlights-on area.
8. Limited public transportation in the Tri-Valley makes it difficult for residents to access County services.
9. Future growth could compromise water quality along with water quantity; local residents are currently reporting a continued lowering of the water table.
10. Mono County emergency services are limited and far away from the remote location of the Tri-Valley.
11. Children are transported out of the county to attend middle and high school; local schools are needed.

MONO COUNTY GENERAL PLAN

12. Access to public lands that surround the Tri-Valley is a critical component of the rural sense of community.
13. There is a desire to continue to promote the intersection of US 6 and SR 120 as the community's commercial core and service center.

BENTON HOT SPRINGS VALLEY

1. Benton Hot Springs Valley, located on SR 120 west of Benton, includes the town of Benton Hot Springs. The majority of land in the valley, including the entire townsite, is owned by one landowner. Benton Hot Springs is the oldest town in Mono County and contains several historic structures that the landowner wishes to preserve and protect.
2. The valley itself is used for agricultural purposes, primarily livestock grazing. The landowner wishes to retain this use in order to preserve the open space and scenic values of the land. In addition, several ponds and springs in the area provide habitat for a variety of wildlife, particularly migratory waterfowl. The landowner wishes to improve habitat for wildlife.
3. The majority of land in the valley, including the townsite, is within the 100-year floodplain and is subject to periodic flooding.

OASIS

1. Oasis, located in the extreme southeastern corner of the county, includes privately owned lands that are used for agriculture, primarily alfalfa production. This area is isolated from the rest of the county by the White Mountains. Access is on SR 168, which runs north through Westgard Pass from Big Pine in Inyo County to connect with SR 266, which connects to routes in Nevada.

BRIDGEPORT & LEE VINING AIRPORT LAND USE PLANNING AREAS

The following briefly summarizes the major issues, opportunities and constraints concerning land use and airport operations in the Lee Vining and Bridgeport airport planning areas.

1. Airport operations inherently present certain risks to the general welfare of the public and residents within the airport vicinity, particularly within the area called the airport Safety Zone. The Safety Zone consists of:
 - a. The primary surface, runway and clear zones (see Figure 1: Airport Clear Zone);
 - b. The area underlying the runway approach and transitional surfaces (see Figure 2: Civil Airport Imaginary Surfaces); and
 - c. The area within the primary traffic pattern (see Figures 3 & 4: Primary Traffic Patterns).

2. Since aircraft align with the approach/departure surface, transitional surface and clear zone when landing or taking off on runways, these areas carry the highest volume of air traffic. Aircraft change power settings to take off or land in this area, so they have a tendency to have more problems within these zones. The convergence of aircraft landing and taking off within these narrow areas also intensifies the noise levels in these zones.
3. The clear zone, which is located immediately at the end of the runway, is particularly subject to these safety and noise factors. The limits of the clear zone are shown schematically on Figure 1. The clear zone is the most critical zone in which aircraft operations might affect the safety of people and property in the airport environs.
4. The impact of aircraft noise associated with airport operations is an obvious factor in determining land use compatibility within the planning area. A noise impact analysis has been prepared for the Bryant Field Airport Master Plan, and noise readings have been taken for the Lee Vining Airport. Noise activity directly related to Bryant Field and Lee Vining airports does not extend much beyond the area of the airport property (see Figures 5 & 6). Consistent with the Mammoth/June Lake Airport Land Use Plan, this plan assumes that 55 dB CNEL is the maximum acceptable noise exposure level for residential uses, without soundproofing.

At Bryant Field Airport, the 55 dB CNEL contour projects partially into the residential area to the east of the airport. The airport noise impact to this area is infrequent and intermittent, and therefore not significant; this same area experiences greater and more frequent noise impacts from the adjacent highway traffic on SR 182. A drastic increase in airport activity could cause the impact to become significant in the future. No residential development or other sensitive noise receptors presently exist or are planned adjacent to the Lee Vining Airport.

5. Due to the inherent risks presented by airport activities, some land uses need to be restricted in certain airport zones. Neither Bryant Field nor the Lee Vining airport is situated in a manner that significantly conflicts with existing land use. Several structures are located within the clear zone of Bryant Field, and a number of residential structures are located in the Bryant Field approach surface. The County has actively pursued acquisition of buildings/property in the clear zone.
6. The prevalence of USFS and City of Los Angeles land ownership in the vicinity of the Lee Vining Airport limits potential future land use conflicts in the Lee Vining Airport planning area.
7. The location of Bryant Field within an area surrounded by agricultural lands, the Bridgeport Reservoir and wetlands limit the development potential and associated conflicts with airport operations. With the exception of several existing structures, the developed portions of Bridgeport are not within the airport's clear zone, although a number of structures are located at the end of the approach/departure surface.

III. POLICIES

INTRODUCTION

This section presents policies which apply to private lands in the unincorporated area of the county. It first presents policies that apply to all private land in the unincorporated area. It then presents policies for each of the community areas in the county; i.e., Antelope Valley, Swauger Creek/Devil's Gate, Bridgeport Valley, Bodie Hills area, Mono Basin (Mono City and Lee Vining), June Lake, the Upper Owens area, the Mammoth Vicinity, Long Valley, Wheeler Crest, Tri-Valley, the Benton Hot Springs area and Oasis. Policies for Antelope Valley, Swauger Creek/Devil's Gate, Bridgeport Valley, Mono Basin, the Upper Owens area, the Benton Hot Springs area and Oasis were developed by the local Regional Planning Advisory Committees or community planning groups. Policies for the remaining community areas are summaries of policies from the appropriate Area Plan. Some of the Land Use Policies in this section summarize policies contained in other elements of the county General Plan. Implementation measures for those policies are found in the referenced General Plan Element.

This section also contains the land use policies from the Conway Ranch Specific Plan and from the Airport Land Use Plans for the Mammoth Yosemite Airport, the Lee Vining Airport, and the Bridgeport Airport (Bryant Field).

NOTE: Land use policies in this Element should be reviewed in conjunction with the following policies and regulations: policies in other General Plan Elements (i.e., Housing, Conservation/Open Space, Noise, Safety, Circulation, and Hazardous Waste Management); applicable sections of the Mono County Code (e.g., Land Use Regulations, Noise Ordinance, Grading Ordinance, Subdivision Ordinance); applicable state policies and regulations (e.g., Lahontan Regional Water Quality Control Board Basin Plan, Great Basin Unified Air Pollution Control District Air Quality Plan, Caltrans planning documents, etc.); and applicable federal policies and regulations (e.g., Clean Water Act, TEA 21, USFS planning documents, Bureau of Land Management planning documents, etc.).

It should also be noted that County "... development policies and standards shall be viewed as minimum requirements; development should strive to exceed those minimums whenever reasonably feasible. County staff may require project modifications as necessary to implement this policy" (Mono County Land Use Element, Policy 10).

COUNTYWIDE LAND USE POLICIES

GOAL: Maintain and enhance the environmental and economic integrity of Mono County while providing for the land use needs of residents and visitors.

Objective A

Accommodate future growth in a manner that preserves and protects the area's scenic, agricultural, natural, cultural and recreational resources and that is consistent with the capacities of public facilities and services.

Policy 1: Contain growth in and adjacent to existing community areas.

Action 1.1: Encourage infill development in existing communities and subdivisions. New residential subdivision should occur within or immediately adjacent to existing community areas. New residential development outside existing community areas and subdivisions should be limited to an overall density of one unit per 40 acres, plus an Accessory Dwelling Unit.

Action 1.2: New residential development for permanent year-round residents should be concentrated in existing community areas.

Action 1.3: Provide sufficient land to accommodate the expansion of community areas, including sites for affordable housing.

Action 1.4: Support the exchange of public lands into private ownership for community expansion purposes if consistent with General Plan policies.

Action 1.5: Future development projects with the potential to induce substantial growth or concentration of population, or to substantially alter the use and density on a parcel or parcels, shall assess potential impacts prior to project approval. The analysis shall:

- a. be funded by the applicant;
- b. be prepared by a qualified person under the direction of Mono County;
- c. describe the existing conditions in the general project vicinity;
- d. describe the growth-inducing impacts of the proposed development, including impacts on services, infrastructure, and traffic; and
- e. recommend project alternatives or measures to avoid or mitigate the identified impacts to a level of non-significance.

Mitigation measures shall be included in the project plans and specifications and shall be made a condition of approval for the project. Projects having significant growth inducing impacts, or which substantially alter the use and density on a parcel, may only be approved if a statement of overriding considerations is made through the EIR process.

Action 1.6: Evaluate proposed amendments to the Land Use Maps based on the land use designation criteria listed in the Land Use Designation section of this element.

Policy 2: Assure that adequate public services and infrastructure are available to serve planned development.

Action 2.1: Require that necessary services and facilities, including utility lines, are available or will be provided as a condition of approval for proposed projects.

Action 2.2: Require that new development projects adjacent to existing communities be annexed into existing service districts, where feasible.

Action 2.3: Through permit conditions and mitigation measures, require development projects to fund the public services and infrastructure costs of the development. In accordance with state law (Government Code § 53077), such exactions shall not exceed the benefits derived from the project.

Policy 3: Designate most lands outside of existing community areas for low intensity uses (e.g., open space, agricultural, resource management). Higher intensity uses (e.g., industrial, resource extraction, large-scale resort development) may be permitted outside of existing community areas if it can be demonstrated that the use cannot be accommodated in existing community areas, that the use is incompatible with existing community uses, or that the use directly relies on the availability of unique on-site resources. Higher intensity uses shall not adversely impact the area's scenic, recreational, cultural and natural resources.

Action 3.1: Proposals for higher intensity uses outside of community areas, including mining operations, shall be addressed through the Specific Plan or PUD process. Such development may be allowed through a Specific Plan or PUD provided that at a minimum, the following findings can be made:

- a. Permanent open space preservation is provided;
- b. The development would not adversely affect existing or potential farming, ranching, or recreational operations;
- c. Development is clustered, concentrated or located to avoid adverse impacts to cultural resources;
- d. Development is clustered, concentrated or located to maintain the visual quality of the area;
- e. Adequate public services and infrastructure for the proposed development are available or will be made available;

- f. The development protects and is compatible with the surrounding natural environment and rural character of the area;
- g. Housing is limited to that necessary to maintain the development; and
- h. The development avoids or mitigates potential significant environmental impacts as required by Mono County General Plan policies and the California Environmental Quality Act (CEQA).

Action 3.2: Development applications for higher intensity uses outside of community areas shall include an assessment of the potential significant environmental impacts as required by General Plan policies.

Action 3.3: Proposals for development on federal lands shall address 1) impacts to nearby communities, including impacts to services and infrastructure, and 2) potential environmental impacts of the project and measures to avoid or mitigate the impact.

Policy 4: Avoid the juxtaposition of incompatible land uses.

Action 4.1: The compatibility of adjacent uses (e.g., noise, traffic, type of development) shall be a major factor in determining land use designations for private property.

Action 4.2: Proposed projects that may include potentially incompatible land uses, or that may be incompatible with surrounding land uses, shall provide project alternatives or mitigation measures to reduce the potential impacts to a level of non-significance.

Action 4.3: Utilize the Specific Plan or Area Plan process, where appropriate, for large projects that may include potentially incompatible land uses, or that may be incompatible with surrounding land uses.

Policy 5: Regulate future development in a manner that minimizes visual impacts to the natural environment, to community areas, and to cultural resources and recreational areas.

Action 5.1: Implement the Visual Resource policies in the Conservation/Open Space Element.

Policy 6: Develop standards and siting criteria for the placement of group homes, juvenile facilities, schools and similar facilities.

Action 6.1: A use permit is required for group homes, juvenile facilities, schools and similar facilities. The fiscal and socioeconomic impacts of the project and proposed mitigation measures or project alternatives to address the impacts shall be addressed in the use permit.

Policy 7: Maintain or enhance the integrity of critical wildlife habitat in the county by limiting development in those areas and requiring mitigation in conformance to CEQA and this General Plan. Examples of critical wildlife habitat include, but are not limited to: key winter ranges, holding areas, migration routes, and fawning areas for mule deer; habitat for other big game species; leks, and winter and summer range for sage grouse; fisheries and associated habitat; and riparian and wetland habitat.

Action 7.1: Implement policies contained in the Conservation/Open Space Element and appropriate Area Plans.

Policy 8: Regulate resource extraction in a manner that maintains environmental quality.

Action 8.1: Consider applications for mining exploration and geothermal exploration activities only in areas designated for Resource Management, Open Space, or Agriculture.

Action 8.2: Mining operations, geothermal operations, small-scale hydroelectric generation facilities, wind and solar energy generation facilities and similar resource extraction activities may be permitted only in areas designated Resource Extraction. Saleable minerals operations (e.g., aggregate mining) may also be permitted in areas designated Agriculture.

Action 8.3: In areas where the existing General Plan land use designation is inconsistent with Action 8.2 above, applications for mining operations, geothermal operations, small-scale hydroelectric generation facilities, wind and solar energy generation facilities, or similar resource extraction activities may require a General Plan Amendment.

Action 8.4: Regulate mineral extraction activities in a manner consistent with the Mineral Resource Policies of the Conservation/Open Space Element.

Action 8.5: Regulate geothermal development and other energy development projects in a manner consistent with the Energy Resources Policies in the Conservation/Open Space Element.

Action 8.6: Existing mining operations, geothermal operations, and other existing resource extraction operations shall be designated Resource Extraction. Existing saleable materials operations (e.g., aggregate mining) in agricultural areas shall be designated Resource Extraction. Once these sites have been exhausted and reclaimed, the land use designation shall be revised to reflect the planned future land use.

Action 8.7: Regulate timber production activities on private lands in a manner consistent with policies in the Conservation/Open Space Element.

Policy 9: Development activity in the Bodie area shall be compatible with the cultural, historic, and natural values of the area.

Action 9.1: Development projects, including mining operations (but not exploration activities), in the Bodie area shall require a Specific Plan or Area Plan. The Specific Plan or Area Plan should focus on ensuring that the development project complies with Policy 9 above. The Specific Plan or Area Plan for a mining operation shall also specify post-mining land uses and requirements for those land uses.

Action 9.2: Designate the Bodie area with the Specific Plan/Area Plan designation in this Land Use Element. Until the Specific Plan or Area Plan is adopted, the area shall be administered in accordance with the directives of the Resource Management land use designation.

Policy 10: In order to protect the area's exceptional natural resources, cultural resources, recreational values and quality of life, and to ensure that future development is of the highest quality, development policies and standards shall be viewed as minimum requirements; development should strive to exceed those minimums whenever reasonably feasible. County staff may require project modifications as necessary to implement this policy.

Action 10.1: During preapplication and application processing, County staff and, when applicable, staff from applicable federal, state, and local agencies, shall work with applicants for specific plans, general plan and land use redesignations, tract and parcel maps, use permits, variances, director review permits, mergers, lot line adjustments, reclamation plans, building permits, grading permits and other applicable permits to ensure that the proposed development is of the highest quality and is consistent with or, when reasonably feasible, exceeds General Plan policies and implementing standards.

Policy 11: Coordinate planning efforts with applicable federal, state, and local agencies.

Action 11.1: The County shall coordinate its planning activities with the planning activities of other public agencies in Mono County; i.e., applicable Special Districts, resource agencies, and the Town of Mammoth Lakes.

Policy 12: For parcels with different designations on different portions of the parcel, the lower intensity designation shall prevail until a tentative map is approved for the parcel.

Objective B

Provide a balanced and functional mix of land uses.

Policy 1: Designate adequate sites for a variety of land uses in order to provide for the land use needs of community areas.

Action 1.1: Establish Area Plan boundaries and associated policies in this element. Transfer the land use designations of existing Area Plans into the designations used in this element.

Action 1.2: Update the Area Plans for the Antelope Valley, Swauger Creek/Devil's Gate, Bridgeport Valley, Bodie Hills, Mono Basin, June Lake, the Upper Owens area, the Mammoth Vicinity, Long Valley, the Wheeler Crest, the Tri-Valley communities, the Benton Hot Springs Valley, and Oasis on an as-needed basis, with the assistance of applicable Community and Regional Planning Advisory Committees.

Action 1.3: Regulate the subdivision of land within community areas in a manner consistent with applicable area land use goals and policies.

Objective C

Provide for the housing needs of all resident income groups, and of part time residents and visitors.

Policy 1: Designate adequate sites for a variety of residential development in each community area.

Action 1.1: Designate areas for high density residential development only in existing community areas. High density residential development should be located in areas with convenient access to employment, shopping, recreation, and transportation, including public transit.

Action 1.2: Residential development outside of existing community areas should be of a low overall density. Higher density residential development in certain locations may be permitted through clustering and transferring densities.

Policy 2: Provide for affordable housing.

Action 2.1: Encourage the provision of a variety of rental housing in community areas.

Action 2.2: Implement policies in the county Housing Element pertaining to the provision of affordable housing.

Policy 3: Designate a sufficient amount of land for a variety of lodging facilities.

Action 3.1: Designate suitable areas in communities as "Commercial Lodging."

Action 3.2: Designate suitable areas outside of communities as "Rural Resort."

Objective D

Provide for commercial development to serve both residents and visitors.

Policy 1: Concentrate commercial development within existing communities.

Action 1.1: Designate a sufficient amount of commercial land within communities to serve the needs of residents and visitors.

Policy 2: Commercial uses should be developed in a compact manner; commercial core areas should be established/retained in each community area, and revitalized where applicable.

Action 2.1: Orient new commercial development in a manner that promotes pedestrian use. Avoid strip commercial development.

Policy 3: Provide for adequate access and parking in commercial areas, including facilities for pedestrians, non-motorized vehicles, automobiles, public transit vehicles, and service vehicles.

Action 3.1: Implement policies in the Circulation Element pertaining to the provision of facilities for parking, non-motorized transportation, and transit.

Policy 4: Allow for the integration of small-scale commercial uses with associated residential uses, such as employee housing.

Action 4.1: Where appropriate, designate land "Mixed Use" (MU) to allow for a mix of residential and compatible commercial uses.

Objective E

Provide for industrial land uses which are economically beneficial to the area and which are compatible with the environment.

Policy 1: Provide for local industrial land use needs.

Action 1.1: Designate a sufficient amount of land in appropriate community areas to meet local industrial land use needs (e.g., wood lots, equipment storage, etc.). Local industrial land use areas should be outside of residential areas.

Policy 2: Provide for light industrial uses (e.g., light manufacturing, assembly work, etc.) that do not create significant environmental impacts.

Action 2.1: Designate suitable areas for light industrial uses. Criteria used to judge the suitability of a site for industrial uses shall include, but not be limited to, the following:

- a. Adequate access exists for industrial land uses;
- b. Industrial development on the site would be compatible with surrounding land uses (e.g., noise levels, fumes, traffic levels);
- c. Industrial development on the site would not significantly impact existing or potential farming, ranching, or recreational operations;

- d. Adequate public services and infrastructure for industrial development are available or could be provided;
- e. Development on the site could be clustered, concentrated, located, or screened to maintain the visual quality of the area. Screening may be achieved through the use of fences, vegetation, topographical features, berms, etc.; and
- f. Development on the site would avoid potential significant environmental impacts or those impacts could be mitigated as required by Mono County General Plan policies and the California Environmental Quality Act (CEQA).

Objective F

Protect open space and agricultural lands from conversion to and encroachment of developed community uses.

Policy 1: Protect lands currently in agricultural production.

Action 1.1: Designate large parcels in agricultural use as "Agriculture."

Action 1.2: Assign the Agriculture designation to lands designated as Agriculture in this element.

Action 1.3: Implement policies in the Conservation/Open Space Element.

Policy 2: Preserve and protect open space in order to protect natural and cultural resources and to provide for a variety of recreational opportunities.

Action 2.1: Implement policies contained in the Conservation/Open Space Element.

Action 2.2: Designate undeveloped lands owned by out-of-county agencies such as the Los Angeles Department of Water and Power (LADWP), and the Walker River Irrigation District (WRID), or by utility entities such as Sierra Pacific Power Company, and Southern California Edison (SCE) as "Open Space" ("OS") or "Agriculture" ("A") in this element. Exceptions to this policy may include lands adjacent to community areas needed for community uses, or lands outside community areas needed for public purposes.

Action 2.3: Designate California Department of Fish and Game lands as "Open Space."

Action 2.4: Amend the Land Development Regulations (LDR) to include a definition of "site disturbance" and to include standards for site disturbance in various land use designations.

Objective G

Prevent the exposure of people and property to unreasonable risks by limiting development on hazardous lands.

Policy 1: Restrict development in areas which are constrained by natural hazards, including but not limited to, flood, fire, geologic hazards, and avalanche hazards.

Action 1.1: Limit the intensity of development in hazard areas through the assignment of appropriate land use designation.

Action 1.2: Avoid intensive development outside existing fire protection districts, unless an appropriate fire protection entity is established as a condition of project approval.

Action 1.3: Implement the provisions of the Safety Element.

Objective H

Maintain and enhance the local economy.

Policy 1: Land use designations shall provide sufficient land for the economic development of community areas.

Policy 2: Assess the economic costs and benefits of proposed development projects.

Action 2.1: Future development projects with the potential to have significant local socioeconomic impacts shall provide a fiscal impacts analysis. The analysis shall:

- a. be funded by the applicant;
- b. be prepared by a qualified person under the direction of Mono County;
- c. include a market analysis documenting:
 - the demand for such a project over a reasonable timeframe;
 - the projected direct and indirect revenues generated by the project within the general project vicinity, over a reasonable timeframe;
 - the projected direct and indirect costs associated with the service demands generated by the project, its employees, and operations during the anticipated project lifetime;
 - the projected short-term and long-term economic costs and benefits resulting from the project over its life span; and
 - phasing from initial construction to a point following termination of use or closure, if applicable;
- d. analyze applicable significant socioeconomic implications of the project, such as employee housing, jobs generation, impacts on crime rates, impacts on schools, hospitals and other community facilities and services, effects of termination or closure of the

project (where applicable) and changes in the quality of life resulting from the proposed project; and

- e. recommend project alternatives or measures to avoid or mitigate economic impacts.

Mitigation measures shall be included in the project plans and specifications and shall be made a condition of approval for the project. Projects having significant socioeconomic impacts may be approved only if a statement of overriding considerations is made through the EIR process.

Action 2.2: In determining the significance of the environmental impacts of a development proposal, consider the relationship of the potential economic and social changes to the potential environmental changes resulting from the project.

Policy 3: Ensure that future development does not significantly impact governmental service providers.

Action 3.1: Impose permit conditions and mitigation measures that offset the impacts of development on governmental services and infrastructure (i.e., county services and other local service providers). Such conditions and mitigation measures shall also address impacts to county services and other local service providers from future development which occurs in the incorporated area. Affected county services include, but are not limited to, the following:

- a. Social Services,
- b. Health Services, including Mental Health Services,
- c. Libraries,
- d. Justice System, including Courts, District Attorney and Public Defender, Sheriff, and Probation departments,
- e. Regional Parks and Recreation,
- f. General Administration and Finance

In accordance with state law (Government Code § 53077), these exactions will not exceed the benefits derived from the project.

Policy 4: Develop strategies to improve the county's economic climate.

Action 4.1: Appoint a countywide advisory task force, or several such community groups, to advise the Board of Supervisors on economic development plans and projects.

Action 4.2: The Task Force shall develop a countywide Economic Development Plan, or several such plans for community areas.

Action 4.3: Work with applicable entities to encourage economic development projects in appropriate areas.

Action 4.4: Pursue state and federal funds and private funding for economic development projects.

Action 4.5: Promote economic development that is consistent with General Plan goals and objectives relating to land use, open space, and conservation of natural resources.

Action 4.6: Develop a multi-year Capital Improvement Program to respond to long-range infrastructure needs for existing and future community development.

Policy 5: Promote diversification and continued growth of the county's economic base.

Action 5.1: Encourage and promote the preservation and expansion of the county's tourist and recreation-based economy.

Action 5.2: Support the retention and expansion of all viable retail trade, consumer, and business establishments.

Action 5.3: Promote the continued growth of compatible industry on sites designated for industry and commerce.

Action 5.4: Concentrate development in existing communities in order to facilitate community economic growth.

Objective I

Maintain an up-to-date and legally adequate land use system and General Plan.

Policy 1: Periodically review and update General Plan documents.

Action 1.1: Conduct a thorough review and update of General Plan documents every 5 years, or as required by state Law.

Action 1.2: Annually review the county General Plan, Area and Specific Plans, and the Master Environmental Assessment (MEA), and update as needed with the assistance of the Community and Regional Planning Advisory Committees. Provide a report to the Board of Supervisors in accordance with Government Code § 65400 (b).

Policy 2: Ensure consistency among General Plan documents and the County Code.

Action 2.1: Initiate necessary land development regulation amendments to ensure consistency with the provisions of the General Plan.

Action 2.2: Utilize Community and Regional Planning Advisory Committees to conduct necessary land use redesignation studies.

Action 2.3: Initiate an update to the county Subdivision Regulations and update as necessary.

Action 2.4: Prepare and update as necessary Airport Land Use Plans for the Bridgeport, Lee Vining, and Mammoth Yosemite airports.

Action 2.5: Projects approved prior to implementing Action 2.1 above shall include a finding that the proposed use is consistent with the land use designation assigned in this element.

Policy 3: Ensure consistency among General Plan documents and planning documents of other agencies.

Action 3.1: Review and comment on planning and environmental documents of other agencies to ensure consistency and coordination with the policies of the General Plan.

Action 3.2: Conduct an annual review of all capital improvement projects proposed by the County and Special Districts in the unincorporated area of the county to ensure compatibility with General Plan directives.

Policy 4: Implement programs identified in this General Plan.

Action 4.1: Prepare and update as necessary other ordinances and regulations necessary to implement this General Plan.

Action 4.2: Promote the use of interagency agreements and cooperation in implementing the General Plan.

Action 4.3: Seek funding to implement the General Plan.

Action 4.4: Maintain an active code enforcement and environmental monitoring program, supported with active citation and penal authority.

Objective J

Maintain compatibility and minimize conflict between Mono County's existing military installations and adjacent land uses.

Policy 1: Notify the United States Armed Forces when development projects or substantial General Plan Amendments may affect operations of the Mountain Warfare Training Center.

Action 1.1: Create a local notification process by which the branches of the United States Armed Forces will be notified whenever a development project or substantial General Plan Amendment occurs within 1,000 feet of a military installation, special-use airspace, or low-level flight path.

Action 1.2: Provide a public forum for representatives of the military to keep the public informed about their current and future operations.

Action 1.3: Monitor military encroachment issues and consider additional measures as necessary, including the approval of a Military Influence Area and related property disclosures.

Policy 2: Consider impacts of development projects on the Lincoln Military Housing complex in Coleville.

Action 2.1: Create a local notification process by which the branches of the United States Armed Forces will be notified whenever a development project or substantial General Plan Amendment occurs within 1,000 feet of the Lincoln Military Housing complex.

Action 2.2: Consider the existing development, infrastructure, and environmental impacts of the Lincoln Military Housing complex when conducting long-term planning efforts in the Antelope Valley.

Action 2.3: Work with appropriate agencies to maintain current understanding of future development plans for Lincoln Military Housing complex so those plans might be considered a part of long-term planning efforts in the Antelope Valley.

Policy 3: Increase recognition of military operations within the county.

Action 3.1: Consider requiring real estate disclosures of military presence and joint operations associated with the Marine Corps Mountain Warfare Center for affected private properties within the county.

Action 3.2: Develop informational materials that educate residents and prospective buyers about military operations and their presence in the area.

PLANNING AREA LAND USE POLICIES

ANTELOPE VALLEY

GOAL: Provide for orderly growth in the Antelope Valley in a manner that retains the rural environment, and protects the area's scenic, recreational, agricultural, and natural resources.

Objective A

Guide future development to occur in and adjacent to Walker, Coleville, and Topaz.

Policy 1: Discourage subdivisions into six parcels or more outside of community areas.

Action 1.1: Designate land outside of community areas and the US 395 corridor¹ for Agriculture or Resource Management.

Action 1.2: Maintain large minimum parcel sizes outside of community areas and the US 395 corridor.

Action 1.3: Limit the type and intensity of development in flood plain areas.

Action 1.4: Prior to accepting a development application in potential wetland areas, require that the applicant obtain necessary permits from the U.S. Army Corps of Engineers.

Policy 2: Provide for a mix of residential, commercial, recreational, institutional, and light industrial land uses within defined community areas, in a manner consistent with the overall goal for the Antelope Valley.

Action 2.1: Designate a sufficient amount of land to accommodate tourist and community commercial needs within existing community areas.

Action 2.2: Designate a sufficient amount of land to meet the housing and lodging needs of Antelope Valley's residents and visitors.

Action 2.3: Designate suitable lands for light industrial uses within community areas. Designated light industrial use areas should be limited to community serving industrial uses that will have no adverse environmental impacts. All industrial development must be compatible with surrounding land uses.

¹The US 395 corridor is defined as the area in the Antelope Valley, outside of communities, along both sides of US 395, between the West Walker River to the east of US 395 and the sloping terrain to the west of US 395.

Action 2.4: Designate suitable lands for community recreational and institutional uses within community areas.

Policy 3: Along the US 395 corridor between existing communities, provide for limited development that is compatible with natural constraints and the Valley's scenic qualities.

Action 3.1: Establish a design review process and standards for development in the US 395 corridor.

Action 3.2: Require projects within fault hazard zones to submit a geologic report prepared by a registered geologist. Such reports should focus on locating existing faults, evaluating their historic activity, and determining the level of risk they present to the proposed development. Report recommendations should address measures to reduce risk to acceptable levels. All such reports shall be prepared in sufficient detail to meet the criteria and policies of the State Mining and Geology Board.

Action 3.3: Maintain the large lot residential nature of the US 395 corridor.

Action 3.4: Uses of a greater intensity than rural residential may be permitted in the US 395 corridor if it is demonstrated that they comply with the following standards:

- a. The project shall not exceed the noise standards for rural residential uses as defined in the Mono County Noise Ordinance, nor increase substantially the ambient noise levels for adjoining areas. Projects having potential noise impacts shall provide a noise impact study which identifies potential noise impacts, and proposes project alternatives or mitigation measures to mitigate the potential impacts.
- b. The project shall not violate applicable ambient air quality standards of the Great Basin Unified Air Pollution Control District, contribute substantially to an existing or projected air quality violation, or expose residents or wildlife to substantial pollution concentrations. Projects having potential air quality impacts shall provide an air quality impact study which identifies potential impacts, and proposes project alternatives or measures to mitigate the potential impacts.
- c. The project shall comply with the requirements of the Mono County Land Clearing, Earthwork and Drainage Facilities Ordinance and the Pollution of Waters Ordinance, as well as with the requirements of the Lahontan Regional Water Quality Control Board. The project shall not substantially degrade water quality; substantially degrade or deplete groundwater resources; contaminate a public water supply; interfere substantially with groundwater recharge; involve the use, production or disposal of

materials which pose a hazard to people or animal or plant populations in the area affected; or cause substantial flooding, erosion, or siltation. Projects having potential for such water-related impacts shall provide a water resource impact study which identifies potential impacts, and proposes project alternatives or measures to mitigate the potential impacts.

- d. The project shall not have a substantial, demonstrable negative aesthetic effect, and must comply with the design review standards established in accordance with Action 3.1, Policy 3. Projects having potential visual impacts shall provide a visual impact study which identifies potential visual effects, and proposes project alternatives or measures to mitigate the potential impacts.
- e. The project shall not interfere substantially with the movement of any resident or migratory fish or wildlife species, nor substantially diminish habitat for fish, wildlife or plants. Projects having potential fish and wildlife impacts shall provide an impact study which identifies potential fish and wildlife impacts, and proposes project alternatives or measures to mitigate the potential impacts.
- f. The project shall not conflict with established or planned recreational uses of the area.

Policy 4: Retain the existing privately owned land base in the Antelope Valley.

Action 4.1: Support a policy of no net loss of private land in the Antelope Valley.

Action 4.2: Oppose private land acquisitions by federal agencies within the Antelope Valley unless comparable land in the region is made available for disposal to private ownership. Exceptions to this policy may be considered if the land acquisitions are consistent with the overall goal for the Antelope Valley.

Action 4.3: Facilitate acquisition of BLM administered public lands south of the county landfill, east of Eastside Lane, and north of Walker, for community expansion, in a manner consistent with the overall goal for the Antelope Valley.

Policy 5: Encourage the use of alternative energy and communications innovations.

Action 5.1: Mobile or satellite-based communication sources may be substituted for conventional land-based sources in satisfying land development conditions.

Parcels that will not have conventional land-based sources extended to the property shall have that information prominently noticed on the map.

All conventional communication lines subsequently installed shall be underground.

Action 5.2: Alternative energy (e.g., solar, wind, water, etc.) systems may be substituted for conventional power in satisfying land development conditions except where existing power lines are within one mile of a proposed land division, in which case extending conventional power lines will be a condition of approval. All conventional power lines shall be underground.

Parcels that will not have conventional power lines extended to the property shall have that information prominently noticed on the map.

Action 5.3: Proposed parcels that have existing street frontage with existing power lines along either side of that street frontage shall not be conditioned with bringing conventional power across the street or onto the property.

Objective B

Maintain the scenic, agricultural, and natural resource values in the Valley.

Policy 1: Maintain and enhance scenic resources in the Antelope Valley.

Action 1.1: In order to protect and enhance important scenic resources and scenic highway corridors, designate such areas in the Antelope Valley for Open Space, Agriculture, or Resource Management.

Action 1.2: Encourage private landowners with visually significant property to grant or sell a conservation easement to a land conservation organization to protect the land as open space.

Action 1.3: Continue to use land use designations and subdivision regulations to preserve open space for scenic purposes.

Action 1.4: Conserve scenic highway corridors by maintaining and expanding large lot land use designations in areas within view of scenic highways.

Policy 2: Preserve the agricultural lands and natural resource lands in the Antelope Valley.

Action 2.1: Designate existing agricultural lands for agricultural use in the Land Use Element, and initiate associated district Land Use Designations and Land Development Regulations amendments.

Action 2.2: In accordance with the California Environmental Quality Act (CEQA), require the preparation of an Environmental Impact Report (EIR) for projects that may convert agricultural lands to other uses.

Action 2.3: Encourage agricultural land owners to utilize the property tax incentives for agricultural land provided for in the county's Williamson Act program.

Action 2.4: Inform owners of critical wildlife habitat areas of the potential for open space easements to protect such areas and of the potential for property tax adjustments.

Policy 3: Work with appropriate agencies to manage water resources in a manner that protects natural, agricultural and recreational resources in the Antelope Valley.

Action 3.1: Consider establishing a Groundwater Management District to manage the groundwater resources of the Antelope Valley.

Action 3.2: Work with the Lahontan RWQCB and other appropriate agencies to require appropriate actions to ensure that future development does not degrade water quality in the area.

Action 3.3: Work with the Walker River Irrigation District, adjacent Nevada Counties, and other appropriate agencies in developing a water management plan for Topaz Reservoir.

Policy 4: Ensure that an adequate water supply exists for new development projects.

Action 4.1: As a condition of approval, require development projects to demonstrate that sufficient water exists to serve both domestic and fire flow needs of the development and that use of the water will not deplete or degrade water supplies in the surrounding area.

Policy 5: Work with appropriate agencies to manage fish and wildlife resources within the Antelope Valley.

Policy 6: Preserve rural character of lands within the Antelope Valley

Action 6.1: Allow the storage of heavy equipment on parcels greater than five acres in the Antelope Valley for personal on-site use or community benefit.

Objective C

Maintain and enhance natural resource based recreational opportunities in the Valley and the surrounding area.

Policy 1: Work with appropriate agencies to maintain or improve natural resource base needed for recreational opportunities in the Antelope Valley and vicinity.

Policy 2: Work with appropriate agencies to initiate recreational facility development in environmentally suitable areas.

Action 2.1: Work with the Walker River Irrigation District and other appropriate agencies to develop a recreation management plan for Topaz Lake. Potential issues to address in the plan include:

- a. Provision of a designated boat launch area to provide boat access within California; and
- b. Creation of restricted boating areas to provide protected water bird nesting and rearing habitats at the south end of the reservoir.

PLANNING AREA LAND USE POLICIES

SONORA JUNCTION – GOAL

Provide for orderly growth in the Sonora Junction area in a manner that recognizes the established military, residential and recreational uses, and reduces potential conflicts between those uses.

OBJECTIVE A

Protect the established military uses in the Sonora Junction area from encroachment

Policy 1: Follow state guidelines relating to the notification of military when development projects and/or substantive General Plan Amendments may affect base operations.

Action 1.1: Create a local notification process by which the branches of the United States Armed Forces will be notified whenever a development project or substantial General Plan Amendment occurs within 1,000 feet of a military installation, Special Use Airspace, or low-level flight path.

Action 1.2: Amend permit review processes to include analysis of a project's proximity to military installations, special use airspace and low-level flight paths.

OBJECTIVE B

Encourage and facilitate the continued use of the Sonora Junction Area for recreational uses such as hiking, skiing, fishing and snowmobiling

Policy 1: Support the continued development and use of the Bridgeport Winter Recreation Area (BWRA).

Action 1.1: Where possible, facilitate improvements that will enhance the winter recreation opportunities at Sonora Junction, including the creation of suitable parking areas and restrooms.

MONO COUNTY GENERAL PLAN

Action 1.2: Collaborate with the USFS and other agencies to minimize environmental impacts while retaining the recreational benefits of the BWRA.

Policy 2: Support efforts to enhance recreation opportunities in the Sonora Junction Area.

Action 2.1: Where possible, facilitate the placement of recreational signage throughout the Sonora Junction Area that notifies users of the multi-use nature of the region.

OBJECTIVE C

Safeguard against potential impacts to sage grouse in all development activities.

Policy 1: Consider the location of sage grouse habitat and leks when processing development applications.

Action 1.1: Include in the project review process a step to identify current sage grouse habitat and lek activity in the area.

Policy 2: Work with landowners and recreational users to mitigate potential impacts to sage grouse.

Action 2.1: Create a list of sage-grouse mitigations that can be forwarded to property owners with prime sage grouse habitat when building or planning permits are applied for.

Action 2.2: Educate users of the area about the condition of the sage grouse near Sonora Junction through signage and handouts that encourage prudent use and reduce potential impact to the sage grouse.

SWAUGER CREEK

GOAL: Distribute and regulate residential land uses in a manner that minimizes impacts to natural resources, supports low-impact recreational uses on wildlands, and preserves and enhances agricultural resources and wildland recreational and research values in areas adjacent to rural residential uses.

Objective A

Provide for a sensitive pattern of future land development.

Policy 1: Future subdivisions in the planning area should recognize the inherent limitations of the land and the environment when determining appropriate parcel size and uses.

Action 1.1: Encourage minimum parcel sizes within the planning area based upon the sustainable carrying capacity of the land. The

sustainable carrying capacity is to be formulated based upon Natural Resource Inventory maps and site visits by Area Planning Group members.

Action 1.2: Unless otherwise determined based on Action 1.1, encourage a minimum parcel size of 40 acres within the planning area.

Action 1.3: Review Land Use Designations and Land Development Regulations of all private lands within the area and adjust as necessary to ensure consistency with these policies.

Action 1.4: In assigning land use designations and indicate the minimum parcel size.

Action 1.5: Encourage consolidation of undersized parcels and/or land trades of same with public and private agencies interested in preservation of habitat (i.e., Nature Conservancy).

Action 1.6: Maintain liaison with USFS with regard to land trades that may affect planning.

Policy 2: Minimize the impacts of development.

Action 2.1: Encourage sustainable agricultural uses, both commercial and private through lobbying efforts and possible tax incentives.

Action 2.2: Restrict construction or improvement of roads within the planning area to the minimum necessary for access under the planned land use. Layout and construction of roads will be controlled by Natural Resource Inventory maps and site visits by Area Planning Group members.

Policy 3: Agricultural uses should be assigned an agricultural land use designation.

Policy 4: Forest clearing or cutting in old growth stands on west- or south-facing slopes on private lands shall not be permitted without careful demonstration of reforestation potentials for similar vegetation.

Policy 5: Encourage fence design to facilitate the migration and movement of wildlife, with particular attention given to deer migration routes and protection from highway traffic.

Policy 6: Preserve the rural and wilderness character while allowing cottage industries and agricultural uses.

Action 6.1: Restrict location and size of all signs, in conformance to the county Sign Regulations.

Action 6.2: Restrict commercial uses to those compatible with the goals and objectives for the area (examples of incompatible uses include trailer and mobile- home parks, service stations, mini marts, landfills. Compatible uses would include agriculture, small recreational touring facilities, etc.).

Objective B

Protect visual resources in the planning area.

Policy 1: Future development shall be sited and designed to be in scale and compatible with the surrounding natural environment.

Action 1.1: Develop design guidelines which ensure a minimum architectural standard that is compatible with the visual and scenic environment.

Action 1.2: Consider establishing a Design Review District for Swauger Canyon, in accordance with the provisions of the Land Development Regulations (LDR).

Action 1.3: Adopt the design guidelines for the Design Review District as part of CC&Rs and attach to deeds on all properties within the Design Review District.

Action 1.4: Encourage SCE/Verizon to develop an overall plan for the underground installation of all utilities within the planning area.

Policy 2: Protect areas identified as open viewsheds or significant viewsheds.

Action 2.1: Work with the Area Planning Group to identify open viewsheds and significant viewsheds and to develop specific design guidelines for those parcels.

Action 2.2: Assign Scenic Combining Land Use Designations and Land Development Regulations to such areas to protect scenic values.

Action 2.3: Parcels identified as having greater than 50% of their area within an open viewshed should be restricted to a minimum lot size of 80 acres.

Objective C

Maintain existing air quality throughout the planning area and discourage any action that could degrade that standard.

Policy 1: Maintain clear and pristine air quality in the planning area.

Action 1.1: Require all woodstoves installed in the area to be certified EPA Phase II, in conformance to policies in the Public Health/Air Quality section of the Conservation/Open Space Element.

Action 1.2: Encourage use of renewable energy sources (wind, solar, hydro). Consult with appropriate agencies concerning tax incentive programs for the development of domestic renewable energy sources.

Policy 2: Minimize impacts of construction on air quality.

Action 2.1: Construction pads should be designed to minimize areas disturbed and construction-related traffic shall be restricted to limited and predefined access routes.

Action 2.2: Once construction is consolidated to the building site and adjacent regraded or otherwise disturbed lands are released from construction activities, revegetation and rehabilitation efforts shall be implemented, using appropriate seed mixtures or other suitable means such as jute mats or erosion-control netting. Within the area, perennial rye-grass mixtures have proved effective with proper site preparation, and seed sources are available.

Policy 3: Minimize impacts of roads on air quality.

Action 3.1: Development of new private roads should be limited to those necessary for access to private residences; shall comply with the Mono County Fire Safe Regulations; should consider how to minimize visual impact; the type of construction (drainage, culverts, road bases and finishes) should minimize dust and erosion problems. Construction on designated wet meadow areas should be prohibited.

Action 3.2: Discourage new general public travel roads throughout the planning area.

Action 3.3: Restrict the speed limits on all secondary roads to 25 mph.

Objective D

Improve water quality and maintain the existing stream-flow regime, in order for residents and visitors to enjoy a high quality of life.

Policy 1: Development shall demonstrate adequate service availability, including water supply, sewage disposal, and utilities, in a manner sensitive to the existing natural environment. The inability to demonstrate the availability of services, such as adequate sewage disposal, is sufficient reason for development to be prohibited altogether.

Policy 2: Consider mapping of all permanent and ephemeral surface water sources within the planning area

Policy 3: Approve parcels of adequate size and location so that septic tank discharges and the various chemicals that development brings into an area do not contaminate either surface or ground water. Large parcel size and limited number of dwellings per parcel will help to ensure a high quality of water.

All existing and proposed building sites should be meticulously examined for septic tank and leach field suitability. Septic installations should not be permitted in wet meadow areas, in areas with a high water table, or on slopes in excess of 45%.

Policy 4: No net increase in runoff should be permitted. Future development projects shall provide a drainage and erosion control plan which complies with standards established by the Department of Public Works.

Policy 5: Alternate methods of sewage treatment which are more compatible to the area than septic tanks, such as composting toilets, should be considered.

Objective E

Maintain and enhance wilderness habitat through conservation of energy.

Policy 1: Reduce overall consumption of all nonrenewable forms of energy, through conservation and use of renewable sources.

Action 1.1: All residential parcels shall be mapped for solar access sites.

Action 1.2: Use of superinsulation and passive solar construction for space heating in all structures should be encouraged through the use of tax or fee incentives.

Action 1.3: Non-solar building sites should be required to use superinsulation techniques to reduce heating loads and costs.

Action 1.4: Wood stoves should be of maximum efficiency currently available (within 5% of greatest available efficiency).

Action 1.5: Domestic water heating should be augmented through the use of:

- a. Batch solar heaters (or preheaters) on solar sites,
- b. Use of instantaneous water heaters (gas or electric) that will eliminate standing losses.

Action 1.6: A schedule of Energy Incentives should be formulated, in conjunction with Mono County, to implement this policy.

Policy 2: Encourage responsible production of renewable forms of energy.

Action 2.1: Promote use of renewable energy through tax and fee incentives, as in Policy 1.

Action 2.2: Discourage out-of-area sale of energy produced by any means.

Action 2.3: The Area Planning Group may develop a regional reforestation plan using only native tree species.

Objective F

Protect the recreational values in the area.

Policy 1: Establish area-wide pedestrian access to the waters of Swauger Creek; this has been accomplished in the Swauger Canyon area through the use of public easements, and should be extended to other areas if not already done.

Action 1.1: Fishing access to all sections of Swauger Creek should be encouraged on public and private lands.

Policy 2: Promote the safety of area residents and visitors.

Action 2.1: Consider amending Chapter 10.64, Firearm Discharge, of the Mono County Code to include private lands in the residential portion of the Swauger Creek Planning Area as a prohibited area for firearms discharge.

BRIDGEPORT VALLEY

GOAL: Provide for orderly growth in the Bridgeport Valley in a manner that retains the small town character, and protects the area's scenic, recreational, agricultural, and natural resources.

Objective A

Guide future development to occur on existing private lands in Bridgeport Townsite, east of Bridgeport Reservoir, in the Evans Tract, and at Twin Lakes.

Policy 1: Carefully evaluate subdivisions outside of the existing community area. Consideration should be given to assigning large minimum parcel sizes in the Valley².

Action 1.1: Assign agricultural land use designation to the valley and the upland areas surrounding the valley. Minimum parcel sizes shall be determined through the land use designation process.

Policy 2: Limit future subdivisions outside the community area to large lots (1 - acre minimum). Lot sizes for subdivisions which infill the community should reflect existing lot sizes, patterns, development, neighborhood character, and the availability of community sewer and water.

²The "community area" in the Bridgeport Planning Area includes the Bridgeport Townsite, the private lands east of Bridgeport Reservoir, the Evans Tract, Rancheria, and Twin Lakes. The "Valley" area includes the flat meadow area bounded to the east by US 395 and to the west and south by the upland areas. The "Valley" area also includes the flat meadow area north of US 395 and west of the reservoir.

Policy 3: Designate land presently in agricultural use as "Agriculture," and establish a Development Credits Program, including voluntary Transfer of Development Rights provisions, which will encourage clustering development away from irrigated land.

Action 3.1: Assign development credits to agricultural lands in the Bridgeport Valley on a per parcel bases in a manner consistent with Table 1 of the Tri-Valley Goals.

Action 3.2: Parcels created consistent with the Development Credit Program shall consist of a minimum of one acre. Parcels should be sited as follows:

- a. Adjacent to existing residential development (if feasible).
- b. A buffer may be required in consultation with adjacent agricultural landowners.
- c. Avoiding steep slopes and fault hazard areas.
- d. Avoiding wetlands and areas subject to flooding.
- e. Away from visually sensitive areas, such as ridgelines or along scenic highways.
- f. Minimizing impacts to migrating deer.
- g. Minimizing impacts to cultural resource sites.
- h. Proximate to existing access and utilities (if feasible).
- i. On soils of sufficient structural and sanitary waste disposal capabilities.

Policy 4: Carefully evaluate the exchange of federal lands for community expansion in order to ensure consistency with the Bridgeport Valley land use goal.

Policy 5: Discourage tract housing developments. The term "tract housing" shall be defined in the Land Development Regulations.

Policy 6: Designate a limited amount of land to provide for local industrial land use needs.

Objective B

Maintain the scenic, agricultural, and natural resource values in the Bridgeport Valley.

Policy 1: Preserve agricultural lands and wetlands.

Action 1.1: Work with appropriate agencies to manage water resources in the Valley in a manner that will protect the natural and recreational values of the water resource and associated resources (wildlife, riparian, etc.)

Policy 2: Consider establishing a Groundwater Management District to manage the groundwater resource.

Policy 3: Support designation of US 395 as a National Forest Scenic Byway.

Objective C

Maintain and enhance natural resource-based recreational opportunities in the Bridgeport Valley.

Policy 1: Work with appropriate agencies to manage Bridgeport Reservoir in a manner that protects the natural resources in the area and provides additional recreational opportunities.

Policy 2: Work with appropriate agencies and groups to develop and implement a management plan for the Travertine Hot Springs.

Policy 3: Work with appropriate agencies to improve dispersed recreational opportunities (picnicking, camping, snowmobiling, cross country skiing, biking, etc.) with information signs and maps, restrooms, bike lanes, etc.

BRIDGEPORT AREA WETLANDS POLICIES

GOAL: Preserve and enhance wetland functions and values, including wildlife and plant habitat, beneficial livestock forage value, water quality benefits, and aesthetic and recreational values, while providing for orderly growth and an efficient, coordinated permitting process.

Objective A

Guide development in the Bridgeport Valley so that no net loss of wetlands functions and values or acreage results from development activities.

Policy 1: Work with the U.S. Army Corps of Engineers to establish procedures for the processing of building and development proposals in or adjacent to wetlands³ areas in the Bridgeport Valley.

³These policies pertain to "jurisdictional wetlands"; i.e., those areas subject to Section 404 of the Clean Water Act, which requires a permit for the discharge of dredged or filled materials into waters of the U.S., including wetlands. Under a Memorandum of Agreement with the Environmental Protection Agency, the U.S. Army Corps of Engineers is responsible for determining wetland jurisdiction and issuing permits; the Soil Conservation Service may, in the future, become responsible for determining wetland jurisdiction on intensively managed

Action 1.1: Seek a regional permit from the U.S. Army Corps of Engineers that incorporates the mitigation strategy and process specified in these policies.

Policy 2: Work with willing landowners, agencies and applicants to establish a Bridgeport land bank to be used as mitigation for those areas where on-site mitigation is not feasible.

Action 2.1: Investigate potential sites for mitigation bank enhancement including:

- a. The East Walker River and its floodplain, which offers an excellent opportunity for enhancement of high-quality riparian habitat and fisheries habitat.
- b. The Robinson Creek outwash plain, which offers an opportunity for vegetation enhancement and possible connection to extended habitat corridors.
- c. Aurora Canyon, which offers an opportunity for enhancement of limited riparian areas within a few yards of the creek.
- d. The pond area at the intersection of US 395 and SR 182 (in the Airport Clear Zone), which offers an opportunity for marsh development.

Action 2.2: Investigate potential sites for a mitigation bank for the creation of wetlands, including:

- a. Irrigation-induced wetlands that could be permanently converted to wetlands.
- b. Upland areas where a reliable water source could be applied to convert the area to wetlands.

Action 2.3: Contact public and private landowners in the Valley, including the Walker River Irrigation District (WRID), for potential sites and interest in participating in a mitigation bank.

Action 2.4: Establish a Wetlands Mitigation Bank Technical Advisory Committee (TAC) for the Bridgeport Valley. This group should include a representative from applicable agencies (e.g., Corps of Engineers, EPA, FWS, SCS, DFG, RWQCB, and Mono County) and a representative of the following:

agricultural lands.

- a. Landowners in an area where wetland impacts will occur and mitigation will be required on a case-by-case basis.
- b. Landowners or the managing entity of the area where the mitigation bank will be located.
- c. Bridgeport Agricultural Property Owners.
- d. U.S. Board of Water Commissioners.

Policy 3: Work to establish The Land Bank for the Bridgeport Valley.

Action 3.1: The Land Bank shall be established as follows:

- a. The goals of the mitigation bank shall be to enhance or create self-sustaining functional ecosystems, providing equal functions and values to those impacted by development.
- b. The life of the bank shall be 20 years from its inception. After the original 20 years, the life of the bank shall be renewed on 20-year cycles as needed, barring any significant changes in regulations, natural conditions or catastrophes.
- c. Parcels eligible to contribute to the bank shall be illustrated on a map.
- d. Mitigation sites incorporated into the land bank shall be developed and managed in accordance with a management plan prepared with the assistance of the Wetlands Mitigation Bank Technical Advisory Committee (TAC) established for the Bridgeport Valley. The TAC shall assist in the design and implementation of a management plan for the bank. This plan shall include specific debiting and crediting procedures for the bank and shall detail remedial action responsibilities.
- e. The Corps shall require periodic inspections conducted with assistance from the TAC to identify whether the mitigation site is in compliance with the management plan.
- f. The management plan shall identify an appropriate methodology to assess pre- and post-mitigation functional values, in order to establish bank credits and debits. To the extent possible, this methodology will be quantitative.
- g. The management plan shall specify the methodology which will be used to protect the enhanced or created wetlands in 20-year cycles. This may include conservation/open space easements, deed restrictions, transfer of the property to a tax-paying conservation organization or agency, or other appropriate methods.

Action 3.2: Seek funding to support land bank projects in the Bridgeport Valley, including but not limited to, grants, loans or other potential funding from Soil Conservation Service, Grants for sewage effluent treatment, EPA, U.S. Fish and Wildlife Service, Resources Agency, and Ducks Unlimited.

Objective B

Maintain and enhance wetland habitat values and functions with willing landowners in the Bridgeport Valley.

Policy 1: Work with participating ranchers in the area to manage their land bank using one or more of the following methods/techniques:

- fire;
- rest;
- technology;
- money;
- labor;
- beneficial grazing practices;
- living organisms;
- human creativity; and /or
- animal impacts.

Action 1.1: If grazing practices beneficial to wetlands are to be utilized, the grazing practices shall be specified in a grazing management plan approved by the SCS in consultation with the TAC.

Action 1.2: Investigate the use of sewage effluent for wetland restoration, creation, or enhancement purposes.

Policy 2: Work with developers to provide buffer zones around wetland areas adjacent to the developed areas

Policy 3: Work with public agencies and interested local groups to develop and post informational and educational signs around wetlands areas on public lands.

Policy 4: Work with interested local groups willing to participate (either financially or with donations of labor) with willing landowners in the protection or enhancement of wetlands.

Policy 5: Restrict public and animal (e.g., cattle) access as necessary to land bank riparian areas during times of nesting or other critical periods in the life cycles of wildlife or fish.

Objective C

At the request of the landowner, reevaluate the jurisdictional status of sites proposed for development which are located in irrigated areas in the Bridgeport Valley when and where irrigation water is no longer applied.

Policy 1: Ensure that accurate and adequate data are collected to permit a reevaluation of wetland status for irrigation-induced wetlands that will meet federal delineation standards.

Action 1.1: The following additional conditions shall apply to altering the irrigation regime, acquiring data, and seeking a reevaluation of jurisdictional status:

- a. Areas shall be reevaluated only where a definite project proposal exists.
- b. The entire area of the proposed project will be reevaluated.
- c. The existing topography in the vicinity of the subject area should not be altered without contacting the U.S. Army Corps of Engineers.
- d. During the time of reevaluation, livestock may be excluded as necessary (in consultation with the SCS) to allow plant species to be identified and catalogued. Cattle exclosures in representative areas may be necessary for monitoring or evaluation.
- e. Reevaluation should begin no later than May 1. Water table levels should be monitored throughout the early growing season by means of pits or piezometer wells, and vegetation should be studied at a time that may vary from mid-May to July, depending upon weather.
- f. Data should be acquired at locations on both sides of apparent wetland boundaries. The locations of piezometer wells or other tests of soil conditions (for example, a,a-dipyridil test for reducing conditions) should be representative of the entire subject area. Methodologies in the current jurisdictional wetland manual will be used to define wetlands.
- g. As per the new National Technical Committee on Hydric Soils (NTCHS) criteria for hydric soils, poorly drained areas with soil permeability less than 6.0 inches/hour (such as most of Bridgeport Valley) would be determined to meet the mandatory soils and hydrology criteria for jurisdictional wetlands if the water table remains within 1.5 feet of the surface for at least two weeks during the growing season.

Action 1.2: Reevaluations of jurisdictional status of proposed project sites located in irrigated areas shall be performed by a qualified professional under the direction of the County and in consultation with the Soil Conservation Service and the U.S. Army Corps of Engineers. The work shall be funded by the project applicant.

BODIE HILLS

GOAL: Protect and enhance Bodie Hills Planning Area resources that complement the Bodie Experience.

Objective A

Protect the visual characteristics of the Bodie Hills that contribute to the Bodie Experience, and ensure that any development allowed is compatible with the existing rural and historic landscape.

Policy 1: Structures proposed on private lands within the Bodie Hills Planning Area shall be constructed in accordance with the minimum development standards found in the Mono County General Plan Visual Resource Policies.

Action 1.1: Develop design guidelines for residential, commercial, and industrial development projects. At a minimum, the following development standards (from the Visual Resource Policies) shall apply:

- a. Projects should not dominate the natural environment, and should complement existing community character; the scale, design, and siting of a project should be appropriate for the setting;
- b. Building mass should be varied and should be appropriate for the surrounding community or area. Facades in commercial districts should be varied;
- c. Project siting and structural design should be sensitive to the climate, topography, and lighting of the surrounding environment;
- d. The design, color, and building materials for structures, fences, and signs shall be compatible with the natural environment and/or surrounding community;
- e. Visually offensive land uses shall be adequately screened through the use of landscaping, fencing, contour grading, or other appropriate measures;
- f. The visual impacts of parking areas shall be minimized through the use of landscaping, covered parking, siting which screens the parking from view, or other appropriate measures;
- g. Signs shall comply with the county's Sign Regulations;
- h. Standardized commercial structures, designs, and materials shall not be allowed (e.g., a "McDonald's" shall be designed with

materials and finishes that harmonize with the surrounding area);

- i. Industrial areas shall be as compact as possible;
- j. Exterior lighting shall be shielded and indirect and shall be minimized to that necessary for security and safety;
- k. All new utilities shall be installed underground, in conformance to applicable provisions of the Land Development Regulations (LDR);
- l. Existing roads shall be utilized whenever possible. Construction of new roads should be avoided except where essential for health and safety;
- m. Earthwork, grading, and vegetative removals shall be minimized;
- n. All site disturbances shall be revegetated with a mix of indigenous species native to the site (based upon a pre-project species survey). A landscaping plan shall be submitted and approved for all projects.

BLM Resource Management Plan Decision:

Manage the main travel corridors into the Bodie Bowl to conform to Visual Resource Management (VRM) II standards.

Objective B

Maximize fire protection within the Bodie Hills Planning Area, including both prevention and suppression.

Policy 1: Actively support fire prevention efforts on public and private lands.

Action 1.1: BLM shall install and maintain Fire Danger Rating signs on SR 270 and on Cottonwood Canyon Road. State Parks shall change the fire rating as needed.

Action 1.2: All campfires within the Bodie Hills Planning Area (including the ACEC) shall require a valid campfire permit issued by BLM, USFS, Cal Fire (formerly the California Department of Forestry and Fire Protection) or State Parks. All campfires shall be in accordance with existing fire restrictions during the summer fire season.

Action 1.3: Require new development to comply with the Mono County Fire Safe Regulations (Chapter 22).

BLM RMP Decision:

Employ full fire suppression techniques against all wildfires.

Objective C

Reduce vandalism within the Bodie Hills Planning Area.

Policy 1: Recognize and support visitor education as the primary deterrent to vandalism. To help reduce vandalism, the BLM, State Parks and the County should continue to educate the public about the cultural, historic, and natural values of Bodie SHP and the Bodie Hills.

Action 1.1: The BLM shall work with State Parks to develop interpretive kiosks or panels along the roads into Bodie to foster a better appreciation of the cultural, historic, and natural values of the Bodie Hills. The verbiage shall be positive and include references to respecting private lands within the area.

Action 1.2: Appropriate agencies shall patrol the Bodie Hills during special permitted events and times of high visitor use, such as hunting season, making visitor contacts and establishing a presence in the area.

Objective D

Maintain a high level of air quality in the Bodie Hills Planning Area.

Policy 1: Activities permitted in the Bodie Hills Planning Area shall meet ambient air quality standards.

Action 1.1: The proponent of any project that may adversely impact air quality shall obtain an air quality permit or clearance from the Great Basin Air Pollution Control District.

Action 1.2: Any project that may generate excessive levels of dust shall be required to use dust control measures approved by Great Basin APCD.

Action 1.3: Future development projects shall comply with the public health and safety policies of the Mono County General Plan, including requirements for future development projects to avoid impacts to air quality or mitigate impacts to a level of non-significance, unless a statement of overriding considerations is made through the EIR process (Conservation/Open Space Element, Public Health & Safety Policies, Goal I, Objective A, Policy 3). In addition, future development projects with the potential to significantly impact air quality shall assess potential impacts prior to project approval in conformance to the requirements of public health and safety policies (Conservation/Open Space Element, Public Health & Safety Policies, Goal I, Objective A, Action 3.1).

Policy 2: Mono County and State Parks shall continue to seek and implement methods to reduce the dust problems on the county roads within the Bodie Hills Planning Area approaching the ACEC.

Action 2.1: Pave SR 270 to the cattle guard at the edge of the Bodie Bowl. Turn it over to Caltrans for maintenance.

Action 2.2: Pave Cottonwood Canyon Road.

Objective E

Provide for the health and safety of visitors and the environment.

Policy 1: Visitor safety within the Bodie Hills Planning Area is a priority.

Action 1.1: Provide for the health and safety of Bodie visitors consistent with established ordinances and regulations of the BLM, State Parks and Mono County.

Objective F

Recreational uses that do not interfere with the Bodie Experience may be permitted.

Policy 1: Permit development of visitor services outside the ACEC to accommodate visitors to the Park. This development should be consistent with, and not threaten, the historic resources at Bodie.

Action 1.1: To provide for visitor service development that facilitates the Bodie Experience and provides dispersed recreational activities Mono County may assign Rural Resort land use designations to appropriate private property.

Action 1.2: The BLM shall designate lands suitable for a visitor center and associated services.

Policy 2: Special and recreational events (trail rides, cattle drives, bike rides, filming, etc.) on public lands in the Bodie Hills Planning Area shall be considered on a case by case basis. Events shall be monitored so that they do not detract from the Bodie Experience.

BLM RMP Decision:

Enhance dispersed recreation opportunities such as off-highway vehicle touring, primitive camping, mountain biking, snowmobiling, hunting, fishing, cross-country skiing, sightseeing and environmental interpretation.

Objective G

Provide services that will enhance the Bodie Experience.

Policy 1: Interpretive, directional, and other signing within the Bodie Hills Planning Area should be provided to educate and inform visitors. The number of signs should be kept to a minimum. Signs should be strategically placed to avoid detracting from the scenic values of the Bodie Hills Planning Area and the Bodie Experience. The messages should be stated in positive terms and address public and private lands.

Action 1.1: The BLM should work with State Parks to develop interpretive kiosks or panels along the roads into Bodie to foster a better appreciation of the area's values, and thereby lessen the threat of vandalism. The verbiage should be of a positive nature ("Bodie is a Special Area . . .").

Action 1.2: Caltrans and Mono County should develop scenic turnouts on SR 270 and Cottonwood Canyon Road. Some interpretive information should be provided, with multi-lingual information or use of international symbols.

Action 1.3: BLM shall place signs on all secondary routes within the Bodie Hills Planning Area. Signs should describe the routes, particularly those crossing both public and private lands, and highlight the need for the public to respect private property.

BLM RMP Decision:

Develop an activity plan for recreational use in the area. Incorporate an interpretive element to highlight wildlife, geologic and cultural values.

Objective H

Any economic and resource development projects on public lands shall be conducted in a manner that protects the historic and scenic values in the Bodie Hills Planning Area, and that does detract from the Bodie Experience.

Policy 1: Any commercial or concessionaire development on public lands should complement or enhance the Bodie Experience.

Policy 2: Concessionaires may be considered for solving transportation problems associated with the State Park, such as providing shuttle services or alternative access such as horses.

Policy 3: Grazing on public lands within the Bodie Hills shall be guided by the BLM Bishop RMP and the Coordinated Resource Management Plans (CRMPs).

BLM RMP Decisions:

Use the existing Coordinated Resource Management Planning (CRMP) process to identify and implement vehicle route closures to protect sensitive plants or deer or sage grouse habitats; to manage grazing; and to attain DPC and stream improvement goals.

Stabilize and restore selected stream reaches throughout the Bodie Hills to improve riparian and aquatic habitat quality. Monitor water quality to determine the impacts of recreation, grazing and mining activities.

Enhance wildlife habitat and watershed conditions, and attain Desired Plant Community prescriptions.

Policy 4: Wildlife habitat management on public lands shall be guided by the BLM's Bishop RMP and the CRMPs.

Policy 5: Mining on valid, existing claims on public lands shall be allowed, subject to existing law.

Policy 6: On public lands (where existing BLM policy allows) project proponents shall pay for administrative, study, monitoring and reclamation costs of projects.

Policy 7: An economic or fiscal impact analysis should be completed and utilized in the decision-making process along with the NEPA document for any major project proposal on public lands.

Objective I

Allow for agriculture, resource management activities, and rural resort uses on private lands in the Bodie Hills Planning Area that do not detract from the Bodie Experience.

Policy 1: Grazing on private lands within the Bodie Hills Planning Area is an historic use. Mono County supports the continued agricultural use of private lands within the Bodie Hills.

Action 1.1: Assign Agricultural land use designations to private property in the Bodie Hills Planning Area.

Action 1.2: Assign Development Credits to property with an agricultural land use designation in the Bodie Hills Planning Area based upon a per parcel bases, as follows:

- a. For parcels which total 10 acres or less, one development credit shall be assigned.
- b. For parcels which total 40 acres or less, one development credit shall be assigned for each 10 acres.
- c. For parcels which total more than 40 acres, four development credits shall be assigned for the first 40 acres, and one additional development credit shall be assigned for each additional 40 acres, or portion thereof greater than 10 acres.
- d. The assigned credits shall be reflected on Mono County's Land Use Maps. As an example, a 650-acre parcel would qualify for 20 development credits, and would be designated Agriculture, 20 Development Credits (AG 20dc).
- e. Each development credit permits the construction of one single-family residence. Development credits may be transferred to parcels as small as one acre in size. Development credit parcels should be clustered as follows:
 1. Adjacent to existing residential development (if feasible).
 2. With a buffer established in consultation with adjacent agricultural landowners.
 3. To avoid steep slopes and fault hazard areas.
 4. To avoid wetlands and areas subject to flooding.
 5. Away from visually sensitive areas, such as ridgelines or along scenic highways.
 6. To minimize impacts to wildlife, including migrating deer.
 7. To minimize impacts to cultural resource sites.

MONO COUNTY GENERAL PLAN

8. Proximate to existing access and utilities (if feasible).
9. On soils of sufficient structural and sanitary waste disposal capabilities.

Policy 2: Wildlife management on private land shall be guided by the provisions of the Mono County Land Use Designation, the Mono County Land Development Regulations, and the policies of the Mono County General Plan

Policy 3: Mineral resource activities on private lands may be permitted subject to established laws.

Action 3.1: Mineral Resource extraction or exploration projects shall comply with requirements of the California Surface Mining and Reclamation Act (SMARA); the Mineral Resource Policies of the Mono County General Plan; the Resource Extraction District, Reclamation Ordinance, and Mining Operations Ordinance of the Mono County Code; and applicable environmental requirements, including the California Environmental Quality Act (CEQA).

Policy 4: Proponents shall bear the costs for project environmental studies, mitigation monitoring, permit processing and reclamation, in accordance with the Mono County General Plan, Mono County Environmental Handbook, and implementing ordinances and resolutions.

Policy 5: An economic or fiscal impact analysis may be required for projects having potential adverse fiscal impacts.

Action 5.1: Require applicable development projects to comply with Mono County General Plan Land Use policies which require assessments of the economic costs and benefits of a project (Land Use Element, Objective H, Policy 2 and Action 2.1).

MONO BASIN

GOAL: Provide for the orderly growth of Mono Basin communities in a manner that retains the small town character, coincides with infrastructure expansion, facilitates economic and community development, and protects the area's scenic, recreational, and natural resources.

Objective A

Direct future development to occur in and adjacent to Lee Vining.

Policy 1: Obtain lands necessary for the orderly expansion of Lee Vining.

Action 1.1: Work with appropriate agencies to provide for developable lands adjacent to Lee Vining.

Action 1.2: Designate lands adjacent to Lee Vining for community expansion in the Land Use Element.

Policy 2: Future development should coincide with infrastructure and service capability expansion.

Action 2.1: Support and assist the Lee Vining PUD in securing sufficient water for community growth.

Action 2.2: Require development projects to obtain "will-serve" letters from applicable service agencies.

Objective B

Encourage infill development of Mono City prior to considering development on adjacent lands.

Policy 1: Existing lots at Mono City should be developed before adjacent lands are considered for development.

Policy 2: If necessary, obtain lands for the orderly expansion of Mono City.

Action 2.1: Request the BLM to designate lands adjacent to Mono City for potential future land disposal, when and if demand for additional development warrants such disposal.

Policy 3: Future development should coincide with infrastructure and service capability expansion.

Objective C

Maintain the scenic, recreational, and natural attributes of areas outside Lee Vining and Mono City.

Policy 1: Ensure that future development outside existing communities is compatible with the scenic, recreational, and natural attributes of the area.

Action 1.1: Provide for low intensity uses (e.g., low density residential uses) outside of Lee Vining and Mono City. Higher intensity uses (e.g., limited commercial, industrial, and resource extraction) may be permitted if it can be demonstrated that the use cannot be accommodated in existing community areas, that the use is incompatible with existing community uses, or that the use directly relies on the availability of unique on-site resources. Higher intensity uses should not adversely impact the area's scenic, recreational, and natural resources.

Action 1.2: Require preparation of a Specific Plan and EIR for subdivisions of 30 parcels or more that are not within or adjacent to Lee Vining or Mono City.

Action 1.3: Require preparation of a Specific Plan or PUD for development projects proposed on federal exchange lands (parcel maps are exempt from this requirement).

Action 1.4: Periodically review the Conway Ranch Specific Plan and any other future specific plans in the Mono Basin.

Objective D

Guide development to provide for community needs.

Policy 1: Encourage the development of affordable housing, including rental units.

Policy 2: Provide a site for limited industrial uses, including road yards, heavy equipment storage, and similar uses, within or adjacent to Lee Vining.

Action 2.1: Consider relocating visually offensive land uses, such as road yards, to the designated industrial site.

Policy 3: Focus commercial development within or adjacent to Lee Vining.

Policy 4: Provide a community center in Lee Vining.

JUNE LAKE

Policies and Actions for June Lake are contained in the **June Lake 2010: June Lake Area Plan**, adopted in 1991.

GOAL: That June Lake ultimately develop into a moderately sized, self-contained, year-round community.

Objective A

Promote the expansion of the June Lake Loop's privately owned land base to accommodate planned community growth.

Objective B

Promote well-planned and functional community development that retains June Lake's mountain community character and tourist-oriented economy.

Objective C

Contain growth in and adjacent to existing developed areas, and retain open space buffers around each area.

Objective D

Balance the rate of development throughout the separate neighborhood areas. Where prudent and feasible, balance the rate of development in new areas and the rate of infill and redevelopment in established areas.

Objective E

Utilize Land Use designations to stimulate redevelopment in depressed areas, to limit and phase-out incompatible uses, and to guide June Lake's future.

Objective F

Protect existing and future property owners and minimize the possibility of future land ownership/use conflicts through the building and planning permit processes.

Objective G

Meet the land needs of the commercial/industrial uses.

Objective H

Balance the development of recreational facilities with the adequate provision of public amenities, employee and visitor housing, infrastructure and circulation facilities.

Objective I

Maintain the June Lake Village as the Loop's Commercial Core by providing a wide-range of commercial and residential uses in a pedestrian-oriented atmosphere.

Objective J

Through the Specific Plan Processes, develop the West Village/Rodeo Grounds into a well-coordinated resort area that provides a balance of resident and visitor housing in close proximity to recreational facilities and other activity centers

Objective K

Retain the Down Canyon's single-family residential character while providing for additional commercial development along SR 158 and pockets of higher density residential uses.

MAMMOTH VICINITY

GOAL: Maintain and enhance the scenic, recreational, and environmental integrity of the Mammoth vicinity.

Objective A

Maintain and enhance scenic resources in the Mammoth vicinity.

Policy 1: Future development activity in the Mammoth vicinity shall avoid potential significant visual impacts or mitigate impacts to a level of non-significance, unless a statement of overriding considerations is made through the EIR process.

Action 1.1: Future development projects with the potential to have a substantial, demonstrable negative aesthetic effect shall provide a visual impact analysis prior to project approval. Examples of a substantial, demonstrable negative aesthetic effect include:

- a. Reflective materials;

- b. Excessive height and/or bulk;
- c. Standardized designs which are utilized to promote specific commercial activities and which are not in harmony with the community atmosphere; and
- d. Architectural designs and features which are incongruous to the community or area and/or which significantly detract from the natural attractiveness of the community or its surroundings.

The analysis shall:

- a. be funded by the applicant;
- b. be prepared by a qualified person under the direction of Mono County;
- c. assess the visual environment in the general project vicinity;
- d. describe the impacts of the proposed development upon views and scenic qualities within the project site and on surrounding areas; and
- e. recommend project alternatives or measures to avoid or mitigate visual impacts.

Mitigation measures shall be included in the project plans and specifications and shall be made a condition of approval for the project.

Policy 2: Future development shall be sited and designed in a manner that preserves the scenic vistas presently viewed from US 395.

Action 2.1: Assign Scenic Combining designations along US 395 in order to minimize the impacts of development in the US 395 viewshed.

Action 2.2: Designate undeveloped LADWP lands as "Open Space" in order to protect the scenic resources on those lands.

Action 2.3: Continue to enforce the visual resource policies in the Mammoth Lakes Airport Land Use Plan.

Action 2.4: Require any expansion of existing visually offensive land uses within the US 395 viewshed to be adequately landscaped or otherwise screened.

Policy 3: Restore visually degraded areas when possible.

Action 3.1: Work with agencies and organizations owning or managing existing uses in the US 395 viewshed to mitigate the adverse visual

impacts of those uses; e.g., by painting, landscaping, or otherwise screening the use.

Action 3.2: Investigate the potential of relocating existing visually incompatible uses in the US 395 viewshed.

Action 3.3: In conformance to the Mammoth Lakes Airport Land Use Plan, promote reclamation of existing quarry sites, including surface restoration and revegetation, following exhaustion of the mineral resource.

Policy 4: Coordinate scenic resource policies in the Mammoth vicinity with USFS and BLM visual policies and objectives.

Action 4.1: Work with the USFS and BLM on development projects on their lands to ensure that potential adverse visual impacts are fully mitigated.

Objective B

Provide for the land use needs of both the incorporated and unincorporated areas.

Policy 1: Contain growth in and adjacent to existing developed areas.

Action 1.1: Prohibit subdivisions into six lots or more in the unincorporated area of the Mammoth vicinity, except in areas designated for Specific Plans or PUDs; minor parcel maps of four lots or less may be considered if consistent with Mammoth vicinity policies.

Action 1.2: Support exchange of federal lands into the private sector for community expansion only if it can be demonstrated that there is a need for such expansion, that the community infrastructure can support the expansion, and that potential significant environmental effects can be avoided or mitigated.

Action 1.3: When and if additional ski area development is proposed for the San Joaquin Ridge, this plan should be updated to address concerns raised by that development.

Action 1.4: Work with the Town of Mammoth Lakes to address regional housing needs.

Policy 2: Provide for industrial land use needs.

Action 2.1: Limited industrial uses may be allowed at the Old Elementary school site, in conformance to the Mammoth Lakes Airport Land Use Plan.

Action 2.2: Amend the Mammoth Lakes Airport Land Use Plan to allow only resource extraction uses at the existing quarry on private land

within the planning area and recommend the same policy for other existing quarries in the planning area.

Action 2.3: Work with the Town of Mammoth Lakes to identify and designate an appropriate site for land intensive industrial uses and a household hazardous waste transfer facility within the Town's sphere of influence boundary.

Policy 3: Future development projects shall avoid potential significant environmental impacts or mitigate impacts to a level of non-significance, unless a statement of overriding concerns is made through the EIR process.

Action 3.1: Future development projects with the potential to have significant environmental impacts shall assess the impact(s) and recommend project alternatives and/or mitigation measures prior to project approval, in the manner required by General Plan policies.

Policy 4: Provide additional regional recreational facilities.

Action 4.1: Study the feasibility of expanding the existing recreational facilities at Whitmore.

Action 4.2: Develop additional interpretive sites in the area, such as the proposed geothermal interpretive center, as funding becomes available.

Policy 5: Encourage the continued use of Hot Creek and the Upper Owens River for fishing purposes.

Action 5.1: Development plans for these areas shall preserve the integrity of the fishery. Implement the policies in this element which pertain to the Upper Owens River.

Action 5.2: Establish a Hot Creek Buffer Zone. Development within that zone shall require a finding that all identified environmental impacts of the project are reduced to less than significant levels by the permit conditions.

Objective C

Preserve and enhance natural resources in the Mammoth vicinity.

Policy 1: Maintain or enhance the integrity of key wildlife habitat in the area by limiting development in the area. Examples of key habitat include, but are not limited to: key winter ranges, holding areas, migration routes, and fawning areas for mule deer; leks, and winter and summer range for sage grouse; and waterfowl habitat at Crowley Lake, Laurel Pond, and along the Owens River.

Action 1.1: Implement policies in the Conservation/Open Space Element.

Policy 2: Maintain or enhance the integrity of fisheries in the planning area.

Action 2.1: Support the DFG's Trout Enhancement Plan for the Mammoth area.

Action 2.2: Manage riparian areas to maintain high-quality habitat for fish, especially in threatened and endangered species waters, wild trout waters, and the meadow reaches of streams.

Policy 3: Preserve, maintain and enhance surface and groundwater resources in the planning area.

Action 3.1: Require projects which could adversely impact water resources, including down-gradient water resources, to avoid or mitigate effects to a point where clearly no significant effects would occur.

Action 3.2: Work with the appropriate agencies to develop and implement a comprehensive management plan for Crowley Lake and the downstream areas of the aqueduct system. The management plan should ensure that the aqueduct system is managed in a manner that protects the ecological values of the Long Valley and the downstream areas of the aqueduct system.

Action 3.3: Develop a Special Area Management Plan⁴ in cooperation with the Corp of Engineers for wetlands in Long Valley.

Policy 4: Regulate geothermal and mining and reclamation activities in the Mammoth vicinity in a manner that retains the scenic, recreational, and environmental integrity of the Mammoth vicinity.

Action 4.1: All geothermal, mining and reclamation activities shall comply with the policies of the county's Conservation/Open Space Element and the county's Reclamation Ordinance.

Action 4.2: Geothermal and mineral extraction activities shall be allowed only in areas designated Resource Extraction; exploratory activities shall be allowed only in areas designated Resource Management, Open Space, or Agriculture.

UPPER OWENS RIVER

GOAL: Retain the existing rural character and environmental resources of the Upper Owens Area.

Objective A

⁴A Special Area Management Plan is a set of policies developed cooperatively with the U.S. Army Corps of Engineers to address local wetland development issues.

Protect the unique natural setting, ecology, riparian corridor and fishery, wildlife, recreational and agricultural resources of the Upper Owens by limiting the types and intensity of development in the area.

Policy 1: Limit development in the area to guest ranches, related commercial uses, agricultural uses and support residential uses.

Action 1.1: In this element, designate the privately owned property of the Upper Owens area as Agriculture, Open Space, Specific Plan or Resource Management.

Action 1.2: Assign Agriculture, Open Space, or Specific Plan designation to the privately owned property of the Upper Owens area in a manner consistent with Action 1.1.

Action 1.3: Require the preparation of a specific plan for projects of more than 30 units. Such projects shall provide a fiscal impact analysis that assesses the impacts of the project on local service agencies, and a market study that analyzes the market demand for such a development.

Action 1.4: A use permit or a Specific Plan (SP) shall be required for residential, guest ranch or commercial development that exceeds one unit per parcel. Projects proposing several units constructed over a period of time may apply for a single use permit. Certain uses, such as employee housing, may be exempted from these requirements following redesignation of properties (see Action 1.2 above).

Policy 2: Limit winter residential occupancy to that which is associated with minimum security and maintenance requirements.

Action 2.1: New residential subdivisions for permanent residents, unless associated with existing guest ranches or agricultural operations, shall not be permitted. Residential subdivisions proposed to provide housing for the resort/ranch owners, guests, managers, and employees may be permitted.

Action 2.2: Study the financial impacts, feasibility, and mechanisms for providing winter access to the area.

Policy 3: Restrict development in a manner that preserves the environmental quality of the area.

Action 3.1: Based upon existing resource information, estimate thresholds for maintaining the area's environmental quality; thresholds should address air quality, viewsheds, water quality, noise environment, traffic, and wildlife habitats. The type and intensity of permitted development should not exceed the estimated thresholds. Development projects proposed prior to the establishment of these thresholds should address these issues in project environmental assessments.

Action 3.2: Development projects that may have significant environmental impacts shall assess potential impact(s), determine if they exceed estimated environmental thresholds, and recommend project alternatives and/or mitigation measures prior to project approval, in the manner required by General Plan policies and CEQA.

Action 3.3: Development projects shall avoid potential significant environmental impacts or mitigate impacts to a level of non-significance, unless the benefits of the proposed project outweigh the unavoidable adverse environmental effects, and an appropriate statement of overriding considerations is made through the EIR process.

Action 3.4: Future development shall be sited and designed to avoid disturbing the scenic quality of the area. Leapfrog development shall be discouraged. The use of bright colors and reflective materials shall be avoided, and buildings should utilize natural screening, such as topographic features and vegetative cover, to avoid detracting from open vistas. Construction in open meadow areas and on ridgelines should be avoided. Buildings shall be low profile, and in no instance exceed 35 feet in height. Utility lines shall be installed underground where environmentally feasible.

Policy 4: Facilitate input from area residents on local planning issues.

Action 4.1: Establish an Upper Owens Planning Advisory Committee consisting of area landowners to review and comment on planning and environmental projects having the potential to impact the area.

Objective B

Protect the water resources of the Upper Owens Area.

Policy 1: Ensure that direct and indirect impacts of development projects on the water resources of the Upper Owens Area are avoided or mitigated to a point where clearly no significant effects would occur.

Action 1.1: Oppose development of a fish hatchery at Big Springs, unless it can be demonstrated that there will clearly be no significant adverse effects on the area's water and fishery resources.

Action 1.2: Oppose water transfer projects that could affect the Upper Owens Watershed – such as the development of the Dry Creek Wellfield – unless it is demonstrated that there will clearly be no significant adverse effects on the area's water resources.

Action 1.3: Require development within the Upper Owens Area to avoid or mitigate impacts to local water resources to a point where clearly no significant adverse effects would occur.

Action 1.4: Require development to set back 50 feet from the top of the bank of natural waterways, and to comply with other stream, riparian and wetland area setback requirements of federal and state agencies.

Action 1.5: Request that potential impacts to the Upper Owens River be thoroughly considered in applicable environmental studies.

Action 1.6: Require projects with the potential to impact the water resources of the Upper Owens area to conduct long-term water monitoring programs in order to ensure the maintenance of the area's water quality and quantity.

Policy 2: Preserve the Upper Owens River water resources and riparian corridor.

Action 2.1: Work with local landowners to develop coordinated strategies for preserving the integrity of the Upper Owens River corridor, including the riparian corridor, downstream to Crowley Lake. Stream preservation options and techniques – such as conservation easements, transfer of development rights, fencing, enhancement of water quality and the sale of sensitive land to conservation organizations – should be considered.

Action 2.2: Work with local landowners to manage access to the river in a manner that preserves the integrity of the riparian corridor and the fishery.

Action 2.3: Promote sound grazing management in accordance with the Conservation/Open Space Element, Agriculture/Grazing/Timber policies, Goal I, Objective C.

Objective C

Promote the continuation of agricultural uses, including aquaculture uses that are compatible with the rural recreational and open space values of the area.

Policy 1: Allow for the continuation and reasonable expansion of agricultural uses, including grazing and aquaculture uses, in a manner consistent with the environmental and recreational values of the area.

Action 1.1: Designate lands used for agricultural purposes as “Agriculture” to ensure consistency with the General Plan.

Action 1.2: Require development to be sited in a manner that avoids interference with existing ranching operations and livestock and wildlife movement.

LONG VALLEY

GOAL: Maintain the rural residential character of the Long Valley communities (i.e., Long Valley, McGee Creek, Crowley Lake/Hilton Creek, Aspen Springs, and Sunny Slopes) in a manner that provides for commercial uses to serve community needs, and that protects the area's visual, recreational, and natural resources.

Objective A

Ensure adequate public services (e.g., fire protection, school facilities) and infrastructure (e.g., water supply, sewage treatment, utilities) for the area.

Policy 1: Future development should coincide with infrastructure and service capability and expansion.

Action 1.1: Require development projects to obtain "will-serve" letters from applicable service agencies.

Action 1.2: Evaluate the cumulative impact of all new development on public services, public facilities and the environment.

Action 1.3: For areas not served by a water system, future development projects shall be required to demonstrate, prior to permit issuance, that sufficient water exists to serve both domestic and fire flow needs of the development and that use of that water will not deplete or degrade water supplies on adjacent properties, or adversely impact water supplies for natural resources.

Policy 2: Encourage the timely expansion of special district facilities, including provisions for a satellite fire station in the Sunny Slopes area, water treatment facilities, television service, etc.

Action 2.1: Study the feasibility and desirability of consolidating service provision in the Long Valley area, as suggested in the Sphere of Influence Reports prepared by Mono LAFCO for the Birchim Community Services District (Sunny Slopes) and the Hilton Creek Community Services District (Crowley Lake/Hilton Creek).

Action 2.2: Study the feasibility and desirability of developing a community water system for the Crowley Lake/Hilton Creek area.

Objective B

Maintain the quality and livability of community areas.

Policy 1: Preserve and enhance existing single-family residential uses.

Action 1.1: Future residential development in community areas shall have a minimum lot size of 15,000 sq. ft. except for areas adjacent to existing development with lot sizes of 7,500-10,000 square feet, where the minimum lot size may be 10,000 square feet if individual septic disposal systems are not required.

Action 1.2: Through the provision of density bonuses, encourage clustering of residential units in areas designated for low density residential uses for sites of two acres or more.

Policy 2: Future development projects shall avoid potential significant environmental impacts or mitigate impacts to a level of non-significance, unless a statement of overriding considerations is made through the EIR process.

Action 2.1: Future development projects with the potential to have significant environmental impacts shall assess the impact(s) and recommend project alternatives and/or mitigation measures prior to project approval, in the manner required by General Plan policies.

Action 2.2: Study the feasibility and desirability of establishing a Design Review District and associated design review standards in the planning area.

Policy 3: Prevent incompatible adjacent land uses.

Action 3.1: Require adequate buffering (e.g., landscaping, physical barriers) to protect residential areas from non-residential, incompatible land uses.

Action 3.2: Provide adequate private open space in all residential areas and developments.

Action 3.3: Require higher density residential development to be compatible with the surrounding area and to provide sufficient open space.

Action 3.4: Encourage the development of higher density development within walking distance of the commercial area in Crowley Lake/Hilton Creek.

Objective C

Provide for commercial development which supplies the area with convenient and necessary goods and services.

Policy 1: Provide adequate land for existing and future commercial needs.

Action 1.1: Designate a sufficient amount of land to accommodate tourist and community commercial needs.

Action 1.2: Cluster commercial development in order to create a commercial core area ("village center") in Crowley Lake/Hilton Creek.

Action 1.3: Mixed uses (commercial and residential) may be allowed, provided these uses do not adversely affect the basic rural residential character of the area.

Action 1.4: For the existing mixed use areas in the Long Valley communities, adopt the Mixed Use ("MU") land use designation, defined as follows:

This designation provides for a wide range of resident and visitor oriented residential and commercial uses, including business, professional and retail uses. The designation also allows for the construction of mixed use buildings. All commercial development in the Long Valley communities, including that in the Mixed Use designation, shall comply with the commercial development performance standards contained in the Long Valley Area Plan.

Permitted Uses: Examples of permitted uses include recreational uses, commercial lodging, professional services, business services, small-scale community-oriented retail operations, food services, and residential uses.

Building Intensity: Minimum lot size is 10,000 square feet except for hotels, motels, condominiums, townhouses, and similar uses the minimum lot size is 20,000 square feet. Maximum building intensity is 15 dwelling units per acre for multiple-family residential units including apartments and condominiums. Motels may not exceed a maximum density of 40 units per acre.

Policy 2: Promote improvements in community commercial areas to increase their attractiveness and to rejuvenate existing commercial uses.

Action 2.1: All commercial development shall comply with the following commercial development performance standards:

- a. All commercial development shall comply with Objective B, Policy 2 and Action 2.1 of this Plan, which require avoidance or mitigation of any potential significant environmental impacts, unless a statement of overriding considerations is made.
- b. The project must comply with the design review standards established in accordance with Objective B, Policy 2, Action 2.2. Exterior signs and lighting shall be considered in the design review standards.
- c. The project shall not exceed a sustained or intermittent noise level of 60 dBA.
- d. The project shall supply adequate access, parking and loading areas.
- e. Exterior signs shall comply with the Mono County Sign Regulations.
- f. Uses involving or producing noxious fumes or odors shall not be permitted unless fumes or odors are treated or diffused prior to release from the generating source.
- g. Operations using and storing noxious chemicals including but not limited to pesticides and herbicides, other than those

packaged for resale, or large volumes of solvents or flammable liquids, will not be allowed.

Policy 3: Encourage the development of professional uses (e.g., clinic, doctor's office, law office) in the Crowley Lake/Hilton Creek commercial core, to provide for the needs of residents.

Policy 4: Allow the continuation of home occupations (as defined in the Mono County Land Development Regulations) which are not in conflict with surrounding uses.

Objective D

Provide for light industrial uses which supply the community with convenient and necessary services (e.g., material and equipment storage, wood lots, automotive repair).

Policy 1: Permit development of clean small-scale light industrial uses which provide local year-round employment, serve local needs tending to make the area industrially self-sufficient, and are environmentally compatible to the area.

Action 1.1: Designate a sufficient amount of land to accommodate light industrial needs.

Action 1.2: Pursue the acquisition of suitable public land for the remote placement of incompatible industrial uses.

Objective E

Provide for recreational and open space uses in and around the Long Valley planning area.

Policy 1: Ensure the preservation of open space in the planning area.

Action 1.1: Require in-filling of areas designated for residential, commercial, and industrial uses prior to allowing conversion of agricultural land or public open space.

Action 1.2: Designate lands owned by the LADWP for open space.

Policy 2: Discourage the extension of public and private facilities, especially roads, into open space or agricultural land.

Policy 3: Encourage recreational uses and activities in all seasons.

Action 3.1: Support increased all season recreational use of Crowley Lake.

Action 3.2: Encourage the California Fish and Game Commission, with the cooperation of the LADWP, to extend the fishing season at Crowley Lake until November 15.

Action 3.3: In cooperation with the LADWP, encourage recreational development at Crowley Lake, including development of winter use ski

trails, a winter campground/trailer park, water skiing, sailing, and concessions.

Policy 4: Maintain and increase recreational facilities for residents.

Action 4.1: Designate sites for neighborhood parks. Each park is encouraged to provide a multiple recreational setting with input from the service area population as to facilities, activities and design.

Action 4.2: Continue to promote multiple use of Whitmore Park in response to regional needs.

Action 4.3: Study the feasibility of developing bike paths/trail system throughout the area, including methods of funding such a system.

Policy 5: Ensure that those using recreation facilities contribute to the cost of providing and maintaining facilities.

Policy 6: Ensure that recreational facilities are compatible with adjacent land uses, the maintenance of environmental quality and the protection of property rights.

Action 6.1: Require all new development proposals to provide public access and rights of way to public open space, in conformance to the provisions of the Subdivision Map Act.

Objective F

Promote complementary and compatible uses of adjoining BLM, USFS, and LADWP lands.

Policy 1: Encourage a systematic prioritized land exchange policy to discourage development of isolated and remote private parcels; to discourage development of private parcels subject to public safety hazards; to discourage development of private parcels indispensable to sound natural resource management; to minimize long-term county and special district service costs; and to encourage acquisition of public lands for public facility and private uses.

Action 1.1: Identify those private parcels which by reason of their remote, isolated or hazard prone location could be considered for trade to public agencies.

Action 1.2: Identify those public parcels which by reason of their location could house otherwise incompatible public facilities or private uses (e.g., light industrial) and which should be considered for acquisition.

Action 1.3: Request the BLM to designate lands adjacent to community areas for potential future land disposal.

WHEELER CREST

GOAL: Retain, as nearly as possible, the character and quality of life presently enjoyed in the community through the year 2010.

Objective A

Prevent incompatible or conflicting uses within the Wheeler Crest community.

Policy 1: The timing and location of new residential developments shall be directed to areas with existing services or adjacent to areas with existing services (i.e., fire protection, water supply, sewage and utilities).

Action 1.1: In-fill, to the greatest extent possible, developed private land to the residential densities specified in this plan (i.e., Estate Residential designation, one-acre minimum lot size). Overall densities for areas outside existing developed areas shall not exceed one unit per two acres (Estate Residential designation, two acre minimum lot size). As specified in the Plan EIR and other Plan policies, larger minimum lot sizes may be appropriate for sensitive resource areas.

Action 1.2: Require developers, at time of application submittal, to demonstrate adequate service availability (water supply, fire flow, sewage/septic, utilities).

Action 1.3: If any extension of services will be required for a proposed project, an economic analysis, including projected public costs, shall be required.

Action 1.4: Consider, and mitigate, the cumulative impact of any new development prior to project approval.

Action 1.5: The residential density of any proposed project shall be consistent with surrounding densities as built.

Action 1.6: Petition the Board of Supervisors to establish a development fee and/or land bank for community uses.

Policy 2: Residential development shall have a minimum impact on the environment.

Action 2.1: Adequate open space shall be provided as part of any proposed development.

Action 2.2: Preserve adequate solar access for all existing and proposed development.

Action 2.3: Discourage installation of street lights unless necessary for safety reasons.

Action 2.4: Place all utilities underground unless the geology will not allow it.

Action 2.5: Develop design review standards indicating desired architectural type and outside treatments that will harmonize with the rural character of the area.

Action 2.6: In order to preserve the brilliant night sky quality of the Wheeler Crest area, adopt a "dark sky" ordinance to restrict local night lighting.

Action 2.7: In order to better preserve continuous open areas for deer and wildlife use, and to facilitate maintenance of a residential structure's defensible space for wildland fire protection purposes, encourage Accessory Dwelling Units be attached to the primary dwelling.

Policy 3: Retain the rural residential character of the entire study area.

Action 3.1: Permit only single-family residential and related accessory structures. Bed-and-breakfast establishments shall also be permitted on parcels of 100 acres or greater, if designed to be compatible with existing residential uses, and if the undeveloped portion of the parcel remains as open space or agricultural use in perpetuity.

Action 3.2: General commercial uses are neither compatible, nor needed, within the residential area, and shall be prohibited. Bed-and-breakfast establishments shall be exempt from this provision, as detailed in Action 3.1.

Action 3.3: Permit small-scale agricultural uses (including the keeping of animals for personal use) within the mandate of the county requirements for the ER designation, or more-restrictive CC&Rs, as applicable.

Action 3.4: Avoid community strife by respecting current, more-restrictive CC&Rs, as well as county land use designations.

Action 3.5: Consider amending the Land Development Regulations or this Plan in order to further restrict the intensity of animal use in residential areas.

Policy 4: Encourage a diversity of architectural styles that reflect a rural residential lifestyle.

Action 4.1: Permit and encourage innovative construction techniques, as long as permitted by local ordinance and building codes (i.e., passive/active solar design).

Policy 5: Encourage the transfer of privately owned, environmentally sensitive or isolated land within the Wheeler Crest planning area.

Action 5.1: Identify parcels incompatible for private use by virtue of location and/or environmental sensitivity (i.e., avalanche area, deer migration route, etc.).

Action 5.2: Coordinate with the USFS or BLM to exchange public land that is more suitable for private ownership.

Objective B

Preserve the value of land dedicated or deeded for community services, natural resources or recreation use as development occurs in the planning area (parks, community centers, equestrian trails, ski trails, hiking trails, tennis courts, deer migration corridors, etc.).

Policy 1: When utilities are installed in new residential areas, ensure that they are adequate for future local needs and are compatible with the rural residential flavor of the planning area.

Policy 2: Provide sites and/or facilities to accommodate a variety of community activities.

Action 2.1: Closely regulate any proposed community facility to ensure compatibility with rural residential and open space uses.

Action 2.2: As necessary, provide an environmental impact analysis of all proposed community facilities.

Action 2.3: Evaluate and improve, if necessary, all utilities to adequately serve community facilities.

Action 2.4: Provide incentives to encourage private parties to contribute toward necessary community facilities.

Policy 3: Guarantee that improvements for community use will increase the attractiveness of the use, and that the use will be compatible with residential uses and surrounding resource values.

Action 3.1: Buffer all community use from residential uses with a combination of open space, plantings, and physical barriers.

Action 3.2: Evaluate traffic, safety and air quality impacts of all proposed community facilities.

Action 3.3: Buffer new developments from deer corridors or other key wildlife habitats using a combination of open space, plantings and physical barriers.

Objective C

Provide for recreational and open space uses in and around the Wheeler Crest area.

Policy 1: Preserve adequate open space rangeland to protect movement of wildlife, cattle and pack stock.

Action 1.1: Monitor and discourage the conversion of viable agricultural land.

Policy 2: Prevent the intrusion of development into rangelands, with special attention to protecting range vegetation and water supply.

Action 2.1: Discourage extensions of public and private facilities, especially roads, into open space rangeland as defined by California Department of Fish and Game, BLM, and USFS.

Policy 3: Provide for recreational and aesthetic open space in and around the Wheeler Crest planning area.

Action 3.1: Utilize Quimby Act fees to finance park and recreation development. Capture currently available state and federal monies allocated for these purposes.

Policy 4: Ensure that recreational facilities are compatible with land uses, maintain environmental quality and protect property rights.

Action 4.1: Recreational needs should be considered in the planning and development of circulation and transportation improvements.

Action 4.2: Maintain and enhance recreation opportunities.

Policy 5: That existing National Forest and BLM lands surrounding the community be retained in public ownership or be utilized for community purposes.

Action 5.1: Coordinate all planning and development activities adjacent to public lands with the affected public entity.

Action 5.2: Assist in the preservation of valuable deer habitat by establishing a land bank, or other mechanisms, to retain migration corridors.

Action 5.3: Coordinate with public agencies to preserve and enhance natural stream courses.

Action 5.4: Consider requiring a fire safety buffer between public land and any new development.

Action 5.5: Assign Open Space designation for surrounding LADWP lands.

Policy 6: That isolated public lands within the study area be exchanged for private lands better suited for watershed protection and other public purposes.

Action 6.1: Identify and designate those lands which, by reason of their remote, isolated, or hazardous location, should be exchanged.

Policy 7: Encourage sound management and utilization of public lands to benefit local recreational and energy needs.

Action 7.1: Any proposed hydroelectric facilities shall be consistent with the goals of this plan.

Objective D

Ensure adequate public services (e.g., fire protection) and infrastructure (e.g., water supply, sewage treatment, utilities) for the area.

Policy 1: Ensure that necessary public facilities are planned for as new residential development is proposed. Ensure that adequate land, in appropriate locations, is set aside for public facilities.

Action 1.1: The Mono County Health Department and the Wheeler Crest Community Services District shall evaluate, as the community expands, the need for community water systems in the planning area.

Action 1.2: Maximize groundwater recharge by protecting natural drainage areas and encouraging their preservation as open space.

Action 1.3: Require utilization of all water saving devices at building construction.

Policy 2: Necessary public facilities shall be located and designed to be compatible with surrounding land uses.

Action 2.1: All proposed public facilities shall provide sufficient buffering to protect residential areas from noise and visual impact.

Action 2.2: Provide adequate parking, snow storage, underground utilities, etc., in accord with the nature and function of the facility.

Objective E

Provide for a quality residential life by maintaining and improving the existing housing stock while ensuring that housing needs of the entire community are being met.

Policy 1: Conserve, by maintaining or rehabilitating, the planning area's housing stock.

Action 1.1: Allow alternative housing construction modes, as long as these conform architecturally to existing homes (i.e., modular, manufactured, etc.) and retain the rural-residential character.

Policy 2: Improve the supply of buildable land by encouraging land exchanges of undevelopable parcels in wet meadow and avalanche-prone areas for more suitable areas.

Objective F

Protect and enhance the environmental resources in the area which contribute to the quality of life and form the basis for the recreation-oriented local economy; i.e., open space, air and water quality, scenic resources, streams and wildlife.

Policy 1: Protect all year-round streams from encroachment or development that detracts from their natural beauty

Action 1.1: Witcher and Birch creeks have been identified by the DFG as locations for the reintroduction of Lahontan cutthroat trout. Require an environmental analysis for any project that may impact this resource.

Action 1.2: Utilize open space and drainage easements as well as clustering of major new development as stream preservation tools.

Action 1.3: Adopt erosion control and grading regulations that will minimize removal of natural vegetation to help prevent downstream sedimentation.

Action 1.4: Prohibit artificial redirection of water courses, especially Lower Rock Creek, Witcher Creek and Birch Creek.

Action 1.5: Maintain and preserve existing vegetation and habitat along stream courses.

Policy 2: Preserve clean surface and groundwater resources.

Action 2.1: Maximize groundwater recharge by protecting natural drainage areas. Ensure their preservation by leaving them in open space.

Action 2.2: Monitor groundwater levels and quality and consider initiation of a groundwater management plan to ensure protection of the resource.

Action 2.3: Cooperate and coordinate with Lahontan Regional Water Quality Control Board in protecting the area's water resources. This may include requirement of on-site sedimentation control devices.

Action 2.4: Promote water conservation through the use of native and/or drought resistant plantings.

Policy 3: Protect wildlife and native plants, especially rare and endangered species.

Action 3.1: Create a list of known or potential rare and endangered plants that may exist within the study area. Retain the expertise of the California Native Plant Society.

Action 3.2: Require an environmental analysis for any proposed land use located in areas that are known habitats for rare and endangered wildlife or flora. The analysis would study the effects of the proposed development upon this resource and how adverse impacts would be mitigated.

Action 3.3: The entire planning area is either within or in close proximity to valuable deer migration routes. Thus all projects, other than homes on subdivided lots, shall assess and mitigate to the greatest degree possible, the impacts of development on this resource. Mitigation measures may include but not be limited to: clustering; reduction of density; large minimum lot sizes; prohibiting construction in certain locations; relocation; contribution to a land bank for alternate routes; fencing of gardens/landscaping; protection of special habitat types such as wet meadows; and building setbacks.

Action 3.4: Restrict off-road vehicle use in areas of environmental sensitivity (i.e., deer migration and habitat areas).

Action 3.5: Support the DFG's continuing program to reintroduce native game species (bighorn sheep).

Policy 4: Protect open space and scenic values within and around the community.

Action 4.1: Require developers/builders to protect views from parcels which are on the "upper" side of a proposed development. This applies to any affected property regardless of whether it is inside or outside the project boundaries.

Action 4.2: Retain areas inappropriate for development (i.e., wet meadows, avalanche hazard zones) in natural open space.

Action 4.3: Prohibit road extensions into valuable open space areas.

Policy 5: Identify and protect significant historical and archaeological sites from damage or destruction.

Action 5.1: Any proposed project in an area having potential archaeological resources shall conduct a site assessment prior to project approval or any grading activity.

Action 5.2: Cluster or relocate projects away from unique cultural resources.

Action 5.3: Revise county procedures regarding cultural resources to assure recordation/preservation prior to site disturbance.

Policy 6: Develop programs that prevent the harassment of wildlife by domestic animals.

Action 6.1: Support enforcement of the leash law in the Wheeler Crest community.

Action 6.2: Support active cooperation of community organizations.

Policy 7: Preserve and protect native vegetation and sizable stands of native trees.

Action 7.1: Work with all federal, state, and local agencies to implement and maintain tree preservation programs.

Action 7.2: Site plans for all proposed projects, including single-family homes, shall identify all mature native trees and native plants. The plans should demonstrate a reasonable attempt to retain as many native trees and native plants as possible.

Objective G

Ensure public safety from the unreasonable risks presented by natural hazards (i.e., seismic, avalanche, flood, wildland fire).

Policy 1: Take all feasible steps to reduce the threat to life and property from fire by implementing effective fire prevention measures.

Action 1.1: Consider requiring expanded fuel breaks and greenbelts between new development and public lands.

Action 1.2: Where feasible, require two access points (built to current standards) for all development projects that are easily accessible to all emergency vehicles.

Action 1.3: Require that vegetation within new developments use native and drought resistant species.

Action 1.4: Require a minimum of 30 feet between all new residences unless existing structures make this unfeasible.

Action 1.5: Set up an emergency evacuation plan that is available prior to a fire breaking out. This could also be used for other natural disasters.

Action 1.6: Propane, gasoline, and other fuel storage should be confined to peripheral locations to provide a safety buffer from areas of human occupancy.

Action 1.7: All new development shall comply with all requirements of the Wheeler Crest Fire Protection District (FPD), as well as existing county requirements. Fire hydrants, water storage and water lines shall be provided as necessary to guarantee sufficient fire flow.

Action 1.8: Require a consistent street naming and housing numbering system for the area and require all names and numbers to be clearly visible.

Action 1.9: The County, supported by the FPD, shall continue to require road designs that guarantee adequate width, moderate grades, and wide-turning radii, so that emergency vehicles can quickly and safely respond to any call.

Action 1.10: Work with applicable agencies to provide a secondary/emergency access route for the Wheeler Crest community (see Appendix C for emergency access route map).

Policy 2: Establish appropriate siting and development standards in order to reduce the risks of earthquakes.

Action 2.1: Assist in enforcing state seismic requirements.

Policy 3: Identify avalanche danger areas and protect life and property accordingly.

Action 3.1: Implement the avalanche policies and mitigation measures in the Safety Element.

Policy 4: Develop and provide an adequate level of safety-oriented services: sheriff, paramedic and fire.

Action 4.1: Utilize the Sheriffs and Public Works to assist in monitoring and evacuating procedures during natural disasters.

Action 4.2: Promote increased emergency medical services for the community.

Action 4.3: Support and monitor compliance of the county's "No Shooting" ordinance.

TRI-VALLEY

GOAL: Preserve the rural and agricultural character of the Tri-Valley area.

Objective A

Integrate compatible residential development into the existing community character in Benton.

Policy 1: Allow for the continuation of growth in Benton in a manner that promotes and protects its rural and agricultural character.

Action 1.1: Gross densities for residential development in Benton shall not exceed two dwelling units per acre. For parcels 40 acres or greater, clustering shall be encouraged.

Action 1.2: Encourage agricultural landowners to utilize the property-tax incentives for agricultural land provided for in the county's Williamson Act program.

Action 1.3: Require new development to provide adequate buffering of incompatible uses (e.g., landscaping, physical barriers, large setbacks) to protect agricultural areas from residential and other incompatible land uses.

Action 1.4 Subdivisions of more than four parcels shall include paved streets.

Action 1.5: All tract maps shall include an in-depth hydrological study including flow tests and pressure/drawdown tests to ensure that there is an adequate water supply and that there will be no impact on neighboring wells.

Action 1.6: Discourage installation of streetlights unless necessary for safety reasons. Encourage shielded light sources whenever possible.

Action 1.7: Permit agricultural uses, including the keeping of animals, in all land use designations.

Action 1.8: Encourage access and equestrian trails through developments to public lands.

Policy 2: Prevent the intrusion of development into agricultural areas in order to protect agricultural resources.

Action 2.1: Monitor and discourage the conversion of viable agricultural land to non-agricultural uses.

Action 2.2: Agricultural activities shall have precedence over incompatible uses/activities in the Tri-Valley area.

Action 2.3: Carefully evaluate subdivisions outside existing community areas. Consideration should be given to assigning large minimum parcel sizes.

Action 2.4: Encourage private landowners with visual, environmental and agriculturally significant property to grant or sell a conservation easement to a land conservation organization to protect the land as open space and/or agricultural use.

Policy 3: Encourage residential development in areas that will minimize the impact on the environment.

Action 3.1: Encourage the completion of adequate studies of the flooding potential throughout the Tri-Valley area.

Action 3.2: Encourage the exchange of environmentally sensitive private lands for public lands.

Action 3.3: Continue to enforce the provisions of the county's floodplain combining district in the Tri-Valley area.

Policy 4: Encourage the timing of growth to allow for efficient use of existing public facilities and services and for adequate planning for additional public facilities and services.

Action 4.1: Allow additional residential subdivision only when adequate services (including fire protection, water, and school facilities) are available or planned for development. The proponent of a residential subdivision shall include this assessment as part of the environmental review process.

Action 4.2: To permit the efficient delivery of public services, encourage residential development in Benton to take place on parcels contiguous to existing development.

Action 4.3: All tract maps shall include an in-depth hydrological study including flow tests and pressure/drawdown tests to ensure that there is an adequate water supply and that there will be no impact on neighboring wells.

Action 4.4: New development projects, including subdivisions, shall comply with fire safe regulations and obtain "will serve" letters from the White Mountain Fire Protection District.

Action 4.5: Subdivisions and/or building permits shall not be approved in areas that are withdrawn and/or not within the White Mountain Fire Protection District until such areas are brought into the district.

Objective B

Preserve the agricultural character of the Hammil Valley.

Policy 1: Protect agricultural uses from the encroachment of incompatible land uses.

Action 1.1: Limit residential development in Hammil Valley in order to minimize agricultural-residential conflicts.

Action 1.2: Prohibit scattered residential development in Hammil Valley that would increase agricultural-residential conflicts.

Action 1.3: Encourage agricultural landowners to utilize the property-tax incentives for agricultural land provided for in the county's Williamson Act program.

Action 1.4: All tract maps shall include an in-depth hydrological study including flow tests and pressure/drawdown tests to ensure that there is an adequate water supply and that there will be no impact on neighboring wells.

Policy 2: Prevent incompatible adjacent land uses.

Action 2.1: Require developers to provide adequate buffering (e.g., landscaping, physical barriers, large setbacks) of incompatible uses to protect agricultural areas from residential and other incompatible land uses.

Action 2.2: Discourage the extension of public and private facilities, especially roads, into open space or agricultural land.

Policy 3: Prevent the intrusion of development into agricultural areas in order to protect agricultural resources.

Action 3.1: Monitor and discourage the conversion of viable agricultural land to non-agricultural uses.

Action 3.2: Agricultural activities shall have precedence over incompatible uses/activities in the Tri-Valley area.

Action 3.3: Encourage private landowners with visual, environmental and agriculturally significant property to grant or sell a conservation easement to a land conservation organization to protect the land as open space and/or agricultural use.

Policy 4: Encourage the continuation of agricultural production through implementation of the Development Credits Program.

Action 4.1: Under the Development Credits Program, in the Hammil Valley:

- a. No parcel may be created less than 10 acres in size.
- b. One development credit permits the construction of one single-family residence.

Action 4.2: Consider amending the 10-acre minimum parcel size.

Action 4.3: Prior to project approval, development credits shall be assigned by the decision-making body having authority to approve or deny the project. Development credits shall be assigned in accordance with the total acreage under a single ownership. The total number of development credits shall be assigned in accordance with the following rules (see Table 1):

- a. For lands under a single ownership that total 10 acres or less, one development credit shall be assigned.
- b. For lands under a single ownership that total 40 acres or less, one development credit shall be assigned for each 10 acres.
- c. For lands under a single ownership that total more than 40 acres, four development credits shall be assigned for the first 40 acres, and one additional development credit shall be assigned for each additional 40 acres, or portion thereof greater than 10 acres.

Action 4.4: The assigned development credits shall be recorded in a Development Credits Ledger. The Development Credits Ledger shall be maintained by the Planning Division.

Action 4.5: One development credit is considered to have been used for each existing dwelling unit on lands under a single ownership. Those lands shall be appropriately debited in the Development Credits Ledger. Accessory Dwelling Units, pursuant to Chapter 16 of the Mono County Land Development Regulations, shall be permitted and shall not be considered as a development credit.

Action 4.6: Property owners who own more than 40 acres must submit and obtain approval of a Master Plan for all the lands under their ownership prior to the use of any of the development credits assigned to lands under their ownership.

Action 4.7: Property owners who own a 1/4, 1/4 section or 40 acres or less need not file a Master Plan and may use their development credits through the normal county land development procedures. Parcels of forty acres or less may apply for or be assigned Agricultural or Rural Residential designation. Development credits shall be debited to the Development Credits Ledger at the time of project approval.

Action 4.8: The Master Plan shall designate the owner's assignment of development credits to each parcel under their ownership. Upon approval of the Master Plan by the decision-making body having authority to approve or deny the project the development credits shall be assigned to the parcels as stipulated by the Master Plan. The Development Credits Ledger shall be posted accordingly.

Action 4.9: The development of parcels that are the subject of a Master Plan shall comply with all applicable Mono County land use designation

and development requirements. In addition, the decision-making body having authority to approve or deny the project shall make a finding that the proposed project is in conformance to the approved Master Plan.

Action 4.10: Wherever feasible, development shall occur on clustered 10-acre parcels. The location of the residential clusters shall be guided by the following policies:

- a. Residential development shall occur adjacent to existing residential development, or
- b. Residential development shall occur on soils rated Class II or poorer by the Soil Conservation Service land use capability classifications.

Action 4.11: When the size, location, or configuration of the lands under a single ownership permits no alternative location for the use of the assigned development credits other than adjacent to agricultural operations, the parcels shall be configured to allow the maximum setback for a building site from the agricultural operation.

Action 4.12: The Master Plan shall designate the phasing of development.

Action 4.13: The Master Plan may be amended utilizing County procedures for amendment of a General Plan.

Action 4.14: The Master Plan shall designate those lands with no remaining development credits as "Exclusive Agriculture."

Action 4.15: Prior to or upon the sale of an "Exclusive Agriculture" parcel that has no remaining development credits, the seller shall disclose to the buyer that the parcel has no remaining development credits.

Action 4.16: "Exclusive Agriculture" parcels of 160 or more acres are permitted one single-family dwelling and one Accessory Dwelling Unit pursuant to Chapter 16 of the Mono County Land Development Regulations. When appurtenant to agricultural use, other farm outbuildings and quarters for farm labor may be permitted.

Action 4.17: Contiguous parcels designated as "Exclusive Agriculture" that total 160 acres or more may be combined under a single ownership. The provisions of Actions 2.15 and 2.16 shall then be applied to the larger parcel.

Action 4.18: When sold, parcels that are the subject of an approved Master Plan shall retain the number of development credits assigned to them by the Master Plan and recorded in the Development Credits Ledger. When sold, parcels that are not the subject of an approved Master Plan shall be assigned development credits in accordance with Action 2.3 of the Development Credits Program. The lands that remain

under the ownership of the selling party shall be reassigned development credits in accordance with Action 2.3 of the Development Credits Program.

Policy 5: Allow family farming mixed with large farms.

Policy 6: Allow exclusive farm worker housing on parcels that support ongoing agricultural operations.

Objective C

Integrate additional compatible development into the existing community of Chalfant.

Policy 1: Allow for the continuation of growth in Chalfant in a manner that promotes and protects its rural and agricultural character.

Action 1.1: Gross densities for residential development in Chalfant shall not exceed one dwelling unit per acre. For parcels 10 acres or greater, clustering shall be encouraged.

Action 1.2: Small parcels (less than 10 acres) designated for agricultural uses contiguous to residential areas, not used primarily for agricultural purposes, may be considered for redesignation to a residential land use.

Action 1.3: Roads within subdivisions of more than four parcels shall at a minimum have a hard surface such as decomposed granite (DG).

Action 1.4: Discourage the installation of streetlights unless necessary for safety reasons. Encourage shielded light sources whenever possible.

Action 1.5: Permit small-scale agricultural uses, including the keeping of animals for personal use, in all land use designations, within the mandate of the county requirements for the Estate Residential (ER) designation.

Policy 2: Encourage residential development in areas that will minimize the impact on the environment.

Action 2.1: Encourage the completion of adequate studies of the flooding potential throughout the Tri-Valley area.

TABLE 01: DEVELOPMENT CREDIT ASSIGNMENTS

Nominal Parcel Size (Acres)	Actual Parcel Size (Acres)	Development Credits
10	0.1-19.4	1
20	19.5-29.4	2
30	29.5-39.4	3
40	39.5-49.4	4
50	49.5-89.4	5
90	89.5-129.4	6
130	129.5-169.4	7
170	169.5-209.4	8
210	209.5-249.4	9
250	249.5-289.4	10
290	289.5-329.4	11
330	329.5-369.4	12
370	369.5-409.4	13
410	409.5-449.4	14
450	449.5-489.4	15
490	489.5-529.4	16
530	529.5-569.4	17
570	569.5-609.4	18
610	609.5-649.4	19
650	649.5-689.4	20

Action 2.2: Encourage the exchange of environmentally sensitive private lands for public lands.

Action 2.3: Continue to enforce the provisions of the county's Floodplain Combining District in the Tri-Valley area.

Action 2.4: All tract maps shall include an in-depth hydrological study including flow tests and pressure/drawdown tests to ensure that there is an adequate water supply and that there will be no impact on neighboring wells.

Policy 3: Encourage residential land use patterns in Chalfant that permit the efficient delivery of public services.

Action 3.1: Encourage residential development in Chalfant to take place on parcels contiguous to existing development.

Policy 4: Encourage the timing of growth that will allow for efficient use of existing public facilities and for adequate planning for additional public facilities.

Action 4.1: Allow additional residential subdivision only when adequate services (including fire protection, water, and school facilities) are available or planned for development. The proponent of a residential subdivision shall include this assessment as part of the environmental review process.

Action 4.2: New development projects and subdivisions shall comply with fire safe regulations and obtain "will-serve" letters from the Chalfant Valley Fire Department.

Objective D

Provide adequate commercial and public facilities and improved access to county services to serve visitors and residents in the Tri-Valley.

Policy 1: Designate adequate lands compatible with the rural character of the Tri-Valley along US 6 and SR 120 in Benton and Chalfant for small-scale commercial uses that serve the communities.

Policy 2: Allow only agriculture-related commercial uses in Hammil Valley.

Policy 3: Prevent the establishment of regional commercial facilities.

Policy 4: In Benton, encourage the establishment of commercial enterprises oriented toward providing services to highway travelers.

Policy 5: Allow the continuation of home businesses in the area.

Policy 6: Promote safer traveling on US 6.

Action 6.1: Create passing lanes on US 6 on the Matthew grade.

Action 6.2: Promote opening of SR 120 year round.

Action 6.3: Promote turnout lanes into housing and business areas.

Action 6.4: Promote a rest stop north of Benton.

Action 6.5: Encourage reduced speed in community areas and speed enforcement in communities.

Action 6.6: Work with agencies to provide enhanced public transportation from the Tri-Valley area to county services.

Action 6.7: Install information kiosks at key locations to provide information for visitors and locals.

Action 6.8: Encourage Caltrans to install “open range” signs in the Tri-Valley area.

Policy 7: Projects shall evaluate and consider communitywide planning to promote harmonious and balanced development that protects the rural character of the Tri-Valley.

Action 7.1: Lands released into private ownership should be deed restricted prohibiting water exportation off site.

Action 7.2: New projects should provide public access to public lands through trail easements or dedications. Historical use patterns should be accommodated.

Policy 8: Encourage the Eastern Sierra Unified School District to provide K-through-12 education in the Tri-Valley area.

Action 8.1: Encourage the BLM to provide property for school district use.

Action 8.2: Encourage the Eastern Sierra Unified School District to provide K-through-12 education in the Tri-Valley area.

Objective E

In Benton, encourage the establishment of commercial enterprises oriented toward providing services to residents as well as tourists and highway travelers.

Policy 1: Define a commercial “core” area with a concentration of shops and services near the intersection of SR 120 and US 6.

Action 1.1: Develop commercial design guidelines that reflect Benton’s history, character and scale.

Action 1.2: Pursue grants and other financing opportunities for “main street” planning and design efforts.

Policy 2: Encourage commercial and community services that enhance the well-being and quality of life of all Benton residents.

Action 2.1: Improve the communication and energy infrastructure including development of sustainable resources.

Action 2.2: Explore establishing a local cemetery.

Action 2.3: Explore developing a County social services center.

Policy 3: Revise signage to promote Benton as a destination in its own right.

Policy 4: Explore the potential for siting and developing rural potable and wastewater treatment facilities.

Objective F

Protect Natural Resources, and provide for recreational and open-space uses in the Tri-Valley area.

Policy 1: Utilize the open space provided by federal lands to ensure that the open-space needs of the community are met and to provide buffer space between communities.

Action 1.1: Designate appropriate federal lands as public lands. Public land shall be used for open space or public purposes such as schools, parks, recreational landing strip, etc.

Action 1.2: Designate a landing strip for agricultural and emergency uses in Hammil Valley.

Action 1.3: Encourage cluster development in Specific Plans to provide for publicly accessible open space.

Policy 2: Provide adequate land for the recreational needs of the area.

Action 2.1: Work with government and private property owners to create an equestrian/recreational trail system in the Tri-Valley area that addresses the following:

- a. Trail(s) from Inyo County line to the Nevada border;
- b. Consider expanding trail system into Inyo County; and
- c. Trails should be designed to access public lands east and west of US 6 in as many areas as possible.

Action 2.2: Require new development to allocate sufficient land and facilities to meet the recreational needs of residents of the development and to provide for its applicable share of Tri-Valley recreational needs.

Action 2.3: Consider establishing a fee system for all new development and building permits dedicated to the construction and maintenance of recreational needs in the Tri-Valley area.

BENTON HOT SPRINGS VALLEY

GOAL: Preserve the historic, rural and agricultural character of the Benton Hot Springs Valley.

Policy 1: Preserve and restore historic features of Benton Hot Springs.

Action 1.1: Support public use and appreciation of Benton Hot Springs' historic properties, including the establishment of museums and exhibits.

Action 1.2: Encourage and support, as possible, restoration of historic structures and new construction within the historic town that reinforces and complements the town's historic design and character.

Action 1.3: Support the landowner's efforts to convert nonconforming structures (i.e., mobile homes and trailers) into structures that fit with the historic town character.

Action 1.4: Apply the Historic Building Code to Benton Hot Springs' historic properties rather than the Uniform Building Code. Support and/or approve variances to local, state and federal regulations when such variances are determined to be environmentally sound and safe and are consistent with furthering preservation of historic resources.

Policy 2: Maintain the open space and rural character of Benton Hot Springs meadow.

Action 2.1: Encourage grazing and agricultural uses of Benton Hot Springs meadow and irrigated pasture lands, as opposed to intensive development, in order to preserve open-space values.

Action 2.2: Support conservation practices and activities to enhance and maintain wildlife, livestock, visual, and recreation benefits. If so desired by the landowner, support conservation and visual easements and tax-reduction incentives as affordable means for open-space protection. Determine that farming and ranching activities are appropriate uses and activities within these undeveloped areas.

Action 2.3: Encourage the clustering of intensive land use and development activities within and adjacent to the historic town to avoid significant encroachment on open-space areas.

Action 2.4: Support development of additional water sources and ponds to enhance habitat for wildlife and livestock.

Action 2.5: Support actions to mitigate flood damage potential within and adjacent to the historic town.

Policy 3: Encourage uses and businesses that support and complement, or do not seriously detract from, Benton Hot Springs' historic, hot springs, agricultural and rural attributes.

Action 3.1: Support using Benton Hot Springs' historic structures for residential housing and tourism services.

Action 3.2: Provide visitor services, including gas station, store/market, food, gift shops, museums and exhibits, lodging, and hot springs access, within and adjacent to the historic town.

Action 3.3: Encourage agricultural activities, such as aquaculture, greenhouse gardening, and field crops, in addition to livestock rearing.

Action 3.4: Allow for the development of short-term recreational-vehicle facilities and recreation special events in areas adjacent to the historic town and along SR 120.

Action 3.5: Allow single-family residential development (estate residential, rural residential, and larger lots with five-acre minimums) in locations adjacent to existing residential development (Benton Paiute Reservation and Benton historic town) and outside of open space (agricultural) areas.

Action 3.6: Encourage Benton Hot Springs to annex into the White Mountain Fire Protection District.

OASIS

GOAL: Protect agricultural and natural resource values in the area.

Objective A

Preserve the agricultural lands and natural resource lands in the Oasis area.

Policy 1: Designate existing agricultural lands for agricultural use in the Land Use Element, and initiate associated redesignation amendments.

Action 1.1: In accordance with the California Environmental Quality Act (CEQA), require the preparation of an Environmental Impact Report (EIR) for projects that may convert agricultural lands to other uses.

Action 1.2: Encourage agricultural land owners to utilize the property-tax incentives for agricultural land provided for in the county's Williamson Act program.

Action 1.3: Inform owners of critical wildlife habitat areas of the potential for open-space easements to protect such areas and of the potential for property-tax adjustments.

CONWAY RANCH SPECIFIC PLAN – LAND USE POLICIES

(Note: The following summarizes the goals and objectives of the Conway Ranch Specific Plan. Detailed policies and standards are contained in the Specific Plan and should be consulted.)

GOAL: Create a private resort development that will provide additional lodging, residential, and recreational facilities within the Mono Basin.

General Land Use Objectives

The basic design principle for the Conway Ranch Specific Plan will be the creation of a private resort community which has an open ranch-like setting. Building structures will be low-profile with a unified texture and design compatibility. The design of all structures will be subordinated to the theme of the ranch and to the natural setting. The concept of the land use plan is to cluster structures of related form, color and texture. The expression of building structures will be minimized to avoid the staccato effect which arises from the placement of individual, isolated, unrelated structures. Mixed densities and land uses shall be utilized to provide a variety of resort accommodations and residential development within the planning area. Maximum number of total residential/resort units shall not exceed 690 units for an overall planning area development density of 0.80 units/acre.

An adequate level of services, facilities and infrastructure shall be provided through the phased implementation of a public facilities plan.

The development will provide a flexible plan to accommodate improvements to the open space elements and changes in lifestyle uses.

Residential Objectives

Provide for a development that is planned as a unified and integrated whole.

Provide for development that incorporates environmental sensitivity into design features and amenities.

Provide for a variety of housing alternatives.

Provide for a transfer of density and product types from one parcel to another to accommodate economic fluctuations and market trends, but not to exceed a total of 690 units.

Commercial/Resort Objectives

Provide for a unified commercial lodging center that will serve as the focal point of the community.

Provide for development of a commercial core with a range of services, including retail and service commercial, which will be necessary to meet the specialized needs of the resort community.

Provide resort accommodations for transient occupancy.

Public Facilities Objectives

Provide adequate public facilities and services such as water supply systems, sewage facilities, solid waste disposal, fire protection, security, first aid, road maintenance, and snow removal which will allow the Conway Ranch to function as a largely self-contained community and thereby minimize the impact on existing service providers and service levels of the county.

Provide all operational services by the association and the various public utility companies.

Provide adequate public utility easements during the development phases. The association shall have the authority to issue subsequent easements if required to meet future needs.

Recreational Open Space Objectives

Provide recreational amenities which promote the region's reputation for recreation and strengthen the local economy.

Provide recreational uses which are consistent with the character and open-space goals of the project.

Provide for uses that can be meshed with the adjoining natural open areas.

Natural Open Space Objectives

Provide for design and construction methods that will protect the natural open areas to be retained in the Specific Plan.

Provide operational policies, rules, and regulations to protect the wildlife habitat and existing character of the natural open space areas.

Housing Objectives

Provide a variety of high-quality housing alternatives and associated amenities to attract a variety of new recreationists and second-home buyers to Mono County.

Ensure an adequate supply of locally available affordable employee housing.

Ensure that housing structures are sensitively designed to be compatible with the natural setting.

Circulation Objectives

Provide for a system of primary and secondary private roadways which will safely accommodate traffic volumes associated with projected land uses and densities.

Establish design and improvement standards for private roadways which will reduce visual impacts and maintain a semi-rural ("country lane") character.

Provide a system of trails and bike paths to accommodate non-motorized forms of transportation and recreational uses.

Open Space/Conservation Objectives

Retain significant portions of the planning area as open space to preserve scenic values and natural resources.

Ensure the preservation of designated natural open space areas.

Utilize recreation open space to enhance the visual appearance of project development and create diversified recreation opportunities.

Protect and preserve wildlife habitat.

Protect and preserve surface and groundwater resources.

Maintain air quality and conserve energy resources.

Protect and preserve soil and vegetation resources.

Seismic Safety Objective

Develop a residential resort community that minimizes potential threat to human safety and physical damage resulting from seismic activity.

Safety Objective

Construct and operate the Conway Ranch project in a manner that minimizes potential hazards to human safety or property and promotes sound safety practices.

Noise Objective

Minimize noise levels on site to provide a setting which is relaxing and conducive to creating a quality recreational experience.

Scenic Highways and General Aesthetic Objectives

Preserve the scenic quality of the lands abutting major roads.

Present an overall aesthetically pleasing development which does not degrade the visual resources of the area.

Recreation Objectives

Develop a year-round destination resort community oriented toward fly fishing, golf, and other activities, to encourage year-round tourism in Mono County.

Protect and enhance the natural resources of the site to maximize the outdoor recreational experience and preserve the existing character of the Mono Basin.

Manage a portion of project open space for the provision of specific recreational facilities to enhance the recreational diversity on the site.

MAMMOTH YOSEMITE AIRPORT LAND USE PLAN

GOAL: Promote the orderly development of the area surrounding the Mammoth Yosemite Airport (formerly Mammoth Lakes Airport) in order to protect the general welfare of the public, enhance the safety of air navigation and traffic, and maintain the utility and economic viability of the facility.

Objective A

All development in the Airport Land Use Planning Area must comply with the following general land use provisions:

Policy 1: All non-federal land uses designated for the airport planning area are subject to the requirements of the Mono County Land Use Designations and Land Development Requirements except as specifically modified by the Airport Land Use Plan.

Policy 2: The ALUC must review and approve all proposed private land uses prior to formal action by jurisdictional agencies. ALUC review will focus on compatibility with the adopted airport Land Use Plan and compliance with the safety provisions, height restrictions, and visual and noise standards.

Policy 3: ALUC criteria regarding land use policy are intended to augment and amend the county General Plan Land Development Regulations and, where applicable, may be incorporated into the BLM and USFS plans for the planning area.

Policy 4: The ALUC land use plan and policies will establish the general parameters for regulation of development within the planning area on non-federal lands. Each local agency or jurisdiction shall be required to amend its general plan to incorporate the provisions of the ALUC Land Use Plan and Policies. Federal agencies may amend applicable land management plans to conform to the ALUP.

Objective B

The Safety Zone shall be kept free of all unrelated airport land uses.

Policy 1: No permanent structures or other objects projecting above the level of the primary surface of any runway will be permitted, unless directly related to a necessary airport operation.

Policy 2: No residential land uses shall be permitted.

Policy 3: No industrial land uses shall be permitted.

Policy 4: No use which may result in short or long-term concentration of people shall be permitted.

Policy 5: No use which would result in large concentrations of people shall be permitted.

Objective C

Prevent incompatible land uses in the overflight zone.

Policy 1: The following are considered incompatible land uses within the airport traffic pattern zone:

- A. Any use which would direct a steady light or flashing light of red, white, green or amber colors associated with airport operations toward an aircraft engaged in an initial climb following takeoff or toward a landing at an airport, unless the use is a FAA approved navigational signal light or visual approach slope indicator (VASI);
- B. Any use which would cause sunlight to be reflected toward an aircraft engaged in an initial climb following takeoff or toward an aircraft engaged in a final approach toward a landing at an airport;
- C. Any use which would generate large amounts of smoke or steam, that may be detrimental to the operation of aircraft;
- D. Any use which would generate electrical interference that may be detrimental to the operation of aircraft and/or instrumentation;
- E. Other uses which may affect safe air navigation within this area;
- F. Uses which would attract large concentrations of birds;
- G. Uses within the primary traffic pattern zone which on a regular basis would result in concentrations of people exceeding 25 persons per acre. Particularly unacceptable uses are shopping centers, restaurants, schools, hospitals, stadiums/arenas, and office complexes, industries and factories which would exceed the 25 persons per acre requirements; and
- H. Uses or land divisions, which on a regular basis would result in a concentration of people exceeding 25 persons per acre over a 24-hour period, or 50 persons per acre over a period of two hours or more within the primary traffic pattern zone.

Policy 2: Single-family residential or multiple-family uses, or land divisions, which would result in a density greater than one dwelling unit per acre may be

permitted. Multiple-family projects will be evaluated on an individual basis, with specific attention given to location and concentration.

Policy 3: The ALUC shall restrict the development of all new non-compatible land uses.

Policy 4: All land uses or use characteristics which may affect safe air navigation or which, because of their nature and proximity to an airport, may pose high risks to the land users shall be avoided/prohibited in the vicinity of an airport.

Policy 5: All residential uses shall be soundproofed as necessary to achieve interior annual noise levels attributable to exterior sources not to exceed 45 db CNEL in any habitable room with windows closed.

Policy 6: Development of Airport Master Plans or Layout Plans, or changes to existing plans of any public use airport that involves significant changes in land use, noise sources, or policy changes in size or type of aircraft to use the airport will, prior to finalizing or modifying the plans, be referred to the ALUC for consideration, as required by Section 21676 (c) of the PUC.

Policy 7: No hazardous installations such as above-ground oil, gas or chemical storage facilities, excluding facilities for non-commercial, private domestic or private agricultural use shall be permitted.

Policy 8: Except when overriding circumstances exist, a condition for approval of any project, subdivision, land use redesignation, or land exchange shall be the subject of the dedication of an aviation easement to the airport. The aviation easement shall contain and/or address the following:

- A. Right-of-flight at any altitude above acquired easements surface.
- B. Right to cause noise, vibrations, fumes, dust, and fuel particle emissions.
- C. Right of entry to remove, mark or light any structures or growths above easement surfaces.
- D. Right to prohibit creation of electrical interference, unusual light sources, and other hazards to aircraft flight.

Policy 9: As a further condition for approval of a residential subdivision or land trade, except where overriding circumstances exist, require the property owners to agree to the following:

- A. That it is understood by the owners and the owners' successors in interest that the real property in question lies close to an operating airport and that the operation of the airport and the landing and takeoff of aircraft may generate high noise levels.
- B. That the owners shall not initiate or support any action in any court or before any governmental agency if the purpose of the action is to

interfere with, restrict, or reduce the operation of the airport or the use of any airport by any aircraft.

- C. That the owners shall not protest or object to the operation of the airport or the landing or takeoff of aircraft before any court or agency of government.
- D. The above easement and agreement shall run with the land and shall be binding upon the owners and subsequent owners of the property.

Policy 10: A buyer notification statement shall be a requirement for the transfer of title of any property located within the airport's planning boundary. This statement should indicate that the buyer is aware of the proximity of an airport, the characteristics of the airport's current and projected activity, and the likelihood of aircraft overflights of the affected property.

Policy 11: In addition to the above basic policies, all development subject to a use permit or involved in a land exchange within the planning boundary shall contain the following provisions.

- A. It is understood by the owner that the subject property is within the area of influence of an airport and the operation of the airport, including aircraft landings and take-offs may generate high noise levels.
- B. The owner shall not initiate or support any action to interfere with, restrict, or reduce the operation of the airport by any aircraft. The owner shall not protest or object to the operation of the airport before any court or agency of the government.
- C. The above stipulations shall be binding upon any subsequent owners or successors in interest to the property.

Objective D

Regulate height of structures and objects in the Airport Planning Area.

Policy 1: No structures or obstructions are permitted within the designated primary runway surface, approach surfaces or clear zones.

Policy 2: Structures within the ALUC Planning Boundary over 35 feet in height are permitted only when in conformance to requirements of the Mono County Land Use Designations and Land Development Regulations and when not in conflict with any runway surface, approach surface or clear zone.

Policy 3: The ALUC shall review any applicable development proposals and restrict the erection or growth of objects which penetrate the established airport height restriction areas.

Policy 4: Rotating beacons, spotlights, or similar aircraft navigation hazards markers which are not part of airport operations are prohibited within the entire overflight zone.

Policy 5: Any structure, either within or outside the ALUC Planning Boundary is not in conformance if it:

- A. Penetrates the height restriction surfaces adopted by the ALUC (unless it is determined not to be a "hazard" by the FAA).
- B. Would result in a loss in airport utility, such as causing the usable length of the runway to be reduced.
- C. Would conflict with the VFR airspace used for the airport traffic pattern of en route navigation to and from the airport.
- D. Is determined to be a "hazard" by the FAA.

Objective E

Regulate noise in the Airport Planning Area.

Policy 1: Noise and aviation easements, as necessary, shall be required before approval of any land trade or approval of any project within the Planning Boundary.

Policy 2: No residential development is permitted within the 65 dB CNEL contour. Non-residential development may be permitted within the 65 dB CNEL contour if structures are soundproofed to limit interior noise levels to 45 dB CNEL.

Policy 3: The maximum noise exposure considered acceptable for non-residential land uses without special sound reduction construction is 60 dB CNEL.

Policy 4: The maximum noise exposure considered acceptable for residential land uses is 55 dB CNEL. All residential structures shall include soundproofing construction to limit interior noise levels to 45 dBA in any habitable room.

Policy 5: If a noise analysis, including noise monitoring, is conducted for a particular location and the results indicate that the maximum CNEL will be less than shown herein, then the lower exposure level may be used for the land use evaluation at the discretion of the ALUC.

BRYANT FIELD AND LEE FINING AIRPORT COMPATIBILITY POLICIES & CRITERIA

OVERALL GOAL: Provide for the orderly growth of the Bryant Field/Lee Vining Airport and the area surrounding the airport in a manner that safeguards the general welfare of inhabitants within the vicinity of the airport and the public in general.

NOISE GOAL: Protect future development within the Bryant Field/Lee Vining Airport influence area from objectionable airport-related noise by minimizing the number of people exposed to frequent and/or high levels of airport noise.

Policy 1: The maximum normally acceptable exterior noise levels for new residential land uses within the Bryant Field/Lee Vining Airport land use noise contours shall be 55 dBA5 CNEL. New residential land uses within the airport noise contours shall include soundproofing to limit interior noise levels to 45 dBA in any habitable room.

If a noise analysis, including noise monitoring, is conducted for a particular location and the results indicate that the maximum CNEL will be less than shown on the Bryant Field/Lee Vining Noise Contours Compatibility Map in this plan, then the lower exposure level may be used for the land use evaluation at the discretion of the Airport Land Use Commission (ALUC).

Policy 2: The maximum noise exposure acceptable for non-residential land uses without special sound reduction construction within the Bryant Field/Lee Vining Airport noise contours is 60 dBA CNEL.

If a noise analysis, including noise monitoring, is conducted for a particular location and the results indicate that the maximum CNEL will be less than shown on the Bryant Field/Lee Vining Noise Contours Compatibility Map in this plan, then the lower exposure level may be used for the land use evaluation at the discretion of the Airport Land Use Commission (ALUC).

Policy 3: Prohibit noise-sensitive land uses (e.g., residential uses, schools, hospitals) within the 55 dBA CNEL noise contours for Bryant Field/Lee Vining Airport.

Policy 4: Require noise and aviation easements ², as necessary, before approving any land trade or major development project within the Bryant Field/Lee Vining Airport land use influence area (for more on aviation easements, see Policy 6 in the Safety policies below).

¹ **Decibel (dBA)** – Environmental noise is measured in units of decibels (dB), on a logarithmic scale. The dBA, or A-weighted decibel, refers to a scale of noise measurement that approximates the range of sensitivity of the human ear to sound of different frequencies. The normal range of hearing extends from about 3 dBA to about 140 dBA. A 10 dBA increase in the level of a continuous noise represents a perceived doubling of loudness; a 3 dBA increase is barely noticeable to most people. Environmental noise fluctuates in intensity over time and is typically described as a time averaged noise level.

Community Noise Equivalent Level (CNEL) – The average equivalent A-weighted sound level during a 24-hour period. Weighting factors are applied that place greater emphasis on evening sound levels (i.e., 5 decibels are added to noise events occurring between 7 p.m. and 10 p.m.) and even greater emphasis upon nighttime sound levels (i.e., 10 decibels are added to noise events occurring between 10 p.m. and 7 a.m.).

SAFETY GOAL: Regulate new development in the Bryant Field/Lee Vining Airport influence area in a manner that minimizes the risks associated with potential aircraft accidents by 1) providing for the safety of people and property on the ground in the case of an aircraft accident near the airport, and 2) enhancing the chances of survival of the occupants of an aircraft involved in an accident beyond the immediate runway environment.

Policy 1: Allowable land use densities and intensities within the Bryant Field/Lee Vining Airport influence area shall be those shown on attached area maps and described in the applicable land use designation descriptions.

Policy 2: New development and land uses on private land within the Bryant Field/Lee Vining Airport influence area shall be restricted to those that are compatible with the airport operations and facilities described in the Bryant Field/Lee Vining Airport Master Plan/2020.

Policy 3: New development and land uses within the Bryant Field/Lee Vining Airport influence areas shall be consistent with the policies in this plan. Applications for uses that are determined by planning staff not to be consistent with these policies shall not be processed unless they are accompanied by an appropriate proposed amendment to this plan and, if necessary, an appropriate amendment to the Mono County General Plan.

Policy 4: Actions adopting or amending the Mono County General Plan, Specific Plans, the Mono County Land Use Regulations, or building regulations which are applicable to the Bryant Field/Lee Vining Airport influence area shall be consistent with the policies in this plan and shall be reviewed by the ALUC.

Policy 5: Undeveloped areas within the Bryant Field/Lee Vining Airport Runway Protection Zone shall remain undeveloped and shall be designated as Open Space in this plan and in the Mono County General Plan Land Use Element.

Policy 6: Restrict new residential subdivisions within the Bryant Field/Lee Vining Airport Runway Protection, Inner Approach/Departure, Inner Turning, Outer Approach/Departure and Sideline Zones to a minimum lot size of one acre. The development of a single-family unit on an existing residential lot less than an acre in size shall not be subject to these restrictions.

Policy 7: Prohibit highly risk-sensitive projects, particularly schools, hospitals and other uses in which the mobility of occupants is effectively limited, within the Bryant Field/Lee Vining Airport Runway Protection, Inner Approach/Departure, Outer Approach/Departure and Sideline Zones. New uses that would result in a concentration of more than 25 people per acre on a regular basis are also prohibited; e.g., shopping centers, restaurants, multiple-family residential units, stadiums/arenas, office complexes, and heavy industrial uses.

Policy 8: Non airport above-ground storage of highly flammable or hazardous materials; e.g., oil, gas or chemicals shall be prohibited with the Runway Protection, Inner Approach/Departure, Outer Approach/Departure and Sideline

Zones, except for non-commercial, private domestic, or private agricultural facilities.

Policy 9: Inform applicants of development projects within the Bryant Field/Lee Vining Airport Traffic Pattern Zone of potential land use conflicts and applicable restrictions, and ensure that such development does not reasonably restrict airport operations.

Policy 10: As a condition of approval for any development project or land exchange within the Bryant Field/Lee Vining Airport Traffic Pattern Zone, applicable navigation easements should be dedicated to the airport. Avigation easements should address the following:

- A. Right of flight at any altitude above acquired easement surfaces;
- B. Right to cause noise, vibrations, fumes, dust, and fuel particle emissions;
- C. Right of entry to remove, mark or light any structures or growth above easement surfaces;
- D. Right to prohibit creation of electrical interference, unusual light sources, and other hazards to aircraft flight; and
- E. Right to prevent erection or growth of all objects above acquired easement surfaces.

Avigation easements should extend from the ground elevation of the runways and the defined approach surfaces to that necessary above that elevation throughout the primary traffic pattern area.

Policy 11: Applicants shall acknowledge, in an enforceable legal document, such as an avigation easement:

- A. That it is understood by the owner(s) and the owners' successors in interest that the real property in question lies close to an operating airport and that the operation of the airport and the landing and takeoff of aircraft may generate high noise levels, which can affect the quiet enjoyment of the property;
- B. That the owner(s) shall not initiate or support any action in any court or before any governmental agency if the purpose of the action is to interfere with, restrict, or reduce the operation of the airport, or the use of the airport by any aircraft;
- C. That the owner(s) shall not protest or object to the operation of the airport or the landing or takeoff of aircraft before any court or agency of government; and

- D. That such easement(s) and/or agreement(s) shall run with the land and shall be binding upon the owners and subsequent owners of the property.

Policy 12: Prohibit incompatible land uses within the Runway Protection Zone.

- A. The Runway Protection Zone shall be kept as free as possible of all unrelated airport land uses and no new permanent structures or other objects shall project above the level of the primary surface of any runway, unless the structure/object is directly related to a necessary airport operation;
- B. Except for minor alterations to existing structures, no new or additional residential, commercial or industrial land uses shall be permitted within the Runway Protection Zone; and
- C. No use that would result in a large concentration of people, either on a short-term or long-term basis, shall be permitted within the Runway Protection Zone.

AIRSPACE PROTECTION GOAL: Avoid the development of land use conditions which, by posing hazards to flight, may increase the risk of an accident occurring. The particular hazards of concern are: 1) airspace obstructions; 2) wildlife hazards, particularly bird strikes; and 3) land use characteristics that pose other potential hazards to flight by creating visual or electronic interference with air navigation.

Policy 1: Within the designated Primary Surface, Approach Surfaces or Runway Protection Zones, no structure, tree, or other object shall be permitted to exceed the height limits set forth in Part 77 of the Federal Aviation Regulations (FAR 77).

Policy 2: Structures over 35 feet in height are permitted within the Bryant Field/Lee Vining Airport influence area only when in conformance to requirements of the Mono County Land Use Regulations, and when not in conflict with any Primary Surface, Approach Surface, or Runway Protection Zones.

Policy 3: The height of new development or land uses shall be restricted to that which will not result in a loss of airport utility; e.g., the height of new development shall not cause the usable length of the runway to be reduced.

Policy 4: The height of new development or land uses shall be restricted to that which will not conflict with the VFR airspace used for the airport traffic pattern for aircraft approaching and departing Bryant Field/Lee Vining Airport.

Policy 5: No object shall be erected to a height which would result in an increase in the minimum ceiling or visibility criteria for an existing or proposed instrument approach procedure.

Policy 6: Prohibit land uses that would attract wildlife hazards, particularly birds. Land uses that may become artificial attractors for birds and wildlife include:

- Sanitary landfills;
- Golf courses with water hazards;
- Drainage detention and retention basins;
- Wetlands created as mitigation measures;
- Landscaping, particularly water features;
- Wildlife refuges; and
- Agriculture, particularly cereal grains.

The FAA recommends that such land uses be kept at least 10,000 feet from any runway used by turbine-powered aircraft.

Policy 7: Review development proposals to ensure that the proposed development does not create visual or electronic hazards to flight. Visual hazards include distracting lights (particularly lights which may be confused with runway lights), glare, and sources of smoke. Electronic hazards include any uses that may interfere with aircraft instruments or radio communication.

The following restrictions regarding potential visual and electronic hazards apply within the Bryant Field/Lee Vining Airport influence areas:

- A. Beacons, spot lights, or similar aircraft navigation markers which are not part of airport operations shall be prohibited. Uses that direct a steady light, including reflected sunlight, or a flashing light of red, white, green, or amber colors toward an aircraft engaged in an initial climb following takeoff, or toward an aircraft engaged in a final approach toward a landing shall be prohibited, unless the use is an FAA-approved navigational signal light or visual approach slope indicator (VASI).
- B. Outdoor lights shall be shielded so they are not aimed above the horizon. For projects near the airport, outdoor lighting shall be flight checked at night to ensure they do not blind pilots during landings and takeoffs.
- C. Uses that generate large amounts of smoke or steam that could be detrimental to the operation of an aircraft shall be prohibited.
- D. Uses that generate electrical interference that could be detrimental to the operation of aircraft and/or instrumentation shall be prohibited.

ALUC PROCEDURAL POLICIES

This chapter delineates the process the Mono County ALUC will use in reviewing local planning actions for compliance with the policies and criteria in the Bryant Field Airport Land Use Compatibility Plan.

Actions Requiring Review

Policy 1: The Mono County Airport Land Use Commission shall review the following planning actions (i.e., the State Aeronautics Act requires mandatory review of these actions):

- A. Mono County General Plan adoptions or amendments;
- B. Specific Plan adoptions or amendments if the boundaries of the specific plan encompass the influence area of the airport;
- C. Proposals to adopt or amend Mono County Land Development Regulations, building regulations, and other land use ordinances and regulations when those ordinances and regulations have implications for airport land use noise or safety compatibility;
- D. Airport Master Plans;
- E. Construction proposals (i.e., layout plans) for new airports; and
- F. Airport expansion plans, including construction of a new runway, the extension or realignment of an existing runway, the acquisition of runway protection zones or any interest in land for the purpose of the above, or any airport expansion project which entails amendment of the Airport Permit issued by the California Department of Transportation. Agricultural airports are exempt from this requirement; heliports are subject to this requirement.

Policy 2: Once the Airport Land Use Compatibility Plan is adopted and the Mono County General Plan is consistent with the Compatibility Plan, Mono County shall review individual land use development plans for consistency with the Airport Land Use Compatibility Plan during the County's overall development review process.

The County's review process must utilize the policies and standards in the applicable Airport Land Use Compatibility Plan to ensure that the project is consistent with the Compatibility Plan.

Policy 3: The ALUC shall coordinate with the Humboldt-Toiyabe National Forest and the Bureau of Land Management to ensure that development on public lands within the Bryant Field Airport influence area is compatible with the policies in this plan.

Policy 4: The ALUC shall request the Humboldt-Toiyabe National Forest and the Bureau of Land Management to refer proposed projects that may conflict with airport operations, such as those that may create dust, smoke, steam or glare, or attract birds, involve structures of excessive height, or attract concentrations of people, to the ALUC for review and comment.

Policy 5: Airport-related operations shall be reviewed by the ALUC for consistency.

Policy 6: The ALUC shall review CEQA documents on projects in the vicinity of airports. The ALUC's role in reviewing CEQA documents is not to provide a formal compatibility determination but to comment on the project to ensure that the highest level of compatibility is achieved. The ALUC has no authority to disapprove such projects but may only offer comments on the CEQA document.

The ALUC may also comment on CEQA documents prepared in conjunction with a project submitted for ALUC review. Again, the ALUC has the authority to make a compatibility determination for the project itself but may only comment on the CEQA document.

Project Information

Policy 1: The following information shall be included when a project or action is submitted to the ALUC for review:

- A. A complete copy of the General Plan element, Specific Plan, land use ordinance or regulation, building regulation, Airport Master Plan, airport layout plan, or airport expansion plan to be reviewed, including any figures, maps, attachments or appendices.
- B. A copy of any applicable environmental documentation for the project.

Timing of Review

Policy 1: The ALUC must respond within 60 days of referral to local agency requests for a consistency determination on plans or projects for which submittal is mandatory [see in Sections 21675.2(a) and 21676(d) of the State Aeronautics Act]. The response period does not begin until ALUC staff determines the project submittal is complete. If the ALUC does not respond within the 60-day timeframe and the land use proposal involves a general plan, specific plan, general plan, or building regulation or is a proposed airport master plan, and the ALUC has an adopted compatibility plan, the proposal is deemed consistent with the Commission's plan [Section 21676(d)].

Policy 2: ALUC review of projects and plans shall occur prior to the Land Development Technical Advisory Committee (LDTAC) meeting for the project or prior to the Planning Commission action on the project if a LDTAC meeting is not required for the project.

ALUC Staff Responsibilities

Policy 1: ALUC staff shall review project submittals to assess whether the project is subject to ALUC review and, if so, whether the project submittal is complete. If additional information is needed, ALUC staff shall notify the project proponent immediately. Once the project submittal is complete, ALUC staff shall schedule an ALUC meeting within the required 60-day timeframe. ALUC staff shall provide a preliminary review of the project to determine compatibility and shall provide a recommendation to the ALUC in a staff report. The staff report shall be made available to the ALUC and the project proponent at least five days prior to the scheduled meeting.

ALUC Action Choices

Policy 1: When determining whether a land use is consistent or inconsistent with the Bryant Field Airport Land Use Compatibility Plan, the ALUC shall evaluate the proposal using the policies and criteria in the Bryant Field Airport Land Use Compatibility Plan.

Although this plan recognizes the incompatibility of certain land uses in the airport land use planning area based on noise, safety, and airspace concerns, it also recognizes that there may be specific situations where a normally incompatible use may be considered compatible because of terrain, specific location, or other factors related to the site. After due consideration of applicable factors, the ALUC may find a normally incompatible land use to be acceptable. In such cases, the ALUC shall specify why the exception is being granted, and find that the land use would not create a safety hazard, that airspace would not be violated, and that extraordinary circumstances related to the site justify the exception. Exceptions may be granted on a case-by-case basis, and shall not be generalized to include other sites.

IV. LAND USE DESIGNATIONS

LAND USE DESIGNATION CRITERIA

Each and every parcel of land in the unincorporated area of the county has been duly assigned a land use designation, as depicted in the Land Use Maps contained in Section VII of this Land Use Element. Except as otherwise expressly provided by the Land Development Regulations set forth in Section VI of this Land Use Element, no land may be developed or used except in the manner permitted by its assigned designation. (See also Sections 01.060, 02.705, 03.010, and 04.020 of the Land Development Regulations.) The land use designations described below were applied to private lands in the county based on an area's suitability for certain uses. Each parcel or area was analyzed using the following criteria:

- Does the area include natural hazards that limit development, such as flood zones, Alquist-Priolo zones, unstable soils or steep slopes, etc.?
- Does the area include natural resources that limit development; e.g., wetlands, significant habitat, deer migration routes, etc.?
- What are the existing uses in the area?
- Is infrastructure available for development (i.e., sewer, water, roads, fire protection)?
- What is the existing land division pattern in the area and what are the lot sizes?
- Does the area have open space value (e.g., visuals, wildlife habitat, agricultural preservation, cultural resources)?
- What is the community vision for the future of the area?

LAND USE DESIGNATIONS

The maximum population densities listed below were calculated without allowances for density bonuses. Certain designations in the Mono County Land Use Designations provide density bonuses of varying percentages based on a variety of criteria, such as the provision of affordable housing or covered parking. Some Area Plans also provide for density bonuses if certain criteria are met. In addition, State Housing Law requires counties to provide density bonuses if a certain percentage of a housing project is provided for affordable housing. Population densities were calculated for all land use designations using a population density of 2.51 persons per dwelling unit (1990 Census).

Land use designations shown on the land use maps are based upon an evaluation of natural, cultural, and social characteristics of the land as well as the countywide land

use policy framework and specific area policies. However, the analyses did not always include a detailed study of the circumstances and environmental constraints of each specific parcel. Future detailed evaluation of specific properties may show that an alternate use is warranted. For this reason, upon proper application, the County will consider amendments to this plan.

The term "permitted use" as used in the following land use designations refers to a typical land use that is allowed within a particular land use category; permitted uses listed for each land use designation are *examples* of permitted uses within that designation. Additional specific uses may be permitted if they are similar to the listed uses. A permitted use is considered to be consistent with the objectives of the General Plan. Permitted uses may also be subject to performance or other development standards in the Mono County Land Development Regulations or applicable area or specific plans and either ministerial or discretionary approval.

The term "site disturbance" as used in the following land use designations refers to the portion of a parcel that has been changed from its natural condition during the process of development, including but not limited to areas altered by structures, parking areas, roads and driveways, and graded areas. It does not include areas used for agricultural operations. Land that has been disturbed but that has subsequently been reclaimed or revegetated is not counted in the calculation of site disturbance. "Site disturbance" includes the area considered as lot coverage (structures and impervious surfaces). Calculations for lot coverage and site disturbance are calculated using gross coverage/disturbance for parcels one acre or more in size; parcels under one acre in size are calculated using net coverage/disturbance.

Since the County has direct planning authority over only a small percentage of the lands in the county, the County must work with other land managers to manage the natural resources in the area in a coordinated and standardized manner, in order to conserve natural and cultural resources while at the same time providing for community needs. Although the Land Use Element assigns land use designations to all of the land within its planning area, the focus of the planning effort is the privately owned unincorporated lands within the county. Land use designations have been developed to reflect federal land use designations and to complement the land use designations used by the Town of Mammoth Lakes.

NOTE: In the following Land Use Designation section, references to mobile home shall mean manufactured housing, as defined in Section 02.770.

Rural Residential (RR)

INTENT: The “RR” designation is intended to permit larger-lot single-family dwelling units with ancillary rural uses in areas away from developed communities. Small-scale agriculture, including limited commercial agricultural activities, is permitted.

PERMITTED USES

- Single-family dwelling
- Small scale agriculture
- Accessory buildings and uses¹
- Animals and pets (see Animal Standards Section 04.270)
- Home occupations (see Home Occupation regulations, Section 04.290)
- Manufactured home used as single-family dwelling²
- Accessory Dwelling Unit (as prescribed in Chapter 16, Development Standards – Accessory Dwelling Unit)
- Transitional and Supportive Housing⁵

USES PERMITTED SUBJECT TO DIRECTOR REVIEW (Director Review Processing, Ch. 31)

None stated

USES PERMITTED SUBJECT TO USE PERMIT (Use Permit Processing, Ch. 32)

- Art galleries, country clubs and golf courses
- Kennel
- Construction of an accessory building prior to construction of the main building
- Mobile-home parks (see Dev. Standards – Mobile Homes & RV Parks, Ch. 17^C)
- Small scale agriculture, including limited commercial agricultural activities^{TP}

DEVELOPMENT STANDARDS

Minimum Parcel Size: 1 acre⁴

Minimum District Area: 5 acres

Minimum Lot Dimensions: Width – 60’
Depth – 100’

Maximum Lot Coverage: 40%

Minimum Setbacks:

Front: 50’ **Rear:** 30 sl’ **Side:** 30 sl’

Setbacks for Accessory Buildings Used as Barns or Stables

Front: 50’ **Rear:** 30 sl’ **Side:** 30 sl’

MONO COUNTY GENERAL PLAN

Building Density: 1 du/lot and an Accessory Dwelling Unit ^{gp} (see Ch. 16, Development Standards – Accessory Dwelling Units).

Population Density: Maximum population density is 5.02 persons per five acres or approximately one person per acre.

Rural Residential (RR) continued

Maximum Building Height: 35' See Table 04.010 for other provisions

NOTES

1. Accessory buildings and uses customarily incidental to any of the permitted uses are permitted only when located on the same lot and constructed simultaneously with or subsequent to the main building.
2. Provided that the unit is less than 10 years old and meets the criteria set forth in Section 04.280. When there are two mobile homes on the same parcel, they must 1) comply with the Accessory Dwelling Unit requirements (see Ch. 16), or 2) comply with state standards for a mobile-home park and obtain a use permit from the county (see Ch. 17, Mobile Homes and RV Parks).
3. Uses may have been omitted from the list of those specified, hence the Commission may find other uses to be similar and not more obnoxious or detrimental to the public health, safety and welfare. See explanation of interpreting "similar uses" (Ch. 04, Uses not listed as permitted).
4. Lots requiring individual septic systems are subject to minimum dimensions as determined by the Lahontan Regional Water Quality Control Board.
5. Transitional and Supportive Housing projects are permitted in the same manner as other residential housing.

Estate Residential (ER)

INTENT: The “ER” designation is intended to permit large-lot, single-family dwelling units with ancillary rural uses in areas adjacent to developed communities. Small-scale agriculture is permitted.

PERMITTED USES

- Single-family dwelling
- Small scale agriculture
- Accessory buildings and uses¹
- Manufactured home used as a single-family dwelling²
- Animals and pets (see Animal Standards Section 04.270)
- Home occupations (see Home Occupation regulations, Section 04.290)
- Accessory Dwelling Unit (as prescribed in Chapter 16, Development Standards – Accessory Dwelling Unit)
- Transitional and Supportive Housing⁵

USES PERMITTED SUBJECT TO DIRECTOR REVIEW (Director Review Processing, Ch. 31)

None stated

USES PERMITTED SUBJECT TO USE PERMIT (Use Permit Processing, Ch. 32)

- Art galleries, country clubs and golf courses
- Kennel
- Construction of an accessory building prior to construction of the main building
- Mobile-home parks (see Dev. Standards – Mobile Homes & Mobile-home Parks, Ch. 17)

DEVELOPMENT STANDARDS

Minimum Parcel Size: 1 acre⁴

Minimum District Area: 5 acres

Minimum Lot Dimensions: Width – 60’
Depth – 100’

Maximum Lot Coverage: 40%

Minimum Setbacks:

Front: 50’ **Rear:** 30’ **Side:** 30’

Building Density: 1 du/lot and a Accessory Dwelling Unit (see Ch. 16, Development Standards – Accessory Dwelling Units).

Population Density: Maximum population density is 5.02 persons per 5 acres or approximately one person per acre.

Maximum Building Height: 35' See Table 04.010 for other provisions.

Estate Residential (ER) continued

NOTES

1. Accessory buildings and uses customarily incidental to any of the permitted uses are permitted only when located on the same lot and constructed simultaneously with or subsequent to the main building
2. Provided that the unit is less than 10 years old and meets the criteria set forth in Section 04.280. When there are two mobile homes on the same parcel, they must: 1) comply with the Accessory Dwelling Unit requirements (see Ch. 16); or 2) comply with state standards for a mobile-home park and obtain a use permit from the County (see Ch. 17, Mobile Homes and RV Parks).
3. Uses may have been omitted from the list of those specified, hence the Commission may find other uses to be similar and not more obnoxious or detrimental to the public health, safety and welfare. See explanation of interpreting "similar uses" (Ch. 04, Uses not listed as permitted).
4. Lots requiring individual septic systems are subject to minimum dimensions as determined by the Lahontan Regional Water Quality Control Board.
5. Transitional and Supportive Housing projects are permitted in the same manner as other residential housing.

Rural Mobile Home (RMH)

INTENT: The “RMH,” rural mobile home, district is intended to provide for development in rural areas within the county consistent with developed lifestyles when mixed uses are determined to be acceptable to the citizens of the RMH area. The RMH district is further intended to provide for mixed uses such as single-family residences, mobile homes used as residences, small-scale agriculture and the keeping of fowl and animals for personal use.

PERMITTED USES

- Single-family dwelling
- Small scale agriculture
- Accessory buildings and uses¹
- Animals and pets (see Animal Standards Section 04.270)
- Home occupations (see Home Occupation regulations, Section 04.290)
- Mobile home used as a single-family dwelling² sl
- Accessory Dwelling Unit (as prescribed in Chapter 16, Development Standards – Accessory Dwelling Unit)
- Transitional and Supportive Housing⁵

USES PERMITTED SUBJECT TO DIRECTOR REVIEW (Director Review Processing, Ch. 31)

- None stated

USES PERMITTED SUBJECT TO USE PERMIT (Use Permit Processing, Ch. 32)

- Kennel
- Construction of an accessory building prior to construction of the main building
- Mobile-home parks (see Dev. Standards – Mobile Homes & RV Parks, Ch. 17 ^c)

DEVELOPMENT STANDARDS

Minimum Parcel Size: 1 acre ⁴

Minimum District Area: 5 acres

Minimum Lot Dimensions: Width – 60’
Depth – 100’

Maximum Lot Coverage: 40%

Minimum Setbacks:

Front: 20’ **Rear:** 10 sl’ **Side:** 10 sl’

Setbacks for Accessory Buildings Used as Barns or Stables

Front: 50’ **Rear:** 30 sl’ **Side:** 30 sl’

Building Density: 1 du/lot and a Accessory Dwelling Unit ^{SP} (see Ch. 16, Development Standards – Accessory Dwelling Units).

Rural Mobile Home (RMH) continued

Population Density: Maximum population density is 5.02 persons per 5 acres or approximately one person per acre.

Maximum Building Height: 35' See Table 04.010 for other provisions.

NOTES

1. Accessory buildings and uses customarily incidental to any of the permitted uses are permitted only when located on the same lot and constructed simultaneously with or subsequent to the main building.
2. When there are two mobile homes on the same parcel, they must: 1) comply with the Accessory Dwelling Unit requirements (see Ch. 16), or 2) comply with state standards for a mobile-home park and obtain a use permit from the County (see Ch. 17, Mobile Homes and RV Parks).
3. Uses may have been omitted from the list of those specified, hence the Commission may find other uses to be similar and not more obnoxious or detrimental to the public health, safety and welfare. See explanation of interpreting "similar uses" (Ch. 04, Uses not listed as permitted).
4. Lots requiring individual septic systems are subject to minimum dimensions as determined by the Lahontan Regional Water Quality Control Board.
5. Transitional and Supportive Housing projects are permitted in the same manner as other residential housing.

- gp. General Plan addition
- sl. State Law requirement

Single-Family Residential (SFR)

INTENT: The “SFR” district is intended to provide for the development of single-family dwelling units in community areas.

PERMITTED USES

- Single-family dwelling
- Accessory buildings and uses¹
- Animals and pets (see Animal Standards Section 04.270)
- Home occupations (see Home Occupation regulations, Section 04.290)
- Small-scale agriculture
- Accessory Dwelling Unit (as prescribed in Chapter 16, Development Standards – Accessory Dwelling Units)
- Manufactured home used as a single-family dwelling² sl
- Transitional and Supportive Housing⁶

USES PERMITTED SUBJECT TO DIRECTOR REVIEW (Director Review Processing, Ch. 31)

- None stated

USES PERMITTED SUBJECT TO USE PERMIT (Use Permit Processing, Ch. 32)

- Cluster development of single-family dwellings on lots of 3+ acres
- Country clubs and golf courses
- Mobile-home parks (see Dev. Standards – Mobile Homes & RV Parks, Ch. 17) ^c
- Construction of an accessory building prior to construction of the main building

DEVELOPMENT STANDARDS

Minimum Lot Size: 7,500 sf ^{3,5}

Minimum District Area: 5 acres

Minimum Lot Dimensions: Width – 60’
Depth – 100’

Maximum Lot Coverage: 40%

Minimum Setbacks:

Front: 20’ **Rear:** 10’ **Side:** 10’

Note: Side yards may be reduced in accordance with Table 04.020, Special Yard requirements.

Building Density: 1 du/lot and a Accessory Dwelling Unit (see Ch. 16, Development Standards – Accessory Dwelling Units).

Population Density:

Maximum population density of 15 persons per acre

Maximum Building Height: 35' See Table 04.010 for other provisions.

Single-Family Residential (SFR) continued

NOTES

1. Accessory buildings and uses customarily incidental to any of the permitted uses are permitted only when located on the same lot and constructed simultaneously with or subsequent to the main building.
2. Provided that the unit is less than 10 years old and meets the criteria set forth in Section 04.280. When there are two mobile homes on the same parcel, they must 1) comply with the Accessory Dwelling Unit requirements (see Ch. 16), or 2) comply with state standards for a mobile-home park and obtain a use permit from the county (see Ch. 17, Mobile Homes and RV Parks).
3. Densities stated are based upon availability of both community water and sewer.
4. Uses may have been omitted from the list of those specified, hence the Commission may find other uses to be similar and not more obnoxious or detrimental to the public health, safety and welfare. See explanation of interpreting "similar uses" (Ch. 04, Uses not listed as permitted).
5. Lots requiring individual septic systems are subject to minimum dimensions as determined by the Lahontan Regional Water Quality Control Board.
6. Transitional and Supportive Housing projects are permitted in the same manner as other residential housing.

Multi-Family Residential, Low (MFR-L), Moderate (MFR-M), High (MFR-H)

INTENT: The “MFR-L” designation is intended to provide for low-density multi-family residential development, such as duplexes and triplexes.

The “MFR-M” designation is intended to encourage long-term multi-family housing by allowing for higher population densities and by not allowing commercial lodging facilities; i.e., hotels, motels.

The “MFR-H” designation is intended to encourage multi-family units by allowing for higher population densities and to provide for commercial lodging facilities; i.e., hotels, motels.

PERMITTED USES

- Single-family dwelling
- Manufactured home used as a single-family dwelling¹ – MFR-L only ^c
- Duplexes and triplexes
- Accessory buildings and uses²
- Animals and pets (see Animal Standards Section 04.270)
- Home occupations (see Home Occupation regulations, Section 04.290)
- Small-scale agriculture
- Transitional and Supportive Housing⁶

USES PERMITTED SUBJECT TO DIRECTOR REVIEW (Director Review Processing, Ch. 31)

- MFR-L Model units
- None stated for MFR-M and MFR-H

USES PERMITTED SUBJECT TO USE PERMIT (Use Permit Processing, Ch. 32)

MFR-L, MFR-M and MFR-H

- Art galleries
- Quasi-public buildings and uses
- Public utility buildings and structures, not including service yards
- Country clubs and golf courses
- Condominiums, cooperatives, townhomes, cluster developments, apartments containing four or more units
- Parking lots and parking structures

MFR-H only

- Mobile-home parks (see Dev. Standards – Mobile Homes and RV Parks, Ch. 17)
- Recreational-vehicle parks (see Ch. 17)
- Social care facilities and related integrated professional offices
- Parking lots and parking structures when abutting a commercial district
- Hotels, motels, bed-and-breakfast establishments and dorms
- Transient rentals (fewer than 30 consecutive days) of four or more dwelling units only

DEVELOPMENT STANDARDS

1. Density bonuses are available to residential projects at a rate of 25% over the maximum density or a ratio of one bonus unit to one affordable/employee housing unit, whichever is greater. Density bonuses will be awarded in a manner consistent with Government Code Section 65915.
2. Units designated as manager/employee housing unit shall not be counted in density calculations.

Multi-Family Residential, Low (MFR-L), Moderate (MFR-M), High (MFR-H)

3. Density bonuses for enclosed, covered parking are available at a rate of one bonus dwelling unit per two enclosed, covered parking spaces. Projects must provide enclosed, covered parking for at least 50% of the units to qualify for bonuses. Density bonuses would be calculated on the surplus of required covered parking spaces greater than 50%.

MFR-H

Hotels, motels, etc. – 40 units/acre

Population Density: Maximum population density is 37.6 persons per acre for multi-family dwellings.

Maximum Building Height: 35' See Table 04.010 for other provisions.

Landscaping: Projects subject to use permit shall submit a landscape site plan at the time of application. A minimum of 5% of the building site shall be landscaped in the MFR-L designation.

NOTES

1. Provided that the unit is less than 10 years old and meets the criteria set forth in Section 04.280. When there are two mobile homes on the same parcel, they must 1) comply with the Accessory Dwelling Unit requirements (see Ch. 16), or 2) comply with state standards for a mobile-home park and obtain a use permit from the county (see Ch. 17, Mobile Homes and RV Parks).
2. Accessory buildings and uses customarily incidental to any of the permitted uses are permitted only when located on the same lot and constructed simultaneously with or subsequent to the main building.
3. Densities stated are based upon availability of both community water and sewer.
4. Uses may have been omitted from the list of those specified, hence the Commission may find other uses to be similar and not more obnoxious or detrimental to the public health, safety and welfare. See explanation of interpreting "similar uses" (Ch. 04, Uses not listed as permitted).
5. Lots requiring individual septic systems are subject to minimum dimensions as determined by the Lahontan Regional Water Quality Control Board.
6. Transitional and Supportive Housing projects are permitted in the same manner as other residential housing.

FOOTNOTES

- c. Clarification

Mixed Use (MU)

INTENT: The “MU” designation is intended to provide for a wide range of compatible resident- and visitor-oriented residential and commercial uses, including business, professional, and retail uses; to provide for efficient use of land and increased opportunities for affordable housing; to provide a transition between intensive commercial uses and residential uses; and to be applied to areas with existing mixed-use development.

MU transitional areas can limit the size of business establishments and restrict uses incompatible with residential district. Not all areas need contain residential uses. Commercial uses shall conform to strict standards that prohibit obnoxious odors, obtrusive light and glare, and excessive noise.

USES PERMITTED

- Single-family dwelling
- Manufactured home used as a single-family dwelling.^{1 c} Manufactured homes are excluded from June Lake GP
- Duplexes and triplexes
- Accessory buildings and uses²
- Animals and pets (see Animal Standards Section 04.270)
- Home occupations (see Home Occupation regulations, Section 04.290)
- Small-scale agriculture
- Transitional and Supportive Housing⁶

USES PERMITTED SUBJECT TO DIRECTOR REVIEW (Director Review Processing, Ch. 31)

- Residential uses – e.g., condominiums, townhomes, commercial lodging cluster developments, and apartments
- Retail trade – e.g., food, drug, hardware, apparel, arts and crafts, sporting goods, bookstores, bakery, florist
- Social care facilities – e.g., medical and dental offices, welfare and charitable services
- Professional offices – e.g., real estate, financial, insurance, rental and reservation services, legal services
- Business services – e.g., stenographic and mailing services, general advertising, business and management consulting
- Recreational activities – e.g., health clubs, dance studios
- Food service establishments – e.g., restaurants, cafes, delicatessens
- Conversion or expansion of existing operations

USES PERMITTED SUBJECT TO USE PERMIT (Use Permit Processing, Ch. 32)

- All of the above uses subject to Director Review, if determined to be necessary by the Community Development director
- Parking lots and parking structures other than required off-street parking when abutting a commercial district
- Religious and cultural activities – e.g., museums, art galleries, churches

- Small-scale malls, plazas, parks and related pedestrian open space
- Conversion or expansion of existing operations
- Mobile-home parks (see Development Standards – Mobile-home Parks and RV Parks, Ch. 17) ^c

Mixed Use (MU) continued

- Recreational-vehicle parks (see Ch. 17) ^c

DEVELOPMENT STANDARDS

Minimum Lot Area:

- Hotels, resort hotels, motels, & rental cabins – 20,000 sf ⁵
- Condominiums, cooperatives, townhouses, cluster developments, and similar uses (excluding apartments) – 20,000 sf ⁵
- All other uses – 10,000 sf ⁵
- Areas lacking community water and sewer – one-acre minimum all uses ^{c, rp}

Land uses on lots measuring less than 10,000 sq. ft. shall be limited to single-family residences, duplexes and triplexes.

Minimum District Area: 5 acres

If the land use designation and existing uses of abutting properties are compatible, a minimum district area of two acres may be considered.

Minimum Lot Dimensions: Width – 60’
Depth – 100’

Maximum Lot Coverage: 60%

An additional coverage bonus of 10% (total coverage of 70%) shall be granted to structures that contain mixed commercial and residential (employee or long-term rentals) uses; commercial uses with public accommodations; or commercial uses which front a public pedestrian mall or plaza.

Minimum Setbacks:

Front: 10’ **Rear:** 5’ **Side:** 0’

Minimum side yard when abutting a residential district is 10 feet. Minimum side yard on a corner lot is 10 feet.

Building Density: Hotels, resort hotels, motels – 40 du/acre

Apartments, multi-family units, condominiums and similar uses – 15 du/acre

Density for mixed uses on one parcel; e.g., apartment units and motel units, will be calculated at a proportionate rate. ^{gp}

Density bonuses are available for affordable housing and enclosed, covered parking. In no case shall projects with affordable housing and/or parking density bonuses exceed 26 units per acre for residential units and 60 units per acre for commercial lodging units.

1. Density bonuses are available to residential and commercial lodging projects at a rate of 25% over the maximum density or a ratio of one bonus unit to one affordable/employee housing unit, whichever is greater. Density bonuses will be awarded in a manner consistent with Government Code Section 65915.
2. Units designated as manager/employee housing unit shall not be counted in density calculations.

Mixed Use (MU) continued

3. Density bonuses for enclosed, covered parking are available at a rate of one bonus dwelling unit per two covered parking spaces. Projects must provide enclosed, covered parking for at least 50% of the units to qualify for bonuses. Density bonuses would be calculated on the surplus of required covered parking spaces greater than 50%.

Population Density: Maximum population density is 37.6 persons per acre for multi-family residential uses.

Maximum Building Height: 35' See Table 04.010 for other provisions.

Landscaping: Projects subject to use permit shall be required to either landscape per an approved landscape site plan or leave in natural open space (i.e., ungraded) all areas not covered by impervious surfaces. Any combination is acceptable.

Special Regulations:

- A change of business shall be reviewed for compliance with mixed-use designation.
- The hours of operation shall be limited to the period between 7 a.m. and 10 p.m.
- Businesses operating within the zone shall not exceed a sustained or intermittent noise level of 60 dB(L_{dn}/CNEL).
- Projects shall be reviewed for adverse impacts resulting from exterior lighting and signs.
- Uses involving or producing noxious fumes or odors shall not be permitted unless fumes or odors are treated or diffused prior to release from the generating source.
- Operations using and storing noxious chemicals including but not limited to pesticides and herbicides, other than those packaged for resale, large volumes of solvents or flammable liquids, will not be allowed.

NOTES

1. Provided that the unit is less than 10 years old and meets the criteria set forth in Section 04.280. When there are two mobile homes on the same parcel, they must: 1) comply with the Accessory Dwelling Unit requirements (see Ch. 16), or 2) comply with state standards for a mobile-home park and obtain a use permit from the

county (see Ch. 17, Mobile-home and RV Parks). Mobile homes are excluded from June Lake.

2. Accessory buildings and uses customarily incidental to any of the permitted uses are permitted only when located on the same lot and constructed simultaneously with or subsequent to the main building.
3. Densities stated are based upon availability of both community water and sewer.
4. Uses may have been omitted from the list of those specified, hence the Commission may find other uses to be similar and not more obnoxious or detrimental to the public health, safety and welfare. See explanation of interpreting "similar uses" (Ch. 04, Uses not listed as permitted).
5. Lots requiring individual septic systems are subject to minimum dimensions as determined by the Lahontan Regional Water Quality Control Board.
6. Transitional and Supportive Housing projects are permitted in the same manner as other residential housing.

Mixed Use (MU) continued

FOOTNOTES

- c. Clarification
- rp. Recommendation from the Regional Planning Advisory Committee
- gp. General Plan addition

Commercial Lodging, Moderate (CL-M) and High (CL-H)

INTENT: The “CL-M” designation is intended to provide commercial lodging units for short-term occupation in or near residential uses.

The “CL-H” designation is intended to provide short-term commercial lodging units in close proximity to commercial/recreational centers.

PERMITTED USES

- Single-family dwelling (manufactured homes are not permitted)
- Duplexes and triplexes
- Accessory buildings and uses¹
- Animals and pets (see Animal Standards Section 04.270)
- Home occupations (see Home Occupation regulations, Section 04.290)
- Transitional and Supportive Housing⁵

USES PERMITTED SUBJECT TO DIRECTOR REVIEW (Director Review Processing, Ch. 31)

- Transient rentals (rentals for fewer than 30 consecutive days) of up to three dwelling units

USES PERMITTED SUBJECT TO USE PERMIT (Use Permit Processing, Ch. 32)

- Mobile-home parks (see Dev. Standards –Mobile-home and RV Parks, Ch. 17)
- Recreational-vehicle parks (see Ch. 17)
- Condominiums, cooperatives, townhomes, cluster developments, apartments containing four or more units
- Hotels, motels, lodges, bed-and-breakfast establishments, cabins and other uses found to be similar by the Commission. Ancillary uses such as limited dining, lounges and convenience retail, provided the ancillary use does not occupy more than 25% of the project's habitable space
- Transient rentals (fewer than 30 consecutive days) of four or more dwelling units
- Conversion of five or more apartment units into transient rentals
- Conversion of existing habitable space into ancillary uses
- Parking lots and parking structures other than required off-street parking
- Construction of an accessory building prior to construction of the main building

DEVELOPMENT STANDARDS

Minimum Lot Area:

Hotels, motels, lodges, bed-and-breakfast establishments, rental cabins and other similar uses – 20,000 sf⁴

Condominiums, cooperatives, townhouses, cluster developments and similar uses (excluding apartments) – 20,000 sf⁴

All other uses – 10,000 sf⁴

Land uses on lots measuring less than 10,000 sq. ft. shall be limited to single-family residences, duplexes and triplexes (mobile homes are not permitted)

Minimum District Area:	3 acres	CL-M
	5 acres	CL-H

If the land use designation and existing uses of abutting properties are compatible, a minimum district area of two acres may be considered.

Minimum Lot Dimensions: Width – 60', Depth – 100'

Commercial Lodging, Moderate (CL-M) and High (CL-H) continued

Maximum Lot Coverage: 60%

Minimum Setbacks:

Front: 10' **Rear:** 5' **Side:** 0'

Minimum side yard when abutting a residential district is 10 feet. Minimum side yard on a corner lot is 10 feet. See Table 04.020, Required Yards for other requirements.

Building Density:

CL-M Hotels, motels, lodges, bed-and-breakfast establishments, rental cabins and other similar uses – 15 du/acre
Apartments, multi-family units, condominiums and similar uses – 15 du/acre

CL-H Hotels, motels, lodges, bed-and-breakfast establishments, rental cabins and other similar uses – 40 du/acre
Apartments, multi-family units, condominiums and similar uses – 15 du/acre

Density bonuses are available for affordable housing and enclosed, covered parking. In no case shall projects with affordable housing and/or parking density bonuses exceed 26 units/acre for residential units and 60 units/acre for commercial lodging units in the CL-H.

1. Density bonuses are available to residential and commercial lodging projects at a rate of 25% over the maximum density or a ratio of one bonus unit to one affordable/employee housing unit, whichever is greater. Density bonuses will be awarded in a manner consistent with Government Code Section 65915.
2. Units designated as manager/employee housing unit shall not be counted in density calculations.
3. Density bonuses for enclosed, covered parking are available at a rate of one bonus dwelling unit per two enclosed, covered parking spaces. Projects must provide enclosed, covered parking for at least 50% of the units to qualify for bonuses. Density bonuses would be calculated on the surplus of required covered parking spaces greater than 50%.

Population Density:

Maximum population density is 37.6 persons/acre for multi-family residential uses.

Maximum Building Height: 35' See Table 04.010 for other provisions.

Landscaping: Projects subject to use permit shall submit a landscape site plan at the time of application.

NOTES

1. Accessory buildings and uses customarily incidental to any of the permitted uses are permitted only when located on the same lot and constructed simultaneously with or subsequent to the main building.
2. Densities stated are based upon availability of both community water and sewer.

Commercial Lodging, Moderate (CL-M) and High (CL-H) continued

3. Uses may have been omitted from the list of those specified, hence the Commission may find other uses to be similar and not more obnoxious or detrimental to the public health, safety and welfare. See explanation of interpreting "similar uses" (Ch. 04, Uses not listed as permitted).
4. Lots requiring individual septic systems are subject to minimum dimensions as determined by the Lahontan Regional Water Quality Control Board.
5. Transitional and Supportive Housing projects are permitted in the same manner as other residential housing.

Rural Resort (RU)

INTENT: The “RU” designation is intended to provide appropriate sites for outdoor recreation facilities and limited visitor-oriented facilities and services in rural areas of the county. The district is intended to protect the environment and rural character of an area while allowing for compatible development.

PERMITTED USES

- Single-family dwelling
- Accessory buildings and uses¹
- Manufactured home used as a single-family dwelling²
- Animals and pets (see Animal Standards Section 04.270)
- Home occupations (see Home Occupation regulations, Section 04.290)
- Small-scale agriculture
- Adult-oriented businesses conducted in compliance with the locational requirements of Chapter 19 of the Land Development Regulations (set forth in Section VI of this Land Use Element) and with the permit and other operational requirements of Chapter 5.45 of the Mono County Code
- Accessory Dwelling Unit (as prescribed in Chapter 16, Development Standards – Accessory Dwelling Unit)
- Transitional and Supportive Housing⁴

USES PERMITTED SUBJECT TO DIRECTOR REVIEW (Director Review Processing, Ch. 31)

- None stated

USES PERMITTED SUBJECT TO USE PERMIT (Use Permit Processing, Ch. 32)

- Construction of an accessory building prior to construction of the main building
- Recreational-vehicle parks (see Dev. Standards – Mobile-home and RV Parks, Ch. 17)
- Hotels, motels, bed-and-breakfast establishments, cabins and other uses found to be similar by the Commission. Ancillary uses such as limited restaurants, lounges and convenience retail, provided the ancillary use does not occupy more than 25% of the project's habitable space
- Transient rentals (fewer than 30 consecutive days)
- Developed campgrounds
- Commercial recreational facilities such as cross-country ski facilities, equestrian facilities, golf courses and facilities (if developed in conjunction with lodging facilities), marinas and boathouses
- Employee housing, if developed in conjunction with recreational/lodging facilities

DEVELOPMENT STANDARDS

Minimum Parcel Size: 5 acres

Minimum Lot Dimensions: Width – 60’
Depth – 100’

Site Disturbance: 10% (includes a maximum of 5% lot coverage).
Maximum site disturbance may be increased if the remainder of the parcel is preserved as open space in perpetuity.

Rural Resort (RU) continued

Minimum Setbacks:

Front: 30' **Rear:** 30' **Side:** 30'

Building Density: One du per 5 acres and an Accessory Dwelling Unit (see Ch. 16, Development Standards – Accessory Dwelling Units. Lodging facilities may not exceed a maximum intensity of 40 units/acre and a total of 150 units/site. Spaces for recreational vehicles may not exceed a maximum density of 17 spaces/acre. Density for mixed uses on one parcel; e.g., motel units and RV spaces will be calculated at a proportionate rate.

NOTES

1. Accessory buildings and uses customarily incidental to any of the permitted uses are permitted only when located on the same lot and constructed simultaneously with or subsequent to the main building.
2. Provided that the unit is less than 10 years old and meets the criteria set forth in Section 04.280. When there are two mobile homes on the same parcel, they must 1) comply with the Accessory Dwelling Unit requirements (see Ch. 16), or 2) comply with state standards for a mobile-home park and obtain a use permit from the county (see Ch. 17, Mobile Homes and RV Parks).
3. Uses may have been omitted from the list of those specified, hence the Commission may find other uses to be similar and not more obnoxious or detrimental to the public health, safety and welfare. See explanation of interpreting "similar uses" Chapter 04, Uses not listed as permitted.
4. Transitional and Supportive Housing projects are permitted in the same manner as other residential housing.

Commercial (C)

INTENT: The “C” designation is intended to provide for a wide range of uses and services for the resident and visitor including retail, business and professional uses and services in community areas, including commercial lodging and higher density housing, when found compatible with retail and service functions.

The creation of a pleasant and efficient environment for shopping and business is an important function of this district.

PERMITTED USES

- Any proposed change of use when conducted within an existing conforming, legally developed structure for the following retail and professional uses. If exterior structural alterations or additional parking is required, it shall require a use permit. The following uses are examples of such permitted uses within existing structures:
 - Retail Trade – e.g., food, drug, hardware, limited apparel, liquor stores, limited department stores, dry goods, gift shops, home furnishings, paint, tires, bookstores, bakery, florist, pet supplies, health food stores, sporting goods, etc.
 - Services – e.g., finance, insurance and real estate, banks, savings and loans, title abstracting, real estate developers and builders, commodity services, holding and investment services, bail bonds,
 - Personal Services – e.g., self-service laundries and dry cleaning, beauty parlors, barbers, shoe repair, photographic services, cleaning and laundry, etc.
 - Business Services – e.g., stenographic and mailing services, general advertising, business and management consulting, blueprinting, photo finishing, employment services, etc.
 - Repair Services – e.g., radio and television repair, furniture and jewelry repair, repair of anything sold in this district, etc.
 - Professional Services – e.g., physicians, dental and legal services, welfare and charitable services, medical and dental laboratories, etc.
 - Cultural/Religious Activities – e.g., churches, art galleries, museums, etc.
 - Food-service establishments – e.g., restaurants, delis, fast food, bars, etc.
 - Any combination of permitted uses
 - When found compatible with the intent, single-family residential, duplex and triplex, plus accessory structures
 - Small-scale agriculture
 - Transitional and Supportive Housing⁵

USES PERMITTED SUBJECT TO DIRECTOR REVIEW (Director Review Processing, Ch. 31)

- All permitted uses if determined necessary by the Director
- Temporary uses: model homes, mobile-home display units, etc., only if one year or less

USES PERMITTED SUBJECT TO USE PERMIT (Use Permit Processing, Ch. 32)

- All new construction for the purpose of conducting sales, business or services, including any uses listed above
- All conversions from a prior use when structural alterations are required
- Household units; if found compatible with the district, apartments, condominiums, etc.

Commercial (C) continued

- Lodging – e.g., hotels, motels, time-share, RV parks, bed-and-breakfast establishments, etc.
- Transportation, communications – e.g., parking lot
- Retail trade – e.g., automotive service stations
- Business services – e.g., stenographic and mailing services, general advertising, business and management consulting
- Educational – e.g., nursery and primary schools, private childcare facilities
- Miscellaneous services – e.g., religious activities
- Cultural activities – e.g., museums and art galleries, etc.
- Public – e.g., hospitals, post offices, water treatment plants, etc.
- Food service establishments – e.g., restaurants, ice cream parlors, fast food restaurants, lunch rooms, delicatessens, etc.
- Entertainment establishments – e.g., theaters, movies, cocktail lounges, bars, nightclubs, discotheques, etc.
- Retail establishments – e.g., department stores, sporting goods, etc.
- Professional offices – e.g., medical complex, administrative centers, animal hospitals and boarding kennels, etc.
- Buildings for conducting services – e.g., financial institutions, bath houses, health clubs, convention centers, roller skating, bowling, indoor ice-skating, auto rental, reducing and figure salons , etc.
- Accessory buildings and uses¹
- All of the permitted uses and uses subject to Director Review if determined necessary by the Director.

DEVELOPMENT STANDARDS

Minimum Lot Area: 10,000 sf⁴

Minimum District Area: 2 acres

Minimum Lot Dimensions: Width – 60’
Depth – 100’

Maximum Lot Coverage: 60%, when principal use is a residential use
70%, all other uses

Minimum Setbacks:

Front: 10’ **Rear:** 5’ **Side:** 0’

Minimum side yard when abutting a residential district is 10 feet. Minimum side yard on a corner lot is 10 feet. Reduced front setbacks may be available in June Lake, Lee Vining, and Bridgeport. See Table 04.020, Required Yards.

Density: Residential uses – 15 du/acre
Hotels, motels – 40 units/acre

If underground or understructure parking is provided for 50% to 100% of the hotel/motel rooms, then a density bonus up to 25% to 50% may be awarded as part of the use permit process.

Maximum Building Height: 35' See Table 04.010 for other provisions.

Landscaping: Fences and/or screening shall be required when abutting any residential district. Any use subject to use permit shall be required to either landscape (per approved landscape plan) or leave in natural open space (i.e., ungraded) all areas not covered by impervious surfaces.

Commercial (C) continued

NOTES

1. Accessory buildings and uses customarily incidental to any of the permitted uses are permitted only when located on the same lot and constructed simultaneously with or subsequent to the main building.
2. Densities stated are based upon availability of both community water and sewer.
3. Uses may have been omitted from the list of those specified, hence the Commission may find other uses to be similar and not more obnoxious or detrimental to the public health, safety and welfare. See explanation of interpreting "similar uses" Chapter 04, Uses not listed as permitted.
4. Lots requiring individual septic systems are subject to minimum dimensions as determined by the Lahontan Regional Water Quality Control Board.
5. Transitional and Supportive Housing projects are permitted in the same manner as other residential housing.

SEE ALSO

Land Development Regulations –

- Ch. 04 Development Standards – General

Service Commercial (SC)

INTENT: The “SC” designation is intended to provide for a wide variety of wholesale, retail and service uses that are not normally compatible with uses permitted in other commercial districts; e.g., enclosed light manufacturing of a non-polluting type, limited outdoor storage.

PERMITTED USES

- Any proposed change of use when conducted within an existing conforming, legally developed structure. Exterior structural alterations, additional parking or outdoor storage shall require a use permit. The following uses are examples of such permitted uses within existing structures:
 - Cottage industry – e.g., limited recreational equipment, apparel and other finished products, crafts, printing, etc.
 - Repair services – e.g., car repair and parts, plumbing, electrical, etc.
 - Construction services – e.g., contractor or building services, engineering contractor^{TP}, cabinet-making, roofing, water-well drilling contractor storage, etc.
 - Transportation services, limited travel agents, bus terminals, enclosed packing and shipping terminals, existing truck and trailer parking - heavy equipment storage^{TP}
 - Warehousing, enclosed retail and wholesale storage
 - Sale lots – e.g., car sales,(requires a minimum one-half acre area)
 - Any combination of the permitted service commercial uses
 - All permitted uses in the C district
 - Construction supplies, materials and equipment storage^{TP}

USES PERMITTED SUBJECT TO DIRECTOR REVIEW (Director Review Processing, Ch. 31)

None stated

USES PERMITTED SUBJECT TO USE PERMIT (Use Permit Processing, Ch. 32)

- All new construction for the purpose of conducting sales, business or services including the uses listed above
- All uses subject to a use permit in the C district
- All permitted uses in the C district, but requiring new construction or alterations
- All uses utilizing outdoor storage
- Commercial planned unit development
- Accessory buildings and uses¹

DEVELOPMENT STANDARDS

Minimum Lot Area: 10,000 sf⁴

Minimum District Area: 3 acres

If abutting land use designations have a commercial or industrial land use designation, and existing uses in these abutting properties are compatible, a minimum district area of two acres may be considered.

Minimum Lot Dimensions: Width – 60’
Depth – 100’

Maximum Lot Coverage: 70%

Service Commercial (SC) continued

Minimum Setbacks:

Front: 10’ **Rear:** 5’ **Side:** 0’

Minimum side yard when abutting a residential district is 10 feet. Minimum side yard on a corner lot is 10 feet. Lots larger than one acre are subject to Fire Safe Regulations, Ch. 22.^s

1

Building Density: one du/lot and Accessory Dwelling Unit (see Ch. 16, Development Standards – Accessory Dwelling Units). Employee housing for those working on the premises subject to use permit. ^{TP}

Density: Maximum population density is 5.02 persons per five acres or approximately one person per acre. ^{TP}

Maximum Building Height: 35’ See Table 04.010 for other provision.

Landscaping: Any uses subject to use permit shall be required to either landscape (per approved landscape plan) or leave in natural open space (i.e., ungraded) all areas not covered by impervious surfaces. Fencing, berms and/or landscaping may be required to buffer incompatible land uses as determined by the Director or the Commission.

Fences: None required, except when adjoining a residential district, then a screening fence or wall not less than 5 feet high or more than 6 feet in height shall be erected along adjoining residential district.

NOTES

1. Accessory buildings and uses customarily incidental to any of the permitted uses are permitted only when located on the same lot and constructed simultaneously with or subsequent to the main building.
2. Densities stated are based upon availability of both community water and sewer.
3. Uses may have been omitted from the list of those specified, hence the Commission may find other uses to be similar and not more obnoxious or detrimental to the public health, safety and welfare. See explanation of interpreting "similar uses" Chapter 04, Uses not listed as permitted.
4. Lots requiring individual septic systems are subject to minimum dimensions as determined by the Lahontan Regional Water Quality Control Board.

FOOTNOTES

rp. Recommendation from the Regional Planning Advisory Committee

sl. State Law requirement

Industrial Park (IP)

INTENT: The “IP” designation is intended to provide for a combination of light- and moderate-intensity industrial uses that do not create environmental nuisances or hazards to a degree which might be obnoxious or offensive to persons conducting business in this or adjacent areas.

PERMITTED USES

- Any proposed change of use when conducted within an existing, conforming, legally developed structure, for those uses subject to a Director Review or use permit
- Adult-oriented businesses conducted in compliance with the locational requirements of Chapter 19 of the Land Development Regulations (set forth in Section VI of this Land Use Element) and with the permit and other operational requirements of Chapter 5.45 of the Mono County Code

USES PERMITTED SUBJECT TO DIRECTOR REVIEW (Director Review Processing, Ch. 31)

- All permitted uses if deemed necessary by the Director
- Agricultural uses, nurseries, greenhouses
- Offices, business and professional
- Laboratories
- Commercial laundries and dry-cleaning establishments
- Wholesale sales and warehousing
- Vehicle repair garages and shops
- Manufacture of clothing, household effects, art, jewelry, silverware, ceramics, leather goods (assembly only) toys, and electronics
- Upholstery
- Shops for the assembly or completion of finished paper, wood, or metal products
- Editorial and designing, printing, lithography, bookbinding
- Painting, plumbing, electrical, cabinet and glass shops,
- Public buildings and uses
- Light equipment rental and/or storage yards
- Storage yard for construction materials and equipment
- Lumber yards and building materials, wholesale and retail (but not lumber mills)
- Temporary buildings and appurtenant structures to allowed use
- Storage of recreational vehicles, boats and miscellaneous recreational related equipment
- Recycling centers
- Accessory buildings and uses¹

USES PERMITTED SUBJECT TO USE PERMIT (Use Permit Processing, Ch. 32)

- Industrial condominiums
- Tank farms
- Freight terminals

DEVELOPMENT STANDARDS

Minimum Lot Area: 10,000 sf⁴

Minimum District Area: 10 acres

Industrial Park (IP) continued

If abutting parcels have a commercial or industrial land use designation and existing uses on those abutting properties are compatible, a minimum district area of five acres may be considered.

Minimum Lot Dimensions: Width – 75’
Depth – 100’⁴

Maximum Lot Coverage: 80%

Minimum Setbacks:

Uses Subject to DR	Front: 20’	Rear: 5’	Side: 0’
Uses Subject to UP	Front: 20’	Rear: 10’	Side: 10’

Side and rear yards may be modified by the Director or Commission. Yards when abutting a residential district shall not be less than 20 feet along the property line. Corner lots shall have a side yard of 10 feet along the street frontage.

Density: Residential uses are not permitted.

Maximum Building Height: 40’

Landscaping: Screening, fences, and/or landscaping may be required when the character of the proposed use, the size and location of the building site or nature of adjacent uses are such as to require screening and will be determined as part of the use permit or director review process.

Location Standards: Before siting a proposed industrial park district, proof shall be provided that it conforms to nuisances and hazards requirements of section 04.250.

Minimum Space Between Buildings: 10’

NOTES

1. Accessory buildings and uses customarily incidental to any of the permitted uses are permitted only when located on the same lot and constructed simultaneously with or subsequent to the main building.
2. Densities stated are based upon availability of both community water and sewer.
3. Uses may have been omitted from the list of those specified, hence the Commission may find other uses to be similar and not more obnoxious or detrimental to the public health, safety and welfare. See explanation of interpreting "similar uses" Chapter 04, Uses not listed as permitted.
4. Lots requiring individual septic systems are subject to minimum dimensions as determined by the Lahontan Regional Water Quality Control Board.

SEE ALSO

Land Development Regulations -

- Ch. 04 Development Standards – General

Industrial (I)

INTENT: The “I” designation is intended to provide for heavy industrial uses that may potentially cause moderate to higher degrees of environmental nuisances or hazards.

The functional and visual character of the district is such that it should be located in areas that are relatively remote from residential and commercial development.

PERMITTED USES

- Those uses listed as permitted under Industrial Park
- Caretaker unit – one per district
- Heavy vehicle storage and maintenance
- Adult-oriented businesses conducted in compliance with the locational requirements of Chapter 19 of the Land Development Regulations (set forth in Section VI of this Land Use Element) and with the permit and other operational requirements of Chapter 5.45 of the Mono County Code

USES PERMITTED SUBJECT TO DIRECTOR REVIEW (Director Review Processing, Ch. 31)

None stated

USES PERMITTED SUBJECT TO USE PERMIT (Use Permit Processing, Ch. 32)

- Those uses listed as permitted under Industrial Park
- General manufacturing such as batch plant, concrete ^C, asphalt and textile and lumber mills
- Alternative energy generation plants: photo voltaic, mirrors, and biomass conversion
- Refining of petroleum and its products
- Smelting of metals such as; copper, iron, tin, and zinc
- Solid waste
- Distillation of alcohol
- Junkyards
- Auto wrecking and salvage yards
- Commercial excavation and mining of stone and earth materials
- Food processing, canning and similar uses
- Accessory buildings and uses¹
- Heavy equipment storage §P
- Firewood processing and storage §P
- Impound yards §P

DEVELOPMENT STANDARDS

Minimum Lot Area: 10,000 sf ⁴

Minimum District Area: 30 acres, except upon finding the dependence of a location on a resource (e.g., gravel pit).

Minimum Lot Dimensions: Width – 75’
Depth – 100’

Industrial (I) continued

Maximum Lot Coverage: 80%

Minimum Setbacks: None stated for the district.

Density: Residential uses are not permitted, with the exception of caretakers’ units.

Maximum Building Height: 40’ A greater height may be approved by the Director.

Landscaping: Screening, fences will be required when the character of the proposed use, the size and location of the building site are such as to require screening. Landscaping is encouraged in the front-yard setback. Fence height may exceed 6 feet, but shall not interfere with necessary siting requirements for vehicles.

Location Standards: Before siting a proposed industrial district, proof shall be provided that it conforms to nuisances and hazards requirements of Section 04.250, Nuisances and hazards.

NOTES

1. Accessory buildings and uses customarily incidental to any of the permitted uses are permitted only when located on the same lot and constructed simultaneously with or subsequent to the main building.
2. Densities stated are based upon availability of both community water and sewer.
3. Uses may have been omitted from the list of those specified, hence the Commission may find other uses to be similar and not more obnoxious or detrimental to the public health, safety and welfare. See explanation of interpreting "similar uses" Chapter 04, Uses not listed as permitted.
4. Lots requiring individual septic systems are subject to minimum dimensions as determined by the Lahontan Regional Water Quality Control Board.

Resource Management (RM)

INTENT: The “RM” designation is intended to recognize and maintain a wide variety of values in the lands outside existing communities. The RM designation indicates the land may be valuable for uses including but not limited to recreation, surface water conservation, groundwater conservation and recharge, wetlands conservation, habitat protection for special status species, wildlife habitat, visual resources, cultural resources, geothermal or mineral resources. The land may also need special management consideration due to the presence of natural hazards in the area; e.g., avalanche-prone areas, earthquake faults, flood hazards, or landslide or rockfall hazards.

The RM designation provides for low-intensity rural uses in a manner that recognizes and maintains the resource values of the parcel.

Land subject to the land use authority of an agency other than the County may be designated RM with a reference to the appropriate plan as follows:

- Humboldt-Toiyabe National Forest Land & Resource Management Plan – RM/TNF
- Inyo National Forest Land & Resource Management Plan – RM/INF
- Mono Basin National Forest Scenic Area Comprehensive Management Plan – RM/MB
- Bureau of Land Management, Bishop Resource Management Plan – RM/BLM
- California Department of Fish and Game Lands – RM/DFG
- Mammoth Yosemite Airport Land Use Plan – RM/ALUP

These designations recognize the planning authority of other agencies on publicly owned lands only; the County has authority over private and LADWP lands throughout the unincorporated area.

PERMITTED USES

- Single-family dwelling
- Manufactured home used as a single-family dwelling¹
- Accessory buildings and uses²
- Animals and pets (see Animal Standards Section 04.270)
- Home occupations (see Home Occupation regulations, Section 04.290)
- Resource exploratory activities which do not involve excavation, devegetation, or other potentially significant environmental effects
- Agricultural uses, provided that such uses are proposed in conjunction with a bona fide agricultural operation³, except those requiring a use permit
- Small-scale agriculture
- Accessory Dwelling Unit (as prescribed in Chapter 16, Development Standards – Accessory Dwelling Units)

USES PERMITTED SUBJECT TO DIRECTOR REVIEW (Director Review Processing, Ch. 31)

- Resource exploratory activities which involve excavation, devegetation, or other potentially significant environmental effects

USES PERMITTED SUBJECT TO USE PERMIT (Use Permit Processing, Ch. 32)

- Limited scale lodging, such as small inns, bed and breakfast establishments, and cabins, if found by the Commission to be compatible

Resource Management (RM) continued

- Recreation facilities, such as improved bike trails, cross country ski trails, and pedestrian trails requiring modification of the natural landscape, if found by the Commission to be compatible with the natural habitat of the area
- Construction of an accessory building prior to construction of the main building
- Airports, heliports, taxiways, and landing strips for aircraft
- Mining and geothermal exploration projects

DEVELOPMENT STANDARDS

Minimum Parcel Size: 40 acres or 1/4 of 1/4 section

Maximum Site Disturbance: 10% maximum lot coverage is 5%.

Maximum site disturbance may be increased in conformance to the Specific Plan process.

Minimum Setbacks:

Front: 50' **Rear:** 30' **Side:** 30'

Maximum Building Density: one du/lot and a Accessory Dwelling Unit (see Ch. 16, Development Standards – Accessory Dwelling Units).

Population Density: Maximum population density is 5.02 persons per 40 acres or approximately 0.13 persons per acre.

NOTES

1. Provided that the unit is less than 10 years old and meets the criteria set forth in Section 04.280. When there are two mobile homes on the same parcel, they must 1) comply with the Accessory Dwelling Unit requirements (see Ch. 16), or 2) comply with state standards for a mobile-home park and obtain a use permit from the county (see Ch. 17, Mobile-home and RV Parks).
2. Accessory buildings and uses customarily incidental to any of the permitted uses are permitted only when located on the same lot and constructed simultaneously with or subsequent to the main building.
3. "Agricultural uses" includes agricultural sheds and warehouses; packing, processing, storage or sale of agricultural products and supplies, machinery, implements and equipment; transportation of agricultural products, supplies and equipment together with the necessary maintenance, repair and service of trucks and equipment used therein; the feeding and selling of livestock; aqua culture; accessory buildings and uses including barns, stables and other farm outbuildings; quarters for farm labor or other employees employed on the premises; stands for sale of agricultural products grown on the premises.
4. Large scale projects may be subject to a Specific Plan (Ch. 36) in conformance to the General Plan.
5. Uses may have been omitted from the list of those specified, hence the Commission may find other uses to be similar and not more obnoxious or detrimental to the

public health, safety and welfare. See explanation of interpreting "similar uses" Chapter 04, Uses not listed as permitted.

Agriculture (AG)

INTENT: The “AG” designation is intended to preserve and encourage agricultural uses, to protect agricultural uses from encroachment from urban uses, and to provide for the orderly growth of activities related to agriculture.

PERMITTED USES

- Agricultural uses, provided that such uses are proposed in conjunction with a bona fide agricultural operation¹, except those requiring a use permit
- Single-family dwelling
- Manufactured home used as a single-family dwelling²
- Accessory buildings and uses³
- Farm labor housing
- Stands for sale of agricultural products grown on the premises
- Animals and pets (see Animal Standards Section 04.270)
- Home occupations (see Home Occupation regulations, Section 04.290)
- Fisheries and game preserves ^{TP}
- Accessory Dwelling Unit (as prescribed in Chapter 16, Development Standards – Accessory Dwelling Units.

USES PERMITTED SUBJECT TO DIRECTOR REVIEW (Director Review Processing, Ch. 31)

- None stated

USES PERMITTED SUBJECT TO USE PERMIT (Use Permit Processing, Ch. 32)

- Commercial hog and poultry raising
- Farm labor trailer parks
- Public utility buildings and structures
- Airports, heliports, taxiways, and landing strips
- Stock feeding yards, animal sales yards, agricultural processing plants, and slaughterhouses
- Limited scale lodging, such as guest ranches, small inns, bed and breakfast establishments, and cabins ^C
- Animal hospitals, large and small, veterinary clinics and animal boarding ^{TP}
- Kennel (see Animal Standards, Table 04.013)
- Mineral exploration activities (including geothermal exploration activities) ^{GP}
- Equestrian facilities ^{TP}
- Commercial hunting and fishing ^{TP}
- Rural recreation, parks, and golf courses ^{TP}
- Sports facilities and outdoor public assembly ^{TP}
- Plant nurseries ^{TP}
- Exotic animals ^{TP}

DEVELOPMENT STANDARDS

Minimum Parcel Size: 2.5 acres, but varies by area – minimum parcel sizes/ densities are established by land use designation maps and policies. (Hammil

MONO COUNTY GENERAL PLAN

Valley, see Tri-Valley Goal page II-86 through II-91) ^{SP} (Ten-acre minimum in the Antelope Valley) (Bridgeport Valley and Bodie Hills, see Hammil Valley ^{TP})

Minimum Lot Dimensions: Width – 60’ Depth – 100’ ⁵

Agriculture (AG) continued

Maximum Lot Coverage: 40%

Minimum Setbacks:

Front: 50’ **Rear:** 50’ **Side:** 50’

Setbacks for Accessory Buildings Used as Barns or Stables

Front: 50’ **Rear:** 30 sl’ **Side:** 30 sl’

Building Density: 1 du/lot and a Accessory Dwelling Unit ^{SP} (see Ch. 16, Development Standards–Accessory Dwelling Units).

Population Density: Approximately two persons per acre.

NOTES

1. "Agricultural uses" includes farm labor housing; agricultural sheds and warehouses; packing, processing, storage or sale of agricultural products and supplies; repair, maintenance, servicing, storage, rental or sale of agricultural machinery, implements and equipment; transportation of agricultural products, supplies and equipment together with the necessary maintenance, repair and service of trucks and equipment used therein.
2. Provided that the unit is less than 10 years old and meets the criteria set forth in Section 04.280. When there are two mobile homes on the same parcel, they must: 1) comply with the Accessory Dwelling Unit requirements (see Ch. 16); or 2) comply with state standards for a mobile-home park and obtain a use permit from the County (see Ch. 17, Mobile Homes and RV Parks).
3. Accessory buildings and uses customarily incidental to any of the permitted uses are permitted only when located on the same lot and constructed simultaneously with or subsequent to the main building., including barns, stables and other farm outbuildings and quarters for farm labor or other employees employed on the premises;
4. Uses may have been omitted from the list of those specified, hence the Commission may find other uses to be similar and not more obnoxious or detrimental to the public health, safety and welfare. See explanation of interpreting "similar uses" s 4, Uses not listed as permitted.
5. Lots requiring individual septic systems are subject to minimum dimensions as determined by the Lahontan Regional Water Quality Control Board.

Scenic Area Agriculture (SAA)

INTENT: The “SAA” designation is intended to recognize existing and historic uses as certified by the U.S. Forest Service (USFS) in its Private Land Certification Process and, within the constraints of the Mono Basin National Forest Scenic Area Plan, to allow for further limited-scale development and new uses consistent with the purposes of the Scenic Area. Emphasis is placed on those new uses that would provide for recreational, interpretive, visitor services and research opportunities while maintaining a natural and rural appearing landscape.

The SAA designation is intended also to preserve and encourage agricultural uses, to protect agricultural uses from encroachment from urban uses, and to provide for the orderly growth of activities related to agriculture, consistent with the Mono Basin National Forest Scenic Area.

PERMITTED USES

The following uses are permitted to the extent they comply with the **Mono Basin National Forest Scenic Area Private Property Development Guidelines**, contained in Appendix E of the Mono Basin National Forest Scenic Area Comprehensive Management Plan (CMP), and with the **Compatibility Determinations for Proposed New Commercial Uses and Developments**, Appendix F of the CMP. Compatibility determinations shall be based upon recommendations of the USFS.

- Agricultural uses, provided that such uses are proposed in conjunction with a bona fide agricultural operation⁴, except those requiring a use permit
- Single-family dwelling
- Mobile home used as a single-family dwelling⁵
- Accessory buildings and uses¹
- Stands for sale of agricultural products grown on the premises
- Animals and pets (see Animal Standards Section 04.270)
- Home occupations (see Home Occupation regulations, Section 04.290)
- Fisheries and game preserves ^{1P}
 - Single-family dwelling
 - Small scale agriculture
 - Accessory buildings and uses¹
- Attached Accessory Dwelling Unit (as prescribed in Ch. 16, Development Standards – Accessory Dwelling Units)

USES PERMITTED SUBJECT TO DIRECTOR REVIEW (Director Review Processing, Ch. 31)

The following uses are permitted to the extent they comply with the **Mono Basin National Forest Scenic Area Private Property Development Guidelines** contained in Appendix E of the Mono Basin National Forest Scenic Area Comprehensive Management Plan, and with the **Compatibility Determinations for Proposed New Commercial Uses and Developments**, Appendix F of the CMP. Compatibility determinations, which shall be based upon recommendations of the USFS, shall be included as a Director Review finding.

- Any expansion of an existing use

USES PERMITTED SUBJECT TO USE PERMIT (Use Permit Processing, Ch. 32)

The following uses are permitted to the extent they comply with the **Mono Basin National Forest Scenic Area Private Property Development Guidelines**, contained in Appendix E of the Mono Basin National Forest Scenic Area Comprehensive Management Plan (CMP), and with the **Compatibility Determinations for Proposed New**

Scenic Area Agriculture (SAA) continued

Commercial Uses and Developments, Appendix F of the CMP. Compatibility determinations, which shall be based upon recommendations of the USFS, shall be included as a Planning Commission use permit finding.

- Public utility buildings and structures
- Limited scale lodging, such as guest ranches, small inns, bed-and-breakfast establishments and cabins; and limited scale employee housing for those working on the premises ^c
- Limited scale animal hospitals and small, veterinary clinics / animal boarding ^{TP}
- Limited scale kennel (see Animal Standards, Table 04.013)
- Equestrian facilities ^{TP}
- Commercial hunting and fishing ^{TP}
- Rural recreation and parks ^{TP}
- outdoor public assembly ^{TP}
- Plant nurseries ^{TP}
- Exotic animals ^{TP}
- Exterior structural alterations, additional parking or outdoor storage
- Cottage industry; e.g., limited recreational equipment, apparel and other finished products, crafts, printing, etc.
- Limited scale repair services; e.g., car repair and parts, plumbing, electrical
- Limited scale construction services; e.g., contractor or building services, engineering contractor ^{TP}, cabinet making, roofing, water-well drilling, contractor storage, etc.
- Existing truck and trailer parking, heavy-equipment storage, construction supplies, and materials ^{TP}
- Any compatible combination of the permitted uses
- All new construction for the purpose of conducting sales, business or services and all conversions from a prior use when structural alterations or additional parking are required
- All uses utilizing outdoor storage
- Limited scale educational uses (see Appendix F of the Mono Basin CMP)
- Limited scale buildings for interpretation
- Accessory buildings and uses ¹
- Any proposed change of use when conducted within an existing conforming, legally developed structure for the following uses:
 - Gift shops, bookstores
 - Limited scale repair services conducted as a cottage industry; e.g., radio and television repair, furniture and jewelry repair, repair of anything sold in district, etc.
 - Limited-scale art galleries

DEVELOPMENT STANDARDS

The following standards shall apply to the extent they comply with the **Mono Basin National Forest Scenic Area Private Property Development Guidelines**, contained in Appendix E of the Mono Basin National Forest Scenic Area Comprehensive Management Plan (CMP), and with the **Compatibility Determinations for Proposed New**

Commercial Uses and Developments, Appendix F of the CMP. Compliance shall be based upon recommendations of the USFS.

Minimum Lot Area: 10,000 sf⁶ **Minimum District Area:** 2 acres

Open Space (OS)

INTENT: The “OS” designation is intended to protect and retain open space for future generations. These lands may be valuable for resource preservation (e.g., visual open space, botanical habitat, stream environment zones, etc.), low-intensity recreational uses, mineral resources, or other reasons.

PERMITTED USES

- Crop and tree farming
- Bikeway, pedestrian ways, equestrian trails, cross country ski touring, ski back trails
- Wildlife preserves, botanical preserves and similar uses ^{gP}
- Single-family dwelling ^{gP}
- Small-scale agriculture

USES PERMITTED SUBJECT TO DIRECTOR REVIEW (Director Review Processing, Ch. 31)

None stated

USES PERMITTED SUBJECT TO USE PERMIT (Use Permit Processing, Ch. 32)

- Recreation areas requiring significant modification of natural landscape – e.g., golf courses, tennis courts, commercial stables, alpine ski runs
- Accessory buildings and uses, including barns, stables and farm buildings
- Water storage tanks
- Mineral exploration activities (including geothermal exploration activities) ^{gP}

DEVELOPMENT STANDARDS

Minimum Parcel Size: None

Minimum District Area: None

Maximum Site Disturbance: 10% (includes lot coverage) ^{gP}

Density: 1 du/80 acres and a Accessory Dwelling Unit (see Ch. 16, Development Standards – Accessory Dwelling Units). ^{gP} No residential development is allowed if the parcel is less than 80 acres ^c

Population Density: Approximately 0.06 persons per acre.

NOTES

1. Uses may have been omitted from the list of those specified, hence the Commission may find other uses to be similar and not more obnoxious or detrimental to the public health, safety and welfare. See explanation of interpreting "similar uses" Chapter 04, Uses not listed as permitted.
2. Provided that the unit is less than 10 years old and meets the criteria set forth in Section 04.280.

Natural Habitat Protection (NHP)

INTENT: The “NHP” designation is intended to protect sensitive environmental habitats by minimizing site disturbance and development. Private lands placed in this district contain valuable wildlife habitat, scenic resources, and/or areas subject to natural hazards. Lands contained in this district are high priorities for land exchanges into public holding or purchases by land conservation organizations.

PERMITTED USES

- Single-family dwelling (excluding mobile homes)
- Accessory buildings and uses¹
- Wildlife preserves, botanical preserves, wetland preservation/banking, and similar uses C, GP

USES PERMITTED SUBJECT TO DIRECTOR REVIEW (Director Review Processing, Ch. 31)

- Transient rentals (rental for less than 30 consecutive days) of up to 3 dwelling units
- (i.e., rental cabins or bed-and-breakfast establishments).

USES PERMITTED SUBJECT TO USE PERMIT (Use Permit Processing, Ch. 32)

- Construction of an accessory building prior to construction of the main building
- Limited density residential development such as condominiums, cooperatives, townhouses, and cluster developments, if found to be compatible with the natural habitat area by the Commission
- Commercial lodging uses such as limited scale hotels, motels, including lodges, bed and breakfast establishments, and cabins if found to be compatible with the natural habitat area by the Commission
- Recreation facilities, such as improved bike, cross country skiing, and pedestrian trails, golf courses, tennis courts, stables requiring modification of the natural landscape, if found to be compatible with the natural habitat area by the Commission
- Educational facilities such as a nature or interpretive center focusing on natural site characteristics, if found to be compatible with the natural habitat area by the Commission

DEVELOPMENT STANDARDS

Minimum Parcel Size: 2 acres

Minimum District Area: 5 acres

The Planning Commission may reduce the minimum district area in order to protect sensitive environmental habitats.

Minimum Lot Dimensions: None stated

Maximum Site Disturbance: 10% Maximum lot coverage for all structures, parking and access is 5%. The county General Plan, area plans or specific plans may

contain more-restrictive coverage limitations (i.e., 3% June Lake). Project site plans shall show the extent of lot coverage and site disturbance.

Natural Habitat Protection (NHP) continued

Minimum Setbacks: 30' from any property line or road. Variances may be granted where the project is located to minimize impacts to significant natural site features, but shall not be granted to increase development intensity.

Density: 1 du/5 acres
Commercial lodging units, one unit/three acres

Population Density: Maximum population density is one person/acre for commercial lodging uses.

Maximum Building Height: 24' See for other provisions

Additional Requirements:

- Development projects in the NHP district shall be located in a manner that minimizes visual impacts on surrounding property owners and scenic highways or major thoroughfares. Visual screening may also be used to minimize visual impacts.
- Development projects, where feasible, shall be located away from or outside of sensitive wildlife habitat areas.
- Projects in potential wetland areas shall receive 404 permit approvals or other applicable clearance from the Army Corps of Engineers prior to applying for county development permit.
- Other requirements may be required in area or specific plans.

NOTES

1. Accessory buildings and uses customarily incidental to any of the permitted uses are permitted only when located on the same lot and constructed simultaneously with or subsequent to the main building.
2. Large scale projects may be subject to a Specific Plan (Ch. 36) in conformance to the General Plan.
3. Uses may have been omitted from the list of those specified, hence the Commission may find other uses to be similar and not more obnoxious or detrimental to the public health, safety and welfare. See explanation of interpreting "similar uses" Chapter 04, Uses not listed as permitted.

SEE ALSO

Land Development Regulations –

FOOTNOTES

- c. Clarification
- gp. General Plan addition

Resource Extraction (RE)

INTENT: The “RE” designation is intended to provide for protection of the environment and resource extraction activities in a manner consistent with the Mono County General Plan and applicable state and federal laws. The designation is also intended to provide for processing plants utilizing on-site materials or materials found in close proximity to the site. The Resource Extraction Designation is intended to be applied only in areas with existing or proposed and permitted resource development activities.

PERMITTED USES

All permitted uses within each category are not listed; the Commission may determine additional uses for each category as long as they are consistent with the intent of this designation (see Section 04.030, Interpretation of Similar Uses).

- Geological, geochemical, or geophysical mapping, surface sampling by hand of outcrops and soil, and activities which do not involve extensive excavation, devegetation, or other potentially significant environmental effects.
- Such other uses as the Director may determine to be of an infrequent nature and which involve only minor surface disturbances.
- Residential uses are limited to caretaker units or on-call employee housing associated with on-site resource development projects; such residential units shall be removed during the final reclamation process. Residential subdivisions or other types of permanent residential development are not allowed.
- Agricultural uses which are compatible with the resource extraction activity.

USES PERMITTED SUBJECT TO DIRECTOR REVIEW (Director Review Processing, Ch. 31)

- Excavations or grading conducted for farming or on-site construction for the purpose of restoring land following a flood or natural disaster.
- Resource development activities involving the prospecting for, or extraction of, minerals for commercial purposes and the removal of overburden in total amounts of less than 1,000 cubic yards in any one parcel of one acre or less.
- Resource development activities that do not involve either the removal of more than 1,000 cubic yards of minerals, ore, or overburden; or involve more than one acre in any one parcel.
- Surface mining operations that are required by federal law in order to protect a mining claim, if such operations are conducted solely for this purpose and in compliance with applicable federal regulations which administer the affected mined lands.
- Such other surface mining operations as are categorically determined by the State Mining and Geology Board to be exempt from the provisions of SMARA; and/or those particular resource development activities with similar impacts

that the County may determine to be of infrequent nature and/or involve insignificant amounts of surface disturbance.

USES PERMITTED SUBJECT TO USE PERMIT (Use Permit Processing, Ch. 32)

- Surface mining operations as defined in SMARA.
- Subsurface mining operations.
- Exploring, drilling, processing, stockpiling and transporting of gas, oil and other hydrocarbons.
- Exploring, drilling, and development of geothermal resources.

Resource Extraction (RE) continued

- Construction and operation of geothermal power plants, hydropower plants, and wind and solar power plants.
- Resale and wholesale distributing of materials produced on site and accessory uses, including but not limited to constructing and using rock crushing plants, aggregate washing, screening and drying facilities and equipment, ore reduction plants, asphalt and concrete batching plants, and storage of materials and machinery which is in use and utilized by the permitted operation.

DEVELOPMENT STANDARDS

Minimum Lot Area: 40 acres or 1/4 of 1/4 section, with the exception of patent and/or historical mining claims and "vested operations" which shall be considered on a case-by-case basis. Minimum lot area may be reduced in conformance to the permit process.

Minimum District Area: 40 acres or 1/4 of 1/4 section

Density: Residential uses are not permitted with the exception of on-call employee housing or a caretaker's unit.

Setbacks:

No processing equipment or facilities or resource development shall occur within:

- a. 100 feet from any interior public street or highway unless the public works Director determines that a lesser distance would be acceptable.
- b. 100 feet from any exterior property line.
- c. 500 feet from any adjacent private dwelling, institution, school, or other building or location used for public assemblage.
- d. No geothermal development located within the Hot Creek Buffer Zone shall occur within 500 feet on either side of a surface watercourse (as indicated by a solid or broken blue line on U.S. Geological Survey 7.5 or 15-minute series topographic maps).

Residential uses shall be:

- a. 50 feet from any interior public street or highway unless the Public Works director determines that a lesser distance would be acceptable.
- b. 50 feet from any exterior property line.

Table 04.020	Required Yards

Area Plan (AP)

INTENT: The “AP” designation is intended to identify areas which have or will have an adopted area plan. Area Plans generally provide more specific direction for community areas than that provided in the countywide General Plan. In some instances, an Area Plan may also be appropriate to provide direction for large development proposals, in a manner similar to a Specific Plan.

PERMITTED USES

Permitted uses will be determined by the land use designations applied to specific parcels within the Area Plan boundaries.

DEVELOPMENT STANDARDS

Development standards (e.g., building densities, site disturbance/lot coverage, setbacks, etc.) will be determined by the land use designations applied to specific parcels within the Area Plan boundaries.

SEE ALSO

Mono County General Plan
Land Development Regulations
Mono County Code

Specific Plan (SP)

INTENT: The “SP” designation is intended to provide for planned development in areas outside of existing communities, or on large parcels of land within or adjacent to existing communities. The Specific Plan designation may also be applied to an area to provide direction for potentially conflicting or incompatible land uses. The designation may also be used to "plan for future land uses in the vicinity of, and access routes serving" surface mining operations (Public Resource Code § 2764).

PERMITTED USES

Permitted uses will be determined by the Specific Plan in accordance with Government Code § 65451, applicable provisions of the Mono County General Plan, the Land Development Regulations, and the Mono County Code.

DEVELOPMENT STANDARDS

Development standards (e.g., building densities, site disturbance/lot coverage, setbacks, etc.) will be determined by the Specific Plan in accordance with Government Code § 65451, applicable provisions of the Mono County General Plan, the Land Development Regulations, and the Mono County Code.

SEE ALSO

Mono County General Plan
Land Development Regulations
Mono County Code

V. PROJECTED BUILDOUT

Projected buildout figures were calculated for each community area and for the private lands outside of community areas based on the land use maps in the previous section and the allowable densities established for each land use designation (see Tables 2 & 3). The figures for maximum potential dwelling units and maximum potential population are based on the assumption that the maximum number of housing units allowed under general plan land use designations could be developed. This assumption is somewhat unrealistic, however, since large parcels of private land outside of community areas are in many cases unlikely to be developed in the next 20 years due to environmental constraints, lack of access, lack of infrastructure, and community desires to keep large parcels of agricultural lands as open space.

Assuming that the maximum potential number of dwelling units would be developed also assumes that commercially designated lots that are currently developed either with lower density residential uses or with commercial uses would be redeveloped with higher density residential uses. It is probably unrealistic to assume that this would occur on all commercially designated lots.

The anticipated 80% buildout figures for dwelling units and population actually assumes an 80% buildout in community areas and a 50% buildout on private lands outside of community areas. This assumption is also probably high for the reasons stated above.

Individual sheets for each Planning Area are included in this section in the following order:

- Antelope Valley
- Swauger Creek
- Bridgeport Valley
- Bodie Hills
- Mono North (Mono City, Lundy, Cottonwood Canyon Road)
- Mono South (Lee Vining)
- June Lake
- Mammoth Vicinity
- Long Valley
- Wheeler Crest
- Chalfant Valley
- Hammil Valley
- Benton Valley
- Outside Planning Areas

BUILDOUT BY PLANNING AREA

TABLE 02: BUILDOUT BY PLANNING AREA – MONO COUNTY

Planning Area	Maximum Potential Dwelling Units	% of County-Wide Total
	Proposed	%
Antelope Valley	5,194	18.6
Swauger Creek/Devil's Gate	9	0
Bridgeport Valley	3,531	12.6
Bodie Hills	402	1.4
Mono Basin North	1,111	4.0
Mono Basin South	490	1.8
June Lake	3,970	14.2
Mammoth Vicinity	400	1.4
Long Valley	2,600	9.3
Wheeler Crest	645	2.3
Chalfant Valley	661	2.4
Hammil Valley	304	1.1
Benton Valley	3,874	13.9
Outside Planning Areas	4,756	17.0
Countywide Total	27,947	

NOTES

1. Numbers may not add up due to rounding.
2. Buildout change calculated assuming acreage was previously designated Resource Management (RM), which allows a density of one dwelling unit/40 acres. Previous buildout would have been 360 dwelling units.
3. In the 1993 General Plan, the buildout calculation for the June Lake Planning Area did not include the buildout figure for the Rodeo Grounds Specific Plan area. Other buildout calculations for the June Lake Planning Area were miscalculated. Correcting the previous figures results in the proposed buildout; however, there is no real change in buildout from that allowed by the existing land use designations.
4. In the 1993 General Plan, the total buildout calculation was miscalculated. The total buildout figure for Large-Lot Residential (LLR) should have been 620. The total buildout figure for Specific Plan (SP) should have been 690; this figure was included in the total for the Mono North Planning Area but was omitted from the countywide total. The correct total buildout figure has been used in this table.

NOTES: du = dwelling unit

1. 146 acres designated ER 10 (10-acre minimum lot size).
2. 1,344 acres designated RR 5 (5-acre minimum lot size); 39 acres designated RR 40 (40-acre minimum lot size).
3. AG 10 (10-acre minimum lot size) designated in Antelope Valley.

4. This represents the future expansion area for Coleville. No development plan has been proposed.

OS Open Space – WRID	1 du/80 acres	3,066	38
Total		47,793	3,531

NOTES du = dwelling unit

1. 66 acres designated AG 10 (10-acre min. parcel size). 115 acres designated AG 20 (20-acre min. parcel size). Dwelling unit potential for remaining 24,602 acres calculated using the development credits program established in Hammil Valley, which allows a certain number of units to be developed per parcel, depending on the size of the parcel and the ownership. In Bridgeport Valley it results in 678 potential du for the 24,602 acres.

2. Development of the remaining 167 acres in the Bridgeport community is constrained by identified wetlands; special considerations are necessary for development. No development plan has been submitted for either of these areas.

Total	---	1,985,950	27,947

BUILDOUT BY LAND USE DESIGNATIONS – COUNTYWIDE TOTALS – continued

This table is a revision of Table 3 in the Land Use Element of the 1993 General Plan. There are separate sheets for each Planning Area in addition to the summary sheet shown here.

NOTES du = dwelling unit.

1. Numbers may not add up due to rounding.
2. Maximum potential dwelling units may not equal total acreage multiplied by the allowable density. This is due to the designation of minimum lot sizes other than those established by the allowable density.
3. The acreage figure for the Town of Mammoth Lakes Private Lands is not included in the total private lands acreage since planning authority for those lands lies with the town of Mammoth Lakes.
4. The private land total has changed from the existing total in Table 3 in the Land Use Element of the 1993 General Plan due to more accurate maps, more precise calculations (including the exclusion of streets), and land exchanges and sales which have occurred between public and private ownership since 1993.
5. The calculations for maximum potential dwelling units do not include the potential for Accessory Dwelling Units where it is available.
6. The maximum potential dwelling units have not been calculated for the Rural Resort (RU) designation. Although the designation allows one du/5 acres, it does not allow subdivisions. Other environmental constraints also limit development on that land. No development plans have been submitted for most of the property designated RU.
7. Densities over one du/acre are dependent on the availability of community water and sewer services. As a result, the maximum allowable buildout is unlikely to occur on parcels with designations that allow multi-family residential development.
8. The maximum allowable buildout is also unlikely to occur on parcels designated Open Space (OS). All the parcels designated OS are owned by utility companies (LADWP, WRID, Sierra Pacific Power, and SCE). Due to environmental constraints and the ownership, it is unlikely that these lands will develop, particularly to their maximum allowable buildout.
9. The 31 acres designated Natural Habitat Protection (NHP) was overlooked in the 1993 General Plan.
10. The 1,336 acres designated Open Space (OS) – SCE were overlooked in the 1993 General Plan.
11. A small reduction in the total acreage designated Resource Management (RM) – Federal/State reflects land exchanges and more-precise maps.

GENERAL PROVISIONS

CHAPTER 01 – INTRODUCTORY PROVISIONS

Sections:

- 01.010 Purpose and Intent.**
- 01.020 Authority for Regulations.**
- 01.030 Application and Scope.**
- 01.040 Interpretation.**
- 01.050 Restrictions.**
- 01.060 Land Use Designations.**
- 01.070 Restriction on Issuance of Permits**

01.010 Purpose and Intent.

- A. The purpose of the Mono County Land Development Regulations is to regulate development as allowed by Government Code 65850, including the following:
 - 1. The use of buildings, structures, and land as between industry, business, residences, and open space uses.
 - 2. Signs and billboards.
 - 3. The location, height, bulk, number of stories, and size of buildings and structures.
 - 4. The size and use of lots, yards, and other open spaces.
 - 5. The percentage of a lot which may be occupied by impervious surfaces.
 - 6. The intensity of land use.
 - 7. Requirements for off-street parking and loading.
 - 8. Establishment and maintenance of setback lines.

- B. These regulations are deemed necessary in order to implement the county's General Plan as summarized in the following objective:

Accommodate future growth in a manner that preserves and protects the area's scenic, agricultural, natural and recreational resources and that is consistent with the capacities of public facilities and services.

01.020 Authority for Regulations.

The Mono County Land Development Regulations are adopted pursuant the State Planning and Zoning Law, Division 1 of Title 7 of the California Government Code (commencing with Section 65000), and other applicable state and federal laws.

01.030 Application and Scope.

Except where preempted by applicable state or federal laws, these regulations (along with other applicable provisions of this General Plan, including but not limited to the Land Use Maps incorporated herein) shall apply to all land in the unincorporated area of the county. Such land may only be developed or otherwise used in a manner

consistent and compliant with these regulations and any other applicable provisions of this General Plan.

01.040 Interpretation.

Unless otherwise provided, any ambiguity concerning the content or application of the Land Development Regulations shall be resolved by the Planning Commission (see Section 3.030, Interpretation of "Similar Uses") or, on appeal therefrom, by the Board of Supervisors.

01.041 Minor Variance by Director.

In certain cases, the Director may grant a reduction of up to 10% in any given Land Development Standard. In order to grant this reduction, the Director must find:

- A. Because of special circumstances applicable to the property, including size, shape, topography, location or surroundings, the strict application of the standard deprives such property of privileges enjoyed by other property in the vicinity and under the same land use designation;
- B. The proposed reduction remains consistent with the intent and objective of the standard;
- C. The proposed reduction will not create undue hardship on adjacent properties;
- D. There is no other practical means of achieving compliance with the standard;
- E. The reduction does not conflict with any other laws or plans; and
- F. The project must be exempt from CEQA.

01.050 Restrictions.

The Land Development Regulations are not intended to interfere with, abrogate, or annul any easement, covenant or other agreement between parties. Where the Land Development Regulations impose a greater restriction upon the use of buildings or land than is imposed or required by other ordinances, rules, regulations or by easements, covenants or agreements, the provisions of the Land Development Regulations shall control. Unless otherwise specified, the County of Mono is not responsible for enforcing CC&Rs.

01.060 Land Use Designations.

For purposes related to the orderly development of the county and in order to carry out the provisions of this General Plan, each and every parcel of land in the unincorporated area of the county has been duly assigned a land use designation, as depicted in the Land Use Maps contained in Section VII of this Land Use Element. (See also "Land Use Designations" in Section IV of this Land Use Element.) A "land use designation" is a general category or class of land use activity (e.g., "residential," "commercial," or "industrial") that is permitted to occur on those specific parcels of land in the county that have been duly assigned that particular land use designation by the County pursuant to this Land Use Element. (See definition of "Land Use Designation" set forth in Section 02.705 of these Land Development Regulations.) Except as otherwise expressly provided by these Land Development Regulations, no land may be developed or used except in the manner permitted by its assigned designation, to wit:

- A. No building shall be erected and no existing building shall be moved, altered, added to or enlarged, nor shall any land, building or premises be used, designated or intended to be used for any purpose, or in any manner other than that which is included among the uses listed as permitted by the particular land

use designation assigned by the County to the parcel of land on which such building or premises is located.

- B. No building shall be erected, reconstructed or structurally altered to exceed in height the limit allowed by these regulations for the particular land use designation assigned by the County to the parcel of land on which such building is located, except as provided in Section 04.110 of these Land Development Regulations.
- C. No building shall be erected nor shall any existing building be altered, enlarged or rebuilt, nor shall any yard or open space be encroached upon or reduced in any manner, except in conformance to the yard, building site area and building location regulations applicable to the particular land use designation assigned by the County to the parcel of land on which such building, yard, or open space is located, except as provided in Chapter 04 of these Land Development Regulations.
- D. No yard or other open space provided about any building for the purpose of complying with provisions of these regulations and this General Plan shall be considered as providing a yard or open space for any other building, and no yard or other open space on one building site shall be considered as providing a yard or open space for any building on any other site.

01.070 Restriction on Issuance of Permits.

Processing any regulatory permit or land use application, renewal or issuance may be denied if a violation of Mono County regulations exists on the subject property until such time that the violation has been abated or no longer exists. Permits necessary to rectify or abate a violation, as determined by Mono County, are exempt from this restriction.

02.1200	Time-share use.
02.1201	Tract housing.
02.1210	Transient rental.
02.1215	Transitional housing.
02.1220	Travel trailer.
02.1230	Use.
02.1240	Use, accessory.
02.1250	Yard.
02.1260	Yard, front.
02.1270	Yard, rear.
02.1280	Yard, side.

02.010 Context and General terminology.

The terms and definitions contained in this chapter shall be used to assist in interpreting the provisions of the Land Development Regulations only.

When not inconsistent with the context, words used in the present tense include the future; words in the singular number include the plural, those in the plural number include the singular; "or" includes "and," and "and" includes "or."

- A. "Commission" means the Planning Commission of Mono County.
- B. "County boundary" means the boundary of Mono County.
- C. "Division" means the Planning Division.
- D. "Director" means the Director of Community Development or Director of Economic Development in the case of energy-related use permits. In the case of Minor Variances pursuant to section 01.041, the Director shall serve in a capacity similar to the zoning administrator as defined in Government Code section 65901."
- E. "Federal" means the government of the United States of America.
- F. "Used" includes "arranged for, designed for, occupied or intended to be occupied for."

02.020 Abutting.

"Abutting" means having a common border.

02.030 Accessory building or use.

"Accessory building or use" means a subordinate building or use incidental to that of the main building or main use on the same lot.

02.031 Accessory dwelling unit

"Accessory dwelling unit" means a secondary residential unit located on the same parcel as the principal unit. It provides complete, independent living facilities for one or more persons. It includes permanent provisions for living, sleeping, eating, cooking, and sanitation on the same parcel as the primary unit. It can be either attached to or detached from the existing residential unit, dependent on the lot or parcel size (see Ch. 16, Development Standards – Accessory Dwelling Units).

02.040 Acreage.

- A. Acreage, gross. "Gross acreage" means the total lot or parcel area as determined through calculations based on the recorded legal description for the subject property.
- B. Acreage, net. "Net acreage" means the total lot or parcel area remaining after existing and/or proposed rights of way have been excluded.

02.050 Adjacent.

"Adjacent" means near, close or abutting; for example, a retail business district across the street or highway from a residential district shall be considered as "adjacent."

02.060 Agriculture.

"Agriculture" means the art or science of cultivating the ground, including the harvesting of crops and rearing and management of livestock; tillage; husbandry; farming; horticulture; and forestry, the science and art of the production of plants and animals useful to man.

02.070 Airport.

"Airport" means any area which is used for the taking off and landing of aircraft, including helicopters, and any appurtenant areas which are used or are intended to be used for airport buildings or facilities, including open spaces, taxiways and "tie-down" areas.

02.080 Alley.

"Alley" means a passage or way open to public travel, affording a secondary means of vehicular access to abutting lots and not intended for general traffic circulation.

02.090 Alquist-Priolo Earthquake Fault Land Use Designations and Land Development Regulations Act.

"Alquist-Priolo Earthquake Fault Land Use Designations and Land Development Regulations Act": Also known as the Alquist-Priolo Earthquake Fault Zones as of January 1994, its purpose is to provide for public safety in hazardous fault zones. The Act requires the delineation of potential damage areas, called "Special Studies Zones," along known active faults throughout California. It requires local governments to withhold approval of construction permits in those zones until geologic investigation has determined that the site is not threatened by surface displacement from future faulting.

02.100 Animal enclosure.

"Animal enclosure" means a detached accessory building, or portion of a building used to shelter and feed pets readily classifiable as being incidental to residential uses. This term precludes stables, corrals and barns used for farm/ranch animals.

02.110 Animal hospital, large.

"Animal hospital, large" means any premises used for the treatment, care, boarding, and grooming of large or small animals, and not conducted wholly within a building.

02.120 Animal hospital, small.

"Animal hospital, small" means any premises used for the treatment, care, boarding, and grooming of dogs, cats and similar size animals, with all operations being conducted wholly within a building unless otherwise specified in the use permit.

02.130 Apartment.

"Apartment" means a room or suite of two or more rooms which is designated for, intended for or occupied by one family doing its cooking therein.

02.140 Automobile wrecking yard.

"Automobile wrecking yard" means the same as junkyard.

02.150 Bed-and-Breakfast.

"Bed-and-Breakfast" establishment means a transient dwelling other than a hotel or dorm where lodging and meals are provided for compensation. Density and parking requirements for hotels shall be applied to bed-and-breakfast establishments, in MFR or Commercial Districts. Upon General Plan consistency review, bed-and-breakfast establishments may be found appropriate in the agricultural district. Further, no meal service may be provided other than for guests staying on the premises.

02.160 Block.

"Block" means that property abutting on one side of a street and lying between the two nearest intersecting or intercepting streets or nearest intersecting or intercepting streets, unsubdivided acreage, watercourse or body of water.

02.170 Buffer.

"Buffer" means a strip of land established to separate incompatible or different land uses. Normally a buffer area is landscaped and retained as open space. The term may be used more broadly to describe any area that separates two unlike land uses, such as multiple-family housing between single-family housing and commercial uses.

02.180 Building.

"Building" means any structure built for the support, shelter or enclosure of any person, animal, or for storage.

02.190 Building, accessory.

"Building, accessory" means a subordinate building, the use of which is incidental to that of a main building on the same building site.

02.200 Building, main.

"Building, main" means a building in which is conducted the principal use of the building site upon which it is located. In any residential district, any dwelling shall be deemed to be a main building on the building site upon which it is located.

02.210 Building site.

"Building site" means a parcel of land occupied or intended to be occupied by one building or group of buildings and uses customarily accessory and incidental thereto, including such open spaces as are provided or are intended to be used in connection therewith or are required by the regulations for the district wherein such parcel is located.

02.220 Business.

"Business" means the retail or wholesale sale, provision of service, or handling of any article, substance or commodity for profit or livelihood, but not including the handling of lumber or other building materials or the open storage or sale of any material or commodity, nor the processing or manufacturing of any product or substance.

02.230 Campground.

"Campground" means land which is used or intended for use, or to be let or rented for occupancy by campers on a temporary basis without provisions for electrical or sanitary hookups at individual campsites.

02.240 Carport.

"Carport" means an accessible and usable covered space of not less than the required dimensions for a parking space for the storage of automobiles. Carports shall be located to meet the setback and building height requirements of the land use designations and, land development regulations. A turning radius of at least 25 feet shall be provided for any carport which does not face directly on a street.

02.250 Cattle feed yard.

"Cattle feed yard" means any premises on which cattle are held or maintained for the purpose of feeding and fattening for market and where 60% or more of the feed for such cattle is imported or purchased.

02.260 Cemetery.

"Cemetery" means land used or intended to be used for the burial of the dead and dedicated for cemetery purposes, including columbariums, crematoriums, mausoleums and mortuaries when operated in conjunction with and within the boundary of such cemetery.

02.270 Club.

"Club" means an association of persons (whether incorporated or not) religious or otherwise, for a common purpose, but not including groups which are organized primarily to render a service carried on as a business for profit.

02.280 Combining district.

"Combining districts" are intended to provide an additional mechanism that can more precisely portray unique constraints or opportunities and may be applied to the underlying base designation (e.g., SFR, ER, AG, etc.). To establish a combining district the procedures outlined Chapter 48, Amendments, shall be followed.

02.290 Cluster development.

"Cluster development" means the concentration of detached single-family residences onto smaller lots than ordinarily permitted by the base designation (e.g., ER, SFR, etc.), or onto commonly owned lots, while not exceeding the permitted density for the total acreage being considered. This permits optimum use of the land; i.e., responding to site constraints by clustering away from the area of sensitivity, yet not decreasing the allowable density.

02.300 Conversion of existing residential facilities to other uses.

"Conversion of existing residential facilities to other uses" means multifamily developments or apartments and mobile-home parks which are converted to another use, including the conversion to no use or cessation of use as residential facilities.

02.310 (a) Condominium, commercial.

"Condominium, commercial" is an estate in real property consisting of an undivided interest in common in a portion of a parcel of real property together with a separate interest in space in a building used for commercial purposes such as offices and stores.

02.310 (b) Condominium, industrial.

"Condominium, industrial" is an estate in real property consisting of an undivided interest in common in a portion of a parcel of real property together with a separate

interest in space in a building used for industrial purposes such as manufacture, and assembly.

02.310 (c) Condominium, residential.

"Condominium, residential" is an estate in real property consisting of an undivided interest in common in a portion of a parcel of real property together with a separate interest in space in a building used as a residence.

02.310 (d) Condominium, hotel.

"Condominium, hotel" means an estate in real property consisting of an undivided interest in common in a portion of a parcel of real property together with a separate interest in space in a building used for vacation residence. A "condo-hotel" may or may not contain cooking facilities. Further, all development requirements part of a residential condominium shall be requirements of a condo-hotel. (Exception: If this is for financing purposes as specified in a Development Agreement or other agreed upon mechanism for a "hotel," these requirements shall not apply).

02.320 Contiguous.

"Contiguous" means in actual close contact; touching; bounded or traversed by. Property shall be considered as contiguous units, even if it is separated by roads, streets or easements.

02.330 Consistency.

"Consistency" means a review to ensure that all plans and actions conform to guidelines of this General Plan and Area General Plans.

02.340 Country club.

"Country club" means the land area and buildings containing recreational facilities, clubhouse, and usual accessory uses, open only to members and their guests for a membership fee.

02.350 Court.

"Court" means open, unoccupied space, other than a yard, on the same lot with a building or group of buildings and which is bounded on two or more sides by such buildings or structures.

02.360 Density.

"Density" means the ratio of dwelling units to net acreage.

02.370 Design.

"Design" means (1) street alignments, grades and widths; (2) drainage and sanitary facilities and utilities, including alignments and grades thereof; (3) location and size of all required easements and rights-of-way; (4) fire roads and firebreaks; (5) lot size and configuration; (6) traffic access; (7) grading; (8) land to be dedicated for park or recreational purposes; and (9) such other specific physical requirements in the plan and configuration of a project as may be necessary to ensure consistency with or implementation of the General Plan, or any applicable specific plan.

02.375 Designation

"Designation" means "Land Use Designation" (defined below).

02.380 Design Review Committee.

"Design Review Committee (DRC)" means a person or persons appointed by the Board of Supervisors to review all applications for commercial structures, multi-family development, and signs within a defined design review district.

02.390 Development agreement.

"Development agreement" means a contract or agreement whereby the County is authorized to enter into an agreement with developers that set forth the rules that will govern a development as it proceeds through the approval process. A development agreement must specify the time during which the County agrees not to change its regulations, and may also include any other terms and conditions including time schedules for development or additional public services and facilities to be provided by the developer.

02.400 Deviation.

"Deviation" means authorized variances from required distances, setbacks, areas or physical improvements.

02.410 District area.

"District area" means all land area within a specific land use designation. For instance, the SFR district area in a specific community may contain 50 acres. Acreage for any district area is calculated based on all contiguous property in a single land use designation.

02.420 Dorm.

"Dorm" means a transient lodging other than a hotel/motel or bed-and-breakfast. A dorm usually contains common sleeping, bathroom and kitchen facilities.

02.430 Duplex.

"Duplex" means a building designed or used exclusively for the occupancy of two families living independently of each other and having separate kitchen and toilet facilities for each family.

02.440 Dwelling.

"Dwelling" means a structure or portion thereof designed and used exclusively for residential occupancy and permitted home occupations, but not including hotels, motels, dorms, travel trailers or tents.

02.450 Dwelling, multiple-family.

"Dwelling, multiple-family" means a building designed or used for occupancy by three or more families, all living independently of each other and having separate kitchen and toilet facilities for each family.

02.460 Dwelling, one family.

"Dwelling, one-family" means a detached building designed or used exclusively for the occupancy of one family and having kitchen and toilet facilities for only one family.

02.470 Environmental impact.

"Environmental impact" means projected long- or short-term effects (adverse or beneficial) that a development project or plan may have on the natural and built environment if the project is carried out.

02.480 Factory-built housing.

"Factory-built housing" means a residential building, dwelling unit, or an individual dwelling room, or combination of rooms thereof, or building component, assembly, or system manufactured in such a manner that all concealed parts or processes of manufacture cannot be inspected before installation at the building site without disassembly, damage, or destruction of the part, including units designed for use as part of an institution for resident or patient care, which is either wholly manufactured or is in substantial part manufactured at an off-site location to be wholly or partially assembled on site in accordance with building standards published in the State Building Standards Code and other regulations adopted by the Commission pursuant to Section 19990. Factory-built housing does not include a mobile home, as defined in Health and Safety Code Section 18008, mobile accessory building or structure, as defined in Health and Safety Code Section 18010, a recreational vehicle, as defined in Health and Safety Code Section 18010.5, or a commercial coach, as defined in Health and Safety Code Section 18012 (see Health and Safety Code Section 19971).

02.490 Family.

"Family" means a person or persons living together as a single housekeeping unit in a dwelling unit.

02.500 Farm-labor quarters.

"Farm-labor quarters" means rooming or boarding houses, bunkhouses, trailers, mobile homes or mess halls for any number of farm laborers customarily employed principally on land owned or leased by the person or persons engaged in the agricultural enterprise, and located on the premises. Farm labor quarters also means farm labor housing where two or fewer families are provided living quarters or housing accommodations.

02.510 Findings.

"Findings" mean a set of conclusions which are required before specified permits, deviations, ordinance changes or other entitlements may be granted.

02.515 Flag lot.

"Flag lot" means access to a street or road by means of a corridor, access way, pole or flag to a single-family residential lot. See Section 04.310.

02.520 Floor area ratio.

"Floor area ratio" means the ratio of gross (e.g., including halls, restrooms, storage areas) floor area to total lot area expressed as a fraction.

02.530 Garage, private.

"Garage, private" means a detached accessory building or a portion of the main building on the same lot as a dwelling for the storage of vehicles of occupants of the dwelling. A turning radius of not less than 25 feet shall be provided for any garage that does not face directly upon a street.

02.540 Garage, public.

"Garage, public" means any premises, except those defined in this chapter as a private garage, used for the storage and/or repair of motor vehicles, or where any such vehicles are equipped for operation or repair (i.e., tow trucks), or kept for remuneration, hire or sale.

02.550 Golf course.

"Golf course" means a golf course with a minimum of nine holes, none of which shall be less than a three par.

02.560 Guesthouse.

"Guesthouse" means an accessory use to a residence that may contain living and sleeping spaces, including bathrooms, but shall not contain facilities for the cooking of food. A guesthouse shall not be used as an Accessory Dwelling Unit for rental whether compensation is direct or indirect. A guesthouse cannot be located within any required setback area. On parcels of less than one gross acre, guesthouses may not exceed 640 sq. ft. and will be subject to Director Review and approval. As a condition of approval, the owner shall record a "Declaration of Restriction" limiting the use of the unit to be that of a bona fide guesthouse. Said covenant shall include an accurate site plan showing all improvements and clearly indicate the guesthouse.

02.570 Grade, natural.

"Grade, natural" means the incline of the surface of earth along a continuous slope before its alteration by the works of man (including any interim grading, whether authorized or not).

02.580 Height of building.

"Height of building" means the vertical distance from the average level of the highest and lowest point of that portion of the building site covered by the building to the topmost point of the building, but excluding certain features as specified in Section 04.110 as set forth in subsection A and B of that section. All height shall be calculated from the natural or finished grade, whichever is more restrictive.

02.590 Home occupation.

"Home occupation" means any use which can be carried on within a dwelling by the inhabitants thereof and which is clearly incidental and secondary to the residential use of the dwelling, and which:

- A. Is confined completely within the dwelling and ancillary structures, excepting two vehicles not to exceed one ton each;
- B. Involves no sales of merchandise other than that produced on the premises or merchandise directly related to and incidental to the occupation; as long as no other violation of any other subsection occurs;
- C. Is carried on by members of the family occupying the dwelling, with no other persons employed;
- D. Produces no evidence of its existence in the external appearance of the dwelling or premises, or in the creating of noise, odors, smoke or other nuisances to a greater degree than that normal for the neighborhood (i.e., no delivery trucks);
- E. Does not generate pedestrian or vehicular traffic beyond that normal in the neighborhood in which located;
- F. Requires no structural, electrical or plumbing alterations in the dwelling;

- G. Involves no equipment other than that customarily used in dwellings;
- H. Involves no outdoor storage or advertising;
- I. Modifications to the above requirements (employees, signage, exterior storage, client visits) may be permitted with an Expanded Home Occupation Permit; and
- J. Expanded Home Occupation Permits require approval by the Planning Commission at a public hearing.

02.600 Housing, dependent.

See Section 02.031, Accessory Dwelling Unit, and also Chapter 16, Development Standards – Accessory Dwelling Units.

02.620 Hotel.

"Hotel" means any building or portion thereof containing six or more rental guest rooms that are used, designed for or intended for use, by six or more guests who pay the compensation or rent either directly or indirectly.

02.630 Hotel, resort.

"Hotel, resort" means a hotel and accessory recreational components, as well as service uses designed primarily for the convenience of guests.

02.640 Industrial park.

"Industrial park" means a single parcel of land designated to provide for a combination of light and moderate industrial uses which do not in their maintenance, assembly, manufacture, or plant operation create smoke, gas, odor, dust, sound, vibration, soot or lighting to a degree which might be obnoxious or offensive to persons conducting a business in this or any adjacent district. Where applicable, the provisions outlined in Nuisances and Hazards, Section 04.250, shall apply.

02.650 Infrastructure.

"Infrastructure" means the basic utilities and services necessary to support development; e.g., sewer, water and roads.

02.660 Joint-use parking.

"Joint-use parking" means the common use of (a) parking space(s) among businesses on the same lot whose operating hours do not overlap.

02.670 Junkyard.

"Junkyard" means the use of more than 200 sq. ft. of the area of any parcel, lot or contiguous lots for the storage of junk, including scrap metals or other scrap materials and for the dismantling, wrecking or storage of used automobile or vehicles or machinery or parts thereof.

02.680 Kennel.

- A. Kennel, private. "Private kennel" means any property where dogs and cats over the age of 4 months are kept in accordance with the requirements of Section 04.270 for the use and enjoyment of the occupant for noncommercial purposes.

- B. Kennel, boarding or commercial. "Boarding or commercial kennel" means any facility other than a private kennel, including, but not limited to, a facility for the keeping, boarding, breeding, training and maintaining of more than four dogs of 4 months of age or older, whether for a fee or not, or for sale.

02.690 Kitchen.

"Kitchen" means any room, all or part of which is designed or used for cooking and the preparation of food.

02.700 Land Development Technical Advisory Committee.

"Land Development Technical Advisory Committee" (LDTAC) means a technical committee consisting of the director of Public Works, the Community Development director and the Health Officer, and any other affected County departments, or their designated representatives. This body shall act in a technical capacity to the Commission. This body reviews and makes recommendations on all subdivisions, land divisions, use permits, general plan amendments, land use redesignations and preapplications.

02.705 Land use designation.

"Land use designation" is a general category or class of land use activity (e.g., "residential," "commercial" or "industrial") that is permitted to occur on specific parcels of land in the unincorporated area of the county that have been duly assigned that designation by the County pursuant to this Land Use Element of the General Plan. Land use designations are generally described in Section IV of this Land Use Element and their specific assignments to individual parcels of land in the unincorporated area of the county are depicted in the Land Use Maps set forth in Section VII of this Land Use Element. Because assigned land use designations essentially create regulatory boundaries or areas within which certain permitted uses may occur, parcels of land are sometimes described under these Land Development Regulations as being located within their assigned land use designations. Except as otherwise expressly provided by these Land Development Regulations, no land may be developed or used except in the manner permitted by its assigned designation. (See Section 01.060 of these Land Development Regulations.)

02.710 Landscaping.

"Landscaping" means the use of plant and natural materials, paving materials or structural materials in order to amend and enhance the exterior environment on any parcel, public right of way and easement or to reestablish or reinforce the existing natural environment.

02.720 Lot.

"Lot" means land occupied or to be occupied by a use, building or a unit group of buildings and uses and accessory buildings and uses, together with such yards, open spaces and lot width and area as are required, and having frontage upon a street; or an area or parcel shown on and created by a final or parcel map recorded with the county Recorder.

02.730 Lot coverage.

"Lot coverage" means the percentage of a lot encumbered by structures and areas devoted to vehicular traffic or parking. Specified requirements may be modified for substandard lots.

02.740 Lot, double-frontage.

"Lot, double-frontage" or through lot means a lot other than a corner lot which has frontage on two parallel or approximately parallel streets. Required front yards shall be measured from both street frontages.

02.750 Lot depth.

"Lot depth" means the average horizontal distance between the front and rear lot lines measured in the mean direction of the side lot lines.

02.760 Lot width.

"Lot width" means the distance measured at the building setback line (BSL) along a line or arc that is parallel or concentric to the right of way.

02.770 Manufactured housing.

The term manufactured home and mobile home may be used interchangeably in the General Plan, however permitting and use shall be pursuant to state law in regard to its definition of manufactured housing. "Manufactured housing" means a structure, transportable in one or more sections, which, in the traveling mode, is 8 body feet or more in width, or 40 body feet or more in length, or, when erected on site, is 320 or more square feet, and which is built on a permanent chassis and designed to be used as a dwelling with or without a permanent foundation when connected to the required utilities, and includes the plumbing, heating, air conditioning, and electrical systems contained therein; except that such term shall include any structure that meets all the requirements of this paragraph except the size requirements and with respect to which the manufacturer voluntarily files a certification and complies with the standards established under Part 2 of Division 13 (18000 et seq.) of the Health and Safety Code. "Manufactured home" includes a mobile home subject to the National Manufactured Housing Construction and Safety Act of 1974 (42 U.S.C., Sec. 5401, et seq.) (see Health and Safety Code Section 18007).

02.780 Manufactured-housing subdivision.

"Manufactured-housing subdivision" means any area or tract of land where two or more lots are created in accordance with applicable provisions of Title 17 of the Mono County Code for the exclusive use of manufactured-housing units that are defined to include mobile homes and factory-built housing.

02.790 Mobile home.

The term manufactured home and mobile home may be used interchangeably in the General Plan, however permitting and use shall be pursuant to state law in regard to its definition of mobile home. "Mobile home" means a structure that meets the Health and Safety Code requirements of Health and Safety Code Section 18007. "Mobile home" does not include a commercial coach, as defined in Health and Safety Code Section 18001.8, factory-built housing, as defined in Health and Safety Code Section 19971, or a recreational vehicle, as defined in Health and Safety Code Section 18010 (see Health and Safety Code Section 18008). "Commercial coach" means a structure transportable in one or more sections, designed and equipped for human occupancy for industrial, professional, or commercial purposes, which is required to be moved under permit, and shall include a trailer coach as defined in Section 635 of the Vehicle Code (see Health and Safety Code Section 18001.8).

02.800 Mobile-home display units.

"Mobile-home display units" means any mobile home or mobile homes which are used solely for the purpose of displaying units offered for sale by the developer of an approved mobile-home park or subdivision in the area.

Mobile-home display units are deemed to be temporary and shall be removed from the site at the completion of the sales program or upon termination of any permit issued for that use. Mobile-home display units shall not be used at any time for living quarters unless installed on legal mobile-home lots that provide all necessary support requirements.

02.810 Mobile-home park.

"Mobile-home park" means any area or tract of land designed as a single unit where two or more mobile-home lots or spaces are rented or leased, or held out for rent or lease to accommodate mobile homes used for dwelling purposes.

02.820 Modular.

Refer to factory-built housing definition, Section 02.480.

02.830 Model home or unit, temporary.

"Model home or unit, temporary" means any dwelling unit or units which are used solely for the purpose of displaying units offered for sale and which are of a temporary nature, the unit or units to be removed from the site at the expiration of any permit issued for the use. Temporary model homes or units shall not be used at any time as living quarters.

02.840 Motel.

"Motel" means a building or buildings containing guest rooms or units with associated automobile parking spaces designed and used primarily for the accommodation of transient automobile and other travelers.

02.850 Nonconforming.

"Nonconforming" means the existence or use of land, a building, a structure or portion thereof, which does not conform to the regulations of the land development regulations and which lawfully existed at the time the regulations with which it does not conform became effective.

02.860 Nurseries.

"Nurseries" means the retail or wholesale handling of any article, substance or commodity related to the occupation of gardening, including the sale of plants, shrubs, trees, packaged fertilizers, soils, chemicals and other nursery goods and related products. The bulk sale or bulk storage of fertilizers, soils, chemicals and other garden supplies shall be within a building.

02.870 Open space.

"Open space" means land where basic natural values have been retained. Open space can include wilderness areas as well as a small park in the middle of town, pastures, forested areas, agricultural uses, golf courses, flood washes, ski runs, etc. The function of open space may differ, depending upon the location. It may have a protective function, as in the case of open space in flood plain areas, where it serves to protect health and safety. It can have a structural or buffer function to space and separate

conflicting land uses. It may serve the function of recreation or a scenic function to provide aesthetic views of forests or mountains.

02.880 Outdoor sales.

"Outdoor sales" means any retail sales operation conducted either partially or entirely outside, in a motorized vehicle, or temporary structure (i.e., tent, vegetable stand, etc.).

02.890 Overlay district.

"Overlay district" means an area within which a set of standards and requirements are employed to deal with special physical characteristics such as hazardous areas. Overlay districts are sometimes described in the general or area plans and are mapped and/or imposed in conjunction with, and in addition to, those of the underlying land use designation.

02.900 Parking space.

"Parking space" means a usable space on the building site at least 10' x 20' if over 7,000' elevation and at least 9' x 18' if covered or under 7,000' elevation. Such space shall be located off the street with adequate access to such space.

02.910 Parking, underground structure.

"Parking, underground structure" is an improved, covered parking lot built beneath the structure that it primarily serves, and not extending more than five feet above the finished grade. Building height is then measured from the top of the underground parking structure.

02.915 Pool.

"Pool" means a man-made structure containing water and open at the surface which is installed permanently within the ground. A pool may be used for human use, aesthetics or otherwise.

02.920 Poultry farms.

"Poultry farms" means the raising and/or keeping of chickens, ducks, geese, pigeons, pheasants, or guinea fowl for commercial purposes.

02.930 Professional office.

"Professional office" means an establishment for professional, executive or administrative offices, including those of accountants, lawyers, medical doctors, dentists, architects, engineers, drafting offices, insurance agents, real estate agents and other occupations which are of similar character to those enumerated, but not including barbers, beauty parlors, cosmetologists or other service establishments or building trades contractors.

02.940 Public buildings and uses.

"Public buildings and uses" means any civic or service oriented facility available to the general public including such uses but not limited to schools, parks, playgrounds, educational, recreational and social facilities, libraries, museums, firehouses, courthouses, administrative offices, hospitals and other governmental facilities.

02.950 Public utility buildings, structures and uses.

"Public utility buildings, structures and uses" means the use of land for public utility purposes by public, quasi-public and private energy and communication purposes and

distributors except for conventional electrical distribution substations and facilities. Hydroelectric, geothermal power plant construction, and cell/communication towers are considered to fall within this definition.

02.960 Quasi-public buildings and uses.

"Quasi-public buildings and uses" means a use operated by a private nonprofit educational, religious, recreational, charitable, fraternal or medical institution, association or organization, and including but not limited to such uses as churches, private schools, universities, community recreational, educational and social facilities, meeting halls, private hospitals and similar uses.

02.970 Recreational vehicle.

"Recreational vehicle" means a motor home, travel trailer, truck camper, or camping trailer, with or without motor power, designed for human habitation for recreation or emergency occupancy, which is 8 feet or less in overall width and 40 feet or less in overall length, or a bus conversion for human habitation, and for which a special permit and/or chauffeur's license is not required by the California Vehicle Code to move such vehicle on a public highway.

02.980 Recreational-vehicle park.

"Recreational-vehicle park" means any area or tract of land where two or more lots or spaces are rented or leased, or held out for rent or lease to owners or users of recreational vehicles which are occupied for temporary purposes or seasonal use. A recreational-vehicle park may allow the use of tents or other temporary camping facilities either in place of a recreational vehicle or in a separate designated area within its confines and considered as part of the number of approved lots or spaces in the park. In addition, an "RV" park normally contains provisions for electrical and sanitary hook-ups.

02.990 Scenic Highway.

"Scenic Highway" means any freeway, highway, route, road, street, boulevard, or other public right of way that traverses an area of land generally adjacent to (within 1,000 feet) and visible from the highway, which requires protective measures to ensure preservation of its scenic qualities.

02.1000 Scenic Highway Corridor.

"Scenic Highway Corridor" means the area of land generally adjacent to (within 1,000 feet) and visible from the highway, which requires protective measures to ensure preservation of its scenic qualities.

02.1010 Screening.

"Screening" means the use of fences, hedges, and walls as well as earth mounds and the massing of trees and shrubs in order to mitigate visual nuisance generated by specific land uses and to protect the amenities of abutting land use districts in accordance with the intent of those districts.

02.1020 Service station.

"Service station" means a retail business establishment limited to the sale of motor fuels and supplying goods and services generally required in the operation and maintenance of automotive vehicles. These may include sale of petroleum products; sale and servicing of tires, batteries, automotive accessories and replacement items; washing

and lubrication services; the performance of minor automotive maintenance and repair. Major automotive repairs, painting, and body and fender work are excluded except where such uses are otherwise permitted in the district.

02.1030 Setback line, street.

"Setback line, street" means a line that defines the depth of the required street setback, front yard, side yard or side street where said yard or yards abut a street. Said street setback line shall be parallel or concentric with the street right-of-way line.

02.1040 Sign.

"Sign" means any words, letters, numerals, emblems, designs, or other marks shown on any card, cloth, paper, metal, painted surface, glass, wood, plaster, stone or other device of any kind or character by which anything is made known and used to attract attention.

02.1050 Site plan.

"Site plan" means a plan, prepared to scale, showing accurately and with complete dimensions all of the uses proposed for a specific parcel of land taking into consideration the natural and man-made characteristics of the parcel.

02.1060 Site plan review.

"Site plan review" means the review by the County of a site plan and other studies to assist the County in determining the manner in which the applicant intends to make use of his property.

02.1063 Small-scale agriculture.

"Small-scale agriculture" means gardens and orchards producing food for human consumption that do not exceed 10% of the total lot area. Such agriculture may be for personal or community use. Landscaping is not considered small-scale agriculture.

02.1065 Snow storage area.

"Snow storage area" means an area set aside for the storage of snow. The area may be landscaped, paved or covered with natural vegetation. See Section 04.300, Snow storage requirements.

02.1070 Social care facility.

"Social care facility" means any facility in the general classification of a boarding home for aged persons, boarding home for children, day care home for children, day nursery, nursing home or parent-child boarding home. These facilities consist of a building or group of buildings used or designed for the housing of sick, demented, injured, convalescent, infirm or well, normal healthy persons, requiring licensing or certification by regulating government agencies.

02.1080 Special event.

"Special event" means any infrequently held activity that requires extending service needs beyond normal service levels provided at the site; is held at any place other than in a permanent building or permanent installation which has been constructed for the purpose of conducting such activity; and to which members of the public are invited or admitted; or is sponsored or encouraged by a club or organization. Special events may include, but are not limited to outdoor festivals, cultural festivals, carnivals, organized

racing events, bazaars and rummage sales, and swap meets held no more than twice a year by any one organization.

02.1090 Stable, private.

"Stable, private" means a detached accessory building for keeping of horses, burros or mules owned by the occupants of the premises and not for remuneration, hire or sale.

02.1100 Stable, public.

"Stable, public" means a stable other than a private stable for keeping of horses.

02.1110 Street line.

"Street line" means the boundary between a street, public or private, and abutting property.

02.1120 Street, public.

"Street, public" means a street, road or way, but not an alley; dedicated to, owned by or maintained by a state, county or incorporated city.

02.1121 Strip commercial.

"Strip commercial" is a form of commercial development in which each establishment is afforded direct access to a major thoroughfare through a shared parking lot; generally associated with intensive use of signs to attract passersby.

02.1130 Structural alterations.

"Structural alterations" means any change in the supporting members of a building, such as a bearing wall, column, beam or girder, floor or ceiling joists, roof diaphragms, foundations, pipes or retaining walls.

02.1140 Structure.

"Structure" means anything that is built or constructed (definition from the California Building Code), but for the purposes of this General Plan shall not include fences under 6 feet in height and retaining walls less than 4 feet in height.

02.1141 Square Footage.

"Square Footage," for the purposes of General Plan policies, shall be calculated based on the exterior foundation footprint of the unit. All interior space, whether habitable, conditioned, or otherwise, shall count toward the total square footage of the unit.

02.1150 Subdivision.

"Subdivision" means the division, by any subdivider of any unit or units of improved or unimproved land, or any portion thereof, shown on the latest equalized County assessment roll as a unit or as contiguous units for the purpose of sale, lease or financing whether immediate or future except for leases of land for agricultural purposes. Property shall be considered contiguous even if it is separated by roads, streets, utility easement or railroad rights-of-way. Subdivision includes a condominium project, as defined in Section 1350 of the Civil Code, a community apartment project, as defined in Section 11004 of the Business and Professions Code or the conversion of five or more existing dwelling units to a stock cooperative, as defined in Section 11003.2 of the Business and Professions Code. As used in this definition, agricultural purposes mean the cultivation of food or fiber or the grazing or pasturing of livestock.

02.1160 Substandard lot.

"Substandard lot" means a unit of land, the area, width or other characteristics which fails to meet the requirements of the land use designation in which it is located.

02.1165 Supportive housing.

"Supportive housing" means permanent rental housing linked to a range of support services designed to enable residents to maintain stable housing and lead fuller lives.

02.1170 Temporary use.

"Temporary use" is any use or occupation of any building or land for a period of 30 days or less.

02.1180 Time-share project.

"Time-share project" is any project in which a purchaser receives the right in perpetuity, for life, or for a term of years, to the recurrent, exclusive use or occupancy of a lot, parcel, unit, or segment of real property, annually or on some other periodic basis, for a period of time that has or will be allotted from the use or occupancy periods where the

02.1190 Time-share estate.

"Time-share estate" is a right of occupancy in a time-share project which is coupled with an estate in real property.

02.1200 Time-share use.

"Time-share use" is a license, certificate or contractual or membership right of occupancy in a time-share project that is coupled with an estate in real property.

02.1201 Tract housing.

"Tract housing" is a style of housing development in which multiple identical or nearly identical homes featuring similar color, texture and form are built together on a single tract of land.

02.1210 Transient rental.

"Transient rental" means any structure, or portion of structure, which is occupied, or intended or designed for occupancy by transients for purposes of sleeping, lodging or similar reasons. A "transient" is any person who exercises occupancy, whether by agreement, concession, permit, right of access, license, contract, payment of rent or otherwise, for a period of 30 consecutive calendar days or less.

02.1215 Transitional housing.

"Transitional housing" means a type of supportive housing used to facilitate the movement of homeless individuals and families to permanent housing.

02.1220 Travel trailer.

"Travel trailer" means a recreational vehicle. See Section 02.970.

02.1230 Use.

"Use" means the purpose for which land or a building thereon is designed, arranged or intended, or for which it is or may be occupied or maintained.

02.1240 Use, accessory.

"Use, accessory" means a use accessory to any permitted use and customarily a part thereof, which use is clearly incidental and secondary to the permitted use and which does not change the character thereof.

02.1250 Yard.

"Yard" means an open space other than a court on the same building site with a building, which open space is occupied and unobstructed from the ground upward, not including any portion of any street or alley or road right of way.

02.1260 Yard, front.

"Yard, front" means that portion of the lot adjacent to a street right of way, extending between the side lot lines to a depth required by the district in which the lot is located.

02.1270 Yard, rear.

"Yard, rear" means a yard extending across the back of the lot between the side lot lines and to a depth required by the district in which the lot is situated.

02.1280 Yard, side.

"Yard, side" means a yard along the side line of the lot and to a width required by the district in which the lot is situated, and extending from the front yard to the rear yard.

DEVELOPMENT STANDARDS

CHAPTER 03 – LAND USE DESIGNATIONS

Sections:

- 03.010 Land use designation criteria.**
- 03.020 Land use designations.**

03.010 Land use designation criteria.

Each and every parcel of land in the unincorporated area of the county has been duly assigned a land use designation, as depicted in the Land Use Maps contained in Section VII of this Land Use Element. Except as otherwise expressly provided by these Land Development Regulations, no land may be developed or used except in the manner permitted by its assigned designation. (See also Sections 01.060, 02.705, and 04.020 of these Land Development Regulations.) Land use designations (shown on the land use maps) are based upon an evaluation of natural, cultural, and social characteristics of the land as well as the countywide land use policy framework and specific area policies. Those analyses, however, did not always include a detailed study of the circumstances and environmental constraints of each specific parcel. Future detailed evaluation of specific properties may show that an alternate designation is warranted. Upon proper application, the County will consider amendments to the land use designations.

03.020 Land use designations.

Section IV of the Land Use Element contains summary sheets of the development standards that apply to each land use designation in Mono County. These sheets contain the general standards for each land use designation, as well as the uses permitted; they do not detail all possible standards and exemptions applicable to the given land use designation. The following is a list of the land use designations found in Section IV.

<u>Symbol</u>	<u>Land Use Designation</u>
RR	Rural Residential
ER	Estate Residential
RMH	Rural Mobile Home
SFR	Single-Family Residential
MFR-L, -M, -H	Multi-Family Residential (Low, Moderate and High)
RU	Rural Resort
CL-M, -H	Commercial Lodging (Moderate and High)
MU	Mixed Use
C	Commercial
SC	Service Commercial
IP	Industrial Park
I	Industrial
RE	Resource Extraction
RM	Resource Management
AG	Agriculture
SAA	Scenic Area Agriculture
OS	Open Space

04.010 General provisions and exceptions.

The general provisions and exceptions contained in these Land Development Regulations shall apply in all designations, where applicable. Where general provisions differ from provisions of a specific designation, the provisions of the specific designation shall apply.

04.020 Uses permitted.

- A. The regulations contained in this chapter shall apply to uses permitted throughout the land development regulations.
- B. Land shall be used only for the purposes listed as permitted in the land use designation assigned to the land and only after securing all permits and licenses

required by law. If the use is not listed, the use is not permitted, except as noted in Section 04.030. Similarly, buildings and structures shall be used, designed, erected, structurally altered or enlarged only for the purposes listed as permitted in the land use designation in which such building or structure is located, and then only after securing all permits and licenses required by law. Any use already established within an area when it is first designated but which is not a permitted use within such designation or is a permitted use only with a use permit shall be allowed to continue therein as a nonconforming use subject to all conditions and restrictions relating to nonconforming uses as provided in Chapter 34, Nonconforming Uses.

- C. Accessory buildings and uses customarily incidental to any of the permitted uses and uses subject to a use permit are permitted only when located on the same lot and constructed simultaneously with or subsequent to the main building.

04.030 Uses not listed as permitted.

- A. It is recognized that in the development of comprehensive land use development standards that:
 - 1. Not all uses can be listed nor can future uses be anticipated.
 - 2. Uses may have been omitted from the list of those specified as permissible in each of the various land use designations described in Section IV of this Land Use Element, hence the phrase, "plus such other uses as the Commission finds to be similar and not more obnoxious or detrimental to the public health, safety and welfare.

- B. Interpretation of "similar uses."
Where the term "and such other uses as the Director or Commission finds to be similar and not more obnoxious ... " is mentioned, it shall be deemed to mean other uses which, in the judgment of the Director or the Planning Commission, as evidenced by a written decision, are similar to and not more obnoxious to the general welfare than the uses listed for the same designation. If a use is found similar to a permitted use or similar to a use requiring a director review or use permit, it shall also be permitted subject to the same requirements as its most similar listed use. The Director shall make the interpretation concerning uses permitted or uses permitted subject to director review; the Planning Commission shall make the interpretation for uses permitted subject to use permit. For interpretation of uses of a potentially controversial or sensitive nature, the Director may submit the matter to the Commission for an interpretation.

Any decision may be appealed in accordance with Chapter 47, Appeals.

Prior to taking an action to find a use similar to and not more obnoxious to the general welfare than the uses listed for the same designation, the Director or the Planning Commission shall find all of the following:

- 1. That the proposed use is consistent with this general plan and any applicable area plans or specific plans.

2. That the proposed use is compatible with the intent of the land use designation and is applicable throughout the county in that designation.
3. That the use is capable of meeting the standards and requirements of that designation.
4. That the use will be similar to and not be more obnoxious to the general welfare (i.e., health, safety) than the uses listed within the designation.

04.040 Uses permitted subject to director review and approval.

- A. Placement and Use of Recreational Vehicles (RVs) on Vacant Property.
 1. RV placement and use of undeveloped property during construction of a main building shall be permitted only for a short duration and shall not exceed one year, unless the Director Review permit is renewed annually following notice to contiguous property owners.
 2. Long-term temporary use of an RV – not to exceed six months of each year for a five-year period – may be permitted in designated avalanche zones subject to Director Review permit.
 3. In granting a Director Review permit, the following conditions, at a minimum shall be required:
 - a. That Environmental Health review and approve sanitation methods for the temporary use;
 - b. That the applicant obtain a building permit for the main building (if applicable) prior to RV placement;
 - c. That the applicant obtain any necessary permits for the RV use, such as a building permit for electrical hookup;
 - d. That the RV be removed from the site upon Director Review expiration;
 - e. That the RV be placed in a manner that minimizes visual impact to scenic highways and nearby properties.

No Director Review permit shall be granted if the proposed use conflicts with local CC&Rs or applicable area or specific plans.

The temporary use of an RV for agricultural-related purposes, where a parcel is 20 acres or larger, shall be exempt from the Director Review. Storage of RVs on vacant parcels is also exempt from these requirements.

04.050 Uses permitted subject to use permit.

Certain uses listed in the land use designations set forth in Section IV of this Land Use Element are permitted only when subject to use permit. Such uses shall be subject to all applicable property development standards of this chapter and those of the designation in which the uses are located. Any such use shall be subject to submission of a site plan.

MONO COUNTY GENERAL PLAN

- A. Uses listed in the designations as "permitted subject to use permit" are permitted subject to the provisions of Chapter 32, Use Permits.
- B. In addition, the following uses are permitted in any designation subject to use permit:
 - 1. Public buildings and quasi-public buildings and uses (see definitions).
 - 2. The removal of minerals and natural materials. This does not include the excavation or removal of materials for a normal construction project or underground utilities or facilities; or the removal of mineral and natural materials or trees when such removal is motivated by land leveling as its prime objective.
 - 3. Drilling for and/or the removal of oil or gas; geothermal fluids; and geothermal power plants generating up to 50 MW (megawatts) of electric power, including associated structures and transmission lines, (except lands under Williamson Act contract).
 - 4. Wind generation (individual use), and commercial wind farms.
 - 5. Small scale hydroelectric power generating facilities including, but not limited to: construction of generation facilities, penstocks, and diversion structures, and associated transmission lines.
 - 6. Construction of an accessory building prior to the construction of a main building.
 - 7. Airports, heliports, taxiways and landing strips for aircraft (except the OS designation).
 - 8. Cemeteries, crematoriums (except the OS designation).
 - 9. Cluster development, as defined in Section 02.290.

04.060 Uses exempt.

Any temporary and seasonal uses conducted by public agencies for public purposes shall be exempt from the provisions of the land use designations and land development regulations. This section is not applicable to permanent improvements.

04.070 Utilities.

Distribution lines to development shall be underground. See Chapter 11, Development Standards – Utilities, for complete requirements.

04.080 Lot area.

- A. After the effective date of any general plan land use map by which any land or area is first assigned a land use designation, no land in any designation shall be divided by the recordation of any map or by voluntary sale, contract of sale or conveyance of any kind which creates a new parcel of land which consists of less than the minimum lot area required for the designation of which such lot is a part; provided further, that all land divisions shall be subject to the

requirements for the division of land in Mono County. Any person participating in violation of this section, whether as seller, grantor, purchaser or grantee, is, as principle in the transaction, guilty of a misdemeanor.

- B. Where a lot has an area less than that prescribed by the land use designation in which that lot is located, and the lot was under one ownership at the time of record at the time the area was first designated whereby the lot became nonconforming, the lot may be used subject to all property development standards of the designation in which such lot is located.
- C. If any land use designation is followed by a numerical suffix which differs from the base designation minimum, then the numerical suffix that follows shall take precedent.
- D. Minimum lot sizes for sewage systems
Minimum lot sizes shall be as follows: notwithstanding the fact that lesser lot sizes may be indicated in the respective designations:
 - 1. If an individual sewage disposal system but not an individual water supply is proposed, 15,000 square feet;
 - 2. If both individual sewage disposal system and individual water supply are proposed, 40,000 square feet;
 - 3. Minimum lot sizes in cluster subdivisions or similar developments not served by a public sewer system may be reduced if density standards for the whole subdivision are not increased above the gross density specified in the designation; provided that all other health requirements are met.

04.090 Lot dimensions.

- A. Every lot shall have a minimum width and depth of not less than 60' x 100' unless otherwise specified in the designation in which the lot is located. The dimensions are minimum only and shall be increased where necessary to attain the minimum lot area required. Lots that require individual septic systems are subject to minimum dimensions as determined by Lahontan Regional Water Quality Control Board and enforced by Mono County Environmental Health.
- B. The lot depth shall not exceed three times the lot width (3:1), unless the lot is 10 gross acres or larger in size then a ratio of four to one (4:1) is acceptable.
- C. Where a lot has a width or depth less than that prescribed by the land use designation, and the lot was under one ownership at the time of record at the time that the area was first designated whereby the lot became nonconforming, the lot may be used subject to all property development standards of the designation in which such lot is located. See Section 17.16.350.

04.100 Density.

- A. All density is based upon the net acreage of the parcel.

- B. Density requirements set forth in the base designation shall apply. Fractional parts from 0.5 to 0.9 may be rounded to the next higher number, subject to all development standards of the land use designation.

04.110 Building height.

- A. All buildings and structures hereinafter designed or erected, or existing buildings which may be reconstructed, altered, moved or enlarged, shall have a height no greater than 35 feet from grade measured from any point of the building. All heights shall be calculated from the natural grade or finished grade, whichever is more restrictive.

- B. Accessory buildings in any residential designation shall be limited to a maximum height of 20 feet except as may be permitted by Director Review.

- 1. Accessory uses over 20 feet in height shall be architecturally compatible with and be subordinate to the primary residence. Additional design requirements, such as color, building material, landscaping, building articulating and location, may be required to minimize off-site visual impacts and respect neighborhood characteristics. Accessory Dwelling Units are not considered accessory and shall be subject to the same standards as the primary unit.

- C. On large commercial projects and multi-family, condominium or apartment projects where an entire floor area is devoted to underground parking, the height of building shall mean the vertical distance from the ceiling of the parking facility to the topmost point of the building, but excluding certain features as specified in Sections 04.110 A & B.

- D. Exceptions to the Height Limitations:

- 1. Permitted: The following uses are permitted:

- a. Public utility exceptions. Poles for public utilities shall be allowed in all designations to a height greater than that permitted for buildings in the designation but shall not exceed 60 feet.
 - b. Residential exceptions. The height specified for residential development of 35 feet may be adjusted to allow additional height to a maximum of 45 feet, provided that the required side and rear yards are increased one foot in width for each foot of height over 35 feet.

- 2. Director Review: The following uses shall be permitted at a height greater than 35 feet subject to Director Review and approval: chimneys, silos, cupolas, flag poles, wind generation towers, monuments, natural gas storage holders, radio and other towers, water tanks, church steeples and similar structures and mechanical appurtenances that are permitted in a designation. In cases where the additional height might result in substantial detrimental effects on the enjoyment and use of surrounding properties, a use permit will be required but shall not exceed 60 feet.

- 3. Use Permit: Commercial and industrial exceptions – The height limitations of this chapter may be modified in commercial and industrial land use designations upon securing use permit approval providing that the gross

floor area of such buildings shall not exceed that possible for buildings in such respective land use designations erected within the height limits of such district. Further, this approval is contingent upon a finding by the Planning Commission that the project will not result in substantial detrimental effects on the enjoyment and use of surrounding properties, and that the modified height will not exceed the lifesaving equipment capabilities of the fire protection agency having jurisdiction, and in no case shall exceed 60 feet.

FIGURE 11: BUILDING HEIGHT MEASUREMENTS

A. UP-SLOPING LOTS

B. DOWN-SLOPING LOTS

TABLE 04.010: BUILDING HEIGHT REQUIREMENTS

(All heights shall be calculated as the vertical distance from natural or finished grade [whichever is more restrictive] to the topmost point of the structure, exclusive of vents, chimneys or other such incidental appurtenances [see Figure 11].)

Situation	Requirement
All buildings hereafter designed or erected, or existing buildings which may be reconstructed, altered, moved or enlarged	Height of no finished part of such building greater than 35' measured from grade. All heights shall be calculated from the natural grade or finished grade, whichever is more restrictive
Residential development	May be permitted greater than 35', to a maximum of 45', provided that the required side and rear yards are increased one foot in width for each foot of height over 35'.
Accessory buildings	Maximum height of 20' (15" in the MFR-L), except as may be permitted by use permit.
Barns, stables and similar necessary buildings in the Equestrian Overlay District	May exceed the height limitation for accessory structures (20'), but in no case greater than 35'.
Accessory agricultural buildings in the AG district (i.e., hay barn)	Maximum height of 40'.
Commercial, apartments, multi-family or condo projects with an entire floor devoted to underground parking (see 2.1160, Definitions – Parking, underground)	The height of the building shall be calculated as the vertical distance from the ceiling of the parking facility to the topmost point of the building, exclusive of vent, chimneys or other such incidental appurtenances.
Structures in I or IP districts	Maximum height of 40'.
Public utility poles	Allowed in all districts to a height greater than that permitted for buildings in the district.

TABLE 04.010: BUILDING HEIGHT REQUIREMENTS – continued

Situation	Requirement
Chimneys, silos, cupolas, flag poles, wind generation towers, monuments, natural gas storage holders, radio & other towers, water tanks, church steeples, & similar structures & appurtenances	Permitted at a height greater than 35’ subject to Director Review. In cases where the additional height might result in substantial detrimental effects on the enjoyment and use of surrounding properties, a use permit will be required.
Fences	Fences shall not exceed 6’ in height. Where a fence, hedge or wall is located in any required front yard, it shall not exceed 4’ in height.
Commercial and Industrial Districts	Height limitations may be modified in these districts subject to use permit, provided that the gross floor area of such buildings shall not exceed that possible for buildings erected within the height limits of such districts. This approval is contingent upon a finding by the Planning Commission that the project will not result in substantial detrimental effects on the enjoyment and use of surrounding properties, and that the modified height will not exceed the lifesaving equipment capabilities of the fire protection agency having jurisdiction and in no case shall exceed 60’.
Natural Habitat Protection (NHP) District	No building or structure shall have a height greater than 24’.

04.120 Yards.

The following minimum yard requirements are applicable to all designations, unless they differ from the provisions of a specific designation; then the provisions of the specific designation shall apply. Setbacks apply from the property line or road easement, whichever is more restrictive.

A. Residential designations; Specific Plan; and Rural Resort.

1. Front. Each lot shall have a front yard of not less than 20 feet deep.
2. Side and Rear. Communities of Sunny Slopes, Crowley Lake, Long Valley, June Lake, Virginia Lakes, Devils Gate, Rancheria and Twin Lakes and, if not otherwise indicated herein, any other development located at elevations 6,000 feet or above: side and rear yards of not less than 10 feet. Eaves into side yards shall be designed so that roofs will not shed snow onto adjoining property, vehicle parking, or public ways. It is determined by the Building Division that the design, pitch, etc., of the roof may cause any of the above shedding problems, the side yard shall be increased proportionately.

Communities of Wheeler Crest, Paradise, Tri-Valley, Lee Vining, Mono City, Bridgeport and Antelope Valley and, if not otherwise indicated herein, any other development located at elevations below 6,000 feet: shall have side yards of not less than 10 feet on one side and not less than five feet on the other side; rear yards shall be not less than 10 feet.

The side yard setback may be reduced to a minimum of five feet when sufficient documentation is presented to the Planning Division by the applicant showing that the roof design of the dwelling or accessory building is oriented so that snow does not shed toward adjacent properties, public parking areas, public walkways, public rights of way or private road easements. Pools may encroach five feet into the required rear yard unless other restrictions apply.

3. Exceptions. Buildings should be configured to reflect the physical limitations and constraints inherent with a substandard lot. Lots substandard in area (i.e., less than 7,500 sq. ft.) or lots measuring less than one of the minimum lengths by width measurements (i.e., 60' x 100') are subject to the following minimum side and rear yard requirements:
 - a. Side. Each side yard shall not be less than 10 feet. The side yard setback may be reduced from the required 10 feet when sufficient documentation is presented to the Planning Division by the applicant showing that the roof design of the dwelling or accessory building is oriented so that snow does not shed toward adjacent properties, public parking areas, public walkways, public rights of way or private road easements. In no case shall the side yard be reduced below five feet under this exception. On corner lots, the side yard abutting the street shall be not less than 10 feet;
 - b. Rear. Each lot shall have a rear yard of not less than 10 feet.

- B. Lots greater than one acre. Notwithstanding the above, lots greater than one acre are subject to 30-foot minimum setbacks pursuant to Chapter 22 – Fire Safe Regulations. Such setbacks are a state mandate and may be reduced only by obtaining a waiver consistent with Chapter 22. Upon receiving a waiver, properties exceeding one acre require a 20-foot front-yard setback, and 10-foot side and rear setbacks.
- C. Commercial designations.
 - 1. Front. Each lot shall have a front yard of not less than 10 feet deep;
 - 2. Side. No requirement except:
 - a. When abutting a residential district, or proposing residential use of the property, see above section 04.120; A.
 - b. On corner lots - not less than 10 feet.
 - 3. Rear. Each lot shall have a rear yard of not less than five feet deep.
- D. The yard requirements as set forth above or in the specific designation shall apply, but may be modified by use permit issued pursuant to the provisions of subsection C of Section 04.110.

04.130 Special yard requirements.

- A. Double frontage lots. These are lots with public access on opposite sides of a lot, where front-yard setbacks shall be required on both frontages. On lots abutting upon two or more streets, no structure shall be erected so as to encroach upon the front or side yard abutting any street.
- B. Corner lots. These are lots that border intersecting streets or access easements. In this case, one street frontage shall require the applicable front-yard setback and the second street frontage shall require the applicable side-yard setback.
- C. Yard requirements on combined lots. Contiguous lots may be merged to create a single building site. Where two or more contiguous lots are merged, yards shall be established from the exterior boundaries of the newly created lot.
- D. Plan lines. If an official plan line is specified in the circulation element of this General Plan, any area plan or land use designation, the required yards on the street side shall be measured from such official plan lines. In no case shall the provisions of land development regulations be construed as permitting any structure to extend beyond such official plan lines.
- E. Other yard regulations.
 - 1. Architectural features. Architectural features such as cornices, eaves, and canopies may extend not more than 30 inches into any required yard.

Fireplaces, not exceeding 8 feet in breadth, may extend not more than 30 inches into any required yard.

2. Porches. Open, uncovered porches, landing places or outside stairways may project not more than three feet into any required yard.
3. Front-yard variation. In any residential designation where 50% or more of the building sites on any one block have been improved with buildings, the required front yard shall be not less than the average of the developed building sites, to a maximum of that specified for the designation in which the building site is located.
4. Garage within front yard. Notwithstanding any part of the requirements of this section, in cases where the elevation of the front half of the lot at a point 50 feet from the centerline of the street is seven feet above or below the grade of the centerline, a private garage, attached or detached, may be constructed to within five feet of the front line; provided that no such structure shall exceed 8 feet in height, measured from the finished floor line to the top plate line, nor more than 20 feet from finished floor line to the roof peak or other structural appurtenance.
5. Pools. Pools may not be located closer than five feet from any side or rear lot line, nor shall they encroach into any easements. On corner lots, no pool shall be located closer than 10 feet to the lot line abutting the side street.
6. Stables. The minimum building site area for the first two horses in a cooperatively or commercially owned stable is two acres. For each additional horse, 10,000 sq. ft. is required in addition to two acres. Stables and paddocks shall not be less than 50 feet from the front property line nor less than 50 feet from any dwelling unit. These requirements do not apply to horses kept for personal use in permitted designations or in an equestrian combining designation.
7. Streams/creeks. In order to minimize the impact to areas with lakes, streams and creeks, the following procedures shall be applicable (specific plans or area plans may be more restrictive or less restrictive, and shall take precedence):
 - a. Definitions. A major stream is shown as a permanent stream on a U.S. Geological Survey (USGS) map, and is a continuously flowing water body. A minor stream is shown as an intermittent stream on a USGS topographic map and is a permanent stream with low flow during all or part of the year. Seasonal streams not shown on a USGS map are not subject to this section, unless determined otherwise in accordance with subparagraph C of this subdivision. A lake is an accumulation of water, larger than a pool or pond, generally formed by a natural or man-made obstruction in the course of flowing water that is shown on a USGS map.
 - b. New development shall be subject to the following minimum setbacks from any lake, and major or minor stream. Any proposed structure,

including associated impervious surfaces, shall be located a minimum of 30 feet from the top of the bank. Greater setback requirements may be imposed through the land division and/or environmental review process if determined necessary to protect the water body and riparian resource. Deviations of these setback requirements may be granted if the mandatory Director Review findings can be made and the applicant can demonstrate that the proposed construction will not result in a significant adverse impact on the water body or the riparian area. Such Director Review applications shall include a landscaping plan that illustrates all project site disturbance areas and specifies a comprehensive program for restoring the disturbed areas.

Structures and uses existing within these setback areas prior to January 1, 1990, shall be permitted to remain and, if necessary, be reconstructed. Such reconstruction within the setback area shall not result in:

1. An increase in lot coverage;
 2. A change in use;
 3. Increased runoff from impervious surfaces; or
 4. An adverse change in the drainage of the lot.
- c. If the Department of Public Works determines in the course of its review that a stream course not identified on a USGS map carries significant flow (either continuously or intermittently), the building setbacks in this subdivision may be imposed.
8. Retaining Walls. Retaining walls of four feet or less above grade are permitted within required setbacks. Terraced retaining walls are measured from the base of the lowest section to the top of the highest section for the purposes of this chapter.
- a. For retaining walls that exceed four feet in height above grade, the following restrictions apply: the base of the wall shall be placed at least as far from the property line as the wall exceeds four feet. Thereby, a six-foot wall requires a two-foot setback from the property line. An eight-foot wall, a four-foot setback, and so on.
 - b. Exceptions to these restrictions may be granted in accordance with section 04.120.

TABLE 04.020: REQUIRED YARDS

REQUIRED YARDS (Minimum setbacks)				
Situation	Front Yard	Rear Yard	Side Yard	Other
Large Lots	–	–	–	Increased setbacks up to 100’ may be required in order to comply with Chapter 22, Fire Safe Standards.
Substandard Residential Lot <7,500 sq. ft. or less than the minimum width or length (60’ - 100’) (SFR, MFR-L, -M, -H)	20’	10’	5’	On substandard corner lots the minimum side yard abutting the street right of way and/or a road easement shall be 10’ (see Permitted Encroachments).
Residential Lot > 7,500 sq. ft. (SFR, RMH, MFR-L, -M & -H)	20’	10’	10’	See Residential Designations
Residential Lots of 1 acre + (RR, ER, RMH)	50’	30’	30’	See Residential Designations
Residential Lots of 5 acres	50’	30’	30’	See Residential Designations
Corner residential lot with both sides meeting the minimum depth requirement	20’	10’	10’	One street frontage shall count as the front yard, the other shall count as a side yard. See Residential Designations
Double-Frontage Lot	---	---	---	Front-yard setbacks shall be required on both frontages.
Merged Lots	---	---	---	Where two or more contiguous lots are merged, all interior lot lines shall be eliminated, and yards shall be established from the exterior boundaries of the merged lot.

TABLE 04.020: REQUIRED YARDS – continued

Situation	Front Yard	Rear Yard	Side Yard	Other
Lakes, Streams, Creeks	---	---	---	For new development, any proposed structure and associated imperious surfaces shall be located a minimum of 30’ from the top of the bank (see 04.130 D 7b, Lakes, Streams, Creeks).
Kennels and Stables	---	---	---	See Animal Standards, 4.270, and Ch. 10 – Equestrian Overlay District.
Residential Lots – Side Yards	<p>Communities of Sunny Slopes, Crowley Lake, Long Valley, June Lake, Virginia Lakes, Devils Gate and Twin Lakes and, if not otherwise indicated herein, any other development located at elevations 6,000 feet or above: 10'. The side yard may be reduced to 5' when sufficient documentation is presented showing that the design of the roof of the dwelling or accessory building is oriented so that snow does not shed toward adjacent properties, parking areas, walkways or roads.</p> <p>Communities of Wheeler Crest, Paradise, Tri-Valley, Lee Vining, Mono City, Bridgeport and Antelope Valley and, if not otherwise indicated herein, any other development located at elevations below 6,000 feet: one side yard of 10', one side yard of 5'.</p> <p>If it is determined by the Building Division that the design, pitch, etc. of the roof may cause any snow shedding problems onto adjoining property, vehicle parking, or public ways, the side yard shall be increased proportionately.</p>			
Residential Lots – Front Yard Variation	In any residential district where 50% or more of the lots on any one block have been improved with buildings, the required front yard shall be not less than the average of the developed lots, to a maximum of that specified for the district.			
SFR	Cluster developments may propose zero lot lines for side yards as part of the use permit review process.			

Garage within Front Yard	Where the elevation of the building site at a point 50' from the centerline of the street is 7' above or below the grade of the centerline, a private garage, attached or detached, may be constructed to within 5' of the front property line, provided that no such structure exceeds 8' in height, measured from the finished floor line to the top plate line, nor more than 20' from finished floor line to the roof peak or other structural appurtenance.
--------------------------	--

TABLE 04.020: REQUIRED YARDS – continued

Situation	Front Yard	Rear Yard	Side Yard	Other
ER, RR	50'	30'	30'	The side and rear setbacks may be reduced to 10' with Cal Fire waiver.
AG	50'	50'	50'	Accessory building uses such as barns or stables shall be not less than 30' from side or rear property line, nor less than 50' from any front property line.
NHP	30'	30'	30'	
OS				
RM	50'	30'	30'	
I				
IP	20'	Uses subject to a DR 5'* Uses subject to UP 10'*	Uses subject to a DR 0* Uses subject to UP 10'*	When abutting any residential district, no yard shall be less than 20' along the abutting property. The minimum side yard abutting the street/road easement shall be 10'. *Side & Rear maybe modified by Director or Commission.
RU	30'	30'	30'	
PF				
Situation	Front Yard	Rear Yard	Side Yard	Other
Commercial (MU, C, SC, CL-M & -H)	10'	5'	0'	When abutting a residential district, or proposing residential use, see Residential Designations

CL-M, MFR-M,	Condominium, townhouse and similar developments requiring a concurrent subdivision application may propose zero lot lines for side yards.
--------------	---

TABLE 04.020: REQUIRED YARDS – continued

Commercial Stables	Stables and paddocks shall not be less than 50’ from the front property line nor less than 50’ from any dwelling unit.
Plan Lines	If an official plan line is specified in the circulation element of an area plan, the required yards on the street side shall be measured from such official plan lines. In no case shall the provisions of this title be construed as permitting any structure to extend beyond such official plan lines.
Commercial lots abutting a highway in June Lake, Lee Vining, Bridgeport	In areas where the majority of the commercial properties have previously been developed to less than the required 10’ front setback (i.e., June Lake, Lee Vining, Bridgeport) the 10’ setback requirement may be reduced provided that the applicant can demonstrate all of the following: a. The project provides a front yard of not less than the average front yard depth of the developed properties in the commercial district; and b. The reduced setback will not adversely impact or impair the ultimate development of streets or sidewalks; and c. The reduced setback will not adversely impact street snow removal and/or storage; and d. The reduced setback will not adversely impact driving visibility or adversely obstruct the line of sight from vehicles in the roadway or driveway(s); nor adversely impact the aesthetic integrity of the commercial area; and e. The reduced setback will not result in a significant adverse impact to the natural environment; and f. The otherwise required setback would result in a fragmented and disjointed development that would disturb the functional and aesthetic integrity of the immediate adjacent established commercial area.
Yard requirements	Yard requirements as set forth above or in the specific district shall apply, but may be modified by use permit.
ENCROACHMENTS	

Feature	Permitted Encroachment
---------	------------------------

TABLE 04.020: REQUIRED YARDS – continued

Cornices, Eaves, Canopies	Not more than 30” into any required yard.
Fireplaces	Fireplaces not exceeding 8’ in breadth may extend not more than 30” into any required yard.
Decks, uncovered porches, landing places or outside stairs	Not more than 3’ into any required yard.
Pools, Spas, Hot tubs	Pools, etc. may not be located closer than 5’ from any side or rear lot line, nor shall they encroach into any easement. On corner lots, no pool shall be closer than 10’ to the lot line abutting the side street or road easement.

04.140 Space between buildings.

All buildings hereafter designed or erected and existing buildings which may be reconstructed, altered, moved or enlarged, shall comply with the space between building requirements as set forth herein:

The minimum space between exterior walls of building on the same lot shall be as follows:

- A. For buildings side to side or front to side, the space shall be not less than one half the height of the highest building abutting the space, but in no case less than 10 feet.
- B. For buildings front to front or front to rear, the space shall be not less than the average height of the main buildings, but in no case less than 20 feet.
- C. Structures are considered attached if it is made structurally a part of and there is a common roof or wall.
- D. Deviations from these setback requirements may be granted if the applicant can demonstrate that the proposed construction will comply with Building Code, if required, and the design of the accessory structure will not:
 - 1. Significantly block sunlight and inhibit the free flow of air between the structure and the main building;
 - 2. Create a wind tunnel effect between the structure and the main building;
 - 3. Cause excessive amounts of snow buildup between the structure and the main building due to the design of the eaves.

04.150 Lot coverage.

All buildings hereafter designed or erected, and existing buildings which may be reconstructed, altered, moved or enlarged, shall comply with the maximum coverage of lot in the designation in which they may be located.

04.160 Fences, screenings and landscaping.

Fences are permitted, but not required, and shall not exceed 6 feet in height. Where fence, hedge or wall is located in any required front yard, it shall not exceed 4 feet in height. Higher fences may be permitted subject to use permit, if they do not obstruct the line of sight from vehicles in roadways or driveways.

Screening and landscaping is permitted and may be required by the Community Development Department director for projects that need buffering from adjacent uses and/or to stabilize exposed or disturbed soils. Screening may take the form of berms, fences, landscaping, other appropriate materials or combinations thereof. Landscaping should utilize native and drought-resistant species to the greatest extent practicable. Shrubs and trees should be of sufficient size and maturity to survive weather extremes as landscaped areas are frequently used for snow-storage purposes over extended periods of time. Normally, a minimum one-inch caliper tree with staking will be required.

04.170 Off-street parking.

The provisions of Chapter 6, Development Standards – Parking, shall apply. Tandem parking is prohibited for all multiple-family projects and all commercial and industrial uses.

4.180 Access.

Access to provide adequate ingress and egress shall be built and maintained to all lots in each designation according to all applicable road standards as determined by the Department of Public Works.

04.190 Signs.

- A. All signs shall be placed in accordance with the regulations established in Chapter 7, Development Standards – Signs.
- B. The following signs shall be permitted subject to Director Review
 - 1. Attached.
 - 2. Freestanding/Monument.
 - 3. Directional.
- C. The following signs shall be permitted in all designations:
 - 1. Real estate.
 - 2. Political.
 - 3. Temporary

04.200 Loading spaces.

Loading-space requirements shall be determined at the time of site plan review in accordance with the uses proposed.

04.210 Site plan review.

- A. Preapplication conference. Prior to submitting an application for a use permit, tentative tract or variance of substantial size and/or complexity (as determined by the Director), a prospective applicant should consult with the Land Development Technical Advisory Committee to obtain relevant information as well as to inform the Committee of the applicant's intentions. This conference will provide an opportunity to review the proposed plan of development and identify potential requirements or subjects requiring particular attention prior to entering into binding commitments or incurring substantial expense in preparing plans, surveys and other data. The applicant shall provide a conceptual plan showing the site, topography, surrounding land uses and road rights of way. Minutes will be taken by planning staff at the meeting and a copy shall be provided to the applicant. These minutes shall be included with the application at the time it is formally submitted.
- B. Compatibility with adjacent lands. Any site plan shall be designed and developed in a manner compatible with and complementary to, surrounding uses in the immediate vicinity of the site. Site planning on the perimeter shall give consideration to protection of the property and any division into parcels shall relate harmoniously to the topography of the site. Consideration shall also be given to suitable provision for reservation of watercourses (see Section 04.130 E.7.), wooded area, rough or steep terrain, and similar natural features and

areas, and shall otherwise be so designated as to use such natural features and amenities to best advantage.

- C. A site plan shall be submitted for any use requiring a use permit. The site plan shall show the subject site, significant topographic features and adjacent structures in relation to proposed structures, phasing, intended method of parking and circulation, proposed grading and landscaping and such additional information (i.e., trash collection, snow storage, existing trees of 12 inches or greater in diameter, or stands) deemed necessary for consideration of the proposal, or as required by applicable area plans.

04.220 Countywide General Plan Provisions.

Prior to submitting an application for any new land use or a change of use, a prospective applicant should consult this general plan to ensure that the proposal is consistent with the goals and policies as well as the mapped land use designations of this general plan. The general plan is comprised of seven "elements." Each of these elements must be reviewed to determine a project's consistency. The elements which make up the general plan include: land use (including maps illustrating land use designations), circulation, conservation and open space, noise, housing, safety and hazardous waste.

04.230 Area Plan Provisions.

In areas in which an area plan has been adopted (Antelope Valley, Bridgeport, Bodie Hills, Mono Basin, June Lake, Long Valley, Mammoth Vicinity, Wheeler Crest, Tri-Valley), the provisions of the area plan shall also apply.

04.240 Environmental Review.

The environmental impact of applications for land uses subject to the regulations of this General Plan shall be reviewed and taken into account in deciding whether such applications shall be approved, as provided in Chapter 16, Mono County Code.

04.250 Nuisances and Hazards.

When any of the following is contained on any lot and is considered to be a nuisance or hazard to surrounding properties, the appropriate county entity shall investigate and initiate the appropriate enforcement proceedings:

- A. Emission of odors. Enclosures, devices, or other precautionary means shall be employed to ensure that odors are maintained at reasonable levels appropriate for the district and are not objectionable at the point of measurement when the use is in operation.
- B. Discharge of liquid or solid wastes. Land uses shall operate within the guidelines of the Lahontan Regional Water Quality Control Board. Disposal of liquid and solid waste shall also be in compliance with Chapter 7.12 and 7.16, Title 7, Health and Welfare, Mono County Code. Liquid or solid wastes discharged from the premises shall be properly treated prior to discharge so as not to contaminate or pollute any watercourse or groundwater supply or interfere with the bacterial processes in sewage treatment.

- C. Vibration, noise. Refer to Chapter 10.16 of the Mono County Code, Public Peace, Safety and Morals.
- D. Fire and explosion hazard. All activities involving the use of storage of combustible, flammable or explosive materials shall be in compliance with nationally recognized standards and shall be provided with adequate safety devices for protection against the hazard of fire and explosion, and adequate fire fighting and fire suppression equipment and devices in compliance with state and local fire prevention regulations. Burning of waste materials in open fires is prohibited without written approval of the local fire department.
- E. Electrical disturbance. No activity or land use shall cause electrical disturbance that adversely affects persons or the operation of any equipment across lot lines and is not in conformance to the regulations of the Federal Communications Commission.

04.260 Design Review Committee (DRC).

Review by the local design review committee is required, where applicable. This DRC review should be initiated upon application to the County and finalized prior to issuance of building permits. The DRC will generally review all commercial structures, multiple family residential uses of four units or more, and signs.

04.270 Animal Standards.

- A. Pet animals. The keeping of pet animals is permitted in addition to the animal units permitted in the matrix in the following subsection. Pet animals are subject to the following provisions:
 - 1. For all dwellings, except multiple-family, any and all of the following pet animals are permitted, with no minimum lot areas:
 - a. Four dogs and four cats.
 - b. Up to four of any combination of the following:
 - 1) Chickens (excluding roosters), cooped.
 - 2) Ducks, penned.
 - 3) Goose, turkey or similar fowl (limit 1), penned.
 - 4) Rabbits or other domestic animals of similar size at maturity, penned.
 - c. Domestic birds, not fowl, enclosed at least 15 feet from any dwelling on adjoining property.
 - 2. Multiple-family dwellings are permitted any combination of cats and dogs, up to a maximum of four animals per dwelling unit.
- B. Animal units. Animal husbandry, and the keeping of animals accessory to dwellings shall be permitted in accordance with the Animal Standards Table.

TABLE 04.030: ANIMAL STANDARDS

Zone District	Minimum Lot Area Required	Animal Units Permitted (a, b)	Distance Separation Requirements (c)
ER RR	10,000 sq. ft.	Less than 1 acre: one unit per 10,000 sq. ft. of lot area with Director Review with notice 1-10 acres: one unit per 10,000 sq. ft. of lot area. >10 acres: no limit	No requirements in OS, PF, AG Except for movement on and off the property, animals shall not be kept, maintained or used in any other way, inside or outside of any structure, within 40' of those portions of any structure used for human occupancy, assembly or habitation, other than the residence of the owner or keeper of such animals.
RMH AG PF OS	10,000 sq. ft.	10 acres or less: one unit per 10,000 sq. ft. >10 acres: no limit	
SFR	20,000 sq. ft.	Two units per 20,000 sq. ft. of lot area with Director Review with notice >1 acre: one unit per 10,000 sq. ft. of lot area.	

One Animal Unit Equals:

1 cow, bull, horse, mule, donkey or llama	2 pigs, goats or sheep
	6 geese, turkeys or similar fowl
10 chickens, ducks or game hens, excluding guinea hens and roosters in the SFR	12 fur-bearing animals including rabbits, and other fur-bearing size at maturity

NOTES

1. In calculations for permitted animals, fractional numbers are to be rounded to the lower whole number.
2. The offspring of animals are allowed and shall not be counted until they are of weanable or of self-sufficient age. Dogs and cats shall be counted at 4 months of age or more.

3. Applicability of lot area requirements: These animal standards refer to each individual lot or parcel; lots cannot be combined to meet area or other requirements for animal keeping.

04.280 Placement of manufactured homes in conventional SFR areas.

These standards permit the placement of manufactured, factory-built or modular housing in all areas designated for conventional single-family residential dwellings: SFR, ER, RR, MFR-L, RU, RM, AG and OS. In addition, they are allowed in the MU designation subject to Director Review.

These building and architectural standards are intended to ensure visual compatibility with traditional single-family home construction (stick built). Before an installation permit is issued for any manufactured, factory-built or modular housing, plans shall be submitted in compliance with the following standards:

- A. A plot plan showing the proposed access, parking and location of the unit on the parcel;
- B. Evidence that the home is 10 years old or newer and bears a seal of the U.S. Department of Housing and Urban Development (HUD) certifying that HUD construction standards are met (except in RMH);
- C. For factory built or modular housing, a seal certifying that the unit has been approved by the California Department of Housing and Community Development and is 10 years old or newer (except in RMH);
- D. Elevations showing the roof slope, roof materials, eave overhang and exterior siding materials;
- E. The unit must meet the design wind, seismic and roof load requirements;
- F. In addition, the following standards shall apply except in the RMH land use designation:
 1. Have a minimum width of 20 feet or more;
 2. Be attached to a permanent perimeter foundation constructed of concrete or masonry. This foundation shall meet the same requirements as foundations for all other single-family residential structures in the county. If the home is installed on an engineered foundation system, perimeter concrete or masonry walls shall be required;
 3. Be covered with an exterior material customarily used for conventional dwellings and approved by the Mono County Building Division;
 4. Have a roof pitch of not less than 3 inches for each 12 inches of horizontal run and consisting of shingles or other material customarily used for conventional dwellings and approved by the Mono County Building Division;
 5. Meet the roof loading requirements of the particular area in which the unit is installed; and
 6. Eaves (roof overhang) shall extend a minimum of 10 inches on all sides of the home. An exception to this eave requirement may be granted by the

building official if proof is provided that the 10-inch eave would prohibit transportation of the home.

ADVISORY NOTE: Mono County is not responsible for enforcing Covenants, Codes and Restrictions (CC&Rs). Property owners should consult their applicable CC&Rs for any restrictions on the type of housing.

04.290 Home occupation.

Home occupations are permitted in all residential designations, subject to obtaining a business license and compliance with the following home-occupation standards. A proposed home occupation must be clearly incidental and secondary to the residential use of the parcel and must be carried on within onsite structures by inhabitants of the parcel.

In order to maintain the home occupation and the business license, the applicant shall comply with all of the following home-occupation standards at all times:

- A. The business shall be confined completely within the dwelling and ancillary structures, excepting two vehicles not to exceed one ton each.
- B. The business shall involve no sales of merchandise other than that produced on the premises or merchandise directly related to and incidental to the occupation; as long as no other violation of any other subsection occurs;
- C. The business shall be carried on by members of the family occupying the dwelling, with no other persons employed;
- D. The business shall produce no evidence of its existence in the external appearance of the dwelling or premises, or in the creating of noise, odors, smoke or other nuisances to a greater degree than that normal for the neighborhood (i.e., no delivery trucks);
- E. The business shall not generate pedestrian or vehicular traffic beyond that normal in the neighborhood in which located;
- F. The business shall require no structural, electrical or plumbing alterations in the dwelling;
- G. The business shall involve no equipment other than that customarily used in dwellings; and
- H. The business shall involve no outdoor storage or advertising.
- I. Modifications to the above requirements may be permitted with an Expanded Home Occupation Permit.
- J. Expanded Home Occupation permits require approval by the Planning Commission at a public hearing.

04.300 Snow storage requirements.

Snow-storage areas shall be provided for all future commercial, industrial and multi-family (three or more units) development, including condominiums. Snow-storage area(s) shall be equal to a required percentage of the area from which the snow is to be removed (i.e., parking and access/roads areas). Snow storage shall be provided on site, but may be allowed off site through the use permit process. Snow loads shall be established by the Design Criteria utilized by the Mono County Building Division.

<u>Snow Load</u>		<u>Snow Storage %</u>
55 psf or less	=	25%
55-60 psf	=	40%
60-95 psf	=	55%
95+ psf	=	65%

Usable snow-storage areas shall be identified on the site plan and shall be accessible to snow-removal equipment and substantially clear of obstructions. All designated snow-storage areas shall be at least 10 feet wide or deep in the smallest dimension or based upon demonstration of alternative methods (i.e., equipment and size). Heavily landscaped areas shall be protected from snow removal.

04.310 Flag lot.

Flag lots shall not be permitted if specifically prohibited in the General Plan or area plan or when viewed as having significant cumulative effects. The County strongly discourages flag-lot divisions, but may permit flag-lot divisions upon findings of special circumstances (i.e., for utilization of irregularly shaped property and/or those properties impacted by topographic features). The creation of a residential flag lot shall comply with the following road or access requirements:

- A. Lot area: That portion of the flag or pole shall not be counted as part of the required lot area.
- B. Street frontage: The minimum street frontage for flag lots shall be 40 feet. All flag lots shall be serviced by a 40-foot minimum flag or pole.
- C. Parking: Required parking shall not be provided within the flag or pole.

DEVELOPMENT STANDARDS

CHAPTER 06 – PARKING

Sections.

06.010	Minimum parking requirements.
06.020	Development.
06.030	Accessibility.
06.040	Tandem parking.
06.050	Parking size.
06.060	Parking layout.
06.070	Handicapped requirements.
06.080	On site.
06.090	Off site.
06.100	Joint use.
06.110	Minimum requirements.

06.010 Minimum parking requirements.

- A. The standards for providing parking shall apply at the time of erection of any main building or when off-site parking is established. These standards shall also be complied with when an existing building is altered or enlarged by the addition of dwelling units or guest rooms, or where the use is intensified by the addition of floor space, seating capacity, seats, or changed to a use requiring additional parking.
- B. No parking area or parking space which is provided for the purpose of complying with the provisions of this chapter shall hereafter be relinquished, reduced or altered in any manner below the requirements established herein, unless equivalent spaces are provided elsewhere, the location of which is approved by the Commission.

06.020 Development.

- A. Any land hereafter used for parking lots, or car or trailer sales lots shall be developed with paving, drainage and painting (lighting and wheel stops as determined by the Commission) according to the specifications of the county departments of Planning and Public Works.
- B. All parking spaces shall be paved except as shown in the Table 06.010.
- C. Modification of Requirements. The Planning Commission or Director may waive, modify or increase the parking and driveway standards of this section. The requirements in Table 06.010 are minimums.

06.030 Accessibility.

All parking spaces, whether in a garage or open area shall be located to be accessible and usable for the parking of motor vehicles. The minimum turning radius shall be 25 feet.

06.040 Tandem parking.

Tandem parking is prohibited for all multiple residential, commercial, and industrial projects.

06.050 Parking size.

- A. Covered parking. The minimum size of parking spaces shall be 9 feet in width by 20 feet in length.

- B. Uncovered parking. The minimum size of parking spaces shall be 10 feet in width by 20 feet in length; in areas below 7,000' in elevation, the parking stall dimensions may be reduced to 9' x 18'. If a finding of necessity can be made for parking spaces directly accessed from a street, then the length of the parking space shall be 33 feet.

06.060 Parking layout.

The method of providing parking shall be clearly shown on any site plan or building plan submitted for consideration.

06.070 Handicapped requirements.

- A. Individual handicapped parking
The minimum size shall be 14 feet wide lined to provide a 9-foot parking space and a 5-foot loading area, by 20 feet in length.

- B. Double.
For two handicapped parking spaces, the minimum size shall be 23 feet wide lined to provide two 9-foot parking spaces and one 5-foot loading area shared between the spaces.

All handicapped parking shall be signed with surface identification symbol and with either a wall mounted or freestanding sign in accordance with the provisions of Title 24, 2-33240.

All parking shall be designed and maintained to permit full utilization of all spaces shown on the submittal. Covered parking may be incorporated in the design of the main building or buildings or may be permitted in separate parking structures.

06.080 On site.

All parking spaces shall be on site unless provided in accordance with the provisions of Section 06.090.

06.090 Off site.

- A. When parking is to be provided off the regularly subdivided lot on which the structure or uses or portions thereof are located, the owner or lessee of record shall furnish satisfactory evidence to the Director that he owns or has available sufficient property to provide the minimum parking required by this chapter.

- B. When parking is to be provided on property other than that being developed or used, there shall have been recorded in the office of the county recorder, prior to the issuance of any permit to construct, erect, add to or alter, a covenant executed by the owners of the property for the benefit of the County in a form approved by the County Counsel to the effect that the owners shall continue to maintain such parking so long as such structure, improvement or use exists. Such covenant shall also recite that the title to and right to use the lots upon which the parking space is to be provided will be subservient to the title to the premises upon which the structure is to be erected or the use maintained and shall warrant that such lots are not and will not be made subject to any other covenant or contract for such use without the prior written consent of the County.

In the event the owners of such structure should thereafter provide parking space equal in area and under the same conditions as to ownership upon the lot or lots other than the premises made subservient in a prior such covenant, the County will, upon written application, accompanied by a filing of a similar covenant, release such original subservient premises from such prior covenant.

06.100 Joint use.

Joint use of parking facilities on the same site may be allowed under the following conditions:

- A. When there is no conflict at time of use;
- B. When there is sufficient parking for all uses at any particular time.

06.110 Minimum requirements.

The following off-street parking requirements shall apply to all buildings, new uses commenced and to any areas of expanded uses commenced after the effective date of this ordinance. For any uses not specifically mentioned herein, the Commission shall determine the number or amount of parking required. All facilities shall be on site unless specified differently.

TABLE 06.010: PARKING SPACE REQUIREMENTS

Land Use	Number of Parking Spaces Required
Single family residences, duplexes, & multi-family residences	Two spaces per unit (either covered or uncovered), plus two spaces for manager's unit. NOTE: In June Lake, single-family residences require three parking spaces.
Accessory Dwelling Units	Two spaces per unit, in addition to that required for the primary unit. The spaces shall be side by side, not tandem. Tandem parking may be considered if all other requirements are met (see § 16.050 F. Standards for Accessory Dwelling Units).
Guest parking for multi-family residences 4-50 units 51-150 units 151+ units	One space per each six units or fraction thereof, but not less than two spaces. One space per each eight units or fraction thereof, but not less than 8 spaces. One space per each 10 units or fraction thereof, but not less than 18 spaces.
Mobile-home parks	Two spaces per unit plus one guest space for each 10 mobile-home lots or fraction thereof.
Commercial lodging; e.g., motels, hotels, bed-and-breakfast, rooming & boarding houses	One space per each sleeping room plus one space for each two employees on largest shift, plus two spaces for managers unit. One extra space for each unit with kitchen.
Public assembly facilities; e.g., churches, community centers, lodges, theaters, auditoriums, arenas	One space for each four seats, but not less than one space for each 100 sq. ft. of floor area of the largest meeting room.
Elementary schools	One and one-half spaces for each classroom and office.
High schools	Two and one-half spaces for each classroom and office.
Hospitals	One space per bed plus one space per doctor, plus one space for each two employees on the largest shift.
Social care facilities	One space for each four beds or fraction thereof, plus one space for each two employees.

Health service facilities; e.g., medical and dental offices	Five spaces for each doctor or doctor's office.
---	---

TABLE 06.010: PARKING SPACE REQUIREMENTS - continued

Land Use	Number of Spaces Required
Retail stores, services and offices	One space for each 200 sq. ft. of gross leasable floor area but not less than two spaces for each occupancy; may be off site within 300' when approved by the Commission or Director.
Bulk retail sales with a minimum of 7,000 sq. ft. or greater	One space for each 650 sq. ft. of gross leasable floor area or fraction thereof; or one space for each 400 sq. ft. of gross leasable floor area or fraction thereof; may be off site within 300' when approved by the Commission.
Restaurants (fast food)	One space for each three seats; plus one space for each 17 sq. ft. of waiting (ordering) area, plus one space for each 40 seats or fraction thereof for fast food restaurants with a drive-up window; plus one space for each two employees on the largest shift or one space for each 250 sq. ft. of floor area not used for seating or assembly, whichever is larger.
Restaurants, bars, cocktail lounges	One space for each three seats, but not less than one space for each 100 sq. ft. of floor area where customers are served; plus one space for each 250 sq. ft. of floor area not used for seating or assembly, whichever is larger; plus one space for each employees on the largest shift
Service stations	Two spaces for each working bay plus one space for each employee on the largest shift.
Bowling alleys, billiard halls	Five spaces per lane and/or two spaces per table, plus one space for each two employees on the largest shift.
Warehousing, wholesale stores	One space for each 1,000 sq. ft. of gross floor area or fraction thereof; may be off site within 300' when approved by the Commission or the Director.

<p>Manufacturing, industrial uses, heavy commercial use; e.g., lumber yards, cabinet shops, electrical, plumbing and heating shops, bottling plants, distribution centers, storage and warehousing</p>	<p>Minimum of two spaces for every three employees on the largest shift, but not less than one space for each 1,000 sq. ft. of gross floor area; may be provided off site within 300' when approved by the Commission.</p>
--	--

TABLE 06.010: PARKING SPACE REQUIREMENTS - continued

Land Use	Number of Spaces Required	
Car wash	One space per bay.	
Shopping centers, malls	A single commercial development project can obtain a reduction of 20% of the number of parking spaces in excess of 200, provided 100 sq. ft. of landscaping, above and beyond other requirements is provided for each parking space reduced. Motels, hotels and combined commercial residential developments are specifically excluded from the described reduction.	
Handicapped parking 1. Handicapped spaces count as a portion of the total number of parking spaces required. 2. Not applicable to existing facilities unless occupancy is changed. 3. Handicapped spaces shall be provided, designed and signed in conformance to Title 24 of the California Administrative Code.	Total # of Parking Spaces 1 - 25 26 - 50 51 - 75 76 - 100 101 - 150 151 - 200 201 - 300 301 - 400 401 - 500 501 - 1,000 1,001 and over	Handicapped Spaces Required 1 2 3 4 5 6 7 8 9 2% of total 20, plus one for each 100 over 1,000

NOTES

1. Density bonuses are available for enclosed, covered parking, including underground or understory parking.
2. Fractional parts from 0.5 to 0.9 may be rounded to the next higher number when calculating required spaces.
3. "Gross leasable floor area" or "gross floor area" means the total floor area, not counting hallways, bathrooms or storage/utility

TABLE 06.020: PARKING STANDARDS – STALL, SIZE, PAVING, STRIPING

PARKING STALL DIMENSIONS – minimum requirements	
Covered Parking, Carport	9' wide x 20' long.
Minimum turning radius	Must have a turning radius of at least 25'.
Uncovered Parking	10' wide x 20' long. Below 7,000' elevation, the required dimensions may be reduced to 9' x 18'. If a finding of necessity can be made for parking spaces accessed directly from a street, the required length of the parking space shall be 33'.
Individual Handicapped Spaces	13' wide, lined to provide an 8' parking space and a 5' access aisle; 20' long.
Double Handicapped Spaces	21' wide, lined to provide two 8' parking spaces and one 5' access aisle shared between the spaces; 20' long.

STRIPING REQUIREMENTS
All paved parking spaces shall be striped in accordance with the approved parking layouts shown in Figure 6.020.
All handicapped parking shall be signed with a surface identification symbol and with either a wall-mounted or freestanding sign in accordance with the provisions of Title 24.

PAVING AND DRIVEWAY IMPROVEMENT STANDARDS
All parking and driveway areas shall be paved except as provided for below. In areas 7,200' or greater in elevation, all parking and driveways shall be paved to facilitate snow removal. The Planning Commission or Director may waive, modify, or increase the parking and driveway improvement standards provided below. Driveways shall also comply with applicable provisions of the Fire Safe Standards in Chapter 22 and the county Roadway Standards.

A reduction of 20% of required surface paving shall be granted in areas that use pervious surface systems for exterior patios, driveways and parking areas. Additional increased reduction may be granted if engineered plans demonstrate a permeability factor greater than 20%.

TABLE 06.020: PARKING STANDARDS – STALL SIZE, PAVING, STRIPING – continued

Land Use	Lot Size	Paved Access Road	Dirt or Gravel Access Road
Single-family residential	Less than 1/2 acre	Asphalt or similar impervious surface	Graded dirt or gravel
Single-family residential	1/2 acre or more	Graded dirt or gravel	Graded dirt or gravel
Multiple-family residential	All sizes	Asphalt or similar impervious surface	Graded crushed rock or gravel
Commercial	All sizes	Asphalt or similar impervious surface	Graded crushed rock or gravel
Industrial	All sizes	Asphalt or similar impervious surface	Graded crushed rock or gravel
Parking lots, car or trailer sales lots	Shall be developed with paving, drainage & striping (lighting & wheel stops as determined by the Commission) according to the specifications of Planning Division and Department of Public Works.		

FIGURE 12: DESIGN AND DIMENSIONS OF PARKING FACILITIES

<p>DESIGN AND DIMENSIONS OF PARKING FACILITIES Mono County, California</p>	
<p>1. The figures within parentheses apply to those sites below 7,000 feet in elevation.</p>	
<p>2. The widths of covered parking stalls may be reduced by one foot.</p>	
Mono County Planning Department	

DEVELOPMENT STANDARDS

CHAPTER 07 – SIGNS

Sections:

07.010	Intent.
07.020	Permitted signs.
07.030	Signs subject to director review.
07.040	General provisions.
07.050	Design excellence (optional).
07.060	Prohibitions.
07.070	Nonconforming signs.

07.010 Intent.

It is the intent of this chapter to establish sign standards that will enhance and preserve the unique scenic beauty of Mono County and promote pedestrian, bicycle, vehicle, and traffic safety. Thus, aesthetics and safety are the primary objective of the following sections. Signs shall be located to be compatible with their surroundings in terms of size, shape, color, texture and lighting. They should not compete visually with other signs. Because signs are important in providing information to the public, and reducing hazards and confusion to pedestrians, bicyclists, and motorists, they should be simple in design and easy to read and should not obstruct vision from roadways or interfere with official traffic signs or signals.

Further, the provisions of applicable area plans will apply if more-restrictive regulations are contained therein. For example, a use permit is required for freestanding signs in a scenic highway corridor.

07.020 Permitted signs.

The following signs are permitted (some require a Building Division permit). These regulations, where more restrictive, override the Uniform Sign Code (1985 Edition):

A. Awning or Canopy Sign:

Definition: An awning sign is painted, stenciled, stitched, sewn or stained onto the exterior of an approved awning or canopy. Signs hanging from or attached to a canopy are not permitted under this definition (see Hanging Signs).

Requirements: No awning sign may have less than 8 feet of clearance from the bottom of the awning to the sidewalk. When an awning is the main signage for a business, the flap should be a minimum of 12 inches wide with 8-inch letters so that the sign can be easily read from across the street.

B. Changeable Copy Sign (or Marquee):

Definition: A sign that contains removable letters (or uses electronically changing copy) and provides information that is subject to change. This includes

amenities available for motels or resorts, movies at theaters, and current events at an auditorium.

Requirements: Maximum size permitted is 20 sq. ft. This sign area shall be counted against the overall sign area permitted for any corresponding monument/freestanding signs or attached/projecting signs on the subject parcel.

C. Political Signs:

Definition: A sign that indicates or displays the name or picture of an individual seeking election or appointment to a public office or relates to a forthcoming public election or referendum or advocates a person's, group's or party's political views or policies.

Requirements:

1. Political signs shall be posted only so long as needed to convey the message intended by the posting and shall be removed immediately thereafter.
2. Political signs that have an adhesive backing shall not be affixed directly to any structure. Such a sign with adhesive backing shall first be affixed to a temporary backing of wood, paper or plastic for support that can be removed easily from its posted location.

D. Real Estate Signs:

Definition: A sign that advertises the sale, rental or lease of property on which it is erected and maintained.

Requirements: A maximum of one sign per parcel is permitted and shall be removed within 15 days after the close of escrow or close of the rental/lease agreement. The sign must be located entirely within the subject property and shall not be lit. Maximum sign areas and heights shall be permitted as follows:

<u>Parcel Size</u>	<u>Sign Size</u>	<u>Sign Height</u>	<u>Minimum Setback from Edge of Road</u>
10 acres or less	4 sq. ft.	4'	5'
10 acres and larger	12 sq. ft.	8'	20'

E. Projecting Signs:

Definition: A sign that projects outward perpendicularly or at an angle from a wall or building face and is primarily attached to that wall or building face.

Requirements: A projecting sign may not extend more than three feet from the wall or building face and not exceed 10 sq. ft. with a minimum clearance of eight feet from the bottom of the sign to the sidewalk. Additional bonus square footage may be awarded as specified in Section 07.050, Design excellence.

F. Hanging Signs:

Definition: A hanging sign is similar to a projecting sign except that the primary sign face is hanging or suspended from a support bracket that projects outward from the wall or building face. A hanging sign may also hang from an awning.

Requirements: A hanging sign may not extend more than 4 feet from any building or wall face. It shall not exceed 10 sq. ft. with a minimum clearance of 8 feet from the bottom of the sign to the sidewalk. Additional square footage may be awarded as specified in Section 07.050, Design excellence.

G. Residential Identification Sign: The following residential identification signs are allowed without permit approval:

1. Private individual residence identification signs, limited to the names of the occupants and a total of 2 sq. ft. in size.
2. Multiple Family Projects, limited to one permanent identification sign with a maximum area of 20 sq. ft., attached to an approved wall or facade. Freestanding or monument signs are subject to Director Review as specified in this chapter. A total signing program will be required as part of the use permit requirements for any new multiple-family residential project of four or more units. Additional square footage may be awarded as specified in Section 07.050, Design excellence.

H. Safety or Required Signs:

1. Signs required for the public safety and convenience shall be permitted in conjunction with permitted business identification signs and shall not be counted against the allowable identification sign area. Safety or required signs shall not exceed 3 sq. ft. in each sign area and may contain any combination of the following words or symbols: "Parking" "Park Here" "Customers Only" "Open," etc., and shall not contain the name of the business.
2. Required signs include those mandated by a federal, state or local agency, and include display of gas prices by retail gasoline distributors. Gasoline price signs shall not exceed more than one set of signs per street frontage. Each line of letters or numbers cannot exceed 6 inches in height, and total sign area may not exceed 24 sq. ft.
3. If the name or logo of the business appears integrated along with any safety or required sign, the total sign area shall be counted against the allowable sign area.

I. Special Events and Holiday Signs:

Banners, signs or decorative materials are permitted in conjunction with a holiday season or an event conducted in accordance with Section 02.1080, Special Events. Such signs and decorative materials are not to be erected more than 30 days preceding the event and shall be removed upon its conclusion. Temporary signs in residentially designated areas shall be limited to garage sales

and open house signs, and shall be limited to 3 sq. ft. Political signs and signs displaying non-commercial messages are not subject to this paragraph.

J. Window Signs:

Definition: Sign(s) painted on, attached to, designed or placed so as to be read principally through the windows from outside the business.

Requirements: The total of all permanent window signs shall cover no more than 20% of total window area. Temporary sales and special event signs may be displayed over this 20% maximum, but shall be removed immediately upon conclusion of the sale or special event, in no case to exceed 30 days.

K. Building Identification and Directory Plaques:

Definition: A plaque mounted flush to a building to denote the building's identity, tenants or historical information. This sign shall not be counted against the allowable sign area.

Requirements: If the parking lot entrance and the main building entrance front on different streets, there may be one sign at each entrance. The total sign area shall be limited to a maximum size of 8 inches by 48 inches and letters shall not exceed 3 inches.

L. Flags:

Definition: A rectangular piece of fabric or other flexible material that is used as a symbol, signage device, or decoration. Flag does not include temporary banners associated with special events or holidays, which are subject to regulation in accordance with paragraph I of this section.

Requirements: Flags displaying non-commercial messages (for example, flags of a nation, state, or local entity, or flags of a religious or civic organization), when not used as an advertising device (i.e., to promote a commercial transaction) shall be permitted. Flags displaying commercial messages or used as an advertising device (i.e., to promote a commercial transaction) shall be considered signs and shall be subject to regulation in accordance with the provisions of this chapter applicable to signs generally, based on the individual characteristics of the flag in question (e.g., freestanding, attached, hanging, etc.).

07.030 Signs subject to director review.

The following signs are subject to Director Review as specified in Chapter 31:

A. Attached:

Definition: A sign mounted flush and affixed securely to a building wall that projects no more than six inches from the face of a building wall, and does not extend vertically or horizontally beyond the building.

Requirements:

1. Attached signs may occupy one square foot for each two lineal feet of business frontage upon which the sign is located. In intensive commercial and industrial areas (e.g., C, IP and I), the maximum area of any attached

sign shall not exceed a 100 sq. ft., but need not be less than 25 sq. ft. In rural, agricultural, residential and neighborhood commercial areas, the maximum area of any attached sign shall not exceed 50 sq. ft., but need not be less than 15 sq. ft.

2. When two or more separate businesses (located in separate offices, spaces, or buildings) are located on one parcel, each shall be eligible for at least the minimum square footage (i.e., 15 or 25 sq. ft.).
3. Further, the maximum height of the sign shall be 20 feet or the height of the building, whichever is less. A maximum of two attached signs per occupancy is permitted, but in total combined area cannot exceed the maximum permitted. Additional square footage may be awarded as specified in Section .050, Design excellence.

B. Community and Historical:

Definition: A sign erected by a Chamber of Commerce or similar organization that identifies local communities or points of historical interest.

Requirements: There are no specific square footage or height restrictions. However, such signs shall be visually compatible and shall not compete with the area in which they are placed. The sign may identify a city or unincorporated community and may contain the name, sub-name or slogan of the area, but without other advertising.

C. Freestanding and Monument Signs: One freestanding or monument permitted for parcels with a minimum of 100 feet of street frontage. Shopping centers with 10 or more shops/offices may have one for each street frontage.

1. Freestanding:

Definition: A sign anchored directly to the ground or primarily supported from the ground rather than a building.

Requirements: The maximum height of the sign shall be 20 feet or the height of the associated building, whichever is less. Freestanding signs may occupy one square foot for every three lineal feet of street frontage, up to a maximum of 100 sq. ft. Freestanding signs shall be set back a minimum of five feet from the property line. Additional square footage may be awarded as specified in Section 7.050, Design Excellence.

2. Monument:

Definition: A freestanding sign attached continuously at grade.

Requirements: The maximum height of monument signs shall be 8 feet. Monument signs are computed the same as freestanding signs (above), except that the minimum need not be less than 45 sq. ft. and the maximum cannot exceed 125 sq. ft. Additional square footage may be awarded as specified in Section 7.050, Design excellence.

D. Directional:

Definition: A sign that provides needed directions to remotely located business and scenic, recreation areas such as pack stations, lodges, resorts and lakes.

Requirements: Directional signs will be approved only upon a demonstrated need. It will be limited to the name of the business or area, and direction to its location. Signs cannot exceed 3 sq. ft.

E. Informational Kiosks and Freestanding Directory Boards:

The following sign types will be allowed only when submitted as part of a total signing program for a shopping center, community improvement district, etc.:

1. Directory Boards: Provides information as to the location of businesses in a pedestrian-oriented business area, not to exceed 3 sq. ft. in area and, if hung, shall not be higher than six feet.
2. Kiosks: May provide information as to the location of businesses in a pedestrian-oriented business area, as well as a surface for handbills, posters and flyers to be affixed too. The total area of a kiosk display surface is not to exceed 40 sq. ft. or 8 feet in height. Kiosks are to be separated from adjacent structures by a minimum of six feet. Kiosks shall be maintained with a neat appearance and outdated materials shall be removed promptly.

07.040 General provisions.

The provisions of this section are applicable to all signs constructed or altered after the effective date of this chapter except as otherwise provided by this chapter. No person except a public officer or employee in the performance of a public duty shall paint, paste, display, construct, erect, alter, use or otherwise maintain any sign except in accordance with the provisions of this chapter.

A. Sign Measurements:

1. Area: The area of a sign is to be measured as the number of square feet of the smallest rectangle within which a single sign face can be enclosed, as follows:
 - a. Sign Faces Counted: Where a sign has two faces containing sign copy that are oriented back-to-back, are separated by not more than three feet at any point, and are parallel to each other; the area of the sign is to be measured using the face of the larger sign.
 - b. Wall-mounted Letters (channel letters): Where a sign is composed of letters individually mounted or painted on a building wall, without a border or decorative enclosure; the sign area is that of the smallest single rectangle within which all letters and words can be enclosed.
 - c. V-Shaped Signs: The area of V-shaped signs shall be calculated the same as if it were a single sign face.
 - d. Monument Signs: Area shall be calculated for that portion of the sign enclosed by the decorative border or frame and shall not include the

foundation for the sign (however, the eight-foot height limit does include the foundation).

2. Height: The height of a sign shall be measured as the vertical distance from the adjacent grade to the uppermost point on a sign or sign structure.
- B. Sign Illumination: For those signs to be lit, indirect illumination from a separate light source is required, with the exception of channel letters. Use of neon and internal lighting is prohibited unless integrated with an overall architectural or design theme and is subject to Director's approval. An indirectly illuminated sign is defined as any sign whose illumination is reflected from its source by the sign display surface to the viewer's eye, the source of light not being visible from the street or from abutting property.
 - C. Sign Copy Changes: Any sign erected in conformance to the provisions of this chapter may be repainted, maintained, and the copy changed as long as there is no increase in existing sign area or the sign face relocated; otherwise, the sign will be considered as a new sign and shall be subject to all provisions of this chapter. Where the sign is not in conformity with the provisions of the chapter, any change shall be in accordance with the provisions of Section 07.060, Nonconforming Signs.
 - D. Shopping Centers, Malls, Office Complexes and Multi-family Projects: Any new proposal requiring a use permit and containing more than four residential units or four shops/offices shall include a total signing program with their use permit application. This signing program shall include total number, size and type of signs proposed, as well as elevations illustrating proposed design and materials to ensure that the signage will be integrated into the project's planning and design.

07.050 Design excellence (optional).

Any sign permitted (except real estate, temporary, and safety, or permitted by Director Review, has the option to apply for additional sign area under the provisions of this section.

Depending upon the quality and design excellence of any new sign, as determined by the Director, additional sign area up to 25% over stated maximums may be awarded.

Factors to be considered in the design excellence of any proposed sign include method of construction and material, color, lighting, relationship of the sign to the building, and relationship of the sign to the community. These are described in more detail as follows:

- A. Materials and method of construction:
Materials and construction style should harmonize with the natural surroundings. Thus, wood and stone are encouraged, along with metal finishes that accent the county's mining past.

Wooden signs can be routed, carved or sandblasted to get the effect of raised letters. Raised letters can also be attached to a wooden signage band. These can also be metal or precast and molded. Paint can also be directly applied to a flat wooden signage band.

Metal signs can also be used effectively by applying raised letters as described above or on a metal band. Paint and lettering can be applied, although a galvanized or baked enamel finish is required to avoid rusting.

Signage can be painted directly on the facade of a building. The use of tile can also be applied onto the wall surface if stucco walls are used instead of wood.

Use of natural materials and landscaping is an effective way to soften and accent monument and freestanding signs.

B. Colors and visibility:

Colors should relate to and complement the materials or paint scheme of the buildings, including accenting highlights and trim colors. The number of colors on any sign should be limited to three. This heightens readability (visibility); especially when one color is a dark hue, the second a medium hue, and the third a light accent color. These three combine to produce a highly legible sign. Additional colors only compete with one another. Fluorescent colors are not permitted.

C. Relationship of the sign to the building:

The location and size of signs on any building should relate to the architecture of that particular structure. The sign should reinforce the existing features of the building by fitting them within other lines and shapes. Flat signs, parallel to the facade, are excellent because they do not compete with the building. Wall signs should complement one another in color and shape and, if possible, be located in the same position over storefronts. In pedestrian areas signs should be located to be visible to both motorist and pedestrian.

D. Relationship of the sign to the community:

Signs should not be out of scale with the street or visually disruptive, and should be visible by both passing motorists and pedestrians. Where feasible, relate new signs to others on the block by aligning them with existing signs or other horizontal elements, such as molding bands above store windows. A sign should complement and reinforce a community's character, creating harmony without uniformity.

07.060 Prohibitions.

The following signs and sign types are prohibited:

- A. No sign shall exceed 20 feet in height.
- B. Animated signs, such as those that rotate, move, flash, reflect, blink or effect changes in hue or intensity of illumination.
- C. Portable signs, including but not limited to, trailer-mounted marquees and sandwich boards.

- D. Signs that project over any property line or extend more than four feet from any building or wall except where such signs are an integral part of an approved canopy or awning.
- E. Signs placed above the eave line, except in the case of an A-frame building where no other option is available or where the theme or design of the building warrants such sign as determined by the Director.
- F. Vehicular-mounted freestanding signs.
- G. Off-site advertising signs or billboards.
- H. Signs that advertise a home occupation, unless permitted by Expanded Home Occupation Permit.
- I. Modification of the location or size of any sign granted under the provisions of Section 07.030, Director Review. All modifications of such signs shall be reviewed by the Director.
- J. Use of neon or internal lighting unless in conformance to Section 07.040-B, Sign Illumination.
- K. Attachment of signs to utility poles or natural features, including trees and rocks, etc.
- L. Removal or pruning of trees within any public right of way to increase the visibility of any sign.
- M. Placement of private advertising signs on public property.
- N. Signs that interfere with, obstruct the view of, or may be confused with any authorized traffic sign or interfere with or obstruct driver, pedestrian, or bicyclist visibility from any street, road, or highway.

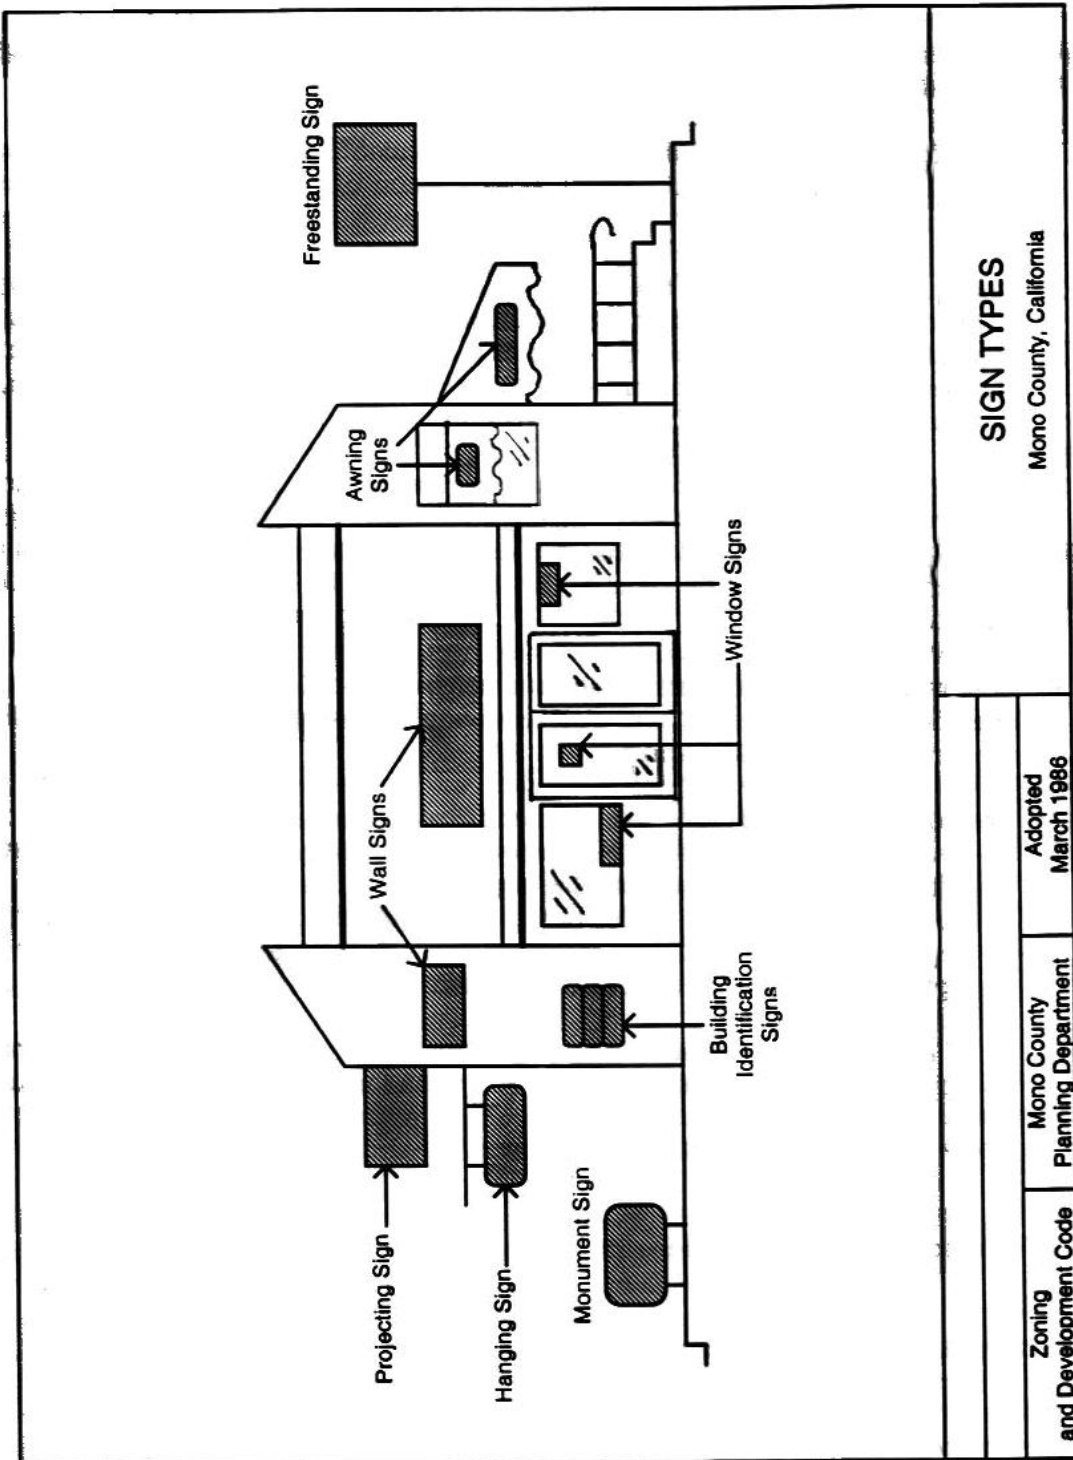

07.070 Nonconforming Signs.

Nonconforming signs are those that were in existence at the time of adoption of land development regulations that do not conform to the provisions of this chapter. Such signs may be continued as follows:

- A. Expansion. A nonconforming sign may not be increased in area or lighting intensity or moved from its location after the effective date of this chapter.
- B. Sign Copy. The advertising copy on a nonconforming sign may be changed except as provided by subsection A, expansion of nonconforming signs, of this section.
- C. Discontinued use. If the use of a building or land associated with a nonconforming sign is discontinued for six months or more, all signs shall thereafter conform to the provisions of this chapter. Where a business operates on a seasonal basis and for which there is an active Mono County business license, the provisions relating to discontinued use will not apply.

- D. If the size or configuration of a lot or building is changed by the subdivision of the property or by alterations, identification signs and outdoor advertising signs on the resulting properties shall be required to conform to the sign regulations applicable to the newly created lot or lots at the time the change becomes effective.
- E. Removal. If a nonconforming sign is removed for any reason other than those specified in subsection C and this section, all subsequent signs must conform to the provisions of this chapter.
- F. Destroyed Signs and Advertising Structures.
 - 1. If a nonconforming sign is destroyed or partially destroyed to the extent of 50% or more of the replacement cost of the total sign before destruction by fire, explosion or act of God, the destroyed sign may be replaced or reconstructed, provided that it is brought into conformity with all applicable requirements of this chapter.
 - 2. If a nonconforming sign is partially destroyed to less than 50% of its replacement cost, it may be restored to its former nonconforming status.

FIGURE 13: SIGN TYPES

SIGN TYPES

Mono County, California

Adopted
March 1986

Mono County
Planning Department

Zoning
and Development Code

TABLE 07.010: SIGN STANDARD SUMMARY

Sign Type	Maximum Number	Maximum Sign Size	Maximum Height	Level of Dept. Review	Designations Permitted	Other Standards
Awning	One per street or parking lot frontage	10 sq. ft.	Minimum 8' ground clearance	Permitted with building permit	ER, RR, RU, SP, AP C, SC	
Changeable Copy/Marquée	One per business	20 sq. ft. (counted against maximum allowed for freestanding or attached)	20'	Permitted with building permit	C, SC	
Political	Not specified	Not specified	Not specified	Permitted	All districts	1. Must be removed when purpose for posting ceases. 2. If adhesive backing, affix to temporary backing
Real Estate	One per parcel	4 sq. ft. on parcel ≤10 acres	4'	Permitted	All districts	1. Sign must be removed within 15 days of close of escrow.
		12 sq. ft. on parcels >10 acres	8'			
Projecting or Hanging	One per business (can be double-faced)	10 sq. ft.	minimum 8' ground clearance 20'	Permitted with building permit	ER, RR, RU, MFR, SP, C, SC, IP, I	1. May not project more than 3' from any wall
	One per business (can be double-faced)	10 sq. ft.	minimum 8' ground clearance 20'	Permitted with building permit	ER, RR, RU, MFR, SP, AP, C, SC, IP, I	1. May not project more than 4' from any wall.
Window	Not specified	20% of window area	Limited to first-floor windows	Permitted	All districts	1. No maximum for sales or special event signs.

Director Plaque	One per building (two permitted if main entrance from both street and parking lot)	8" x 48"	Not specified	Permitted	All districts	1. Individual letters limited to 3" in height.
-----------------	--	----------	---------------	-----------	---------------	--

TABLE 07.010: SIGN STANDARD SUMMARY - continued

Sign Type	Maximum Number	Maximum Sign Size	Maximum Height	Level of Dept. Review	Designations Permitted	Other Standards
Attached (wall)	Two per business	a. Up to 20 sq. ft. in MFR, RU, SP, AP b. Up to 50 sq. ft. in ER, RR, IP c. Up to 100 sq. ft. in C, SC, I	20'	Director review	As specified under sign area	1. Except for multiple family projects in MFR, RU, SP, AP districts, sign area is calculated at 1 square foot for each 2 lineal feet of business frontage. 2. Cannot project more than 6" from building face.
Monument or Freestanding	One per business (can be double-faced)	Up to 125 sq. ft.	8' from grade	Director review	ER, RR, MFR, SP, AP C, SC, IP, I	1. Required a minimum of 100' of street frontage. 2. Sign area is calculated at 1 sq. ft. per each 3' of street frontage.
	One per business (can be double-faced)	Up to 100 sq. ft.	20'	Director review	ER, RR, MFR, SP, AP C, SC, IP, I	1. Required a minimum of 100' of street frontage. 2. Sign area is calculated at 1 sq. ft. per each 3' of street frontage. 3. Sign shall be set back a minimum of 20' from the street.
Directional	One per business (can be double-faced)	3 sq. ft.	Not specified	Director review	All districts	1. Must demonstrate need in order to erect.

NOTE: This summary is for informational purposes only. Refer to the applicable sections of Chapter 07 for detailed requirements.

- Eligible for additional square footage under the provisions of the Design Excellence Section 07.050.
- Noted signs are permitted in these districts only as part of a total signing program (see Sections 07.020 G2 and 07.040 D).

DEVELOPMENT STANDARDS

**CHAPTER 08 – SCENIC COMBINING DISTRICT &
STATE SCENIC HIGHWAY**

Sections:

08.010	Applicability.
08.020	Establishment of district.
08.030	Standards – General.
08.040	Standards – State Scenic Highway 395
08.050	Uses permitted subject to use permit.
08.060	Permit issuance.

08.010 Applicability.

The S-C, scenic combining, district is intended to regulate development activity in scenic areas outside of communities in order to minimize potential visual impacts. Use of the S-C district is encouraged in areas adjacent to and visible from designated scenic highways as well as in other important scenic areas.

08.020 Establishment of district.

The S-C, scenic combining, district may be overlaid on any designation. In addition to the requirements of this chapter, initiation and application of the scenic combining district is subject to the same requirements as a land use redesignation (see Ch. 48, Amendments).

08.030 Standards – General.

Development in the scenic combining district shall be restricted by the following general standards:

- A. Visually offensive land uses shall be adequately screened through the use of extensive site landscaping, fencing, and/or contour grading.
- B. Earthwork, grading and vegetative removals shall be minimized.
- C. All site disturbances shall be revegetated with plants and landscaping which are in harmony with the surrounding environment (drought resistant indigenous plants are encouraged). A landscaping plan shall be submitted and approved for all projects.
- D. Existing access roads shall be utilized whenever possible. Construction of new access roads, frontage roads or driveways shall be avoided except where essential for health and safety.
- E. The number, type, size, height and design of on-site signs shall be strictly regulated according to the county sign regulations (see Ch. 07).

- F. The design, color and materials for buildings, fences and accessory structures shall be compatible with the natural setting.
- G. All new utilities shall be installed underground in accordance with Chapter 11, Development Standards – Utilities.
- H. Exterior lighting shall be shielded and indirect and shall be minimized to that necessary for security and safety.

08.040 Standards – State Scenic Highway 395

New development outside communities visible from State Scenic Highway 395 shall be additionally restricted by the following standards:

- A. The natural topography of a site shall be maintained to the fullest extent possible. Earthwork, grading and vegetative removals shall be minimized. Existing access roads shall be utilized whenever possible. Existing trees and native ground cover should be protected. All site disturbances shall be revegetated and maintained with plants that blend with the surrounding natural environment, preferably local native plants.
- B. New structures shall be situated on the property where, to the extent feasible, they will be at least visible from the state scenic highway. Structures shall be clustered when possible, leaving remaining areas in a natural state, or landscaped to be compatible with the scenic quality of the area.
- C. To the extent feasible new subdivisions shall not create parcels with ridgeline building pad locations.
- D. Roofs visible from State Scenic Highway 395 shall be a dull finish and in dark muted colors.
- E. Vertical surfaces of structures should not contrast and shall blend with the natural surroundings. Dark or neutral colors found in immediate surroundings are strongly encouraged for vertical surfaces and structures.
- F. Light sources in exterior lighting fixtures shall be shielded, down-directed and not visible from State Scenic Highway 395.
- G. Fencing and screening shall not contrast in color, shape and materials with the natural surroundings. The use of landscaping to screen utility areas and trash containers is strongly recommended.
- H. Signs shall be compatible with the natural surroundings in color and shape. They shall be small in scale. No sign shall be placed or constructed in such a manner that it silhouettes against the sky above the ridgeline or blocks a scenic viewshed. The number, type, size, height and design of on-site signs shall be strictly regulated according to the county sign regulations.

08.050 Uses permitted.

All uses permitted in the basic land use designation with which the scenic combining district is combined shall be permitted.

08.060 Uses permitted subject to use permit.

All uses permitted in the basic land use designation with which the scenic combining district is combined shall be permitted, subject to securing a use permit.

08.070 Permit issuance.

The general standards listed in Section 8.03 shall be applied by the Planning Division during review of an application. No permit shall be issued until the project complies with the standards for this district.

DEVELOPMENT STANDARDS

CHAPTER 09 – DESIGN REVIEW DISTRICT

Sections:

09.010	Applicability
09.020	Establishment of a design review district.
09.030	Design review process.
09.040	Standards - General.
09.050	Uses permitted.
09.050	Uses permitted subject to use permit.
09.060	Permit issuance.
09.050	Appeals.

09.010 Applicability.

This chapter provides for the establishment of design review districts and for design review of commercial structures and multi-family residential development within the district. Single-family residential development may also be reviewed if the ordinance establishing a design review district provides for such review.

09.020 Establishment of a design review district.

In addition to the requirements of this chapter, initiation and application of a design review district is subject to the requirements for a land use redesignation (see Ch. 48, Amendments). A design review district shall be established upon adoption of an ordinance which states the boundaries of the district and the purposes of the district.

9.030 Design review process.

- A. Upon creation of a design review district, the board of supervisors may appoint a design review committee or may designate the Planning Division as the design review body for the purposes of this chapter. If a design review committee is appointed, the committee shall consist of not less than three or more than seven members residing within the design review district.

- B. Specific design review standards shall be established for each design review district. These standards shall, at a minimum, comply with the general development standards in Section 9.040. Specific standards for a design review district shall be developed and updated as needed by the Planning Division in consultation with any local architectural review committee or, if appointed, by the design review committee, in consultation with the Planning Division and any local architectural review committee. Standards must be adopted by the board of supervisors in a noticed public hearing prior to review of any projects.
- C. Either the Planning Division or, if appointed, the design review committee, shall review an application for a project or permit to determine whether the proposal is compatible with the established design review standards for the district. In their review, the planning division or the design review committee shall identify unacceptable visual qualities of the proposal and request appropriate changes. Proposals may be recommended for approval by the design review committee with or without conditions; design review committee recommendations shall be considered by the Planning Division in the case of building permits or by the reviewing body prior to approval.
- D. If an active local architectural review committee exists to enforce CC&Rs in a subdivision that lies within a design review district, that committee may continue to review all development applications within the subdivision.

9.040 Standards - General.

- A. The overall objective of design review shall be to retain a community's natural topography, vegetation and scenic beauty to the greatest extent possible.
- B. Visually offensive land uses shall be adequately screened through the use of extensive site landscaping, fencing, and/or contour grading.
- C. Earthwork, grading and vegetative removals shall be minimized.
- D. All site disturbances shall be revegetated with plants and landscaping which are in harmony with the surrounding environment (drought-resistant indigenous plants are encouraged). A landscaping plan shall be submitted and approved for all projects.
- E. Existing access roads shall be utilized whenever possible. Construction of new access roads, frontage roads or driveways shall be avoided except where essential for health and safety.
- F. The number, type, size, height and design of on-site signs shall be strictly regulated according to the county sign regulations (see Ch. 07, Development Standards-Signs).
- G. The design, color and materials for buildings, fences and accessory structures shall be compatible with the natural setting.
- H. The following architectural designs and features are considered detrimental to the general well-being of a community:

1. Reflective materials;
 2. Excessive height and/or bulk;
 3. Standardized designs which are utilized to promote specific activities and which are not in harmony with the community atmosphere; and
 4. Architectural designs and features which are incongruous to the community and/or which significantly detract from the natural attractiveness of the community or its surroundings.
- I. All new utilities shall be installed underground in accordance with Ch. 11, Development Standards – Utilities.
- J. Exterior lighting shall be shielded and indirect and shall be minimized to that necessary for security and safety.

9.050 Uses permitted.

All uses permitted in the basic land use designation with which the design review district is combined shall be permitted.

9.060 Uses permitted subject to use permit.

All uses permitted in the basic land use designation with which the design review district is combined shall be permitted, subject to securing a use permit.

9.070 Permit issuance.

No permit shall be issued in any case where design review is required until the project complies with the established design review standards for the district.

9.080 Appeals.

Appeals of any design review decision shall be made in conformance to the provisions of Ch. 47, Appeals.

DEVELOPMENT STANDARDS**CHAPTER 10 – EQUESTRIAN OVERLAY DISTRICT****Sections:**

10.010	Intent.
10.020	Establishment of district.
10.030	Uses permitted.
10.040	Uses permitted subject to use permit.
10.050	Lot area/District area.
10.060	Special requirements.
10.070	Restrictions to use of an E-Overlay District.

10.010 Intent.

The equestrian overlay district is intended to provide for the superimposing of an equestrian district on all land use designations where single-family residences are permitted. The land use designation followed by the letter E (e.g., SFR-E) would indicate an equestrian district overlay providing for the keeping of large domestic animals for personal use subject to the minimum standards set forth in this district.

10.020 Establishment of district.

The equestrian district may be overlaid on any single-family residential district. In addition to the requirements of this chapter, initiation and application of this overlay district is subject to the same requirements as any land use redesignation (see Ch. 48, Amendments).

10.030 Uses permitted.

The following uses shall be permitted in the equestrian overlay district, plus such other uses as the Commission finds to be similar and not more obnoxious or detrimental to the public safety, health and welfare:

- A. All uses permitted in the basic land use designation with which the equestrian district is combined;
- B. Where the principal use of the subject parcel is single-family residential, the keeping of horses or other large domesticated animals for personal use may be permitted. No commercial animal raising or keeping shall be allowed.

10.040 Uses permitted subject to use permit.

All uses permitted in the basic land use designation with which the equestrian overlay district is combined shall be permitted, subject to securing a use permit.

10.050 Lot area/District area.

- A. Minimum lot area.

For the keeping of one horse or other large domesticated animal, 15,000 sq. ft. Additional animals may be kept on a larger parcel, but shall not exceed one animal for each 10,000 sq. ft. of land area contained in the parcel.

- B. Minimum district area.
 - 1. Five acres;
 - 2. Any addition to an already established E-Overlay District shall be not less than one acre.

10.060 Special requirements.

- A. Animal confinement areas, including, but not limited to pens and corrals, shall be maintained in accordance with Mono County Environmental Health requirements. Confinement areas shall be maintained in a clean and orderly manner at all times. Accumulation of animal waste or other odor or insect producing materials shall not be permitted. No part of any animal confinement area shall be located closer than 50 feet to any dwelling with the exception of the animal owner's dwelling in which case the minimum distance may be 20 feet.
- B. Barns, stables and similar necessary buildings in the E overlay district may exceed the height limitations for accessory structures in the base designation, but in no case shall they exceed the heights permitted for primary dwellings in the base designation.

DEVELOPMENT STANDARDS**CHAPTER 11 – UTILITIES****Sections:**

- 11.010** **Placement of Utility Lines.**
11.020 **Alternative Energy Systems**

11.010 **Placement of Utility Infrastructure.**

A. Exemption for Regulated Public Utilities.

The provisions of this section shall not apply to distribution and transmission lines owned and operated as part of the statewide electrical network regulated by the California Public Utilities Commission (PUC). The authority for this exemption is set forth in the California Constitution, Article XII, Section 8, which vests exclusive regulatory authority over the distribution and transmission lines of these utilities in the California Public Utilities Commission.

B. Uses Permitted.

Underground facilities for the distribution of gas, water, sewer, telephone, television, communications and electricity shall be allowed in all designations.

C. Definitions.

For the purposes of this section, the following definitions shall apply:

"Individual development" means an individual development project, such as a single-family residence and/or Accessory Dwelling Unit, a garage, a single commercial use, one apartment building, or similar uses. It does not mean a subdivision, land division, condominium development, or development of more than one detached unit at the same time.

"Overhead utility lines" means utility distribution lines that are installed above ground, either overhead, in an above ground conduit, or in some other manner.

"Subdivision" means the division of any unit or units of improved or unimproved land as further defined in Section 02.1520 and the Mono County Subdivision Ordinance.

"Utility" means gas, water, sewer, telephone, television, communications and electricity.

D. Utility Distribution Lines to Individual Development.

Utility distribution lines to an individual development shall be installed underground, unless the applicant has obtained a Director Review Permit with Notice for overhead installation, in the manner specified in Chapter 31, Director

Review Processing. For projects that require a use permit, the application for overhead utility lines shall be processed as part of the use permit application.

Prior to considering issuance of a permit, planning staff shall work with the applicant to site and design the project in a manner that avoids or minimizes the use of overhead lines, and that avoids or minimizes the impacts of overhead lines. Consideration should be given to combining lines whenever possible.

In granting a permit for overhead utility lines, the Community Development Director (Director) or the Planning Commission (Commission) shall make one of the following findings, in addition to the required Director Review or Use Permit findings:

1. The overhead line placement will not significantly disrupt the visual character of the area. In making this determination, the Director or the Commission shall consider the following:
 - a. In areas without a number of existing overhead lines in the immediate vicinity, would overhead lines create the potential for a significant cumulative visual impact; i.e., would allowing an overhead line be likely to result in future requests for additional overhead lines in the area? If so, it may be determined that an overhead line will have a significant impact on the visual character of the area.
 - b. Does the topography or vegetation in the area effectively screen the proposed lines? If so, then an additional line may not significantly disrupt the visual character of the area.
 - c. Are there other potential alignments that would have less visual impact?
 - d. Does the project reduce the overall number of overhead lines and poles in the area? If so, it may be determined that an overhead line will not have a significant impact on the visual character of the area.

The Director or the Commission may consider additional information pertaining to the visual character of the area which is deemed relevant to the application.

2. The placement of utility lines above ground is environmentally preferable to underground placement. In making this determination, the Director or the Commission shall consider the following:
 - a. Will underground placement disturb an environmentally sensitive area, including but not limited to the following: cultural resource sites, significant wildlife habitat or use areas, riparian or wetland areas, or shallow groundwater? If so, above-ground placement may be preferable.
 - b. Will underground placement require disturbance of a waterway, including perennial, intermittent and seasonal streams? If so, above-ground placement may be preferable.

- c. Will underground placement increase the utility line's exposure to environmental hazards, such as flood hazards, fault hazards or liquefaction? If so, above-ground placement may be preferable.
- d. Are there other potential alignments that would avoid potential environmental impacts?

The Director or the Commission may consider additional information pertaining to the environmental sensitivity of the area which is deemed relevant to the application.

- 3. The installation of underground utilities would create an unreasonable financial hardship on the applicant due to the unique physical characteristics of the property. In making this determination, the Director or the Commission shall consider the following:
 - a. Is the cost of the line to be installed excessive?
 - b. Will the installation of underground utilities require trenching under a stream bed?
 - c. Will the installation of underground utilities require unreasonable trenching or blasting through rock?
 - d. Are there alternate alignments that would eliminate or significantly lessen the financial hardship?

The Director or the Commission may consider other site specific financial hardships deemed relevant to the application.

- 4. The exclusive purpose of the overhead line is to serve an agricultural operation.

For the purposes of this section, agricultural operations are defined as use of the land for the production of food and fiber, including the growing of crops and grazing of livestock. Above-ground utility lines may be permitted for agricultural uses such as pumps and similar uses.

E. Utility Distribution Lines for Subdivisions.

Utility distribution lines for all subdivisions and land divisions shall be installed underground, unless a specific hardship can be demonstrated (see # 3 above). If a specific hardship can be demonstrated, overhead installation may be allowed subject to approval of a variance (see Ch. 33, Variance Processing).

Subdivisions may be required to underground the feeder distribution line to the subdivision. An assessment district, or a similar mechanism, may be established for this purpose as a condition of the tract map approval.

F. Use Permit.

Other utility (municipal, private, and if applicable, public utilities not regulated by the PUC) distribution lines, transmission lines and corridors, towers, electrical substations, repeater stations, pumping stations, and uses accessory thereto, including microwave facilities, may be allowed in all districts subject to first securing a use permit, in the manner specified in Chapter 32, Use Permit Processing.

G. Exceptions.

In the event that any regulations of the Public Utilities Commission or any other agency of the state with jurisdiction over utilities conflicts with the provisions of land use designations and the land development regulations, the regulations of the state shall apply, to the extent that the same are conflicting.

H. Locational Requirements.

Whether or not a utility is subject to any permitting requirements as delineated in subsections A to G, above, all new utility distribution lines, transmission lines, corridors, rights of way, towers, electrical substations, repeater stations, pumping stations, cell/communication towers and uses accessory thereto, including microwave facilities, shall comply with the policies of this General Plan and applicable area or specific plans.

I. Cellular and Wireless Towers

Towers erected for the purposes of providing communications through wireless or cellular technologies are permitted in all land use designations subject to a use permit. These towers shall exhibit substantial compliance with the following, unless such substantial compliance would result in an effective prohibition of the provision of wireless communication facilities, or in unreasonable discrimination against a provider of wireless communication facilities, as defined in the Telecommunications Act of 1996:

1. Visual mitigations strategies included in the Mono County Design Guidelines.
2. Cellular and wireless towers shall bond for the reclamation of the site in the event that the infrastructure has not been utilized for a period of three years.
3. Towers shall be sited only when there is an identified service provider who has proved a need for the facility.
4. Facilities shall be co-located to minimize the number of towers
5. Cell tower operators shall be required to verify compliance with the FCC's RF Emission Standards.

11.020 Alternative Energy Systems

Alternative Energy Systems are accessory uses that generate power for no less than 80% on-site consumption. Systems that generate power beyond this threshold for sale, or for off-site consumption, may be permitted through use permit.

A. Solar Thermal and Solar Photovoltaic.

Solar thermal and solar photovoltaic systems are permitted in accordance with the California Solar Rights Act, through the issuance of a ministerial building permit.

The systems must comply with all structural, plumbing and electrical requirements of the current version of the California Building Code.

Ground-mounted systems are considered structures for the purposes of determining setbacks and lot coverage.

B. Wind Energy Systems

Wind systems are permitted in Mono County pursuant to Chapter 20.05 of the Mono County Code pertaining to Small Wind Energy Systems.

DEVELOPMENT STANDARDS

CHAPTER 15 – RESOURCE EXTRACTION DESIGNATION

Sections:

15.010	Purpose and Intent.
15.020	Applicability.
15.030	Criteria for Applying the "RE" Designation.
15.040	Use Permit Requirements.
15.050	Phasing Requirements.
15.060	Amendments.
15.070	Development Standards.
15.080	Reclamation Requirements.
15.090	Financial Assurances.
15.100	Inspections.
15.110	Administration.
15.120	Enforcement.

15.010 Purpose and Intent.

The intent of the Resource Extraction (RE) Designation is to evaluate and, if appropriate, permit resource extraction projects in a manner that is consistent with the provisions of this General Plan, applicable area plans, and applicable state and federal laws, such as the Surface Mining and Reclamation Act of 1975 (SMARA). The Resource Extraction (RE) Designation has been established to protect the environment and allow for the conditional development of on-site resources, including but not limited to, mineral resources, geothermal resources, wind and solar energy resources, hydropower resources, and timber resources.

15.020 Applicability.

The Resource Extraction (RE) Designation may be applied only to areas with existing or proposed resource development activities. The establishment of Resource Extraction (RE) designations is also intended to encourage and facilitate public awareness concerning the potential for resource and energy-related extraction activities in areas where significant resource deposits or energy-related resources have been identified.

In compliance with General Plan policies, mining operations, geothermal operations, small-scale hydroelectric generation facilities, wind and solar energy generation facilities and similar resource extraction activities may be permitted only in areas designated Resource Management and designated Resource Extraction. Within those areas, all resource development projects shall comply with the provisions of this chapter.

15.030 Criteria for Applying the "RE" Designation.

In applying the "RE" designation to a specific site, one or more of the following criteria must be demonstrated to the satisfaction of the County:

- A. An active resource development project currently exists on the subject lands.
- B. The project qualifies under the "vesting" provisions as specified in the California Surface Mining and Reclamation Act (SMARA).
- C. It has been reasonably determined to the satisfaction of the County that potentially significant resources exist on the lands under consideration. This determination may be based on reports filed by a registered professional acceptable to the county, and funded by the applicant, or in the case of surface mining operations, on mineral land classification reports filed in conjunction with SMARA.
- D. In areas with conflicting resource values, it has been reasonably determined to the satisfaction of the County that the proposed resource development activity, and therefore the proposed "RE" designation, is the highest and best use of the land, and is in full compliance with the General Plan.

15.040 Use Permit Requirements.

- A. Filing:
 - 1. Submittal: An application for a use permit shall be accompanied by the appropriate filing fee and shall be submitted to the Planning Division or Economic Development Department on forms provided by the applicable department. Applications must be complete
 - 2. Acceptance: An application for a use permit shall not be deemed complete or accepted for filing and the processing time limits shall not begin to run until the Planning Division or Economic Development Department accepts the application as complete.
- B. Procedure:
 - 1. Use Permit Processing: Within 30 days after receipt of a resource use permit application, the Planning Division shall review the application and shall notify the applicant or his designated representative, in writing, concerning any application deficiencies.
 - a. Applications shall be deemed complete unless the applicant or his designated representative has been notified in writing that the application is incomplete prior to the expiration of the 30-day review period. Acceptance of the application as complete shall not constitute an indication of project approval.
 - b. Complete applications shall be processed in accordance with the provisions of Chapter 19.38, Use Permits, and for surface mining operations, with the applicable provisions of SMARA.
 - 2. Non-Use of Permit: In conformance to Chapter 19.38, Use Permits, failure to commence diligent resource development activities within one year subsequent to permit issuance, or within the period determined by the

Planning Commission, shall render the use permit null and void. Documentation that the operator has made every attempt to secure required permits at the state or federal level but that, despite due diligence, the permits have not yet been issued may serve to stay this requirement.

C. Environmental Compliance:

Permits shall be processed in accordance with CEQA, the Mono County Environmental Handbook and General Plan policies. Common environmental documentation may be used for the exploratory and development permit stages of a project when consistent with CEQA.

Permits shall contain conditions which assure compliance with CEQA and with applicable laws and regulations of Mono County and other agencies with jurisdiction.

D. Monitoring:

In accordance with General Plan policies and CEQA requirements, when applicable, permits shall contain conditions for ongoing monitoring of operations. The Conservation/Open Space Element contains monitoring requirements for geothermal development, mineral resource development, and timber development.

15.050 Project Development–Phasing Requirements.

In compliance with General Plan policies, geothermal projects shall be developed in a phased manner. In addition to the phasing requirements listed below, energy resource extraction projects shall comply with all phasing requirements in this General Plan (Conservation/Open Space Element, Energy Resource Policies).

A. Phasing of Geothermal Projects.

Geothermal development shall be subject to the following phased permitting process:

1. The "Geothermal Exploration Permit" shall regulate geothermal exploration and reservoir characterization activities. The primary purpose of the exploratory phase is to determine hydrologic, geologic and other relevant characteristics of the geothermal resource being considered for development. During the exploratory phase, the permittee shall develop sufficient data, to the satisfaction of the County, to determine whether there is a geothermal resource adequate to sustain the proposed development project.
2. The "Geothermal Development Permit" shall regulate geothermal development, operations, termination of operations, site reclamation, and reserve monitoring. The purpose of the development phase is to regulate all geothermal development, including the siting and construction of facilities, conditions of operation, maintenance of roads and equipment, and to assure the protection of the environment.

B. Phasing of Other Resource Development Activities.

Other resource development activities may be subject to a phased permitting process, depending on the nature of the resource and its development.

15.060 Amendments.

- A. Minor Amendments to an Approved Resource Development Permit.
 - 1. Minor amendment: Minor changes to an approved resource development permit may be approved by the Planning Division Director or Economic Development director in accordance with the following provisions.
 - 2. Processing: Requests for approval of a minor amendment shall be submitted on forms provided by the Planning Division or Economic Development Department, along with the applicable fees. Within 30 days of receipt of such a request, the appropriate Director shall determine whether or not the application should be considered a minor amendment. The Director shall approve or deny the request and notify the applicant in writing within 10 days of his decision. The decision of the Director as to whether or not the request should be approved or denied shall be final, unless an appeal is filed. If it is determined that the request is not a minor amendment, the request may be processed as a major amendment.
 - 3. Requests for a minor amendment may be approved only if the Director is able to make all of the following findings:
 - a. That the proposed change involves only minor changes in the siting or operations of the project and will not affect the basic character or implementation of the permit.
 - b. No substantial adverse environmental damage, either on-site or off-site, will result from the proposed change and the proposed change is consistent with adopted environmental determinations.
 - c. That the proposed change will not be detrimental to the public health, safety and welfare and is compatible with the objectives and policies of this General Plan and applicable specific plans.
- B. Major Amendments to an Approved Resource Development Use Permit.
 - 1. Major amendment: Major amendments to approved resource development use permits may be approved by the Planning Commission subject to the following provisions.
 - 2. Processing: Applications for proposed amendments shall be submitted on forms provided by the Planning Division or Economic Development Department and shall include such data as may be required to complete an environmental assessment. Applications shall include the required filing fee, and shall be noticed and scheduled for public hearing before the Planning Commission in the same manner as the original permit submittal.
 - 3. Amendments may be approved by the Planning Commission only if all of the following findings can be made:

- a. The proposed amendments are necessary or desirable to assure a more practical recovery of the resource or to avoid multiple future disturbances of surface land or waters.
- b. No substantial adverse environmental damage, either on-site or off-site, will result from the proposed change and that the proposed change is consistent with adopted environmental determinations.
- c. The security required to be filed by the applicant with the County is adequate or additional security has been filed to guarantee compliance with the revised permit.
- d. The permit, as amended, will continue to meet the requirements of this chapter and will be conducted in conformity with all applicable laws, ordinances, and regulations of all agencies with jurisdiction over the resource development project.
- e. The approval of the amendment will not be detrimental to the public health, safety, or welfare and is compatible with the objectives and policies of this General Plan, and applicable specific plans, the land use designation and approved end use of the site.

15.070 Development Standards.

The following minimum development standards shall apply to all projects in the Resource Extraction Designation unless amended through the "Specific Plan" process. Other standards or conditions identified during the use permit process may also apply.

- A. Lot Size and District Area.
The minimum lot size and district area shall be 40 acres or a quarter, quarter section, with the exception of patent and/or historical mining claims and "vested operations" which shall be considered on a case by case basis. Minimum lot size and district area may be reduced in conformance to the "Development Plan" or "Specific Plan" process.
- B. Setbacks.
 1. No processing equipment or facilities shall be located and no resource development shall occur within the following minimum horizontal setbacks:
 - a. One hundred (100) feet from any interior public street or highway unless the Public Works Director determines that a lesser distance would be acceptable.
 - b. One hundred (100) feet from any exterior property line.
 - c. Five hundred (500) feet from any adjacent private dwelling, institution, school, or other building or location used for public assemblage.
 - d. No geothermal development located within the Hot Creek Buffer Zone shall occur within 500 feet on either side of a surface watercourse (as

indicated by a solid or broken blue line on U.S. Geological Survey 7.5- or 15-minute series topographic maps).

2. No residential uses shall be located with the following minimum horizontal setbacks:
 - a. Fifty (50) feet from any interior public street or highway unless the Public Works Director determines that a lesser distance would be acceptable.
 - b. Fifty (50) feet from any exterior property line.

C. Visual Impacts.

1. Siting.

All resource development projects shall be sited, designed and operated to minimize impacts to the surrounding visual environment, in conformance to applicable provisions of this General Plan and the Mono County Code. The Conservation/Open Element contains policies relating to the siting of various types of energy resource projects.

2. Screening.

Screening shall be required for uses which are contiguous to any residential or commercial district or use, for uses in scenic highway corridors or important visual areas, and for uses with an identified significant visual impact. Screening may be achieved through the use of siting, landscaping, fencing, contour grading, constructed berms and/or other appropriate measures. If landscaping is chosen as a method of screening, a landscape plan shall be submitted as part of the use permit application (see 15.59, Landscape Plan Requirements).

3. Lighting.

Exterior lighting shall be shielded and indirect and shall be minimized to that necessary for security and safety.

4. Materials and Colors.

Materials for structures, fences, etc. should harmonize with the natural surroundings, whenever possible. Materials should be non-reflective or should be painted with a matte finish. Colors for structures, fences, etc. should blend into the natural surroundings.

D. Erosion and Sediment Control.

1. Siting.

All resource development projects shall be sited, designed and operated to minimize erosion and sediment transport, in conformance to applicable provisions of this General Plan, the Mono County Code, and applicable state and federal regulations. The Conservation/Open Element, Energy Resource section, contains policies relating to the siting of various types of energy resource projects.

Siting should minimize impacts to the natural landscape. Project design should encourage the joint use of facilities whenever possible in order to

minimize disturbance to the natural environment. Access and construction roads should be located so that natural features are preserved and erosion is minimized.

2. Site Disturbance.

Earthwork, grading, and vegetative removal shall be minimized. Existing access roads shall be utilized whenever possible. Construction of new access roads, frontage roads, or driveways shall be avoided except where essential for health and safety. Earthwork and grading shall be performed in accordance with the county's Grading Ordinance.

3. Revegetation.

Site disturbances shall be revegetated in conformance to the Reclamation Plan developed pursuant to the county's Reclamation Ordinance.

4. Drainage.

Drainage facilities shall be constructed and maintained in accordance with the county's Grading Ordinance and with any applicable requirements of the Lahontan Regional Water Quality Control Board pertaining to waste discharge.

E. Cultural Resources.

The applicant shall stop work and notify appropriate agencies and officials if archaeological evidence is encountered during construction or operations. No disturbance of an archaeological site shall be permitted until such time as the applicant hires a qualified consultant and an appropriate report is filed with the county Planning Division which identifies acceptable site mitigation measures, which shall then become conditions of the use permit and the reclamation plan (if applicable).

F. Noise.

All resource development projects shall be sited, designed and operated to minimize noise impacts to the surrounding environment, in conformance to applicable provisions of this General Plan (Noise Element) and the Mono County Code (Noise Ordinance).

G. Air Quality.

All resource development projects shall be designed and operated in compliance with all requirements of the Great Basin Unified Air Pollution Control District and applicable provisions of this General Plan.

H. Safety, including Hazardous Materials and Hazardous Waste.

All projects shall comply with applicable safety standards. Hazardous waste shall be maintained in conformance to the Mono County General Plan (Hazardous Waste Management Element) and the Mono County Integrated Waste Management Plan.

15.080 Reclamation Requirements.

Standards and procedures for the reclamation of resource development activities in Mono County are contained in the county's Reclamation Ordinance (Ch. 35 of the land

development regulations). All resource development projects must comply with the Reclamation Ordinance. Reclamation plans must be submitted as part of the use permit application.

15.090 Financial Assurances.

Financial assurance requirements for the reclamation of resource development activities in Mono County are contained in the county's Reclamation Ordinance (Ch. 35 of the land development regulations). All resource development projects must comply with the financial assurance requirement.

15.100 Inspections.

A. Requirements.

The use permit shall establish an inspection schedule for compliance with use permit conditions. Inspections shall occur at least once a year, but may occur more often depending on the nature of the project. The inspection schedule may change over the lifetime of the project. The annual inspection for mining operations shall coincide with the annual inspection required by SMARA.

The county's Reclamation Ordinance establishes an inspection schedule for reclamation plans. The required inspections for compliance with use permit conditions and reclamation plan requirements should coincide.

B. Procedure:

The operator shall file a request for annual inspection with the county Compliance Officer at least once in each calendar year. Requests for annual inspections shall be accompanied by the appropriate filing fee.

The Compliance Officer shall inspect or cause to be inspected the site within 30 working days of receipt of the application for inspection and the filing fee. Unless otherwise agreed, failure to inspect within 30 working days shall be deemed a finding that the resource development operation is in compliance with its use permit.

15.110 Administration.

A. Appeals:

Appeals of any decision resulting from the requirements of this chapter may be made in conformance to the provisions of Chapter 19.42, Appeals.

B. Fees:

Fees required in conjunction with the provisions of this chapter shall be established from time to time by the Board of Supervisors.

15.120 Enforcement.

A. Enforcement:

The provisions of this chapter shall be enforced by the Economic Development Department, the Planning Division, and/or the county Compliance Officer or such other persons as may be designated by the Board of Supervisors. Enforcement of the provisions contained in this chapter shall be in accordance with applicable provisions of the Mono County Code.

B. Right of Entry:

Whenever it becomes necessary to inspect resource development activities as provided in this chapter or to investigate complaints associated with resource development activities or to monitor conditions of approval as may be imposed on resource development activities, reasonable access to the project site shall be afforded by the operator in conformance to Chapter 1.08 of the Mono County Code. Authorized representatives of the County, upon presentation of appropriate credentials, shall have access to the site without advance notice.

DEVELOPMENT STANDARDS**CHAPTER 16 – ACCESSORY DWELLING UNITS****Sections:**

16.010	Intent.
16.020	Definition.
16.030	Applicable Land Use Designations.
16.040	General Provisions.
16.050	Standards for Accessory Dwelling Units.

16.010 Intent.

The intent of this chapter is to allow for Accessory Dwelling Units in accordance with state law in order to provide additional affordable housing opportunities, including housing for the elderly in Mono County.

16.020 Definition.

"Accessory Dwelling Unit" (also referred to as "dependent," "Secondary Housing," or "granny unit") means residential occupancy of a living unit located on the same parcel as the primary residential unit. It provides complete, independent living facilities for one or more persons including permanent provisions for living, sleeping, eating, cooking, and sanitation on the same parcel as the primary unit is situated. An Accessory Dwelling Unit shall meet the minimum regulations for an efficiency dwelling unit in the California Building Code.

The Accessory Dwelling Unit can be either attached to or detached from the primary residential unit but in either case shall have similar architectural elements as the primary unit (i.e., materials, textures, colors, etc.; see 16.050 G below). The Accessory Dwelling Unit shall be clearly subordinate to the primary unit.

Utilities that are installed for future expansion, such as stub outs that would allow a kitchen to be installed at a later date shall be considered as complete cooking facilities in accessory dwelling units. In units required by deed restriction, complete cooking facilities shall be installed resulting in a usable kitchen at final permit issuance and interior access between attached units shall be no more than a single personnel door.

16.030 Applicable Land Use Designations.

An Accessory Dwelling Unit may be permitted in any land use designations that allows single-family residences as a permitted use or as allowed in Specific Plan (SP) areas subject to the General Provisions below.

16.040 General Provisions.

- A. On parcels less than 7,500 sq. ft. in net area, an attached Accessory Dwelling Unit not exceeding 500 sq. ft. in size may be permitted by application for a Director Review.
- B. On parcels of 7,500 sq. ft. up to 10,000 sq. ft. in net area, an attached Accessory Dwelling Unit not exceeding 640 sq. ft. in size is allowed with a building permit. A detached Accessory Dwelling Unit not exceeding 640 sq. ft. may be permitted by application for a Director Review.
- C. On parcels of 10,000 sq. ft. up to one acre in net area, an Accessory Dwelling Unit not exceeding 640 sq. ft. in size (attached or detached) is allowed with a building permit.
- D. On parcels one acre or greater, an Accessory Dwelling Unit not exceeding 640 sq. ft. in size (attached or detached) is allowed with a building permit. In this same parcel size range, an Accessory Dwelling Unit exceeding 640 sq. ft. but not exceeding 1,400 sq. ft. in size (attached or detached) may be permitted by application for a Director Review. In this same parcel size range, an Accessory Dwelling Unit exceeding 1,400 sq. ft. may be permitted by application for a Use Permit.
- E. Square footage of Accessory Dwelling Units shall be calculated based on the exterior dimensions of the unit. All interior living space, shall count toward the total square footage of the unit.

16.050 Standards for New Accessory Dwelling Units.

- A. All construction shall conform to the height, setback, lot coverage, fees (including school impact fees and fire district fees), snow storage, and other development requirements applicable to residential construction in the land use designation in which the property is located.
- B. If a well and/or septic system is/are to be utilized, a clearance letter shall be obtained from the county health officer and shall accompany the building permit application (or if applicable, the Director Review or Use Permit application). For Accessory Dwelling Units that are served by a public water and/or sewer system, a letter from the serving entity that indicates adequate service shall be submitted as part of the application.
- C. One of the units on the parcel (either the primary unit or the Accessory Dwelling Unit) must be owner occupied.
- D. If the Accessory Dwelling Unit is 640 sq. ft. or less in size, one off-street parking space must be provided for the Accessory Dwelling Unit in addition to parking required for the primary unit. If the Accessory Dwelling Unit is larger than 640 square feet, two parking spaces must be provided for the Accessory Dwelling Unit in addition to parking required for the primary unit. Parking shall be in accordance with Chapter 06 of the Mono County Land Use Element except that June Lake provisions of three parking spaces per unit shall apply only to the primary unit and not the Accessory Dwelling Unit.

- E. Whether attached or detached, the Accessory Dwelling Unit shall be architecturally compatible with the primary residence. The Community Development Department shall determine the architectural compatibility of the structures and shall consider roofing, siding, trim, door and window frame colors; roofing, siding, trim, door, and window materials; roof slope and pitch; and wall articulation, roof line articulation, eaves, railings, chimneys, porches, and similar features; landscaping should also be considered in helping to make the units compatible. In addition, the Accessory Dwelling Unit shall be clearly subordinate to the primary unit in terms of size and placement on the property. If attached, the two units shall have the appearance of a single-family residence; the Accessory Dwelling Unit entrance shall be located on the side or rear of the building.

DEVELOPMENT STANDARDS

CHAPTER 17 – MOBILE-HOME AND RECREATIONAL-VEHICLE PARKS

Sections:

17.010	Requirements generally.
17.020	Lot area and lot width.
17.030	Density.
17.040	Existing mobile-home parks and recreational-vehicle parks.
17.050	Streets.
17.060	Garbage collection area.
17.070	Fences, landscaping and screening.
17.080	Access.
17.090	Yards.
17.100	Signs.

17.010 Requirements generally.

The standards contained in this chapter shall apply to the development of all mobile home parks and recreational-vehicle parks in all designations. Refer to definitions 02.790 and 02.970 for the definition of mobile home and recreational vehicle.

17.020 Lot area and lot width.

- A. The minimum lot area in all designations shall be as follows but may be more restrictive in any applicable area general plan:
- Mobile-home parks, five acres;
 - Recreational-vehicle parks, two acres.

- B. The minimum lot width in all designations shall be:
 - Mobile-home parks, 250 feet;
 - Recreational-vehicle parks, 100 feet.

17.030 Density.

The maximum density permitted in all districts shall be as follows, but may be more restrictive in any area general plan:

- A. Mobile-home parks, not more than 10 mobile-home spaces for each one acre of land area;
- B. Recreational-vehicle parks, not more than seventeen (17) recreational-vehicle spaces for each one acre of land.

17.040 Existing mobile-home parks and recreational-vehicle parks.

The following standards shall apply to all existing mobile-home parks and recreational-vehicle parks which were legally established prior to adoption of the land use designations and land development regulations.

- A. Lot Area and Width.
 - 1. Any existing mobile-home park or recreational-vehicle park legally established prior to adoption of the land development regulations and which has a lot area or lot dimensions of less than prescribed by the designation in which it is situated is deemed a nonconforming lot and shall be permitted to continue the mobile-home park use. A mobile-home park on a nonconforming lot may, upon securing a use permit, expand to utilize the entire nonconforming parcel.
- B. Mixed Uses - Nonconforming lots.
 - 1. Subject to securing a use permit, a portion of a mobile-home park may be designated for use by recreational-vehicle spaces.
 - 2. Subject to securing a use permit, a portion of a recreational-vehicle park may be converted for use by mobile-home spaces subject to the following criteria:
 - a. Any percent of the lot area may be converted to mobile-home uses; however, mobile-home areas shall be distinct from areas designated for recreational vehicles (i.e., separated by a road, fence or landscaped buffer).
 - b. When converting recreational-vehicle spaces for mobile-home occupation, the converted space shall comply with all minimum yard requirements in section 17.090.
 - c. All mobile-home spaces so created shall meet all state and county requirements for mobile-home installation.

17.050 Streets.

The following street-width standards shall apply to all internal streets for new parks or additions to existing parks. In those portions of the county which lie at an elevation of seven thousand (7,000) feet and above, internal streets shall be widened an additional five feet over allowable minimums to facilitate snow removal.

A. Recreational-Vehicle Parks.

1. One Way: 15 feet. One-way streets shall be permitted only when individual recreational-vehicle sites are designed so that the vehicle can pull out (not back out) into the correct one-way direction.
2. Two Way: 25 feet.
3. Parking: Parking along internal roadways is allowed only when a paved or graveled parking lane eight feet wide is provided in addition to the roadway.

B. Mobile-Home Parks.

1. Two Way: 25 feet.
2. Parking on one side of the street: 33 feet.
3. Parking on both sides of the street: 41 feet.

17.060 Garbage collection area.

All trash and garbage collection areas shall be surrounded on at least three sides by a solid fence not less than five feet in height.

17.070 Fences, landscaping and screening.

Upon a finding by the Planning Commission during the use permit process that a mobile-home park or recreational-vehicle park will have a detrimental impact upon surrounding properties, the Commission may determine that a solid fence of not less than six feet in height shall be placed and maintained on all side and rear property lines to mitigate the impact upon adjoining properties. Alternately, a combination of landscaping, screening or fencing may also be deemed appropriate.

17.080 Access.

All mobile home- and recreational-vehicle park spaces shall be served by internal streets within the development. There shall be no direct access from a mobile home- or recreational-vehicle space to a public street or road. All points of vehicular access to or from a public street or road shall be approved by the Department of Public Works.

17.090 Yards.

- A. Yards from property boundaries.
 1. Front yard. A minimum 20-foot front yard.
 2. Rear yard. A minimum 10-foot rear yard.
 3. Side yard. A minimum 5-foot side yard.
- B. Yards from individual space boundaries.
 1. No mobile home shall have a front yard setback of less than 10 feet from an interior street.

2. No mobile home shall have a side yard of less than 5 feet along the entire length of the unit, and not less than 3 feet from any convenience structure or awning.
3. No mobile home shall have a rear yard of less than 10 feet.

17.100 Signs.

- A. Not more than one sign shall be permitted at each entrance to a mobile-home park or recreational-vehicle park.
- B. The signs shall not exceed 32 sq. ft. in area, and shall not exceed six feet in height.
- C. Signs shall not be blinking, flashing, rotating or animated. Lights used to illuminate on the sign and to minimize glare on any public street or adjacent property.
- D. Each sign shall be placed adjacent to, but not closer than 10 feet to, the entrance from any public street or road serving the mobile-home park or recreational-vehicle park.

DEVELOPMENT STANDARDS

CHAPTER 18 – MANUFACTURED HOUSING SUBDIVISION

Sections:

18.010	Purpose and intent.
18.020	Designations in which permitted.
18.030	Density.
18.040	Lot area/District area & width.
18.050	Special requirements.
18.060	Lot dimensions.
18.070	Yards.
18.080	Lot coverage.
18.090	Fences, screening and landscaping.
18.100	Access.
18.110	Accessory uses and structures permitted.
18.120	Undergrounding.
18.130	Subdivision of existing mobile-home parks, additional requirements.

18.010 Purpose and intent.

Since, historically, manufactured housing tends to be less expensive than conventional housing, it is the purpose and intent of this chapter to facilitate lower-cost housing opportunities by providing affordable-housing sites to be utilized exclusively for manufactured housing purposes.

18.020 Designations in which permitted.

Manufactured housing subdivisions may be allowed, subject to a Use Permit, and Tract Map application in the following land use designations: MFR-H, ER and RR.

18.030 Density.

The maximum density permitted in all designations shall not be more than eight manufactured housing lots designed for a single home for each one acre of land. The provisions of Chapter 4.3 of the California Government Code, Sections 65915 et seq., are included in this maximum density. The Government Code allows a density bonus of 25% (i.e., an additional two units per acre) when at least 25% of the total units of a housing development are constructed for low- or moderate-income households as defined by Section 50093 of the Health and Safety Code.

18.040 Lot area/District area and width.

The minimum lot area for each manufactured home shall be 4,000 sq. ft.

The minimum area requirements for a manufactured-housing subdivision shall not be less than five acres; minimum lot width for the subdivision shall not be less than 250 feet.

18.050 Special requirements.

All applications for a building permit within a manufactured-housing subdivision shall also be accompanied by:

- A. A plot plan showing the proposed access, parking, setback from property lines and location of the unit on the parcel;
- B. Evidence that the manufactured home bears a seal of the U.S. Department of Housing and Urban Development, or the California Department of Housing and Community Development certifying that their manufactured housing construction standards have been met;
- C. Elevations showing roof slopes, roof materials and exterior siding materials;
- D. The wind, seismic and snow loading design;
- E. Responsible entity. As a condition to approval of a manufactured housing subdivision pursuant to this chapter, the subdivider shall establish a legal entity, such as a homeowners association, which shall have the responsibility and duty to maintain all common areas, including streets, snow removal, greenbelts, landscaping and common facilities such as lights and private water and sewer systems, as set forth in the applicable declaration of covenants, conditions and restrictions.
- F. Open area. Recreation or open space shall be provided for each manufactured housing subdivision, the area of which shall be not less than 1,000 sq. ft. plus an additional 150 sq. ft. for each manufactured housing lot over eight. This open space may be in more than one location, but no location shall contain less than 1,000 sq. ft. Each recreational or open space shall be accessible to all of the manufactured housing lots in the facility and shall not be used for any other purpose.

18.060 Lot dimensions.

The minimum lot dimensions for each manufactured home shall be as follows:

- A. Width, 50 feet; and
- B. Depth, 80 feet.

18.070 Yards.

- A. Front yards. Each manufactured housing lot shall have a front yard setback of not less than 10 feet extending the entire width of the manufactured housing lot. A front yard will be measured from the nearest element of the manufactured housing unit, or any accessory structure, to the closest edge of the interior access drive.
- B. Side yards. Each manufactured housing lot shall have a side yard of not less than 5 feet in width along the entire length of the manufactured housing unit, and not less than 3 feet in width from the property line to any convenience structure or awning.

- C. Corner lots. The side yard abutting the street shall be not less than 10 feet along the entire length of the manufactured housing unit, and not less than 5 feet from the property line to any convenience structure or awning.
- D. Rear yards. Each manufactured housing lot shall have a rear yard of not less than 10 feet and shall extend across the entire width of the manufactured housing lot.
- E. No manufactured housing unit shall be located closer than 20 feet from any property line that is a public street.

18.080 Lot Coverage.

Not more than 75% of the area of a manufactured housing lot shall be covered by the manufactured housing unit, accessory structures, paved drives and parking.

18.090 Fences, screening and landscaping.

A solid fence of not less than 6 feet in height may be required on all exterior subdivision boundaries. Fences are permitted, but not required for manufactured housing lots, and shall not exceed 6 feet in height. Where a fence is located in any required front yard, it shall not exceed 4 feet. Alternately, a combination of landscaping, screening, or fencing may also be deemed appropriate.

18.100 Access.

All manufactured housing lots and recreation facilities shall have access only from a private interior drive. There shall be no direct access from a manufactured housing lot to a public street or road. Private internal drives within a manufactured housing subdivision shall not be less than 25 feet in width or 30 feet over 7,000 feet in elevation and shall be paved, improved and maintained according to improvement standards adopted by the County.

18.110 Accessory uses and structures permitted.

The following accessory uses and structures may be permitted in manufactured housing subdivisions, provided that they conform to setback requirements and maximum lot coverage requirements:

- A. Convenience Structures. Awnings; portable, demountable, or permanent cabanas; storage cabinets and buildings; ramadas; windbreaks; carports; garages; porches; greenhouses; bathhouses and other accessory structures;
- B. Recreational Facilities. Parks, playgrounds, riding and hiking trails, golf courses, lakes, stables and riding rings, recreational buildings, clubhouses, community centers, and similar uses and facilities, provided that all such uses and facilities are designed for and limited to use by residents of the manufactured housing subdivision and their guests, and if otherwise permitted by county code.

18.120 Underground installation.

All sewer and water facilities and electric, gas, telephone, and TV cable distribution systems shall be placed underground.

18.130 Subdivision of existing manufactured home parks, additional requirements.

A manufactured home park may be subdivided in accordance with applicable provisions of the Mono County Code relating to subdivisions and shall also comply with the provisions contained in this chapter, as well as in the provisions of Chapter 17 of the Mono County Code (Subdivision).

DEVELOPMENT STANDARDS

CHAPTER 19 – ADULT-ORIENTED BUSINESSES

Sections:

19.010	Findings.
19.020	Legislative purpose.
19.030	Definitions.
19.040	Minimum proximity requirements.
19.050	Permit required.
19.060	Severability.

19.010 Findings.

A. The Board of Supervisors, in adopting this chapter, takes legislative notice of the existence and content of the following studies concerning the adverse secondary effects of Adult-Oriented Businesses in other cities: Garden Grove, California (1991); Tucson, Arizona (1990); Seattle, Washington (1989); Austin, Texas (1986); Oklahoma City, Oklahoma (1986); Indianapolis, Indiana (1984); Houston, Texas (1983); Beaumont, Texas (1982); Minneapolis, Minnesota (1980); Phoenix, Arizona (1979); Whittier, California (1978); Amarillo, Texas (1977); Cleveland, Ohio (1977); Los Angeles, California (1977). The Board of Supervisors finds that these studies are relevant to the problems addressed by the County in enacting this chapter to regulate the adverse secondary effects of Adult-Oriented Businesses, and more specifically finds that these studies provide convincing evidence that:

- A. Adult-Oriented Businesses are linked to increases in the crime rates in those areas in which they are located and in surrounding areas.
 - 1. Both the proximity of Adult-Oriented Businesses to sensitive land uses and the concentration of Adult-Oriented Businesses tend to result in blight and deterioration of the areas in which they are located.
 - 2. The proximity and concentration of Adult-Oriented Businesses adjacent to residential, recreational, religious, community or educational uses can have adverse secondary effects on local businesses and residences.
 - 3. There is substantial evidence that an increase in crime tends to accompany, concentrate around, and be aggravated by Adult-Oriented Businesses, including but not limited to an increase in the crimes of narcotics distribution and use, prostitution, pandering, and violence against persons and property. The studies from other cities establish convincing evidence that Adult-Oriented Businesses which are not regulated as to permissible locations often have a deleterious effect on nearby businesses in residential areas, causing, among other adverse secondary effects, an increase in crime and a decrease in property values.

- B. Based on the foregoing, the Board of Supervisors of Mono County finds and determines that special regulation of Adult-Oriented Businesses is necessary to ensure that their adverse secondary side effects will not contribute to an increase in crime rates or to the blighting or deterioration of the areas in which they are located or surrounding areas. The need for such special regulations is based upon the recognition that Adult-Oriented Businesses have serious objectionable operational characteristics, when located in direct proximity to sensitive uses such as dwellings, parks, schools, churches, or public buildings thereby having a deleterious effect upon the adjacent areas. It is the purpose and intent of these special regulations to prevent such adverse secondary effects.
- C. Mono County is a rural county that is made up mostly (at least 94%) of public lands over which the County lacks land use authority. Very little private land exists within the county and, of that private land, only a small portion (less than 1%) is available for any type of commercial use. Based on the above, and on a thorough review of decisions of the United States Supreme Court, the United States Court of Appeals for the 9th Circuit and California Courts, the Board finds that the locational requirements established by this chapter do not unreasonably restrict the establishment or operation of constitutionally protected Adult-Oriented Businesses in Mono County, and a sufficient reasonable number of appropriate locations for Adult-Oriented Businesses are provided by this chapter.
- D. In developing this chapter, the Board of Supervisors has been mindful of legal principles relating to regulation of Adult-Oriented Businesses and does not intend to suppress or infringe upon any expressive activities protected by the First Amendments of the United States and California Constitutions, but instead desires to enact reasonable time, place, and manner regulations that address the adverse secondary effects of Adult-Oriented Businesses. The Board of Supervisors has considered decisions of the United States Supreme Court regarding local regulation of Adult-Oriented Businesses, including but not limited to: City of Erie v. Pap's A.M., 12 S.Ct. 1382 (2000); Young v. American Mini Theaters, Inc., 427 U.S. 50 (1976) (Reh. denied 429 U.S. 873); Renton v. Playtime Theaters, 475 U.S. 41 (1986) (Reh. denied 475 U.S. 1132); FW/PBS, Inc. v. Dallas, 493 U.S. 215 (1990); Barnes v. Glenn Theater, 501 U.S. 560 (1991); United States Court of Appeals 9th Circuit decisions, including but not limited to: Diamond v. City of Taft, 2000 WL 821287 (9th Cir. (Cal.)); Topanga Press, et al. v. City of Los Angeles, 989 F.2d 1524 (1993); Kev, Inc. v. Kitsap County, 793 F.2d 1053 (9th Cir. 1986); Colacurcio v. City of Kent, 163 F.3d 545 (9th Cir. 1998), pet. For cert. Filed (1999); several California cases including but not limited to: Tily B. v. City of Newport Beach, 69 Cal.App.4th 1 (1998); City of National City v. Wiener, 3 Cal.4th 832 (1993); People v. Superior Court (Lucero) 49 Cal.3d 14 (1989); and City of Vallejo v. Adult Books, et al., 167 Cal.App.3d 1169 (1985); and other federal cases including Lakeland Lounge v. City of Jacksonville (5th Cir. 1992) 973 F.2d 1255, Hang On, Inc. v. Arlington (5th Cir. 1995) 65 F.3d 1248, Mitchell v. Commission on Adult Entertainment (3rd Cir. 1993) 10 F.3d 123, International Eateries v. Broward County (11th Cir. 1991) 941 F.2d 1157, and Star Satellite v. City of Biloxi (5th Cir. 1986) 779 F.2d 1074.

- E. General plans, licensing and other police power regulations are legitimate, reasonable means of accountability to help protect the quality of life in Mono County and to help assure that all operators of Adult-Oriented Businesses comply with reasonable regulations and are located in places that minimize the adverse secondary effects which naturally accompany the operation of such businesses.
- F. The Board of Supervisors recognizes the possible harmful effects on children and minors exposed to the effects of such Adult-Oriented Businesses and the deterioration of respect for family values, and the need and desire of children and minors to stay away from and avoid such businesses, which causes children to be fearful and cautious when walking through or visiting the immediate neighborhood of such businesses; and the particular need to reduce such effects near schools, where large numbers of children spend much of their time; and the Board of Supervisors desires to minimize and control the adverse secondary side effects associated with the operation of Adult-Oriented Businesses and thereby protect the health, safety, and welfare of the citizens of Mono County; protect the citizens from increased crime; preserve the quality of life; preserve property values and the character of surrounding neighborhoods and businesses; deter the spread of urban blight and protect against the threat to health from the spread of communicable and sexually transmitted diseases.
- G. It is not the intent of the Board of Supervisors in enacting this chapter, or any provision thereof, to condone or legitimize the distribution of obscene material, and the County recognizes that state law prohibits the distribution of the obscene materials and expects and encourages law enforcement officials to enforce state obscenity statutes against such illegal activities in Mono County.
- H. Nothing in this chapter is intended to authorize, legalize, or permit the establishment, operation, or maintenance of any business, building, or use which violates any county ordinance or any statute of the State of California regarding public nuisances, unlawful or indecent exposure, sexual conduct, lewdness, obscene or harmful matter or the exhibition or public display thereof.
- I. While the Board of Supervisors desires to protect the rights conferred on Adult-Oriented Businesses by the United States Constitution, it does so in a manner that ensures the continued and orderly development of property within the county and diminishes, to the greatest extent feasible, those undesirable secondary effects which the aforementioned studies have shown to be associated with the development and operation of Adult-Oriented Businesses.

19.020 Legislative purpose.

It is the intent of the chapter to prevent community-wide adverse economic impacts, increased crime, decreased property values, and the deterioration of neighborhoods which can be brought about by the location of Adult-Oriented Businesses in close proximity to incompatible uses such as schools for minors, churches, parks, public buildings and residentially-designated districts or uses. It is the purpose of this chapter to establish reasonable and uniform regulations to prevent the location of Adult-Oriented Businesses in close proximity to incompatible uses, while permitting the location of Adult-Oriented Businesses in certain areas.

19.030 Definitions.

For the purpose of this chapter the words and phrases shall have the same meanings respectively ascribed to them by this section and by Chapter 02 of the Land Development Regulations set forth in Section VI of this General Plan Land Use Element:

“Adult-Oriented Businesses.” The term "Adult-Oriented Businesses" as used in this chapter means any one of the following:

- A. Adult Arcade. The term "adult arcade" as used in this chapter means an establishment where, for any form of consideration, one or more still or motion picture projectors, or similar machines, for viewing by five (5) or fewer persons each, are used to show films, computer generated images, motion pictures, video cassettes, slides or other photographic reproductions thirty (30) percent or more of the number of which are distinguished or characterized by an emphasis upon the depiction or description of specified sexual activities or specified anatomical areas.
- B. Adult Bookstore. The term "adult bookstore" as used in this chapter means an establishment that has thirty (30) percent or more of its stock in books, magazines, periodicals or other printed matter, or of photographs, films, motion pictures, video cassettes, slides, tapes, records or other form of visual or audio representations which are distinguished or characterized by an emphasis upon the depiction or description of specified sexual activities and/or specified anatomical areas.
- C. Adult Cabaret. The term "adult cabaret" as used in this chapter means a nightclub, bar, restaurant, or similar business establishment which: (1) regularly features live performances which are distinguished or characterized by an emphasis upon the display of specified anatomical areas or specified sexual activities; and/or (2) which regularly features persons who appear semi-nude; and/or (3) shows films, computer generated images, motion pictures, video cassettes, slides, or other photographic reproductions thirty (30) percent or more of the number of which are distinguished or characterized by an emphasis upon the depiction or description of specified sexual activities or specified anatomical areas.
- D. Adult Hotel/Motel. The term "adult hotel/motel" as used in this chapter means a hotel or motel or similar business establishment offering public accommodations for any form of consideration which, (1) provides patrons with closed-circuit television transmissions, films, computer generated images, motion pictures, video cassettes, slides, or other photographic reproductions thirty (30) percent or more of the number of which are distinguished or characterized by an emphasis upon the depiction or description of specified sexual activities or specified anatomical areas; and (2) rents, leases, or lets any room for less than a six (6)-hour period, or rents, leases, or lets any single room more than twice in a 24-hour period.
- E. Adult Motion Picture Theater. The term "adult motion picture theater" as used in this chapter is a business establishment where, for any form of consideration,

films, computer generated images, motion pictures, video cassettes, slides or similar photographic reproductions are shown, and thirty (30) percent or more of the number of which are distinguished or characterized by an emphasis upon the depiction or description of specified sexual activities or specified anatomical areas.

F. Adult Theater. The term "adult theater" as used in this chapter means a theater, concert hall, auditorium, or similar establishment which, for any form of consideration regularly features live performances that are distinguished or characterized by an emphasis on the display of specified anatomical areas or specified sexual activities.

G. Modeling Studio. The term "modeling studio" as used in this chapter means a business which provides, for pecuniary compensation, monetary or other consideration, hire or reward, figure models who, for the purposes of sexual stimulation of patrons, display "specified anatomical areas" to be observed, sketched, photographed, painted, sculpted or otherwise depicted by persons paying such consideration. "Modeling studio" does not include schools maintained pursuant to standards set by the state Board of Education. "Modeling studio" further does not include a studio or similar facility owned, operated, or maintained by an individual artist or group of artists, and which does not provide, permit, or make available "specified sexual activities."

“Adult-Oriented Business Operator” The term "Adult-Oriented Business Operator" as used in this chapter (hereinafter "operator") means a person who supervises, manages, inspects, directs, organizes, controls or in any other way is responsible for or in charge of the premises of an Adult-Oriented Business or the conduct or activities occurring on the premises thereof.

“Applicant” The term “applicant” as used in this chapter is a person who is required to file an application for a permit under this chapter, including an individual owner, managing partner, officer of a corporation, or any other operator, manager, employee, or agent of an Adult-Oriented Business.

“Church” The term "church" as used in this chapter is a structure used primarily for religious worship and related religious activities.

“Community Development Director” The term “Community Development Director” as used in this chapter shall mean the Community Development Director of Mono County or the authorized representatives thereof.

“Distinguished or Characterized by an Emphasis Upon” As used in this chapter, the term "distinguished or characterized by an emphasis upon" shall mean and refer to the dominant or essential theme of the object described by such phrase. For instance, when the phrase refers to films "which are distinguished or characterized by an emphasis upon" the depiction or description of specified sexual activities or specified anatomical areas, the films so described are those whose dominant or predominant character and theme are the depiction of the enumerated sexual activities or anatomical areas. See *Pringle v. City of Covina*, 115 Cal.App.3 151 (1981).

“Establishment of an Adult-Oriented Business” As used in this chapter, to establish an Adult-Oriented Business shall mean and include any of the following.

- A. The opening or commencement of any Adult-Oriented Business as a new business;
- B. The conversion of an existing business, whether or not an Adult-Oriented Business, to any Adult-Oriented Businesses defined herein;
- C. The addition of any of the Adult-Oriented Businesses defined herein to any other existing Adult-Oriented Business; or
- D. The relocation of any such Adult-Oriented Business.

“Figure Model” The term "figure model" as used in this chapter, means any person who, for pecuniary compensation, consideration, hire or reward, poses in a modeling studio to be observed, sketched, painted, drawn, sculptured, photographed or otherwise depicted.

“Health Officer” The term “Health Officer” as used in this chapter means the Mono county Health Officer or his or her duly authorized representative.

“Nudity or a State of Nudity” The term "nudity or a state of nudity" as used in this chapter means the showing of the human male or female genitals or pubic area with less than a fully opaque covering, the showing of the female breast with less than a fully opaque covering of any part of the nipple or areola.

“Operate an Adult-Oriented Business” As used in this chapter, "operate an Adult-Oriented Business" means the supervising, managing, inspecting, directing, organizing, controlling or in any way being responsible for or in charge of the conduct of activities of an Adult-Oriented Business or activities within an Adult-Oriented Business.

“Permittee” The term "permittee" as used in this chapter means the person to whom an Adult-Oriented Business Permit is issued.

“Person” The term “person” as used in this chapter means any individual, partnership, co-partnership, firm, association, joint stock company, corporation, or combination of the above in whatever form or character.

“Public Building” The term “public building” as used in this chapter is a building or structure owned or operated by a public entity (including, but not limited to Mono County) which is open to and frequented by members of the general public (e.g., a public library or community center).

“Regularly Features” The term "regularly features" with respect to an adult theater or adult cabaret means a regular and substantial course of conduct. The fact that live performances which are distinguished or characterized by an emphasis upon the display of specified anatomical areas or specified sexual activities occurs on two (2) or more occasions within a thirty (30)-day period; three (3) or more occasions within a sixty (60)-day period; or four (4) or more occasions within a one hundred and eighty

(180)-day period, shall to the extent permitted by law be deemed to be a regular and substantial course of conduct.

“School” The term "school" as used in this chapter is any institution of learning for minors, whether public or private, offering instruction in those courses of study required by the California Education Code and maintained pursuant to standards set by the state Board of Education or any child or day care facility. This definition includes a nursery school, kindergarten, elementary school, middle or junior high school, senior high school, or any special institution of education, but it does not include a vocational or professional institution of higher education, including a community or junior college, college, or university.

“Semi-Nude” The term “semi-nude” as used in this chapter means a state of dress in which clothing covers no more than the genitals, pubic region, buttocks, and nipple and areola of the female breast, as well as portions of the body covered by supporting straps or devices.

“Specified Anatomical Areas” As used in this chapter, the term "specified anatomical areas" shall mean and include any of the following: less than completely and opaquely covered human

- A. Genitals or pubic region;
- B. Buttocks; and
- C. Female breast below a point immediately above the top of the areola.

“Specified Sexual Activities” As used in this chapter, the term "specified sexual activities" shall mean and include any of the following, whether performed directly or indirectly through clothing or other covering:

- A. The fondling or other erotic touching of human genitals, pubic region, buttocks, anus, or female breast;
- B. Sex acts, actual or simulated, including intercourse, oral copulation, or sodomy;
- C. Masturbation, actual or simulated;
- D. Excretory functions as part of or in connection with any of the other activities described in subdivision (1) through (3) of this subsection.

19.040 Minimum proximity requirements.

Notwithstanding anything to the contrary contained in the Mono County Code or Mono County General Plan, no Adult-Oriented Business shall be established or located on property in the county other than property with the land use designation of Rural Resort (RU), Industrial Park (IP), or Industrial (I), as those designations are defined in the Land Use Element of the Mono County General Plan, or within specified distances of certain land uses as set forth below:

- A. No such business shall be established on or within 500 feet from any property with a residential land use designation (including Rural Residential (RR), Single-Family Residential (SFR), Multi-Family Residential (MFR), Estate Residential (ER) and Rural Mobile Home (RMH) or from a building or structure used as a dwelling, park, church, or public building.
- B. No Adult-Oriented Business shall be established within 3,000 feet from a school.
- C. The distances set forth above shall be measured as a radius from the Adult-Oriented Business to the property line of the residentially designated properties or park, or to the actual structure used as a dwelling, school, church, or public building.

19.050 Permit required.

In addition to complying with the location restrictions set forth above, all Adult-Oriented Businesses shall comply with the permit requirements and other operational standards contained in Chapter 5.45 of the Mono County Code.

19.060 Severability.

If any section, subsection, subdivision, paragraph, sentence, clause, or phrase in this chapter or any part thereof is for any reason held to be unconstitutional or invalid or ineffective by any court of competent jurisdiction, such decision shall not affect the validity or effectiveness of the remaining portions of this chapter or any part thereof. The Board of Supervisors hereby declares that it would have passed each section, subsection, subdivision, paragraph, sentence, clause, or phrase thereof irrespective of the fact that any one or more of those be declared unconstitutional, or invalid, or ineffective.

- 20.050 General Provisions for Cargo Container Installation.**
- 20.060 Prohibitions.**
- 20.070 Retroactivity, Exemptions.**

20.010 Intent.

The intent of this chapter is to provide for the orderly placement of cargo containers throughout the county, to protect the character and visual quality of neighborhoods and communities through appropriate aesthetic restrictions, and to address health and safety hazards through building permit requirements.

20.020 Definition.

- A. “Cargo Container” refers to a large metal box typically used for the shipment of containerized goods, which includes land or sea cargo containers, or any portable storage container designed and constructed as a standardized, reusable vessel intended to be loaded on a truck, trailer, or ship (e.g., Sea-Trains, Transportainers, Land-See Containers, PODS). Railroad cars and tractor or semi-trailers are not considered cargo containers.
- B. Cargo containers are generally considered accessory non-building structures, incidental to the main use of the property, and used for storage purposes.

20.030 Temporary Use.

- A. Cargo containers shall be permitted in all land use designations as a temporary use (180 days) in conjunction with an active building permit or grading permit. Container placement shall occur after the permit has been issued, and the container shall be removed upon the finalization or expiration of the permit, or within 180 days, whichever occurs first. Such temporary installations are subject to the below section 20.050; A. Visual Mitigation Requirements.
- B. Cargo containers shall be permitted in the AG land use designation as a temporary use (180 days) in conjunction with a bona fide agriculture operation. Such temporary installations are subject to below section 20.050; A. Visual Mitigation Requirements.

20.040 Permanent Installations.

- A. Permanent cargo container installations are permitted in all land use designations as follows:

1. On properties one acre or larger and in accordance with the requirements of section 20.050.
2. On properties smaller than one acre, subject to Director Review with Notice and in accordance with the requirements of section 20.050.

20.050 General Provisions for Permanent Cargo Container Installation.

- A. Visual Mitigation Requirements
 1. Containers shall be placed in a manner to minimize visibility from adjacent properties and roadways.
 2. Containers shall be painted a solid color that blends into the surrounding landscape, vegetation and/or structures.
 3. The total number of cargo container(s) on any one parcel shall be limited to the following: On properties less than one acre, only one container may be permitted. On properties one to five acres, two containers may be permitted.
 4. Exceptions to any of the above Visual Mitigations may be granted with a Director Review with Notice.
- B. Building Permit Requirements
 1. Cargo containers require a standard Building Permit from the Building Division.
 2. All cargo containers shall conform to existing height, setback, and lot coverage requirements of accessory structures in the applicable land use designation.
 3. The permit shall include a complete site plan with proposed paint color, and details of anchoring requirements pursuant to ASCE 07-05/Chapter 15 for "Non-Building Structures."
- C. Permanent installations shall comply with the Mono County Building Code Occupancy Classification of Group U and Type of Construction to be V-B for a utility structure.
- D. Cargo containers shall not store hazardous materials in exceedance of California Fire Code.
- E. Utilities including, but not limited to, water, sewer, electricity, gas and fuel oil are prohibited from being permanently supplied or installed within containers.

20.060 Prohibitions.

- A. Cargo containers are prohibited in delineated flood areas, and conditional development areas.
- B. No alterations to a cargo container shall be made that will change the structural integrity of the container, without approved design by a California licensed engineer or architect.

- C. Stacking of cargo containers is prohibited.

20.070. Retroactivity, Exemptions.

- A. Any cargo container with an active permit shall be exempt from the provisions of this ordinance.
- B. Any permanent cargo container installed prior to the enactment of this ordinance that is out of compliance with the above General Provisions may be required to alter the container's appearance, location or foundation in order to come into compliance with the provisions of this chapter.
- C. The requirements of the current edition of the California Building Code apply to all cargo containers. In the event of a conflict between this chapter and the California Building Code, the Building Code shall govern.
- D. This chapter is not intended to apply to cargo containers utilized as a building material within a duly permitted and engineered structure.

DEVELOPMENT STANDARDS

CHAPTER 21 – FLOOD PLAIN REGULATIONS

Sections:

21.010	Intent.
21.020	Statutory Authorization.
21.030	Findings of Fact.
21.040	Statement of Purpose.
21.050	Methods of Reducing Flood Losses.
21.060	Definitions.
21.070	Lands to Which This Chapter Applies.
21.080	Basis for Establishing the Areas of Special Flood Hazard.
21.090	Compliance.
21.100	Abrogation and Grater Restrictions.
21.110	Interpretation.
21.120	Warning and Disclaimer of Liability.
21.130	Establishment of Development Permit.
21.140	Designation of Floodplain Administrator.
21.150	Duties and Responsibilities of the Floodplain Administrator.
21.160	Standards of Construction.
21.170	Standards for Utilities.
21.180	Standards for Subdivisions.
21.190	Standards for Manufactured Homes.
21.200	Floodways.
21.210	Variance Procedures.

21.010 Intent.

The FP, flood plain combining district, is intended to establish special requirements and regulations to be applied to those areas of the county subject to inundation in order to prevent loss of life and property damage.

21.020 Statutory authorization.

The Legislature of the State of California has in Government Code Sections 65302, 65560 and 65800 conferred upon local government units authority to adopt regulations designed to promote the public health, safety, and general welfare of its citizenry.

21.030 Findings of fact.

- A. The flood hazard areas of Mono County are subject to periodic inundation which may result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base, all of which adversely affect the public health, safety and general welfare.

- B. These flood losses may be caused by the cumulative effect of obstructions in areas of special flood hazards which increase flood heights and velocities, and when inadequately anchored, damage uses in other areas. Uses that are inadequately flood proofed, elevated or otherwise protected from flood damage also contribute to the flood loss.

21.040 Statement of purpose.

It is the purpose of this chapter to promote the public health safety and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed:

- A. To protect human life and health;
- B. To minimize expenditure of public money for costly flood control projects;
- C. To minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public;
- D. To minimize prolonged business interruptions;
- E. To minimize damage to public facilities and utilities such as water and gas mains, electric, telephone and sewer lines, streets and bridges located in areas of special flood hazard;
- F. To help maintain a stable tax base by providing for the second use and development of areas of special flood hazard so as to minimize future flood blight areas;
- G. To ensure that potential buyers are notified that property is in an area of special flood hazard; and
- H. To ensure that those who occupy the areas of special flood hazard assume responsibility for their actions.

21.050 Methods of reducing flood losses.

In order to accomplish its purposes, this chapter includes methods and provisions for:

- A. Restricting or prohibiting uses which are dangerous to health, safety, and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;
- B. Requiring that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;
- C. Controlling the alteration of natural floodplains, stream channels, and natural protective barriers, which help accommodate or channel flood waters;
- D. Controlling, filling grading, dredging, and other development which may increase flood damage; and

- E. Preventing or regulating the construction of flood barriers which will unnaturally divert flood waters or which may increase flood hazards in other areas.

21.060 Definitions.

Unless specifically defined below, words or phrases used in this chapter shall be interpreted so as to give them the meaning they have in common usage and to give this chapter its most reasonable application.

"Appeal" means a request for a review of the Floodplain Administrator's interpretation of any provision of this ordinance or a request for a variance.

"Area of Special Flood Hazard" means the land in the floodplain within a community subject to a 1% or greater chance of flooding in any given year. (See "Special Flood Hazard Area.")

"Base Flood" means the flood having a 1% chance of being equaled or exceeded in any given year (also called the "100 year flood").

"Basement" means any area of the building having its floor subgrade (below ground level) on all sides.

"Breakaway Walls" are any type of walls, whether solid or lattice, and whether constructed of concrete, masonry, wood, metal, plastic or any other suitable building material which is not part of the structural support of the building and which is designed to breakaway under abnormally high tides or wave action without causing damage to the structural integrity of the building on which they are used or any building to which they might be carried by flood waters. A breakaway wall shall have a design safe loading resistance of not less than ten and not more than twenty pounds per square foot. Use of breakaway walls must be certified by a registered engineer or architect and shall meet the following conditions:

- A. Breakaway wall collapse shall result from a water load less than that which would occur during the base flood; and
- B. The elevated portion of the building shall not incur any structural damage due to the effects of winds and water loads acting simultaneously during the base (a 100-year event) flood.

"Development" means any man made change to improve or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations located within the area of special flood hazard.

"Flood" or "Flooding" means a general and temporary condition of partial or complete inundation of normally dry land areas from:

- A. The overflow of inland or tidal waters and/or
- B. The unusual and rapid accumulation or runoff of surface waters from any source.

- C. The collapse or subsidence of land along undermining caused by waves or currents of water exceeding anticipated cyclical levels or suddenly caused by an unusually high-water level in a natural body of water, accompanied by a severe storm, or by an unanticipated force of nature, such as flash flood or an abnormal tidal surge, or by some similarly unusual and unforeseeable event which results in flooding as defined in definition.

"Flood Boundary/Floodway Map" means the official map on which the Federal Emergency Management Agency or Federal Insurance Administration has delineated both the areas of flood hazard and the floodway.

"Flood Insurance Rate Map (FIRM)" means the official map on which the Federal Emergency Management Agency or Federal Insurance Administration has delineated both the area of special flood hazards and the risk premium zones applicable to the community.

"Flood Insurance Study" means the official report provided by the Federal Insurance Administration that includes flood profiles, the Flood Insurance Rate Map (FIRM), the Flood Boundary and Floodway Map, and the water surface elevation of the base flood.

"Floodplain or Flood-Prone Area" means any land area susceptible to being inundated by water from any source (see definition of "Flooding").

"Floodplain Management" means the operation of an overall program of corrective and preventive measures for reducing flood damage, including but not limited to emergency preparedness plans, flood control works and floodplain management regulations.

"Floodplain Management Regulations" means land development regulations, subdivision regulations, building codes, health regulations, special purpose ordinances (such as floodplain ordinance, grading ordinance and erosion control ordinances) and other applications of police power. The term describes such state or local regulations in any combination thereof, which provide standards for the purpose of flood damage prevention and reduction.

"Floodproofing" means any combination of structural and non-structural additions, changes or adjustments to structures which reduce or eliminate flood damage to real estate or improved real property, water and sanitary facilities, structures and their contents.

"Floodway" means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one foot. Also referred to as "Regulatory floodway."

"Functionally Dependent Use" means a use that cannot perform its intended purpose unless it is located or carried out in close proximity to water. The term includes only docking facilities, port facilities that are necessary for the loading and unloading of cargo or passengers, and ship building and ship repair facilities, but does not include long-term storage or related manufacturing facilities.

"Hazard Mitigation Plan" means a plan that incorporates a process, whereby the potential of future loss due to flooding can be minimized by planning and implementing alternatives to floodplain management community-wide.

"Highest Adjacent Grade" means the highest natural elevation of the ground surface prior to construction next to the proposed walls or a structure.

"Lowest Floor" means the lowest floor of the lowest enclosed area (including basement). An unfinished or flood resistant enclosure, usable solely for parking of vehicles, building access or storage in an area other than a basement area is not considered a building's lowest floor; provided, that such enclosure is not built so as to render the structure in violation of the applicable non-elevation design requirements of this chapter.

"Manufactured Home" means a structure, transportable in one or more sections, which is built on a permanent chassis and is designed for use with or without a permanent foundation when connected to the required utilities. For floodplain management purposes the term "manufactured home" also includes park trailers, travel trailers and other similar vehicles placed on a site for greater than 180 consecutive days.

"Manufactured-Home Park or Subdivision" means a parcel (or contiguous parcels) of land divided into two or more manufactured home lots for sale or rent.

"Mean Sea Level" means, for purposes of the national Flood Insurance Program, the National Geodetic Vertical Datum (NGVD) of 1929 or other datum, to which base flood elevations shown on a community's Flood Insurance Rate Map are referenced.

"New Construction" means, for floodplain management purposes, structures for which the "start of construction" commenced on or after the effective date of floodplain management regulation adopted by the County of Mono.

"One Hundred Year Flood" or "100-Year Flood" means a flood that has a 1% annual probability of being equaled or exceeded. It is identical to the "base flood," which will be the term used through this chapter.

"Person" means an individual or his agent, firm, partnership, association or corporation, or agent of the aforementioned groups, or this state or its agencies or political subdivisions.

"Remedy a Violation" means to bring the structure or other development into compliance with state or local floodplain management regulations, or, if this is not possible, to reduce the impacts of its noncompliance. Ways that impacts may be reduced include protecting the structure or other affected development from flood damages, implementing the enforcement provisions of this chapter or otherwise deterring future similar violations, or reducing Federal financial exposure with regard to the structure or other development.

"Riverine" means relating to, formed by, or resembling a river (including tributaries), stream, brook, etc.

"Special Flood Hazard area (SFHA)" means an area having special flood or flood-related erosion hazards, and shown on an FHBM or FIRM as Zone A, A1-30, AE or A99.

"Start of Construction" includes substantial improvement, and means the date the building permit was issued, provided the actual start of construction, repair, reconstruction, placement, or other improvement was within 180 days of the permit date. The actual start means either the first placement of permanent construction of a structure on a site, such as the pouring of slab or footings, the installation of piles, the construction of columns, or any work beyond the stage of excavation; or the placement of a manufactured home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers, or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or not part of the main structure.

"Structure" means a walled and roofed building, including a gas or liquid storage tank that is principally above ground, as well as a manufactured home.

"Substantial Improvement" means any repair, reconstruction, or improvement of a structure, the cost of which equals or exceeds 50% of the market value of the structure either:

- A. Before the improvement or repair is started, or
- B. If the structure has been damaged and is being restored before the damage occurred.

For the purposes of this definition "substantial improvement" is considered to occur when the first alteration of any wall, ceiling, floor, or other structural part of the building commences, whether or not that alteration affects the external dimensions of the structure.

The term does not, however, include either:

- A. Any project for improvement of a structure to comply with existing state or local health, sanitary or safety code specifications which are solely necessary to assure safe living conditions, or,
- B. Any alteration of a structure listed on the National Register of Historic Places or a state Inventory of Historic Places.

"Variance" means a grant of relief from the requirements of this chapter which permits construction in a manner that would otherwise be prohibited by this chapter.

"Violation" means the failure of a structure or other development to be fully compliant with the County's floodplain management regulations. A structure or other development without the elevation certificate, other certifications, or other evidence of compliance

required in this chapter is presumed to be in violation until such time as that documentation is provided.

21.070 Lands to which this chapter applies.

This chapter shall apply to all areas of special flood hazards within the jurisdiction of Mono County.

21.080 Basis for establishing the areas of special flood hazard.

The areas of special flood hazard identified by the Federal Emergency Management Agency or the Federal Insurance Administration in a scientific and engineering report entitled "Flood Insurance Study for the County of Mono," dated February 18, 2011, with an accompanying Digital Flood Insurance Rate Map is hereby adopted by reference and declared to be part of this chapter, and all subsequent amendments and/or revisions. The Flood Insurance Study is on file at the Department of Public Works, Bridgeport, California. This Flood Insurance Study is the minimum area of applicability of the chapter and may be supplemented by studies for other areas that allow implementation of this chapter and that are recommended to the Board of Supervisors by the Floodplain Administrator.

21.090 Compliance.

No structure or land shall hereafter be constructed, located, subdivided, extended, converted or altered without full compliance with the terms of this chapter and other applicable regulations. Violations of the provisions of the chapter by failure to comply with any of its requirements (including violations of conditions and safeguards established in connection with conditions) shall constitute a misdemeanor. Nothing herein contained shall prevent the Board of Supervisors from taking such lawful action as is necessary to prevent or remedy any violation.

21.100 Abrogation and greater restrictions.

The chapter is not intended to repeal, abrogate, or impair any existing easements, covenants, or deed restrictions.

21.110 Interpretation.

In the interpretation and application of this chapter, all provisions shall be:

- A. Considered as minimum requirements:
- B. Liberally construed in favor of the governing body; and,
- C. Deemed neither to limit nor repeal any other powers granted under state statutes.

21.120 Warning and disclaimer of liability.

The degree of flood protection required by this chapter is considered reasonable for regulatory purposes and is based on scientific and engineering considerations. Larger floods can and will occur on rare occasions. Flood heights may be increased by man-made or natural causes. This chapter does not imply that land outside the areas of special flood hazards or uses permitted within such areas will be free from flooding or flood damages. This chapter shall not create liability on the part of Mono County, any officer or employee thereof, or the Federal Insurance Administration, for any flood

damages that result from reliance on this chapter or any administrative decisions they lawfully make thereunder.

21.130 Establishment of development permit.

A development permit shall be obtained before construction or development begins within any area of special flood hazards established in Section 21.080. Application for a Development Permit shall be made on forms furnished by the Floodplain Administrator and may include but not be limited to: plans in duplicate drawn to scale showing the nature, location, dimensions, and elevation of the area in question; existing or proposed structures, fill, storage of materials, drainage facilities; and the location of the foregoing. Specifically, the following information is required:

- A. Proposed elevation in relation to mean sea level, of the lowest floor (including basement) of all structures and elevation of highest adjacent grade.
- B. Proposed elevation in relation to mean sea level to which any structure will be flood proofed;
- C. All appropriate certifications listed in Section 21.150-D of this chapter; and
- D. Description of the extent to which any watercourse will be altered or relocated as a result of proposed development.

21.140 Designation of floodplain administrator.

The Director of Public Works is hereby appointed as Floodplain Administrator and authorized to administer and implement this chapter by granting or denying development permit applications in accordance with its provisions.

21.150 Duties and responsibilities of the floodplain administrator.

The duties and responsibilities of the Floodplain Administrator shall include, but not be limited to:

- A. Review of all development permit applications to determine that:
 - 1. The permit requirements of this chapter have been satisfied;
 - 2. All other required state and federal permits have been obtained;
 - 3. The site is reasonably safe from flooding.
 - 4. The proposed development does not adversely affect the carrying capacity of areas where the base flood elevation have been determined, but a flood way has not been designated. For purposes of this chapter, "adversely affects" means the cumulative effect of the proposed development when combined with all other existing and anticipated development will not increase the water surface elevation of the base flood more than one foot at any point.

B. Use of Other Base Flood Data

When base flood elevation data has not been provided in accordance with Section 21.080, the Floodplain Administrator shall obtain, review, and

reasonably utilize any base flood elevation and floodway data available from a federal, state or other source, in order to administer Section 21.160. Any such information shall be submitted to the Board of Supervisors for adoption.

C. Alteration of Watercourses

Whenever a watercourse is to be altered or relocated:

1. Notify adjacent communities and the Department of Water Resources prior to such alteration or relocation of a watercourse, and submit evidence of such notification to the Federal Insurance Administration;
2. Required that the flood carrying capacity of the altered or relocated portion of said watercourse is maintained.

D. Information to be Obtained and Maintained

Obtain and maintain for public inspection and make available as needed:

1. The certification required in Section 21.160-C-1 (floor elevations);
2. The certification required in Section 21.160-C-2-c (elevation or floodproofing of nonresidential structures);
3. The certification required in Section 21.160-C-3-a or 21.160-C-3-b (wet floodproofing standard);
4. The certification required in Section 21.180-B (subdivision standards);
5. The certification required in Section 21.200-A (floodway encroachments); and

E. Interpretation of Flood Insurance Rate Map (FIRM) Boundaries

Make interpretations where needed as to the exact location of the boundaries of the areas of special flood hazards (for example, where there appears to be conflict between a mapped boundary and actual field conditions). The person contesting the location of the boundary shall be given a reasonable opportunity to appeal the interpretation as provided in Section 21.210.

F. Remedy Violations

Take necessary action to remedy violations of this chapter as specified in Section 21.090 herein.

21.160 Standards of construction.

In all areas of special flood hazard the following standards are required

A. Anchoring

1. All new construction and substantial improvements shall be anchored to prevent flotation, collapse or lateral movements of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy.

2. All manufactured homes shall meet the anchoring standards of Section 21.190.

B. Construction Materials and Methods

1. All new construction and substantial improvements shall be constructed with materials and utility equipment resistant to flood damage.
2. All new construction and substantial improvements shall be constructed using methods and practices that minimize flood damage.
3. All new construction and substantial improvements shall be constructed with electrical, heating, ventilation, plumbing and air conditioning equipment and other service facilities that are designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding.

C. Elevations and Floodproofing

1. New construction and substantial improvement of any structure shall have the lowest floor, including basement, elevated to or above the base flood elevation (i.e., the depth number specified in feet on the FIRM), or at least two feet above the highest adjacent grade if no depth number is specified. Nonresidential structures may meet the standards in Section 21.160- C-2. Upon the completion of the structure the elevation of the lowest floor, including basement, shall be certified by a registered professional engineer or surveyor, or verified by the county building inspector to be properly elevated. Such certification or verification shall be provided to the Floodplain Administrator.
2. Nonresidential construction shall either be elevated in conformance to Section 21.160-C-1 together with attendant utility and sanitary facilities:
 - a. Be flood-proofed so that, below the base flood level, the structure is watertight with walls substantially impermeable to the passage of water:
 - b. Have structural components capable of resisting hydrostatic and hydrodynamic loads and effects of buoyancy; and
 - c. Be certified by a registered professional engineer or architect that the standards of this subsection are satisfied. Such certifications shall be provided to the Floodplain Administrator.
3. Require, for all new construction and substantial improvements, that fully enclosed areas below the lowest floor that are subject to flooding shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwaters. Designs for meeting this requirement must either be certified by a registered professional engineer or architect or meet or exceed the following minimum criteria:

- a. Either a minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided. The bottom of all openings shall be no higher than one foot above grade. Openings may be equipped with screens, louvers, valves or other coverings or devices provided that they permit the automatic entry and exit of flood waters; or
 - f. Be certified to comply with a local floodproofing standard approved by the Federal Insurance Administration.
4. Manufactured homes shall also meet the standards in Section 21.190.

21.170 Standards for utilities.

- A. All new and replacement water supply and sanitary sewage systems shall be designed to minimize or eliminate infiltration of flood waters into the system and discharges from the system into flood waters.
- B. On-site waste disposal systems shall be located to avoid impairment to them, or contamination from them during flooding.

21.180 Standards for subdivisions.

- A. All preliminary subdivision and land division proposals shall identify the flood hazard area and the elevation of the base flood. This shall apply to those divisions greater than 50 lots or five acres, whichever is the lesser.
- B. All final subdivision plans will provide the elevations of proposed structure(s) and pads. If the site is filled above the base flood, the final pad elevation shall be certified by a registered professional engineer or surveyor and provided to the Floodplain Administrator.
- C. All subdivision proposals shall be consistent with the need to minimize flood damage.
- D. All subdivision proposals shall have public utilities and facilities such as sewer, gas, electrical and water systems located and constructed to minimize flood damage.
- E. All subdivisions shall provide adequate drainage to reduce exposure to flood hazards.

21.190 Standards for manufactured homes.

All new and replacement manufactured homes and additions to manufactured homes shall:

- A. Be elevated so that the lowest floor is at or above the base flood elevation;
- B. Be securely anchored to a permanent foundation system to resist flotation, collapse or lateral movement.

21.200 Floodways.

Located within areas of special flood hazard, established in Section 21.080, are areas designated as floodways. Since the floodway is an extremely hazardous area due to the velocity of flood waters which carry debris, potential projectiles, and erosion potential, the following provisions apply:

- A. Prohibit encroachments, including fill, new construction, substantial improvements, and other development unless certification by a registered professional engineer or architect is provided demonstrating that encroachments shall not result in any increase in flood levels during the occurrence of the base flood discharge.
- B. If Section 21.200-A is satisfied all new construction and substantial improvements shall comply with all other applicable flood hazard reductions provisions of Sections 21.160 through 21.200.

21.210 Variance procedures.

A. Appeal Board

- 1. The Mono County Planning Commission shall hear and decide requests for variances from the requirements of this chapter.
- 2. The Mono County Planning Commission shall hear and decide appeals when it is alleged there is an error in any requirement, decision or determination made by the Floodplain Administer in the enforcement or administration of this chapter.
- 3. The Board of Supervisors shall hear appeals of actions of the Planning Commission in the manor set forth in Chapter 47, Appeals.
- 4. In passing upon such requests or appeals, the Board of Supervisors or Planning Commission shall consider all technical evaluations, all relevant factors, standards specified in other sections of this chapter, and:
 - a. The danger that materials may be swept onto other lands to the injury of others.
 - b. The danger to life and property due to flooding or erosion damage.
 - c. The susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner.
 - d. The importance of the services provided by the proposed facility to the community.
 - e. The necessity to the facility of a waterfront location, where applicable.
 - f. The availability of alternative locations for the proposed uses which are not subject to flooding or erosion damage.

- g. The compatibility of the proposed use with existing and anticipated development.
 - h. The relationship of the proposed use to this general plan and floodplain management program for that area.
 - i. The safety of access to the property in times of flood for ordinary and emergency vehicles.
 - j. The expected heights, velocity, duration, rate of rise, and sediment transport of the flood waters expected at the site.
 - k. The costs of providing governmental services during and after flood conditions, including maintenance and repair of public utilities and facilities such as sewer, gas, electrical, and water system, and streets and bridges.
5. Generally, variances may be issued for new construction and substantial improvements to be erected on a lot of one-half acre or less in size contiguous to and surrounded by lots with existing structures constructed below the base flood level, providing items a through k in Section 21.210 A-4 have been fully considered. As the lot size increases beyond the one-half acre, the technical justification required for issuing the variance increases.
6. Upon consideration of the factors of Section 21.210 A-4 and the purpose of the chapter, the Board of Supervisors or Planning Commission may attach such conditions to the granting of variances as it deems necessary to further the purpose of this chapter.
7. The Floodplain Administrator shall maintain the records of all appeal actions and report any variances to the Federal Insurance Administration upon request.

B. Conditions for Variances:

- 1. Variances may be issued for the reconstruction, rehabilitation or restoration of structures listed in the National Register of Historic Places or the state Inventory of Historic Places, without regard to the procedures set forth in the remainder of this Section.
- 2. Variances shall not be issued within any designated floodway if any increase in flood levels during the base flood discharge would result.
- 3. Variances shall be issued upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.
- 4. Variances shall only be issued upon:
 - a. A showing of good and sufficient cause. Variances issued for economic considerations, aesthetics, or because variances have been used in the past, are not good and sufficient cause;

- b. A determination that failure to grant the variance would result in exceptional hardship to the applicant; and
 - c. A determination that the granting of a variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of, the public, or conflict with existing local laws or ordinances.
5. Variances may be issued for new construction and substantial improvements and for other development necessary for the conduct of a functionally dependent use provided that the provisions of Section 21.210 A-1 through 21.210 A-2 are satisfied and that the structure or other development is protected by methods that minimize flood damages during the base flood and create no additional threats to public safety.
6. Any applicant to whom a variance is granted shall be given written notice that the structure will be permitted to be built with lowest flood elevation below the base flood elevation and that the cost of flood insurance will be commensurate with the increased risk resulting from the lowered floor elevation. A copy of the notice shall be recorded by the Floodplain Administrator in the office of the Mono County Recorder and shall be recorded in a manner so that it appears in the chain of title of the affected parcel of land.

22.150	Defensible Space and Fire Hazard Reduction.

22.010 Purpose.

Mono County is rural in nature, primarily consisting of mountainous and high-desert terrain. The communities and inhabited portions of the unincorporated area of Mono County are generally located within, or in close proximity to, mountainous areas, forest-covered land, brush-covered lands, grass-covered lands, and similar lands that are subject to wildfires. In order to minimize the threat of wildfire spreading to occupied structures, and to supplement the educational and enforcement activities of Cal Fire (formerly the California Department of Forestry and Fire Protection), local educational efforts, and enforcement of, defensible space requirements are reasonable and necessary and will benefit the public health and safety.

22.020 Intent.

These fire safe regulations are intended to provide the same practical effect as the State Responsibility Area Fire Safe Regulations, Public Resources Code Section 4290, Title 14 of the California Code of Regulations (CCR) and roofing requirements as specified in Government Code Sections 51178.5 and 51189 and Health and Safety Code Sections 13108.5 and 13132.7. The regulations establish basic wildland fire protection standards in the State Responsibility Areas of Mono County for emergency access; signing and building numbering; private water supply reserves for fire use; roof covering standards; and vegetation modification.

22.030 Scope.

These regulations do not apply to existing structures (except as specified in Sections 22.130 and 22.140), roads, streets and private lanes or facilities. These regulations shall apply as appropriate to all construction within State Responsibility Areas approved after October 1, 1991. Affected activities include but are not limited to:

- A. Permitting or approval of new parcels, excluding lot line adjustments as specified in Government Code (GC) Section 66412(d),
- B. Application for a building permit for new construction, not relating to an existing structure (except as specified in Section 22.140 Roof Covering Standards),
- C. Application for a Use Permit,
- D. The siting of manufactured homes (manufactured homes are as defined by the National Fire Protection Association, National Fire Code, Section 501A, Standard for Fire Safety Criteria for Manufactured Home installations, Sites and Communities, Chapter 1, Section 1-2, Definitions, page 4, 1987 edition and Health and Safety Code Sections 18007, 18008, and 19971),
- E. Road construction, including construction of a road that does not currently exist, or extension of an existing road,

Exemption: Roads required as a condition of tentative parcel maps prior to the effective date of these regulations; roads for agricultural or mining use solely on one ownership; and roads used solely for the management and harvesting of wood products.

22.040 Provisions for Application of these Regulations.

This chapter shall be applied as follows:

- A. Mono County shall provide Cal Fire (formerly the California Department of Forestry and Fire Protection) with notice of applications for building permits, tentative parcel maps, and use permits for construction or development within State Responsibility Areas.
- B. The Battalion Chief of Cal Fire, or his designee, shall review and make fire protection recommendations on applicable construction or development permits or maps provided by Mono County.
- C. The applicable sections of this chapter shall become a condition of approval of any applicable construction or development permit or map. Applicants should also consult with the applicable local fire protection district for possible additional requirements.

22.050 Inspection Authority.

- A. Inspection shall be made pursuant to Section 1270.06 of the California Code of Regulations by the Battalion Chief of Cal Fire. Applicable fire districts or Mono County departments may provide inspection assistance through the building or development permit process.

- B. Reports of violations shall be provided to the Cal Fire Battalion Chief, who administers State Responsibility Area fire protection for Mono County.

22.060 Inspections.

The inspection authority may inspect for compliance with these regulations. When inspections are conducted, they should occur prior to: the issuance of the use permit; certificate of occupancy; the recordation of the parcel map or final map; the filing of a notice of completion; or the final inspection of any project or building permit.

22.070 Exceptions to Standards.

Upon request by the applicant, exceptions to standards within this chapter and mitigated practices may be allowed by the inspection authority, where the exception provides equal to or better than overall practical effect as these regulations toward providing defensible space.

22.080 Requests for Exceptions.

Requests for an exception shall be made in writing to the inspection authority by the applicant or the applicant's authorized representative. The request shall state the specific section(s) for which an exception is requested, material facts supporting the contention of the applicant, the details of the exception or mitigation measure proposed, and a map showing the proposed location and siting of the exception or mitigation measure.

22.090 Appeals.

Where an exception is not granted by the inspection authority, the applicant may appeal such denial to the Mono County Planning Commission in accordance with Chapter 47, Appeals. Prior to the appeal hearing, the inspection authority shall be consulted and shall provide to the Planning Commission documentation outlining the effects of the requested exception on wildland fire protection.

If an appeal is granted, the Planning Commission shall make findings that the decision meets the intent of providing defensible space consistent with these regulations. Such findings shall include a statement of reasons for the decision. A written copy of these findings shall be provided to Cal Fire (formerly the California Department of Forestry and Fire Protection) Ranger Unit headquarters that administers State Responsibility Area fire protection in Mono County.

22.091 Definitions.

"Accessory building" means any building used as an accessory to residential, commercial, recreational, industrial, or educational purposes as defined in the California Building Code, 1989 Amendments, Chapter 11, Group M, Division 1, Occupancy that requires a building permit.

"Agriculture" means land used for agricultural purposes as defined in land use designations of the Mono County General Plan Land Use Element.

"Building" means any structure used or intended for supporting or sheltering any use or occupancy that is defined in the California Building Code. For the purposes of this chapter, building includes mobile homes and manufactured homes, churches, and day care facilities.

“Cal Fire” is the former California Department of Forestry and Fire Protection.

"Dead-end road" means a road that has only one point of vehicular ingress/egress, including cul-de-sacs and looped roads.

"Defensible space" means the area within the perimeter of a parcel, development, neighborhood or community where basic wildland fire protection practices and measures are implemented, providing the key point of defense from an approaching wildfire or defense against encroaching wildfires or escaping structure fires. The perimeter as used in this regulation is the area encompassing the parcel or parcels proposed for construction and/or development, excluding the physical structure itself. The area is characterized by the establishment and maintenance of emergency vehicle access, emergency water reserves, street names and building identification, and fuel modification measures.

"Development" means as defined in Section 66418.1 of the California Government Code.

“Battalion Chief” replaces the director of the former California Department of Forestry and Fire Protection or his/her designee.

"Driveway" means a vehicular access that serves no more than two buildings, with no more than three dwelling units on a single parcel, and any number of accessory buildings.

"Dwelling unit" means any building or portion thereof that contains living facilities, including provisions for sleeping, eating, cooking and/or sanitation for not more than one family.

"Exception" means an alternative to the specified standard requested by the applicant that may be necessary due to health, safety, environmental conditions, physical site limitations or other limiting conditions such as recorded historical sites, that provides mitigation of the problem.

”Firebreak” shall mean an area of land within 30 feet of an occupied dwelling or structure or to the property line, whichever is closer, in which all flammable vegetation or other combustible growth has been removed. The creation of a firebreak shall not require the removal of single specimens of trees or other vegetation that is well-pruned and maintained so as to effectively manage fuels and not form a means of rapidly transmitting fire from other nearby vegetation to any dwelling or structure.

"Fire valve” see hydrant.

"Fuel modification area" means an area where the volume of flammable vegetation has been reduced, providing reduces fire intensity and duration.

"Greenbelts" means a facility or land use, designed for other than fire protection, which will slow or resist the spread of a wildfire. Includes parking lots, irrigated or landscaped areas, golf courses, parks, playgrounds, maintained vineyards, orchards or annual crops that do not cure in the field

"Hammerhead/T" means a roadway that provides a "T" shaped, three-point turnaround space for emergency equipment, being no narrower than the road that serves it.

"Hydrant" means a valved connection on a water supply/storage system, having at least one 2-1/2 inch outlet, with male American National Fire Hose Screw Threads (NH) used to supply fire apparatus and hoses with water.

"Local Jurisdiction" means a County/Town agency or department that issues or approves building permits, use permits, tentative maps or tentative parcel maps, or has authority to regulate development and construction activity.

"Occupancy" means the purpose for which a building, or part thereof, is used or intended to be used.

"One-way road" means a minimum of one traffic lane width designed for traffic flow in one direction only.

"Roads, streets, private lanes" means vehicular access to more than one parcel; access to any industrial or commercial occupancy; or vehicular access to a single parcel with more than two buildings or four or more dwelling units.

"Roadway" means any surface designed, improved, or ordinarily used for vehicle travel.

"Roadway structures" means bridges, culverts, and other appurtenance structures that supplement the roadway bed or shoulders.

"Reduced-Fuel Zone" shall mean an area between 30 and 100 feet of an occupied dwelling or occupied structure or to the property line, whichever is closer, in which all brush, flammable vegetation or combustible growth has been removed. The creation of a reduced fuel zone shall not require the removal of single specimens of trees or other vegetation that is well-pruned and maintained so as to effectively manage fuels and not form a means of rapidly transmitting fire from other nearby vegetation to a dwelling or structure. Grass and other vegetation located more than 30 feet from the dwelling or structure and less than 18 inches in height above the ground may be maintained where necessary to stabilize the soil and prevent erosion.

"Same Practical Effect" means as used in this chapter, means an exception or alternative with the capability of applying accepted wildland fire suppression strategies and tactics, and provisions for fire fighter safety, including:

1. Access for emergency wildland fire equipment,
2. Safe civilian evacuation,
3. Signing that avoids delays in emergency equipment response,
4. Available and accessible water to effectively attack wildfire or defend a structure from wildfire, and

5. Fuel modification sufficient for civilian and fire fighter safety.

"Shoulder" means roadbed or surface adjacent to the traffic lane.

"State Board of Forestry (SBOF)" means a nine-member board, appointed by the Governor, which is responsible for developing the general forest policy of the state, for determining the guidance policies of Cal Fire (formerly the Department of Forestry and Fire Protection), and for representing the State's interest in federal land in California.

"State Responsibility Area (SRA)" means as defined in Public Resources Code Section 4126-4127: and the California Code of Regulations, Title 14, Division 1.5, Chapter 7, Article 1, Sections 1220-1220.5.

"Structure" means that which is built or constructed, an edifice or building of any kind, or any piece of work artificially built up or composed of parts joined together in some definite manner.

"Subdivision" means as defined in Section 66444 of the Government Code.

"Traffic lane" means the portion of a roadway that provides a single line of vehicle travel.

"Turnaround" means a roadway, unobstructed by parking that allows for a safe opposite change of direction for emergency equipment. Design of such area may be a hammerhead/T or terminus bulb.

"Turnout" means a widening in a roadway to allow vehicles to pass.

"Vertical clearance" means the minimum specified height of a bridge or overhead projection above the roadway.

"Wildfire" is as defined in Public Resources Code Sections 4103 and 4104.

22.092. Distance Measurements.

All specified or referenced distances are measured along the ground, unless otherwise stated.

22.100. Maintenance of Defensible Space Measures.

To ensure continued maintenance of properties in conformance to these standards and measures and to assure continued availability, access, and utilization of the defensible space provided for in these standards during a wildfire, provisions for annual maintenance shall be included in the development plans and/or shall be provided as a condition of the permit, parcel or map approval.

22.110 Emergency Access.

Road and street networks, whether public or private, unless exempted under Section 22.020(e), shall provide for safe access for emergency wildland fire equipment and civilian evacuation concurrently, and shall provide unobstructed traffic circulation during a wildfire emergency consistent with this section.

A. Road Width.

All roads shall be constructed to provide a minimum of two nine-foot traffic lanes providing two-way traffic flow, unless other standards are provided in this chapter, or additional requirements are mandated by local jurisdictions or county subdivision requirements.

B. Roadway Surface.

The surface shall provide unobstructed access to conventional-drive vehicles, including sedans and fire engines. Surfaces should be established in conformance to local ordinances, and be capable of supporting a 40,000- pound load.

C. Roadway Grades.

The grade for all roads, streets, private lanes and driveways shall not exceed 16 percent.

D. Roadway Radius.

1. No roadway shall have a horizontal inside radius of curvature of less than 50 feet and additional surface width of 4 feet shall be added to curves of 50-100 feet radius; 2 feet to those from 100-200 feet.
2. The length of vertical curves in roadways, exclusive of gutters, ditches, and drainage structures designed to hold or divert water, shall be not less than 100 feet.

E. Roadway Turnarounds.

Turnarounds are required on driveways and dead-end roads as specified in this article. The minimum turning radius for a turnaround shall be 40 feet from the center line of the road. If a hammerhead/T is used, the top of the "T" shall be a minimum of 60 feet in length.

F. Roadway Turnouts.

Turnouts shall be a minimum of 10 feet wide and 30' long with a minimum 25-foot taper on each end.

G. Roadway Structures.

1. All driveway, road, street, and private lane roadway structures shall be constructed to carry at least the maximum load and provide the minimum vertical clearance as required by Vehicle Code Sections 35550, 35750, and 35250.
2. Appropriate signing, including but not limited to weight or vertical clearance limitations, one-way road or single lane conditions, shall reflect the capability of each bridge.
3. A bridge with only one traffic lane may be authorized by the local jurisdiction; however, it shall provide for unobstructed visibility from one end to the other and turnouts at both ends.

H. One-Way Roads.

All one-way roads shall be constructed to provide a minimum of one 10-foot traffic lane. The County/Town may approve one-way roads. All one-way roads shall connect to a two-lane roadway at both ends, and shall provide access to an area currently designated for no more than 10 dwelling units. In no case shall it exceed 2,640 feet in length. A turnout shall be placed and constructed at approximately the midpoint of each one-way road.

I. Dead-End Roads.

1. The maximum length of a dead-end road, including all dead-end roads accessed from that dead-end road, shall not exceed the following cumulative lengths, regardless of the number of parcels served:

- | | |
|---|------------|
| a. parcels designated for less than one acre | 800 feet |
| b. parcels designated for one acre to 4.99 acres | 1,320 feet |
| c. parcels designated for five acres to 19.99 acres | 2,640 feet |
| d. parcels designated for 20 acres or larger | 5,280 feet |

All lengths shall be measured from the edge of the roadway surface at the intersection that begins the road to the end of the road surface at its farthest point. Where a dead-end road crosses areas of differing parcel sizes, requiring different length limits, the shortest allowable length shall apply.

2. Where parcels are designated five acres or larger, turnarounds shall be provided at a maximum of 1,320-foot intervals.

3. Each dead-end road shall have a turnaround constructed at its terminus.

J. Driveways.

All driveways shall provide a minimum 10-foot traffic lane and unobstructed vertical clearance of 15 feet along its entire length.

1. Driveways exceeding 150 feet in length, but less than 800 feet in length, shall provide a turnout near the midpoint of the driveway. Where the driveway exceeds 800 feet, turnouts shall be provided no more than 400 feet apart.

2. A turnaround shall be provided at all building sites on driveways over 300 feet in length, and shall be within 50 feet of the building.

K. Gate Entrances.

1. Gate entrances shall be at least two feet wider than the width of the traffic lane(s) serving that gate.

2. All gates providing access from a road to a driveway shall be located at least 30 feet from the roadway and shall open to allow a vehicle to stop without obstructing traffic on that road.
3. Where a one-way road with a single traffic lane provides access to a gated entrance, a 40-foot turning radius shall be used.

22.120 Signing and Building Numbering.

To facilitate locating a fire and to avoid delays in response, all new and existing or approved roads, streets, and buildings shall be designated by names or numbers, posted on signs clearly visible in a position that is plainly legible and visible from the street or road fronting the property and legible from the roadway. This section shall not restrict the size of letters or numbers appearing on street signs for other purposes.

- A. Streets and roads shall be identified with approved signs. Temporary signs shall be installed at each street intersection when construction of new roadways allows passage by vehicles. Signs shall be of an approved size, weather resistant and be maintained until replaced by permanent signs.
- B. Size of Letters, Numbers and Symbols for Street and Road Signs.
Size of letters, numbers, and symbols for street and road signs shall be a minimum of 4-inch letter height, 1/2-inch stroke, reflectorized, contrasting with the background color of the sign.
- C. Visibility and Legibility of Street and Road Signs
Road, street and private lane signs required by this chapter shall be installed prior to final acceptance by the County/Town of road improvements.
- D. Addresses for Buildings
All buildings shall be issued an address by the County/Town that conforms to the County/Town overall address system. Accessory buildings will not be required to have a separate address; however, each dwelling unit within a building shall be separately identified.
- E. Size of Letters, Numbers and Symbols for Addresses
Size of letters and symbols for addresses shall be a minimum 4-inch letter height, 1/2-inch stroke, reflectorized, contrasting with the background color of the sign. Address numbers shall be Arabic numerals or alphabet letters.
- F. Installation, Location and Visibility of Addresses
 1. All buildings shall have a permanently posted address, which shall be placed at each driveway entrance and visible from both directions of travel along the road. In all cases, the address shall be posted at the beginning of construction and shall be maintained thereafter, and the address shall be visible and legible from the road on which the address is located fronting the property.
 2. Address signs along one-way roads shall be visible from both the intended direction of travel and opposite direction.

3. Where multiple addresses are required at a single driveway, they shall be mounted on a single post.
 4. Where a roadway provides access solely to a single commercial or industrial business, the address sign shall be placed at the nearest intersection providing access to that site.
- G. Numbering standards herein are minimum and may be greater as approved by the Mono County Building Division for buildings or Department of Public Works for streets and roadways.

22.130 Emergency Water Standards.

Emergency water for wildfire protection shall be available and accessible in quantities and locations specified in the statute and these regulations, in order to attack a wildfire or defend property from a wildfire. Such emergency water may be provided in a fire agency mobile water tender, or naturally occurring water source provided that source contains a minimum of 2,500 gallons of available water year round and, in the Wheeler Crest and Long Valley fire protection districts, has access acceptable to the fire district, or man-made containment structure with required fire department connections, as long as the specified quantity is immediately available.

A. Application

The provisions of this article shall apply when new parcels are approved after October 1, 1991, by a county/town or when any existing parcel is developed within the Long Valley or Wheeler Crest fire protection districts regardless when the parcel was created. The emergency water system shall be available on site prior to the completion of road construction, where a community water system is approved, or prior to the completion of building construction, where an individual system is approved.

For the purposes of this section, “developed” shall not apply to accessory buildings for, or additions to, existing residential structures.

B. General Standards

Water systems that meet or exceed the standards specified in Public Utilities Commission of California (PUC) revised General Order #103, Adopted June 12, 1956 (Corrected September 7, 1983, Decision 83-09-001), Section VIII Fire Protection Standards and other applicable sections relating to fire protection water delivery systems, static water systems equaling or exceeding the National Fire Protection Association (NFPA) Standard 1231, "Standard on Water Supplies for Suburban and Rural Fire Fighting," 1989 Edition, or, in all areas except Long Valley and Wheeler Crest fire protection districts, a mobile water system that meets the Insurance Services Office (ISO) Rural Class 8, 2nd Edition 3-80, standard shall be accepted as meeting the requirements of this article. These documents are available at CAL FIRE Ranger Unit Headquarters.

Nothing in this article prohibits the combined storage of emergency wildfire and structural fire-fighting water supplies unless so prohibited by local ordinance or specified by the local fire agency.

Freeze protection shall be provided as required by the California Plumbing Code and NFPA 13.

C. Hydrant/Fire Valve

1. The hydrant or fire valve shall be 18 inches above grade, eight feet from flammable vegetation, no closer than four feet nor farther than 12 feet from a roadway, and in a location where fire apparatus using it will not block the roadway.

The hydrant or other off-site fire department connection serving any building shall be:

- a. Not less than 50 feet nor more than ½-mile by road from the building it is to serve. In the Long Valley and Wheeler Crest fire protection districts, the distance shall be not less than 50 feet or more than 1,000 feet by road from the building it is to serve.
 - b. Located at a turnout or turnaround along the driveway to that building or along the road that intersects with that driveway.
2. The hydrant head or fire valve shall be brass with 2-1/2 inch National Hose male thread with cap for pressure and gravity flow systems and 4-1/2-inch draft systems. Such hydrants shall be wet or dry barrel as required by the delivery system. They shall have suitable crash protection as required by the local jurisdiction.

D. Signing of Water Sources

Each hydrant/fire valve or access to water shall be identified as follows:

1. If located along a driveway, a reflectorized blue marker, with a minimum dimension of 3 inches shall be located on the driveway address sign and mounted on a fire-retardant post, or
2. If located along a street or road,
 - a. A reflectorized blue marker, with a minimum dimension of 3 inches, shall be mounted on a fire-retardant post. The sign post shall be within 3 feet of said hydrant/fire valve, with the sign no less than 3 feet nor greater than five feet above ground, in a horizontal position and visible from the driveway, or
 - b. As specified in the State Fire Marshal's Guidelines for Fire Hydrant Markings Along State Highways and Freeways, May 1988.

E. Maintenance

Ongoing maintenance of required water supply(s) shall be the responsibility of the property owner.

22.140 Roof Covering Standards

- A. Class A roof covering(s) as defined in the California Building Code, shall apply for every new building(s) and all reroofing of existing building(s) and shall be verified by field inspection.
 1. The installer of the roof covering shall provide certification of the roof covering classification to the building owner and, when requested, to the Mono County Building Division. The installer shall also install the roof covering in accordance with the manufacturer's listing.
 2. The roofing material shall have passed a minimum 10-year accelerated weather test approved by a testing laboratory recognized by the State Fire Marshal.
 3. This section shall not apply to any building or facility designated as an historic building, as defined in Section 18955.

22.150 Defensible Space and Fire Hazards Reduction.

A. Requirements

1. Property shall be maintained in accordance with the defensible space requirements contained in Government Code section 51182 (unless exempted by Government Code section 51183 or 51184) and Public Resources Code section 4291, as applicable.
2. The existence or maintenance of any of the following conditions is prohibited:
 - a. Tree branches within 10 feet of a chimney outlet or stovepipe outlet;
 - b. Dead or dying tree branches adjacent to or overhanging a building;
 - c. Leaves, needles, or other dead vegetative growth on the roof of any structure;
 - d. Flammable vegetation or other combustible growth within 30 feet of an occupied dwelling or structure which prevents the creation of a Firebreak;
 - e. Brush, flammable vegetation, or combustible vegetation located between 30 and 100 feet of an occupied dwelling or structure which prevents the creation of a Reduced Fuel Zone; or
 - f. Brush or other flammable material within 10 feet of a propane tank.
3. No person shall be required to maintain any clearing on any land if that person does not have the legal right to maintain the clearing, nor is any person required to enter upon or damage property that is owned by another person without the consent of that person.

4. The prohibitions contained in paragraph 3 shall not apply to land or water area located outside of a State Responsibility Area that are acquired or managed for one or more of the following purposes or uses:
 - a. Habitat for endangered or threatened species, or any species that is a candidate for listing as an endangered or threatened species by the state or federal government.
 - b. Lands kept in a predominantly natural state as habitat for wildlife, plant, or animal communities.
 - c. Open-space lands that are environmentally sensitive parklands.
 - d. Other lands having scenic values, as declared by the local agency or by state or federal law.

B. Local Enforcement

1. Any County personnel performing health and safety functions, including but not limited to, paramedics, building inspectors, and code compliance officers, may be trained and assigned to conduct general property inspections to determine compliance with the provisions of 22.150, provide educational materials and instruction concerning defensible space requirements to owners and occupiers of structures, and to issue correction notices to owners and occupiers of structures to gain compliance with the provisions of 22.150. Any duly designated person assigned by a local fire protection district may be trained and assigned to conduct general property inspections to determine compliance with the provisions of 22.150, provide educational materials and instruction concerning defensible space requirements to owners and occupiers of structures, and to issue correction notices to owners and occupiers of structures to gain compliance with the provisions of 22.150.
2. If an owner or occupier of a structure fails to comply with a correction notice issued to them, the person or entity that issued the correction notice may follow up the correction notice with a second correction notice that shall include a warning that the failure to make the necessary corrections may result in enforcement action pursuant to Chapter 1.12 of the Mono County Code or any other enforcement action or remedy allowed by law.
3. Mono County Code Compliance Officers may take any necessary enforcement action upon receipt of a second correction notice. The proposed enforcement action shall take into consideration the degree of the danger posed by the lack of compliance with the defensible space requirements.
4. Forms may be created for use by County personnel and fire protection district personnel in implementing this section.

5. The provisions in this section are intended solely to supplement, and not supersede, replace, or modify the enforcement provisions set forth in Public Resource Code Section 4291.

C. Applicability

1. Defensible space requirements shall apply to existing structures and shall be required for the following applications for which approval has not been granted as of the effective date of this chapter:
 - a. Applications for building permits as provided in Mono County Code Chapter 15.04.
 - b. Applications for tentative subdivision final and parcel maps.
 - c. Applications for use permits when applicable.

D. Exceptions and Modifications

1. An exception to, or modification of, the regulations set forth 22.150 may be authorized whenever a finding is made by [the Community Development Director] that the exception or modification provides an overall practical effect of creating defensible space and/or where site-specific conditions, including previously required development mitigation conditions to preserve wildlife or botanical habitat preservation have been required. When considering such site-specific exemptions or modifications, the [Community Development Director] may consult with experts in the fields of wildfire protection and wildlife and botanical habitat preservation in reaching an appropriate level of modification. When an exception is requested for a site that is located within an established community, the [Community Development Director] may consult with the designated representative of the local fire protection district in determining the requested exception or modification.

DEVELOPMENT STANDARDS

CHAPTER 23 – DARK SKY REGULATIONS

Sections:

23.010	Purpose
23.020	Definitions
23.030	Applicability
23.040	Exemptions
23.050	General Requirements
23.060	Outdoor Lighting Plans
23.070	Prohibitions
23.080	Signs
23.090	Outdoor Performance, Sport and Recreation Facilities
23.100	Energy Conservation Measures
23.110	Violations and Penalties
23.120	Repeals
23.130	Figures and Diagrams

23.010 Purpose.

- A. The purpose of this chapter is to provide rules and regulations for outdoor lighting within Mono County except north of Mountain Gate in order to accomplish the following:
1. To promote a safe and pleasant nighttime environment for residents and visitors;
 2. To protect and improve safe travel for all modes of transportation;
 3. To prevent nuisances caused by unnecessary light intensity, direct glare, and light trespass;
 4. To protect the ability to view the night sky by restricting unnecessary upward projection of light;
 5. Through new building permits phase out existing non-conforming fixtures that violate this chapter; and
 6. To promote lighting practices and systems to conserve energy.
- B. This chapter shall be known and may be cited as the Mono County Outdoor Lighting Ordinance.
- C. The figures incorporated in this chapter or shown on informational sheets produced by the Mono County are provided as guidelines for the public and staff

to use in meeting the intent of this chapter. The figures serve only as examples. Mono County does not endorse or discriminate against any manufacturer or company that may be shown, portrayed, or mentioned as examples.

23.020 Definitions. Unless specifically defined below, the words and phrases used in this chapter shall be interpreted to give the meaning they have in common usage, and to give this chapter its most reasonable application.

“Fixture” means a complete lighting unit including the lamp and parts designed to distribute the light, position and protect the lamp, and connect the lamp to a power source. Also referred to as a “luminaire.”

“Footcandle (fc)” means a unit of measurement for the total amount of light cast on a surface (illuminance). One footcandle is equivalent to the illuminance produced by a source of one candle at a distance of one foot.

“Full Cutoff Fixture” means a lighting fixture designed such that no light, either directly from the bulb or indirectly from the fixture, is emitted at or above a horizontal plane running through the lowest point on the fixture.

“Glare” means direct and unshielded light striking the eye to result in visual discomfort and reduced visual performance.

“Lamp” means an artificial light source installed in the socket portion of the fixture, to be distinguished from the whole assembly. Commonly referred to as a “bulb.”

“Light Pollution” means any adverse effect of artificial light sources including, but not limited to, discomfort to the eye or diminished vision due to glare, light trespass, uncontrolled up-lighting, uncomfortable distraction to the eye, or any artificial light that diminishes the ability to view the night sky.

Light trespass from uncontrolled source

Controlled source and good aiming prevents light trespass

“Light Trespass” means light falling where it is not wanted or needed, generally light from one property that shines onto another property or the public right of way.

“Lumen” means the unit used to quantify the amount of light energy produced by a lamp. For example, a 40-watt incandescent lamp produces approximately 400 lumens, while a 35-watt high-pressure sodium lamp produces about 2,300 lumens.

“Outdoor Lighting Fixture” means any temporary or permanent lighting fixture that is installed, located, or used in such a manner to provide illumination of objects or activities outside. Outdoor lighting fixtures include all fixtures mounted to the exterior of a structure, poles, bollards, or other freestanding structures, or placed so as to provide direct illumination on any exterior area or activity.

“Shielding” means a barrier around a fixture that helps conceal the lamp and control light distribution. A fixture that is “fully shielded” incorporates a solid barrier, emits no light rays above the horizontal plane and effectively obscures visibility of the lamp. A fixture that is “partially shielded” may allow some light to pass through a semi-translucent barrier, and/or may allow visibility of the lamp from certain perspectives.

“Temporary Lighting” means lighting that is intended to be used for a special event for up to seven days.

23.030 Applicability.

- A. New Outdoor Lighting. All outdoor lighting fixtures installed after the effective date of this chapter shall conform to the requirements established by this chapter.
- B. Existing Outdoor Lighting. All existing outdoor lighting fixtures installed prior to the effective date of this chapter shall be addressed as follows:
 - 1. To address nuisances caused by improperly installed, unshielded, or misdirected fixtures, it is recommended that all existing outdoor lighting fixtures be adjusted or modified to the extent practical to reduce or eliminate glare, light trespass, and light pollution.
 - 2. All existing outdoor lighting fixtures located on a property that is part of an application for design review approval; a conditional use permit; subdivision approval; or, a building permit for any new structure or exceeding 15% of existing structure value or any addition(s) of gross floor area, seating capacity, or parking spaces (either with a single addition or cumulative additions), shall meet the requirements of this chapter for the entire property. Such applications are required to include an outdoor lighting plan pursuant to section 23.060. Conformity shall occur prior to final inspection, final plat recordation, or business license issuance, when applicable.

23.040 Exemptions.

- A. The following are exempt from the provisions of this chapter:
 - 1. Seasonal displays using multiple low-wattage bulbs (approximately 15 lumens or less), provided that they do not constitute a fire hazard, create a nuisance, and are maintained in a safe and attractive condition.
 - 2. Vehicular lights and all temporary emergency lighting needed by the law enforcement and Fire Protection District, or other emergency services.

3. All temporary lighting used for the construction or repair of roadways, utilities, and other public infrastructure.
 4. All lighting required by state or federal regulatory agencies.
 5. Illuminated address at no more than 15 lumens.
- B. The Community Development Director may authorize minor deviations when proposed outdoor lighting does not conflict with the purposes of this chapter. An application for such a deviation must be made in writing and include an outdoor lighting plan pursuant to sections 23.050 G and 23.06O. Temporary lighting for special events shall be reviewed in this manner.

23.050 General Requirements.

The following general standards apply to all non-exempt outdoor lighting fixtures:

- A. Nuisance prevention. All outdoor lighting fixtures shall be designed, located, installed, aimed downward or toward structures, retrofitted if necessary, and maintained in order to prevent glare, light trespass, and light pollution.
- B. Maintenance. Fixtures and lighting systems shall be in good working order and maintained in a manner that serves the original design intent of the system.
- C. Lighting Levels. Outdoor lighting installations shall be designed to avoid harsh contrasts in lighting levels between the project site and the adjacent properties. The Mono County Planning Commission may, by resolution, adopt standards for maximum or minimum lighting levels for various land use areas and for public streets, sidewalks, or trails, as developed by the Community Development and Public Works departments.
- D. Lamp Types. Metal halide or high-pressure sodium lamps are preferred for all new commercial and industrial area lighting (parking lot and yard lights) and street lighting installed after the effective date of this chapter due to good color rendering and good energy efficiency. Low-pressure sodium lamps and mercury vapor lamps are not permitted. Low wattage incandescent, LEDs or compact fluorescent lamps are preferred for residential lighting.
- E. Fixture Types. All new outdoor lighting shall use full cutoff luminaires with the light source downcast and fully shielded with no light emitted above the horizontal plane, with the following exceptions:
 1. Fixtures that have a maximum output of 100 lumens (equivalent to one 10-watt incandescent bulb) or less, regardless of the number of bulbs, may be left unshielded provided the bulb surfaces are obscured from off-site visibility with a semi-translucent or frosted glass that has an opaque top to prevent the light from shining directly up. However, partial or full shielding is preferred to control light output in all situations.
 2. Fixtures that have a maximum output of 600 lumens (equivalent to one 40-watt incandescent bulb) or less shall be partially or totally shielded using a solid or semi-translucent

Land Use

Glare from unshielded

Shielding prevents glare

barrier, provided that the lamp is not visible from off site, no direct glare is produced, and the fixture has an opaque top to keep light from shining directly up; e.g., a low output-style wall pack.

3. Floodlights that do not meet the definition of “full cutoff” may be used if permanently directed downward, if no light is projected above the horizontal plane, and if and fitted with external shielding to prevent glare and off-site light trespass. Unshielded floodlights are prohibited.

F. Accent Lighting. Residential accent lighting shall be limited. LED-type accent lighting is preferred. Commercial accent lighting may be permitted in conjunction with a use permit. Limited architectural features may be illuminated by uplighting, provided that the light is effectively contained by the structure, the lamps are low intensity to produce a subtle lighting effect, and no glare or light trespass is produced. For statues, public art, or other objects of interest that cannot be illuminated with down-lighting, upward lighting may be used only in the form of one narrow-cone spotlight that confines the illumination to the object of interest.

G. The provisions of this chapter are not intended to prevent the use of any design, material, or method of installation or operation not specifically prescribed herein, provided that the Community Development Director has approved any such alternative. An alternative proposal may be approved if it provides at least approximate equivalence to the applicable specific requirements of this chapter, or if it is otherwise satisfactory and complies with the intent of this chapter.

Example of a narrow-cone spotlight

H. Mono County reserves the right to further restrict outdoor lighting including, but not limited to, pole height and level of illumination, when it is deemed in the public interest consistent with the purpose of this chapter.

23.060 Outdoor Lighting Plans.

A. An outdoor lighting plan shall be submitted in conjunction with an application for design review approval; a conditional use permit; subdivision approval; or, a building permit exceeding 15% of existing structure value or any addition(s) of gross floor area, seating capacity, or parking spaces (either with a single addition or cumulative additions). An outdoor lighting plan is required for all new outdoor lighting installations on commercial (includes multi-family residential project of four or more units), industrial, public and institutional properties. The Community Development Director may request outdoor lighting plans from applicants for other types of projects due to project location, size, or proposed use, as necessary. An outdoor lighting plan shall include at least the following:

1. Manufacturer specification sheets, cut-sheets, or other manufacturer-provided information for all proposed outdoor lighting fixtures to show fixture diagrams and light output levels;

2. The proposed location, mounting height, and aiming point of all outdoor lighting fixtures (a site plan is preferred); and
 3. If building elevations are proposed for illumination, drawings for all relevant building elevations showing the fixtures, the portions of the elevations to be illuminated, the illuminance level of the elevations, and the aiming point for any remote light fixture.
- B. If needed to review the proposed outdoor lighting fixture installation, the Community Development Director may require additional information following the initial outdoor lighting plan submittal, including but not limited to a written narrative to demonstrate the objectives of the lighting, Photometric data, Color Rendering Index (CRI) of all lamps and other descriptive information on the fixtures, computer-generated photometric grid showing footcandle readings every 10 feet within the property or site and 10 feet beyond the property lines (an iso-footcandle contour line-style plan may be acceptable), and/or landscaping information to describe potential screening.
- C. The Community Development Director may approve, deny, or require modifications to any outdoor lighting plan in order to meet the purpose of this chapter.

23.070 Prohibitions.

- A. The installation of any new fixture not in conformance to this chapter is prohibited after the effective date of this chapter.
- B. No outdoor lighting fixtures shall be installed, aimed, or directed to produce light that spills over into neighboring properties or the public right of way. Light trespass is prohibited.
- C. No outdoor lighting fixture may be installed or maintained in such a manner to cause glare visible from off site.
- D. No outdoor lighting fixture may be operated in such a manner as to constitute a hazard or danger to persons, or to safe vehicular travel.
- E. Blinking, flashing, moving, revolving, scintillating, flickering, changing-intensity, and changing-color lights and internally illuminated signs are prohibited.
- F. The installation of new mercury vapor and/or low-pressure sodium lamps is prohibited.
- G. Search lights, laser source lights, or any similar high-intensity light is prohibited except in emergencies by police and fire personnel or at their direction, or for approved temporary lighting under a special event permit issued by the Community Development Director.
- H. Streetlights shall be down directed with complete horizontal shielding of the

Example of shielded streetlight

reflective surface and no higher than 17 feet from the bottom of the shielded fixture surface with a maximum 150-watt lamp. Greater height may be granted by the Community Development Director for safety or adopted minimum highway standards.

23.080 Signs.

All outdoor lighting for commercial signs installed and maintained pursuant to Chapter 07 shall conform to the provisions of this chapter. Light bulbs or lighting tubes used for sign illumination shall not be readily visible from the vehicular travel lanes, adjacent public rights of way, or adjoining properties. The intensity of sign lighting shall not exceed that necessary to illuminate and make legible a sign from the approved location of view, such as pedestrian walkway, adjacent travel way or closest county street.

23.090 Outdoor Performance, Sport and Recreation Facilities.

- A. Where playing fields or other special activity areas are to be illuminated, lighting fixtures shall be mounted, aimed, and shielded so that their beams fall within the primary playing area and immediate surroundings, and so that no significant off-site light trespass is produced.

- B. The main lighting shall be turned off as soon as possible following the end of an event. Where feasible, a low-level lighting system shall be used to facilitate patrons leaving the facility, cleanup, nighttime maintenance, and other closing activities.

23.100 Energy Conservation Measures.

Incorrect installations, poor choice of fixtures, and over-lighting can result in unnecessarily high energy costs. The following recommendations are intended to encourage the efficient use of energy for lighting purposes:

- A. All non-essential outdoor commercial and residential lighting shall be turned off after business hours and/or when not in use. Limited accent lighting and safety lighting as approved by the Community Development Director may remain illuminated after business hours.

- B. Where practical, outdoor lighting installations are encouraged to include timers, dimmers, or photocell controllers that turn lights off during daylight hours to reduce overall energy consumption and eliminate unnecessary lighting.

- C. When selecting new outdoor lighting, the full cost of operation over the life of the fixture(s) should be considered. Substantial annual energy savings may be realized by using quality efficient fixtures.

- D. Indiscriminate and excessive lighting shall be avoided. Light should be directed only to where it is needed with appropriate intensity.

23.110 Violations and Penalties.

It shall be unlawful to install or operate any outdoor lighting fixture in violation of this chapter. Any person violating any provisions of this chapter may be subject to the provisions of Mono County Code section 1.04.060. In addition, any outdoor lighting fixture erected or maintained contrary to the provisions of this chapter may be declared

to be a public nuisance subject to the procedures set forth in County Code Chapter 07.20. Such remedies are in addition to and may be sought or imposed concurrently with any other remedy provided by law, regulation or ordinance.

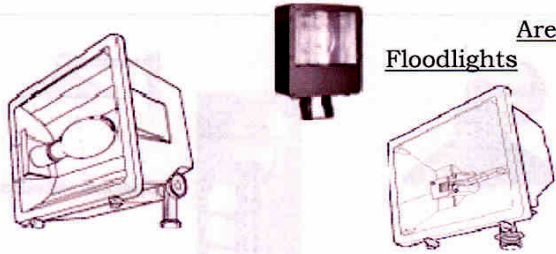

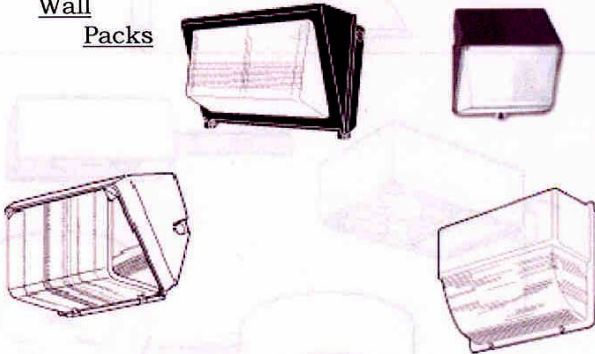

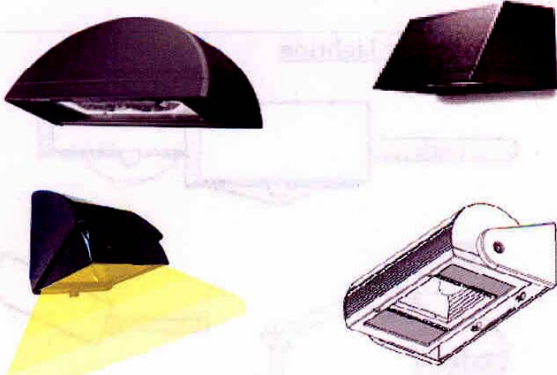

23.120 Figures and Diagrams.

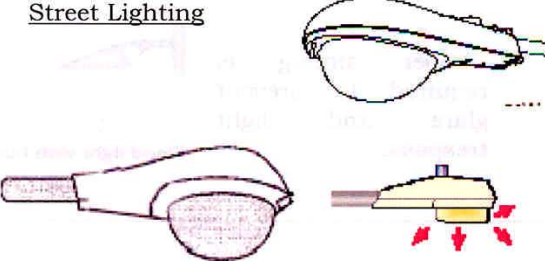

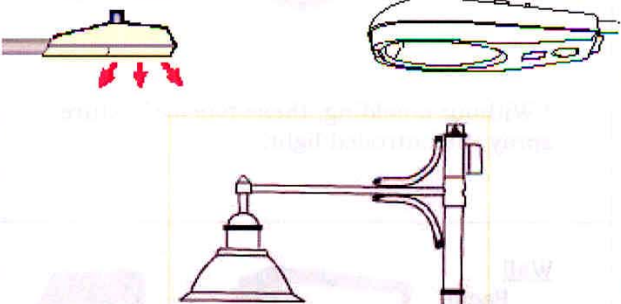

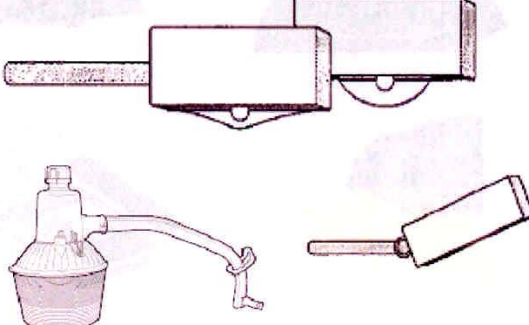

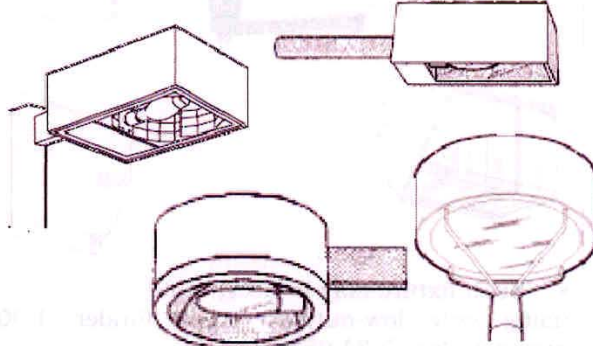

The following figures illustrate examples of acceptable and unacceptable types of outdoor lighting fixtures. Note that even those types of fixtures shown as “acceptable” must be installed and aimed properly to comply with this chapter.

23.130 Repeals.

This chapter supersedes and takes precedence over any other code sections that are inconsistent with these regulations.

DEVELOPMENT STANDARDS

CHAPTER 24 – RIGHT-TO-FARM REGULATIONS

Sections:

24.010	Definitions.
24.020	Findings.
24.030	Purpose and intent.
24.040	Nuisance.
24.050	Disclosure.
24.060	Notification.
24.070	Severability.

24.010 Definitions.

“Agricultural land” means land designated in the Land Use Element of the Mono County General Plan as “Agricultural,” regardless of the minimum acreage associated with the designation.

“Agricultural activity, operation, or facility or appurtenances thereof” (herein collectively referred to as “agricultural operations”) means and includes, but is not limited to the cultivation and tillage of the soil, dairying, the production cultivation, growing, and harvesting of any agricultural commodity including timber, viticulture, apiculture, or horticulture, the raising of livestock, fur bearing animals, fish, or poultry, and any practices performed by a farmer or on a farm as incident to or in conjunction with those farming operations, including preparation for market, delivery to storage or to market, or delivery to carriers for transportation to market.

24.020 Findings.

The Board of Supervisors finds that it is in the public’s interest to preserve and protect agricultural land and agricultural operations within Mono County. The Board of Supervisors also finds that when nonagricultural land uses occur in or near agricultural areas, agricultural operations frequently become the subjects of nuisance complaints due to the lack of information about such operations. Such actions discourage investments in farm improvements to the detriment of agricultural uses and the viability of the county’s agricultural industry as a whole.

24.030 Purpose and intent.

The purposes of this chapter are to protect agricultural operations on land designated as Agricultural from conflicts with adjacent or nearby non-agricultural land uses, to support and encourage continued agricultural operations in the county, and to forewarn prospective purchasers of property located adjacent to or near agricultural operations of the inherent attributes of such purchase including, but not limited to, the sounds, odors, dust and chemicals that may accompany agricultural operations so that such purchasers and residents will understand the inconveniences that accompany living near agricultural operations and be prepared to accept those inconveniences as the natural result of living in or near agricultural lands.

This chapter is not to be construed as in any way modifying or abridging state law as set out in the California Civil Code, Health and Safety Code, Fish and Game Code, Food and Agricultural Code, Water Code, or any other applicable provision of state law relative to nuisance.

24.040 Nuisance.

No agricultural operation conducted or maintained for commercial purposes and in a manner consistent with proper and accepted standards within the agricultural industry as established and followed by similar agricultural operations in the same locality, shall be or become a nuisance, private or public, due to any changed condition in or about the locality, after the same has been in operation for more than three years if it was not a nuisance at the time it began.

24.050 Disclosure.

A. The County of Mono recognizes the statewide policy to protect and encourage agriculture. Sections 3482.5 and 3482.6 of the California Civil Code and Section 24.040 of the Mono County General Plan protect certain preexisting agricultural production and processing operations (“agricultural operations”) from nuisance claims. If your property is near a protected agricultural operation, you may be subject to certain inconveniences and/or discomforts which are protected by law. In order for the agricultural operation to be protected, the following requirements of Civil Code Sections 3482.5 and 3482.6 must be satisfied:

1. The agricultural operation must be conducted or maintained for commercial purposes;
2. The agricultural operation must be conducted or maintained in a manner consistent with proper and accepted customs and standards as established and followed by similar agricultural operations in the same locality;
3. The agricultural operation must predate the affected use(s) on your property;
4. The agricultural operation must have been in existence for more than three years; and
5. The agricultural operation must not have been a nuisance at the time it began.

B. If your property is near an agricultural operation in the unincorporated area of the county, which satisfies the above requirements, you may at times be subject to inconvenience and/or discomfort arising from that operation. Such inconvenience may include (depending upon the type of agricultural operation protected), but is not necessarily limited to, the following: noise, odors, fumes, dust, legal pesticide use, fertilizers, smoke, insects, farm personnel and truck traffic, visual impacts, night time lighting, operation of machinery and the storage, warehousing and processing of agricultural products or other inconveniences or discomforts associated with the protected agricultural operations. For additional information pertaining to this disclosure and the county’s Right-to-Farm standards as set forth in the county General Plan, or

concerns with an agricultural operation, please contact the Mono County Agricultural Commissioner's office.

- C. This disclosure statement is given for informational purposes only and nothing in this chapter or in the disclosure statement shall prevent anyone from complaining to any appropriate agency or taking any other available remedy concerning any unlawful or improper agricultural practice.
- D. The disclosure statement set forth above shall be used as described in Section 24.060.

24.060 Notification.

Upon any transfer of real property located in the unincorporated area of the county by sale, exchange, installment land sale contract (as defined in Civil Code Section 2985), lease with an option to purchase, any other option to purchase, ground lease coupled with improvements, residential stock cooperative, improved with or consisting of not less than one nor more than four dwelling units, or resale transaction for a manufactured home (as defined in Health and Safety Code Section 18007) or a mobile home (as defined in Health and Safety Code Section 18008), which manufactured home or mobile home is classified as personal property and intended for use as a residence, the transferor shall deliver to the prospective transferee the written disclosure statement required by this chapter. The disclosure statement shall be delivered in the manner set forth in Civil Code Sections 1102.2 and 1102.10. Exceptions to the applicability of this section are set forth in Civil Code Section 1102.2. The written disclosure shall be set forth in, and shall be made on a copy of, the following disclosure form:

LOCAL OPTION
REAL ESTATE TRANSFER DISCLOSURE STATEMENT

THIS DISCLOSURE STATEMENT CONCERNS THE REAL PROPERTY SITUATED IN THE UNINCORPORATED AREA OF THE COUNTY OF MONO, STATE OF CALIFORNIA, DESCRIBED AS _____. THIS STATEMENT IS A DISCLOSURE OF THE CONDITION OF THE ABOVE PROPERTY IN COMPLIANCE WITH CHAPTER 24 OF THE MONO COUNTY GENERAL PLAN AS OF _____, 2006. IT IS NOT A WARRANTY OF ANY KIND BY THE SELLER(S) OR ANY AGENT(S) REPRESENTING ANY PRINCIPALS(S) IN THIS TRANSACTION, AND IS NOT A SUBSTITUTE FOR ANY INSPECTIONS OR WARRANTIES THE PRINCIPAL(S) MAY WISH TO OBTAIN.

I.

SELLER'S INFORMATION

The Seller discloses the following formation with the knowledge that even though this is not a warranty, prospective Buyers may rely on this information in deciding whether and on what terms to purchase the subject property. Seller hereby authorizes any agent(s) representing any principal(s) in this transaction to provide a copy of this statement to any person or entity in connection with any actual or anticipated sale of the property.

THE FOLLOWING ARE REPRESENTATIONS MADE BY THE SELLER(S) AS REQUIRED BY THE COUNTY OF MONO, AND ARE NOT THE REPRESENTATIONS OF THE AGENT(S) IF ANY. THIS INFORMATION IS A DISCLOSURE AND IS NOT INTENDED TO BE PART OF ANY CONTRACT BETWEEN THE BUYER AND SELLER.

“The County of Mono recognizes the statewide policy to protect and encourage agriculture. Sections 3482.5 and 3482.6 of the California Civil Code and Section 24.040 of the Mono County General Plan protect certain preexisting agricultural production and processing operations (“agricultural operations”) from nuisance claims. If your property is near a protected agricultural operation, you may be subject to certain inconveniences and/or discomforts which are protected by law. In order for the agricultural operation to be protected, the following requirements of Civil Code Sections 3482.5 and 3482.6 must be satisfied:

1. The agricultural operation must be conducted or maintained for commercial purposes;
2. The agricultural operation must be conducted or maintained in a manner consistent with proper and accepted customs and standards as established and followed by similar agricultural operations in the same locality;
3. The agricultural operation must predate the affected use(s) on your property;
4. The agricultural operation must have been in existence for more than three years; and
5. The agricultural operation must not have been a nuisance at the time it began.

If your property is near an agricultural operation in the unincorporated area of the county, which satisfies the above requirements, you may at times be subject to inconvenience and/or discomfort arising from that operation. Such inconvenience may include (depending upon the type of agricultural operation protected), but is not necessarily limited to, the following: noise, odors, fumes, dust, legal pesticide use, fertilizers, smoke, insects, farm personnel and truck traffic, visual impacts, night time lighting, operation of machinery and the storage, warehousing and processing of agricultural products or other inconveniences or discomforts associated with the protected agricultural operations. For additional information pertaining to this disclosure and the county’s Right-to-Farm standards as set forth in the county General Plan, or concerns with an agricultural operation, please contact the Mono County Agricultural Commissioner’s office.”

24.070 Severability.

If any section or provision of this chapter or the application thereof to any person or circumstance is held invalid or unconstitutional by a court of competent jurisdiction, such invalidity or unconstitutionality shall not affect any other section or application of this chapter which can be given effect without the invalid or unconstitutional provision or application.

DEVELOPMENT STANDARDS

CHAPTER 25 – TRANSIENT RENTAL OVERLAY DISTRICT

Sections:

25.010	Intent.
25.020	Establishment of district.
25.030	Uses permitted.
25.040	Uses permitted subject to director review.
25.050	Uses permitted subject to use permit.
25.060	District requirements
25.070	Additional requirements.

25.010 Intent.

The Transient Rental Overlay District is intended to provide additional tourism-based economic opportunities and homeowner economic stability by allowing a transient rental district to be overlaid on properties within residential neighborhoods exhibiting support for allowing transient rentals. The land use designation followed by the letters TR (e.g., SFR-TR) would indicate a Transient Rental Overlay District.

25.020 Establishment of district.

The transient rental district may be overlaid on any residential neighborhood, parcel, or group of parcels meeting the requirements of 25.060, and having land use designation(s) of SFR, ER, RR, MFR-L or RMH. In addition to the requirements of this chapter, initiation and application of a Transient Rental Overlay District shall be processed in the same manner as any land use redesignation (see Ch. 48, Amendments I. General Plan Map/Land Use Designation Amendments).

25.030 Uses permitted.

The following uses shall be permitted in the Transient Rental Overlay District, plus such other uses as the commission finds to be similar and not more obnoxious or detrimental to the public safety, health and welfare:

- A. All uses permitted in the underlying land use designation.
- B. Where the principal use of the subject parcel(s) is single-family or multi-family residential the residence or any accessory dwelling unit on the parcel(s), may be rented on a transient basis subject to the requirements of 25.070.

25.040 Uses permitted subject to director review.

All uses permitted subject to director review in the underlying land use designation with which the Transient Rental Overlay District is combined shall be permitted, subject to director review approval.

25.050 Uses permitted subject to use permit.

All uses permitted subject to use permit in the underlying land use designation with which the Transient Rental Overlay District is combined shall be permitted, subject to securing a use permit.

25.060 District requirements.

A. Overlay district area and overlay district formation noticing process:

A Transient Rental Overlay District may be applied to one or more existing legal parcels, provided that at least one parcel within the district is developed with a single-family or multi-family residence.

Applicants are strongly encouraged to propose districts made up from three or more parcels and to communicate with all adjacent property owners before submitting an application.

Applications for transient overlay districts consisting of one or two parcels will require an overlay district formation noticing process prior to public hearing. Notice shall be provided to all property owners adjacent to the proposed transient overlay district and include a 20-day period for noticed property owners to request inclusion in the district.

B. Overlay District shape:

New Transient Rental Overlay Districts consisting of more than one parcel and district additions shall be contiguous, compact and orderly in shape as determined by the Planning Commission. Factors used to determine compact and orderly district shape include but are not limited to:

1. Street-frontage sharing
2. Adjoining yards
3. Existing neighborhood separation characteristics such as
 - a. Subdivision boundaries
 - b. Major roads
 - c. Natural features
 - d. Large undeveloped parcels
 - e. Commercial or civic land use

25.070 Additional requirements.

Any person or entity that leases, rents, or otherwise makes available for compensation, a single-family or multi-family residence located within a Transient Rental Overlay District designated by this chapter, for a period of less than thirty (30) days, must first obtain a vacation home rental permit and comply with all applicable requirements of that permit, as set forth in Chapter 26, Transient Rental Standards and Enforcement.

Parcels located within conditional development zones (avalanche) shall not be allowed transient rentals during the avalanche season, November 1 through April 15.

DEVELOPMENT STANDARDS

CHAPTER 26 – TRANSIENT RENTAL STANDARDS & ENFORCEMENT

Sections:

26.010	Purpose and Findings.
26.020	Vacation Home Rental Permit.
26.030	Application and Issuance of a Vacation Rental Permit.
26.040	Standards and Requirements.
26.050	Rental Agreement and Owner Responsibility.
26.060	Compliance with Transient Occupancy Tax Requirements.
26.070	Enforcement.
26.080	Existing and Otherwise Permitted Rentals.
26.090	Unauthorized Rentals Prohibited.

26.010 Purpose and Findings.

- A. The purpose of this chapter is to implement procedures, restrictions, and regulations, and to provide for the payment of transient occupancy tax and applicable fees for the transient rental of properties within Transient Rental Overlay Districts designated pursuant to Chapter 25 of the Mono County General Plan and to provide enhanced enforcement tools to address unauthorized transient rentals countywide.
- B. The Board of Supervisors finds that allowing transient rentals within areas of the county designated for residential use will provide a community benefit by expanding the number and types of lodging available to visitors to Mono County, increasing the use of property within the county, and providing revenue to property owners so that the units may be maintained and upgraded.
- C. The Board of Supervisors also finds that the operation of transient rentals within residential communities should be regulated in order to minimize fire hazard, noise, traffic, and parking conflicts and disturbance to the peace and quiet. The Board further finds that current enforcement tools have been ineffective to address the illegal operation of transient rentals countywide, primarily because the penalty amount is easily offset by the revenue such uses generate.

26.020 Vacation Home Rental Permit.

Any person who rents a residential structure that is not a condominium (hereinafter “rental unit” or “property”) within an area of the county designated as a transient overlay district on a transient basis shall comply with the provisions of this chapter, the Mono County General Plan, and any applicable area plans or specific plans. Transient rental of a private residence within a transient overlay district without a valid vacation home rental permit is a violation of this chapter.

26.030 Application and Issuance of a Vacation Home Rental Permit.

- A. Applicant. An applicant for a vacation home rental permit shall be either the owner of title to the subject property or his or her expressly authorized representative. The authorization shall be in writing and notarized.
- B. Application. An application for a vacation home rental permit shall be on a form that may be obtained from the Department of Finance or the Community Development Department. The following requirements and approvals must be met and substantiated before a vacation home rental permit will be issued:
 - 1. The rental unit must be located within an area of the county designated as a transient overlay district.
 - 2. The rental unit must comply with the standards and requirements as set forth in section 26.040, and any other requirement provided by this chapter. An inspection to verify compliance with such requirements shall be the responsibility of the owner or designated property manager. The owner or property manager shall certify in writing, under penalty of perjury, the rental unit's conformance with such standards. Such certification shall be submitted to the Mono County Community Development Department prior to permit issuance.
 - 3. The applicant must designate the management company or property manager for the rental unit who will be available on a 24-hour basis to address any problems that may be associated with the property or the transient users of the property. The management company or property manager must be duly licensed, and shall be in good standing with the County. Alternatively, the property owner may serve as the property manager.
 - 4. The property must be certified by the Community Development Department as complying with parking requirements and any applicable land use regulations set forth in the Mono County General Plan.
 - 5. A Mono County business license must be obtained and must remain active during all times that the property is used as a transient rental.
 - 6. Any required fees must be paid in full.
 - 7. A Mono County Transient Occupancy Certificate must be obtained from the Department of Finance and will be issued at the time the vacation home rental permit is issued and all conditions of approval have been met.

26.040 Standards and Requirements.

The following standards and requirements must be met in order to obtain a vacation home rental permit and to maintain that permit in good standing:

- A. Health and Safety Standards. The purpose of these standards is to establish minimum requirements to safeguard the public safety, health, and general welfare from fire and other hazards, and to provide safety to firefighters and

emergency responders during emergency operations. These standards include without limitation:

1. The address of the rental unit must be clearly visible.
2. Carbon monoxide and smoke detectors must be installed and maintained in good operating condition in each bedroom, sleeping area, or any room or space that could reasonably be used as a sleeping area, and at a point centrally located in the corridor or area giving access to each separate sleeping room.
3. All stairs, decks, guards, and handrails shall be stable and structurally sound.
4. The rental unit shall be equipped with a minimum of one (1) 2A:10B:C type fire extinguisher with no more than seventy five (75) feet of travel distance to all portions of the structure; there shall be no fewer than one such extinguisher per floor. Fire extinguishers shall be mounted in visible locations with the tops of the fire extinguishers mounted between three (3) and five (5) feet above the floor and shall be accessible to occupants at all times. California State Fire Marshal annual certification tags must be provided and be current on all extinguishers.
5. If there is a fireplace or solid-fuel barbecue, the rental unit shall be equipped with a minimum five-gallon metal container with a tight-fitting lid for ash removal. This container shall be clearly labeled and constructed to meet the purpose of containing ash. Instructions on the proper disposal of ash shall be stated in the rental agreement and clearly posted in the rental unit. The ash container shall not be placed on or near any furniture or other combustible material; ashes must be wet down thoroughly with water; the ash can must be stored outdoors with a minimum of three (3) feet clearance from building, porch, trees, and other combustible materials; the lid must remain on the ash container when in use.
6. Wall or baseboard heaters in the rental unit shall be in good working condition, and instructions on the proper use of these units shall be clearly stated in the rental agreement and posted in the rental unit.
7. Furniture and any other material that may be flammable shall be kept a minimum of 54 inches from any fireplace opening and 30 inches from any wall or floor heaters.
8. Flammable or hazardous liquid or materials, firearms, controlled substances, or any unlawful material shall not be stored in the rental unit.
9. The roof and grounds of the transient rental property shall be kept clear of accumulations of pine needles, weeds, and other combustible materials.
10. Any locking mechanism on exterior doors must be operable from inside the unit without the use of a key or any special knowledge. If the dwelling unit is

greater than three thousand (3,000) square feet in area, two exit doors shall be required, each of which shall conform to this requirement.

11. All fixtures, appliances, furnaces, water heaters, space heaters, plumbing, wiring, electrical, propane or gas connections, doors, windows, lighting, and all parts of the structure and furnishings (interior and exterior) must be in operable working condition and repair.
12. If telephone service is available, there shall be a telephone connected to the local carrier and in working condition for use in the event of an emergency or to contact the owner or property manager. The phone shall be connected to the reverse 911 directory. If there is no telephone service available, then the rental agreement must so state.
13. Bedroom windows shall be operable and free of obstructions to allow for emergency escape and rescue.
14. There shall be at least one screened window per bedroom to allow for proper ventilation.
15. All utilities (electric, gas, water, sewage, etc.) shall be connected, in good operating condition, and connected to approved sources.
16. Any hot tubs, pools, and spas shall be fenced or equipped with a cover with locking mechanisms, and shall be maintained in a safe and sanitary condition.
17. There shall be no evidence of pest infestations, and all firewood and other stored items shall be kept in a neat and clean condition.
18. Exits shall be kept free from storage items, debris or any impediments at all times.
19. No tree limbs are allowed within ten (10) feet of any chimney or flue openings.
20. Spark arresters of a minimum opening size of three-eighths (3/8) inch and a maximum opening size of one-half (1/2) inch shall be required on all fireplace flue openings.
 21. If any applicable law, rule, or regulation enacted after the enactment of this chapter imposes requirements more stringent than those set forth herein, such requirements shall apply.

B. Sign and Notification Requirements.

1. Exterior Sign and Notice. Each rental unit shall be equipped with one temporary exterior identification sign not to exceed 8 ½ by 11 inches in size that shall be posted as long as the unit is being rented on a transient basis. This identification sign shall be placed in a location that is clearly visible from the front entrance of the unit, and may be illuminated in a manner that

does not conflict with any County exterior lighting standards or signage standards. This sign shall clearly state the following information in lettering of sufficient size to be easily read:

- a. The name of the managing agency, agent, property manager or owner of the unit and the telephone number where said person or persons can be reached on a 24-hour basis.
 - b. The maximum number of occupants permitted to stay in the unit.
 - c. The maximum number of vehicles allowed to be parked on the property. A diagram fixing the designated parking location shall be included.
2. Interior Notice. Each rental unit shall have a clearly visible and legible notice posted within the unit adjacent to the front door that shall contain the same information set forth above, and shall additionally include the following:
- a. Notification and instructions about the proper disposal of trash and refuse, including any bear-safe disposal requirements.
 - b. Notification and instructions concerning the proper use of any appliances, fireplaces, heaters, spas, or any other fixture or feature within the unit.
 - c. Notification that failure to conform to the parking, trash disposal and occupancy requirements for the rental unit shall be a violation of this Chapter and may result in immediate removal from the premises and administrative, civil or criminal penalty.
 - d. Notification that any violation of rules or regulations set forth in the Rental Agreement may be a violation of this Chapter and may result in immediate removal from the premises and administrative, civil or criminal penalty.
 - e. Physical street address of the unit and emergency contact information consisting of 911, the property manager's phone number, and contact information of the local fire department and the Mono County Sheriff's Department.
- C. Occupancy. The maximum number of persons who may occupy the property as transient renters or their overnight guests shall be limited to two persons (2) per bedroom plus two (2) additional persons. In no event may the maximum occupancy exceed ten (10) persons in any rental unit unless the unit is certified and approved by the Mono County Building Official as meeting all applicable building standards for such occupancy. Additionally, occupancy may be further restricted by the limitation of the septic system serving the dwelling as determined by Mono County Environmental Health.
- D. Parking. Parking requirements shall be based on the parking requirements set forth in the Mono County General Plan. Parking requirements for the rental unit

shall be noticed in the rental agreement and posted on and in the unit. There shall be no parking allowed off-site or on-street, and parking on property owned by other persons shall be considered a trespass. A violation of this section may subject any person to administrative, civil and criminal penalty, including fines and towing of any vehicle, as authorized by state and local law.

- E. **Trash and Solid Waste Removal.** A sufficient number of trash receptacles shall be available. Trash and other solid waste shall not be allowed to accumulate in or around the property and shall be removed promptly to a designated landfill, transfer station or other designated site. For purposes of this paragraph, promptly shall mean at least one time per week during any week that the unit is occupied, regardless of the number of days it is occupied. Any trash receptacles located outside a unit shall be in bear-proof containers and comply with County standards. Trash removal requirements for each rental unit shall be included in the rental agreement and posted on and in the property. Property management shall be responsible for the cleanup if the tenants do not properly dispose of trash in bear-proof containers.
- F. **Snow Removal.** Snow removal from driveways, walkways, stairs, decks, and all exits and entrances shall be performed prior to each occupancy period, and during any occupancy period as needed to maintain the functionality of these areas. Snow removal from driveways, pathways, exits and entrances, and removal of snow, ice, and ice dams from roofs, decks, and stairs shall be performed in a timely manner as necessary to protect any person who may be using or visiting the rental unit.

26.050 Rental Agreement and Owner Responsibility.

- A. **Rental Agreement.** The temporary rental or use of each rental unit shall be made pursuant to a rental agreement. The rental agreement shall include, as attachments, a copy of this Chapter and the vacation home rental permit for the unit. Each rental agreement shall contain all required notices and shall specify the number of persons who may occupy the unit, parking requirements and number of allowed vehicles, trash disposal requirements, and include the telephone number of the person or persons to be notified in the event of any problem that arises with the rental. The agreement shall include the phone number, address, and contact information for the person responsible for renting the unit, and any other information required by the county. The rental agreement shall notify the renters that they may be financially responsible and personally liable for any damage or loss that occurs as a result of their use of the unit, including the use by any guest or invitee. The property manager or owner shall keep a list of the names and contact information of the adult guests staying in the unit.
- B. **Owner Responsibility.**
 - 1. The owner, managing agency, and property manager shall be responsible for compliance with all applicable codes regarding fire, building and safety, health and safety, other relevant laws, and the provisions of this chapter.

2. An owner, managing agency, and/or property manager shall be personally available by telephone on a 24-hour basis to respond to calls regarding the conditions and/or operation of the unit. Failure to timely respond in an appropriate manner may result in revocation of the vacation home rental permit and business license.
3. The owner shall require, as a term of a written agreement with a management company or agent, that said agent comply with this chapter. The owner shall identify the management company or agent, including all contact and license information in the application for a vacation home rental permit, and shall keep this information current. Such agreement shall not relieve owner of its obligation to comply with this chapter.
4. The owner shall maintain property liability and fire insurance coverage in an appropriate amount and shall provide proof of such insurance to county upon reasonable request. Additionally, the owner shall defend, indemnify, and hold the county harmless from any and all claims, judgments, liabilities, or other costs associated with the property or the rental unit, or the rental thereof.
5. The owner, managing agency, property manager and guest shall comply with all lawful direction from any law enforcement officer, fire official, building official, or code compliance officer.
6. The owner shall be responsible for assuring that the occupants and/or guests of the rental property do not create unreasonable noise or disturbances, engage in disorderly conduct, or violate any law. If an owner, property manager, or other agent of the owner is informed about any violation of this chapter, the owner, property manager, or owner's agent shall promptly take action and use best efforts to stop or prevent a recurrence of such conduct, including, when appropriate, calling law enforcement.

26.060 Compliance with Transient Occupancy Tax Requirements.

Each owner shall be responsible for obtaining a transient occupancy registration certificate and for complying with Chapter 3.28 of the Mono County Code. An owner may contract with a management company or property manager to collect, disburse, report, and maintain all records related to transient occupancy tax, but the owner remains responsible for any failure to collect, disburse, or accurately report such tax.

26.070 Enforcement.

- A. A violation of any provision of this chapter, and/or the renting of any property in a land use designation that does not allow for such transient rental, or without proper land use approvals, is subject to the General Penalty provisions and/or the Administrative Citation provisions set forth in Section 1.04.060 and Chapter 1.12 of the Mono County Code, respectively, and any other civil or administrative remedy allowed by law. Notwithstanding Section 1.12.030, the administrative fine for the operation of any transient rental facility within a transient overlay district without a valid vacation home rental permit, or the operation of any transient rental facility in violation of applicable land use

requirements in any other land use designation of the county shall be one thousand dollars (\$1,000) for the first violation and two thousand dollars (\$2,000) for a second or subsequent violation within three years. In addition to these penalty provisions, the failure to comply with any provision of this chapter may result in the suspension or revocation of the vacation home rental permit in accordance with subsection D below, or the suspension or revocation of the business license and/or transient occupancy registration certificate. The failure of a management company or property manager to comply with the provisions of this chapter may additionally result a finding that such management or company or property manager is not in good standing.

- B. An inspection and/or audit of each unit subject to this chapter, and any contract or agreement entered into in furtherance of, or to implement, this chapter, may be made at any reasonable time, and upon reasonable notice to confirm compliance with this chapter.
- C. Transient rentals may not be conducted if there are any code violations, stop-work orders, or other violation of law or regulation outstanding on the property.
- D. The following procedures shall be followed in conjunction with any proposed revocation or suspension of a vacation home rental permit.
 - 1. The County shall provide the property owner with a notice of proposed revocation or suspension stating the nature of the violation, whether revocation or suspension is proposed, and the date, time, and place of a hearing before a hearing officer, who shall be a Planning Commissioner appointed for this purpose by the County Administrative officer, will be held. The notice shall be served on the owner at least 10 business days prior to the date of the hearing by personal service or by certified mail, postage prepaid, return receipt requested to the address for such purpose provided on the vacation home rental permit application. Service by mail shall be deemed effective on the date of mailing.
 - 2. At the hearing, the hearing officer shall consider any written or oral evidence consistent with the following:
 - a. The contents of the County's file shall be accepted into evidence (except as to such portions of the file, if any, that contain confidential or privileged information); and
 - b. The notice of revocation or suspension shall be admitted as prima facie evidence of the facts stated therein.
 - 3. The hearing officer shall independently consider the facts of the case and shall draw his or her own independent conclusions.
 - 4. Upon conclusion of the hearing and receipt of information and evidence from all interested parties, the hearing officer shall render his or her decision

affirming the revocation or suspension as proposed, modifying the revocation or suspension, or rejecting the revocation or suspension.

5. If directed by the hearing officer, staff shall prepare a written decision reflecting the hearing officer's determination. Following approval of the written decision by the hearing officer, the clerk of the Planning Commission shall serve the written decision on the property owner by certified mail, postage prepaid, return receipt requested.
 6. The decision of the hearing officer shall be the final administrative action of the county, and the property owner shall be advised of his rights to challenge that decision in Superior Court pursuant to section 1094.5 of the Code of Civil Procedure and of the timelines in which such an action must be brought.
- E. Notwithstanding the foregoing, in the event the code compliance officer determines that suspension or suspension pending revocation of a vacation home rental permit is necessary for the immediate protection of the public health, safety, or welfare, such suspension may be made without prior hearing or determination by the hearing officer, upon the giving of such advance notice to the property owner as the code compliance officer deems reasonable given the nature of the violation and risks presented. The code compliance officer shall inform the property owner in writing of the duration of the suspension, the reasons therefor, the procedure and timelines for filing an appeal, in accordance with the following:
1. The property owner may appeal the suspension by filing an appeal with the clerk of the Planning Commission within 10 calendar days of the date the suspension or revocation takes effect. Such appeal shall also function as a hearing on revocation of the permit, if the suspension is made pending revocation. In the event the property owner does not appeal a suspension pending revocation within the time provided, then the suspension shall automatically become a revocation if notice of such was included in the notice of the suspension.
 2. The hearing shall be in accordance with the procedures set forth in section D above.
 3. The suspension shall remain in effect for the number of days provided by the code compliance officer, or until the appeal/revocation hearing is finally decided by the hearing officer, whichever occurs later, unless extended by the Board.
- F. When a vacation home rental permit is revoked pursuant to the procedures set forth in this chapter, a new vacation home rental permit may not be issued to the same property owner for a period of five years.

26.080 Existing and Otherwise Permitted Rentals.

Any lawful use of property as a transient rental occurring, or subsequently authorized, in a land use designation which permits such uses (or permits such uses subject to Use

Permit or Director Review approval) without the application of a transient overlay district shall be exempt from the provisions of this chapter.

26.090 Unauthorized Rentals Prohibited.

The transient rental of any property, unit, or structure which is not within a designated transient overlay district or within a land use designation that permits such use and for which all necessary approvals have been granted, is prohibited. Any violation of this section shall be subject to the provisions of section 26.070, including the fines set forth therein.

PROCESSING

CHAPTER 30 – GENERAL

Sections:

- 30.010 Preapplication conference.**
- 30.020 LDTAC review.**
- 30.030 Environmental review.**
- 30.040 Project modifications.**

30.010 Preapplication conference.

Prior to submitting an application for a discretionary project, the County encourages applicants to contact the Planning Division or, in the case of energy-related projects, the Economic Development Department, for a preliminary review of the project concept and an informal identification of probable concerns.

For complex or potentially controversial projects, a prospective applicant should attend a preapplication conference with the Land Development Technical Advisory Committee (LDTAC) to refine the project design in order to avoid anticipated impacts and to ensure compliance with federal, state and local regulations. The preapplication conference also provides an opportunity to discuss the permit process, the environmental review process, and time frames for the project.

For the preapplication conference, the applicant shall provide a project description, a conceptual site plan and any other information that the Planning Division deems relevant to the application.

30.020 LDTAC Review.

The Land Development Technical Advisory Committee (LDTAC) consists of the Director of Public Works, the Community Development Director and the Health Officer, and any other affected County departments, or their designated representatives. The committee acts in a technical capacity to the Planning Commission by reviewing discretionary projects prior to the initial hearing before the Planning Commission. The purpose of the LDTAC review is to discuss the project and proposed conditions/mitigation measures with the applicant and/or project engineer, to provide solutions for potential concerns, and to ensure that the project complies with federal, state and local regulations.

In addition to reviewing discretionary permit applications, the LDTAC approves lot line adjustments and makes written recommendations to the Planning Commission on subdivisions and land divisions. The LDTAC also participates in preapplication conferences.

30.030 Environmental Review.

Applications for discretionary permits are subject to environmental review and assessment, as provided in the Mono County Environmental Handbook.

30.040 Project modifications.

During preapplication and application processing, County staff and, when applicable, staff from applicable federal, state and local agencies, shall work with projects applicants to ensure that the proposed development is of the highest quality and is consistent with or, when reasonably feasible, exceeds Mono County General Plan policies and the implementing standards in the Land Development Regulations.

Those policies and standards shall be viewed as minimum requirements; development should strive to exceed those minimums whenever reasonably feasible. County staff may require project modifications as necessary to implement this subsection.

PROCESSING

CHAPTER 31 – DIRECTOR REVIEW

Sections:

31.010	Director review permit.
31.020	Director review permit with notice.
31.030	Findings.
31.040	Director action.
31.050	Notice of decision.
31.060	Effect of decision.
31.070	Termination.
31.080	Extensions.
31.090	Revocation.

31.010 Director review permit.

This procedure allows the Director to issue a permit for planning projects without the delay and expense of a public hearing as long as the project is exempt from CEQA, and is not controversial or environmentally sensitive.

When reviewing a request for Director Review, the Director may require that the applicant submit in such form and type as the Director may specify, additional information as may be deemed relevant to the application.

If the Director determines during the application review that the project is controversial, is environmentally sensitive, or is not Categorical Exempt from CEQA then a use permit shall be required per Chapter 32.

31.020 Director review permit with notice.

Unless the matter has been referred to the Planning Commission per the provisions of 31.010, it shall be the responsibility of the Director to determine if the application warrants notice to contiguous property owners (see Noticing Requirements, Chapter 46). Notice shall be given when the application may have an impact upon contiguous property owners and/or public agencies.

The notice shall be given after filing of application and after determination by the Director that the information submitted by the applicant is sufficient to consider the matter. The notice shall include a brief description of the project and specify the duration of the comment and response period.

The notice shall be designed to ensure that affected parties, including the Planning Commission, are aware of the pending application and are given a chance to comment prior to the Director's rendering a decision. Such notice shall also state the procedure to obtain a copy of the Director's decision.

31.030 Findings.

In order to issue a Director Review permit, the Director must find that all of the following are true:

- A. All applicable provisions of Land Use Designations and Land Development Regulations are complied with, and the site of the proposed use is adequate in size and shape to accommodate the use and to accommodate all yards, walls and fences, parking, loading, landscaping and other required features.
- B. The site for the proposed use relates to streets and highways adequate in width and type to carry the quantity and kind of traffic generated by the proposed use.
- C. The proposed use will not be detrimental to the public welfare or injurious to property or improvements in the area in which the property is located.
- D. The proposed use is consistent with the map and text of this General Plan and any applicable area plan.
- E. That the improvements as indicated on the development plan are consistent with all adopted standards and policies as set forth in the Land Development Regulations, this General Plan and any applicable area plan.
- F. That the project is exempt from CEQA.

31.040 Director action.

The Director, based upon available information, shall in writing, grant, grant in modified form or deny the requested use, or determine that a use permit will be required.

31.050 Notice of decision.

The Director shall give written notice of the decision to the applicant and engineer, Planning Commission and any other person, so requesting in writing, a copy of the notice of decision. The notice of decision shall set forth the procedure for filing appeals, specify any conditions of the permit, and include a summary of the Director's findings.

31.060 Effect of decision.

The Director Review permit shall become effective 15 days following the issuance of the Director's decision. During the 15-day period, an appeal may be filed in accordance with Chapter 47. If an appeal is filed, the permit will not be issued until the appeal is considered and a decision is rendered by the Planning Commission.

31.070 Termination.

A Director Review shall terminate and all rights granted therein shall lapse, and the property affected thereby shall be subject to all the provisions and regulations applicable to the land use designation in which such property is classified at the time of such abandonment, when any of the following occur:

- A. There is a failure to commence the exercise of such rights, as determined by the Director, within one year from the date of approval thereof. Exercise of rights

shall mean substantial construction or physical alteration of property in reliance with the terms of the Director Review.

- B. There is discontinuance for a continuous period of one year, as determined by the Director, of the exercise of the rights granted.
- C. No extension is granted as provided in Section 31.080.

31.080 Extensions.

If there is a failure to exercise the rights of the Director Review within one year of the date of approval, the applicant may apply for an extension for an additional one year. Any request for extension shall be filed at least sixty (60) days prior to the date of expiration and shall be accompanied by the appropriate fee. Upon receipt of the request for extension, the Planning Division shall review the application to determine the extent of review necessary. Conditions of approval for the Director Review may be modified or expanded, including revision of the proposal, if deemed necessary. The Planning Division may also deny the request for extension. Exception to this provision is permitted for those Director Reviews approved concurrently with a tentative parcel or tract map; in those cases the approval period(s) shall be the same as for the tentative map.

31.090 Revocation.

The Commission may revoke the rights granted by a Director Review and the property affected thereby shall be subject to all of the provisions and regulations of the Land Use Designations and Land Development Regulations applicable as of the effective date of revocation. Such revocation shall include the failure to comply with any condition contained in the Director Review or the violation by the owner or tenant of any provision pertaining to the premises for which such Director Review was granted. Before revocation of any permit, the Commission shall hold a hearing thereon after giving written notice thereof to the permittee at least 10 days in advance of such hearing. The decision of the Commission may be appealed to the Board of Supervisors in accordance with Chapter 47, Appeals, and shall be accompanied by an appropriate filing fee.

PROCESSING

CHAPTER 32 – USE PERMIT

Sections:

32.010	Required findings.
32.020	Application.
32.030	Hearing.
32.040	Action.
32.050	Notice of decision.
32.060	Termination.
32.070	Extensions.
32.080	Revocation.

32.010 Required findings.

Use permits may be granted by the Planning Commission only when all of the following findings can be made in the affirmative:

- A. All applicable provisions of the Land Use Designations and Land Development Regulations are complied with, and the site of the proposed use is adequate in size and shape to accommodate the use and to accommodate all yards, walls and fences, parking, loading, landscaping and other required features.
- B. The site for the proposed use relates to streets and highways adequate in width and type to carry the quantity and kind of traffic generated by the proposed use.
- C. The proposed use will not be detrimental to the public welfare or injurious to property or improvements in the area in which the property is located.
- D. The proposed use is consistent with the map and text of this General Plan and any applicable area plan.

32.020 Application.

Application for a use permit shall be made to the Planning Division, or the Economic Development Department for energy-related use permits, and shall be accompanied by the general application form, environmental documents, plans and elevations necessary to show details of the proposed use and/or structures and shall be accompanied by a fee, no part of which shall be returnable to the applicant. Fees shall not be required for public buildings and uses (see definition 02.940). If a preapplication conference has been determined to be appropriate; minutes from this conference shall accompany the application (see Site Plan Review).

The Director may waive use permit procedures specified in other chapters of the Land Development Regulations when sufficient standards have been adopted, the project is minor in nature, and the project is exempt from CEQA. Sufficient standards may include provisions included in the County Code, applicable general plan documents,

Board of Supervisors resolutions, planning and other County departments' procedures and standards, or responsible agencies' regulations.

32.030 Hearing.

A public hearing shall be held after filing of application and after determination by the Director that the information submitted by the applicant is sufficient to consider the matter. After making such determination, the Director shall give notice of the time, place and subject matter at a public hearing at least 10 days prior to the date set, as provided in Chapter 46, Noticing Requirements. Errors in the giving of notice or the failure of any person to receive notice shall not invalidate the proceeding.

Any hearing may be continued by a majority of the members of the Planning Commission present or, in the absence of a quorum, shall be continued by the secretary to a time and place certain, which shall be publicly announced, and no further notice shall be required except as may be required by California Government Code Sections 54955 and 54955.1.

32.040 Action.

Upon the close of the public hearing, the failure of the Commission to grant the use permit shall constitute a denial and disapproval of the use permit, unless action on the matter is continued to a later date. Refer to Chapter 47, Appeals, for specific procedures for appealing a denial. The Commission shall take action within one year or the application shall be deemed approved as per Chapter 4.5, Article 5, commencing with Section 65956 of the Government Code.

The Commission may designate such conditions in connection with the granting of the use permit as it deems necessary to secure compliance with the purpose of the Land Use Designations and Land Development Regulations, including street dedication, street and drainage improvements and such guarantees as it deems appropriate in accordance with protection of the public health, safety, and welfare. Whenever performance of any condition or accomplishment of any development is required by the granting of the use permit and the performance or accomplishment is to occur at or after a specified time, the Commission may require the record owner of the land involved to execute a covenant running with the land, in a form approved by the County Counsel, which shall contain the requirements imposed, and it shall be recorded in the office of the County Recorder. The Director shall issue and record releases from such covenants when they are no longer applicable to a property.

32.050 Notice of Decision.

The Director shall give notice of the decision of the Commission relating to use permits. All such notices shall be mailed to the applicant and engineer and any other persons, so requesting in writing within 10 days after the decision is made. The notice shall set forth the procedure for filing appeals.

Use permits shall not be issued until after 15 days have elapsed from the granting thereof, and if an appeal is filed as provided in Chapter 47, Appeals, such permit shall not be issued until the decision is made by the Board of Supervisors on such appeal.

32.060 Termination.

A use permit shall terminate and all rights granted therein shall lapse, and the property affected thereby shall be subject to all the provisions and regulations applicable to the land use designation in which such property is classified at the time of such abandonment, when any of the following occur:

- A. There is a failure to commence the exercise of such rights, as determined by the Director, within one year from the date of approval thereof. Exercise of rights shall mean substantial construction or physical alteration of property in reliance with the terms of the use permit.
- B. There is discontinuance for a continuous period of one year, as determined by the Director, of the exercise of the rights granted.
- C. No extension is granted as provided in Section 32.070.

32.070 Extensions.

If there is a failure to exercise the rights of the use permit within one year of the date of approval, the applicant may apply for an extension for an additional one year. Only one extension may be granted. Any request for extension shall be filed at least 60 days prior to the date of expiration and shall be accompanied by the appropriate fee. Upon receipt of the request for extension, the Planning Division shall review the application to determine the extent of review necessary and schedule it for public hearing. Conditions of approval for the use permit may be modified or expanded, including revision of the proposal, if deemed necessary. The Planning Division may also recommend that the Commission deny the request for extension. Exception to this provision is permitted for those use permits approved concurrently with a tentative parcel or tract map; in those cases the approval period(s) shall be the same as for the tentative map.

32.080 Revocation.

The Commission may revoke the rights granted by a use permit and the property affected thereby shall be subject to all of the provisions and regulations of the Land Use Designations and Land Development Regulations applicable as of the effective date of revocation. Such revocation shall include the failure to comply with any condition contained in the use permit or the violation by the owner or tenant of any provision pertaining to the premises for which such use permit was granted. Before the Commission shall consider revocation of any permit, the Commission shall hold a public hearing thereon after giving written notice thereof to the permittee at least 10 days in advance of such hearing. The decision of the Commission may be appealed to the Board of Supervisors in accordance with Chapter 47, Appeals, and shall be accompanied by an appropriate filing fee.

PROCESSING

CHAPTER 33 – VARIANCE

Sections:

33.010	Required findings.
33.020	Application.
33.030	Hearing.
33.040	Action.
33.050	Notice of decision.
33.060	Termination.
33.070	Extensions.
33.080	Revocation.

33.010 Required findings.

A variance from the provisions of the land use designations or land development regulations shall be granted only when all of the following findings can be made:

- A. Because of special circumstances (other than monetary hardship) applicable to the property, including its size, shape, topography, location or surroundings, the strict application of the provision of the land use designations or land development regulations deprives such property of privileges (not including the privilege of maintaining a nonconforming use or status) enjoyed by other property in the vicinity and in an identical land use designation; and,
- B. The grant of variance will not constitute a special privilege inconsistent with the limitations upon other properties in the vicinity and in the land use designation in which the property is situated; and,
- C. The grant of variance will not be detrimental to the public welfare or injurious to property or improvements in the area in which the property is situated; and,
- D. The grant of variance will not be in conflict with established map and text of the general and specific plans and policies of the County.

33.020 Application.

Application for a variance shall be made to the Planning Division and shall be accompanied by the general application form, environmental documents, plans and elevations necessary to show details of the proposed use and/or structure; and shall be accompanied by a fee, no part of which shall be returnable to the applicant. Fees shall not be required for public buildings and uses (see Definition 02.940).

33.030 Hearing.

A public hearing shall be held after filing of application and after determination by the Community Development Director that the information submitted by the applicant is sufficient to consider the matter. After making such determination, the Director shall

give notice of the time, place and subject matter of a public hearing at least 10 days prior to the date set therefore, as provided in Chapter 46, Noticing Requirements. Errors in the giving of notice or the failure of any person to receive notice shall not invalidate the proceeding.

Any hearing may be continued by a majority of the members of the Commission present or, in the absence of a quorum, shall be continued by the secretary to a time and place certain, which shall be publicly announced, and no further notice shall be required except as may be required by California Government Code Section 54955 and 54955.1.

33.040 Action.

The action by the Commission on any application for a variance shall be in the manner prescribed below.

Upon close of the public hearing, the failure of the Commission to grant the variance shall constitute a denial and disapproval for the variance, unless action on the matter is continued to a later date. Refer to Chapter 47, Appeals, for specific procedures for appealing a denial. The Commission shall take action within one year or the application shall be deemed approved as per Chapter 4.5, Article 5, commencing with Section 65956, of the Government Code.

The Commission may designate such conditions in connection with the granting of the variance as it deems necessary to secure compliance with the purpose of the land use designations and the land development regulations, including street dedication, street and drainage improvements and such guarantees as it deems appropriate. Whenever performance of any condition or accomplishment of any development is required by the granting of the variance and the performance or accomplishment is to occur at or after a specified time, the Commission may require the record owner of the land involved to execute a covenant running with the land, in a form approved by the County Counsel, which shall contain the requirements imposed, and it shall be recorded in the office of the County Recorder. The Director shall issue and record releases from such covenants when they are no longer applicable to a property.

33.050 Notice of decision.

The Director shall give notice of the decision of the Commission relating to variances. All such notices shall be mailed to the applicant and engineer and any other persons, so requesting in writing within 10 days after the decision is made. The notice shall set forth the procedure for filing appeals.

Variances shall not be issued until after 15 days have elapsed from the granting thereof, and if an appeal is filed as provided in Chapter 47, Appeals, such variance shall not be issued until the decision is made by the Board of Supervisors on such appeal.

33.060 Termination.

A variance shall terminate and all rights granted therein shall lapse, and the property affected thereby shall be subject to all of the provisions and regulations applicable to the land use designation in which such property is classified at the time of such abandonment, when any of the following occur:

- A. There is a failure to commence the exercise of such rights as determined by the Director within one year from the date of approval thereof. Exercise of rights shall mean substantial construction or physical alteration of property in reliance with the terms of the variance.
- B. There is discontinuance for a continuous period of one year, as determined by the Director, of the exercise of the rights granted.
- C. No extension is granted as provided in Section 33.070.

33.070 Extensions.

If there is a failure to exercise the rights of the variance within one year of the date of approval, the applicant may apply for an extension for an additional one year. Only one extension may be granted. Any request for extension shall be filed at least sixty (60) days prior to the date of expiration and shall be accompanied by the appropriate fee. Upon receipt of the request for extension, the Planning Division shall review the application to determine the extent of review necessary and schedule it for public hearing. Conditions of approval for the variance may be modified or expanded, including revision of the proposal, if deemed necessary. The Planning Division may also recommend that the Commission deny the request for extension. Exception to this provision is permitted for those variances approved concurrently with a tentative parcel or tract map; in those cases the approval period(s) shall be the same as for the tentative map.

33.080 Revocation.

The Commission may revoke the rights granted by a variance and the property affected thereby shall be subject to all of the provisions and regulations of Land Use Designations and Development Requirements applicable as of the effective date of revocation. Such revocation shall include the failure to comply with any condition contained in the variance or the violation by the owner or tenant of any provision of this general plan pertaining to the premises for which such variance was granted. Before the Commission shall consider revocation of any variance, the Commission shall hold a public hearing thereon after giving written notice thereof to the permittee at least ten days in advance of such hearing. The decision of the Commission may be appealed to the Board of Supervisors in accordance with Section 47, Appeals, and shall be accompanied by the appropriate filing fee.

PROCESSING**CHAPTER 34 – NONCONFORMING USES****Sections:**

34.010	General provisions.
34.020	Alterations to nonconforming uses, buildings and structures.
34.030	Mergers.

34.010 General provisions.

The lawful uses of land, buildings or structures existing on the effective date of the adoption of this general plan to the subject property, although such use does not conform to the land development regulations, may be continued except as provided in this chapter.

The regulations of this chapter are intended to set standards that will not inhibit the continued and/or expanded or altered use of such properties, provided that the general intent of the provisions of the land use designations and land development standards are met and that wherever practical, deficiencies are mitigated.

34.020 Alterations to nonconforming uses, buildings and structures.

The following criteria shall be considered by the Director during the review of any application to expand/alter a nonconforming use. Any alteration required by governmental or court action shall be exempt from these conditions and restrictions, and conditions affecting a nonconforming use shall apply to the existing use, land and structures and shall not be affected by ownership change.

- A. Alterations of the nonconforming use shall not be detrimental to or prevent the attainment of objectives, policies, general land use and programs specified in this General Plan.
- B. The granting of permission to alter the nonconforming use shall not be substantially detrimental to the public health, safety or welfare or injurious to the property or improvements in the vicinity and district in which the use is located.
- C. The alteration shall not change the primary use of the land or increase the intensity of that use.
- D. If the proposed alteration could generate public controversy, the Director shall refer the application to the Planning Commission for its consideration.
 1. Nonconforming Use of Land.
 - a. Expansion. The use may not be enlarged, increased or extended to occupy a greater area of land than that occupied by such use at the time of application of the land use designations and development standards to

the subject property unless it complies with 34.020 criteria 1 through 4. Such expansion or alteration shall not prolong the normal life of the nonconforming use.

- b. Discontinued use. If the nonconforming use of the land is discontinued for a period of six months (180) days or more, any subsequent use of the building is to conform to the requirements of the land use regulations and development standards.
2. Nonconforming Uses of Buildings.
 - a. Extension of Use. The use may be extended throughout the building provided that structural alterations are of a minor nature and are necessary to improve or maintain the health or safety of occupants or are required by law or ordinance.
 - b. Discontinued Use. If the nonconforming use of the building is discontinued for a period of six months (180 days) or more, any subsequent use of the building is to conform to the requirements of this General Plan.
 3. Nonconforming Structures.

Any structure which does not conform to yard, height, parking or lot coverage requirements of the land use designations may continue to be used as a lawful nonconforming use provided:

 - a. Alterations and Expansions. This structure may not be altered or expanded except for minor alterations necessary to improve or maintain the health and/or safety of the occupants or if required by law or ordinances unless the expansion will not unduly increase any aspects of nonconformity and complies with 34.020 criteria A through D.
 - b. Destroyed Structures. If the nonconforming structure is damaged or destroyed to 50% or more of its value for whatever reason (fire, explosion, act of God), the building and land shall then be subject to all requirements of this General Plan. Deviations to this requirement, such as rebuilding to a former size or in a previous location, may be permitted subject to a use permit. In no case may the intensity of use or size of the structure be increased beyond what existed before it was destroyed unless it complies with all current County requirements.
 4. Nonconforming Use – Animals.
 - a. Expansion and Replacement – Domestic. The number of nonconforming domestic animals may not be increased above the number existing on the effective date of application of the land use designation to the subject property. Deceased or relocated nonconforming animals may not be replaced except in conformance to the land use designations and land development regulations.

- b. Public Nuisance. Regardless of any other provision of this general plan, the keeping of any nonconforming animals may be declared a public nuisance by the Board of Supervisors upon recommendation of the Planning Division and/or Health Department and abated in accordance with Chapter 7.20, the Health and Welfare Title, Mono County Code, where the use is found to be dangerous or prevents the full use and enjoyment of neighboring properties.

34.030 Mergers.

- A. Two or more contiguous lots, parcels or units of land that were originally created under the provisions of the Subdivision Map Act or prior law regulating division of land or county ordinance enacted pursuant thereto shall not, except as provided below, be deemed merged by virtue of the fact that such contiguous lots, parcels or units of land are held by the same owner, and no further proceedings shall be required for the purpose of sale, lease or financing of such lots, parcels or units of land.
- B. If any one of the contiguous parcels or units of land held by the same owner does not conform to standards for minimum parcel size, under County land use designations, subdivision or other applicable ordinance, the lots shall be merged if all of the following requirements are satisfied:
 - 1. At least one of the affected parcels is undeveloped by any structure for which a building permit was issued or for which a building permit was not required at the time of construction, or is developed only with an accessory structure or accessory structures, or is developed with a single structure, other than an accessory structure, that is also partially sited on a contiguous parcel or unit.
 - 2. With respect to any affected parcel, one or more of the following conditions exists:
 - a. Comprises less than 5,000 sq. ft. in area at the time of the determination of merger.
 - b. Was not created in compliance with applicable laws and ordinances in effect at the time of its creation.
 - c. Does not meet current standards for sewage disposal and domestic water supply.
 - d. Does not meet slope stability standards.
 - e. Has no legal access which is adequate for vehicular and safety equipment access and maneuverability.
 - f. Its development would create health or safety hazards.
 - g. Is inconsistent with the applicable general plan and any applicable specific plan, other than minimum lot size or density standards.

C. Whenever real property is to be merged pursuant to this section, the following procedure shall be used:

1. Prior to recording a Notice of Merger, the Commission shall cause to be mailed by certified mail to the then current record owner of the property a Notice of Intention to determine status, notifying the owner that the affected parcels may be merged pursuant to standards specified in Section B, and advising the owner of the opportunity to request a hearing on determination of status and to present evidence at the hearing that the property does not meet the criteria for merger. The Notice of Intention to determine status shall be filed with the county Recorder on the date that notice is mailed to the property owner.
2. At any time within 30 days after recording of the Notice of Intention to determine status, the owner of the affected property may file with the Planning Division a request for hearing on determination of status.
3. Upon receiving a request for a hearing on determination of status, the Planning Division shall fix a time, date, and place for a hearing to be conducted and shall so notify the property owner by certified mail. The hearing shall be conducted not less than 30 days following the Planning Division's receipt of the property owner's request therefore, but may be postponed or continued with the mutual consent of the Planning Commission and the property owner.
4. At the hearing, the property owner shall be given the opportunity to present any evidence that the affected property does not meet the standards for merger specified in Section B.

At the conclusion of the hearing, the Planning Commission shall make a determination that the affected parcels are to be merged or are not to be merged and shall so notify the owner of its determination. A Determination of Merger shall be recorded within 30 days after conclusion of the hearing.

5. If, within the 30 day period specified in Section C-2, the owner does not file a "Request for a Hearing" in accordance with Section C-4, the Commission may, at any time thereafter, make a determination that the affected parcels are to be merged or are not to be merged. A Determination of Merger shall be recorded no later than 90 days following the mailing of notice required by Section C-3.
 6. If in accordance with Section C-4 or C-5, the Commission determines that the subject property shall not be merged, it shall cause to be recorded with the county Clerk Recorder a "Release of the Notice of Intention" to determine status, and shall mail a clearance letter to the then current owner of record.
- D. If the substandard, contiguous lots under common ownership may be merged in more than one way and comply with county General Plan, subdivision and other applicable ordinances, mergers by lot combination shall conform to any

configuration which the property owner(s) may request if, and only if, the following requirements can be satisfied:

1. The proposed mergers by lot combinations must be effected by utilization of existing lot lines;
 2. The parcels so created must meet all prescribed minimum standards under applicable land use designation requirements, including but not limited to lot area, lot width and access;
 3. Mergers of such contiguous, substandard lots under common ownership by lot combination may not result in the creation of more than four parcels; and
 4. The property owner shall submit a map specifically delineating the proposed mergers by lot combination on or before 15 days prior to the noticed hearing before the Commission on the intention to record the Notice of Merger.
- E. If the proposed mergers by lot combination do not meet each and every requirement as specified in subdivision D above, then each of such contiguous, substandard lots under common ownership shall be merged into one parcel that shall not thereafter be subdivided for the purpose of sale, lease or finance except by parcel or subdivision map pursuant to the Subdivision Map Act and the provisions of the Mono County Code enacted pursuant thereto.
- F. For purposes of determining whether contiguous parcels are held by the same owner, ownership shall be determined as of the date that a "Notice of Intention" to record notice of merger is recorded.
- Upon recording of the "Notice of Intention" to record notice of merger, no transfer of any interest in the notice lots, parcels or units of land may occur unless and until the Commission has held the noticed hearing and has rendered its decision.
- G. A merger of parcels becomes effective when the county Recorder causes to be filed for record with the county Clerk, a "Notice of Merger" specifying the names of the record owners and particularly describing the real property. The merged parcel shall not thereafter be subdivided for the purpose of sale, lease or financing except pursuant to the provisions of the Subdivision Map Act and the provisions of this chapter enacted pursuant thereto.
- H. Individual lots, parcels or units of land which are nonconforming, and which are under separate ownership that would preclude merger here under shall be permitted all uses in the district in which same are located; provided, that height, yards, distance between buildings, lot coverage, off-street parking, and other property development requirements shall be applicable.
- I. The provisions of this section are applicable to property designated in the Mono County General Plan for exclusive residential use, including all property designated as follows:

1. Rural Residential (RR);
2. Estate Residential (ER);
3. Rural Mobile Home (RMH);
4. Single-Family Residential (SFR);
5. Multiple-Family Residential (MFR);
6. Such other land use designations which may be created to allow exclusive residential use.

J. This subdivision shall not apply if one of the following conditions exists:

1. On or before July 1, 1981, one or more of the contiguous parcels or units of land is enforceably restricted open-space land pursuant to a contract, agreement, scenic restriction, or open-space easement, as defined and set forth in Section 421 of the Revenue and Taxation Code.
2. On July 1, 1981, one or more of the contiguous parcels or units of land is timberland as defined in subdivision (f) of Section 51100, or is land devoted to an agricultural use as defined in subdivision (b) of Section 51201.
3. On July 1, 1981, one or more of the contiguous parcels or units of land is located within 2,000 feet of the site on which an existing commercial mineral resource extraction use is being made, whether or not the extraction is being made pursuant to a use permit issued by the local agency.
4. On July 1, 1981, one or more of the contiguous parcels or units of land is located within 2,000 feet of a future commercial mineral extraction site as shown on a plan for which a use permit or other permit authorizing commercial mineral resource extraction has been issued by the local agency. For purposes of paragraphs (3) and (4) of this subdivision, "mineral resource extraction" means gas, oil, hydrocarbon, gravel, or sand extraction, geothermal wells, or other similar commercial mining.

PROCESSING

CHAPTER 35 – RECLAMATION PLANS

Sections:

35.010	Purpose and Intent.
35.020	Definitions.
35.030	Reclamation Plan Requirements.
35.040	Amendments.
35.050	Reclamation Standards.
35.060	Vested Surface Mining Operations.
35.070	Idle Mine Status.
35.080	Annual Inspections.
35.090	Administration.
35.100	Surety Required.
35.110	Enforcement.

35.010 Purpose and Intent.

It is the purpose of this chapter to provide standards and procedures for reclamation of resource development activities in Mono County. Specifically, it is the purpose of this chapter to implement the policies of this General Plan pertaining to reclamation of energy-related projects, mining projects, and other resource development activities and to fulfill the legislative mandate contained in the Surface Mining and Reclamation Act (SMARA) and the corresponding sections of the California Code of Regulations. It is the intent of the Board of Supervisors to provide for the reclamation of disturbed lands, and to eliminate hazards to public health, safety, and welfare.

35.020 Definitions.

Definitions and applicable provisions contained in SMARA and in the corresponding sections of the California Code of Regulations are incorporated herein by reference. The following definitions are also applicable to the provisions of this chapter:

“Abandoned or Abandonment” means the cessation of resource development activities prior to completion of required reclamation or to cease resource development activities whether or not actual reclamation has commenced, or both. Mere non-use shall not in and of itself constitute abandonment; provided, however, non-use for more than twelve (12) consecutive months without filing an interim management plan shall create a rebuttable presumption of intent to abandon. Regarding geothermal well abandonment, it is the discontinued, non-operative condition of a well as determined and defined by the California Division of Oil and Gas on non-federal lands and by the Bureau of Land Management on federal lands.

“Expansion of resource development activities” means any substantial increase in the size or scope of a resource development activity. Expansion includes, without limitation, any resource development activities beyond the boundaries defined in an approved reclamation plan.

"Idle" means to curtail for a period of one year or more, surface mining operations by more than 90% of the operation's previous maximum annual mineral production, with the written intent to resume those surface mining operations at a future date.

"Mined lands" means the surface, subsurface, and groundwater of an area in which resource development activities will be, are being, or have been conducted, including those private ways and roads appurtenant to any such area, land excavations, workings, mining waste, and areas in which structures, facilities, equipment, machines, tools, or other materials or property which result from, or are used in, resource development activities are situated.

"Minerals" means any naturally occurring chemical element or compound, or groups of elements and compounds, formed from inorganic processes and organic substances, including, but not limited to, coal, peat, and bituminous rock, but excluding geothermal resources, natural gas, and petroleum.

"Operator" means any person who is engaged in resource development activities himself, or who contracts with others to conduct operations on his behalf, except a person who is engaged in surface resource development activities as an employee, with wages as his sole compensation.

"Reclamation" means the combined processes of land treatment that minimize water degradation, air pollution, damage to aquatic or wildlife habitat, flooding, erosion, and other adverse effects from resource development activities, including surface effects incidental to underground mines, so that disturbed lands are reclaimed to a usable condition which is readily adaptable for alternate land uses and creates no danger to public health and safety. The process may extend to affected lands surrounding disturbed lands, and may require grading, resoiling, revegetation, soil compaction, stabilization, or other measures.

"Reclamation Plan" means the plan approved by the County for reclaiming the lands disturbed by resource development or exploration activities.

"Resource Development Activities" means projects which propose to utilize or develop natural resources. Resource development activities include, but are not limited to, the following: (a) geothermal exploration and development projects; (b) surface mining operations; (c) hydroelectric, wind or solar power facilities; (d) oil and gas exploration and development projects; and (e) timber production.

"SMARA" means the Surface Mining and Reclamation Act of 1975 as amended (Section 2710 et seq. of the Public Resources Code) and the corresponding sections of the California Code of Regulations, Title 14.

"State Geologist" means the individual holding that office created by Sec. 667, Article 3, Chapter 2 of Division 1 of the Public Resources Code, or his designee.

"Surface Mining Operations": All, or any part of, the process involved in the mining of minerals on mined lands by removing overburden and mining directly from the mineral deposits, open pit mining of minerals naturally exposed, mining by the auger method,

dredging and quarrying, or surface work incidental to an underground mine. Surface operations shall include, but are not limited to:

1. In-place distillation or retorting or leaching.
2. The production and disposal of mining waste.
3. Prospecting and exploratory activities.

In addition, borrow pitting, stream bed skimming, segregation and stockpiling of mined materials (and recovery of same) are also deemed to be surface mining operations unless specifically excluded in conformance to other regulatory provisions.

"Vested Surface Mining Operation" means a person shall be deemed to have obtained "vested" rights when sufficient documentation has been submitted to the Community Development Director and County Counsel to indicate that prior to January 1, 1976, he or she has, in good faith and in reliance on a permit or other authorization, if a permit or other authorization was required, diligently commenced surface mining operations and incurred substantial liabilities for work and materials therefore. The operator may also be required to submit documentation indicating that no substantial changes have occurred in the operation since January 1, 1976, except for those changes that were in conformance to applicable regulations in effect at the time of the change. Expenses incurred in obtaining the enactment of an ordinance in relation to a particular operation or the issuance of a permit shall not be deemed liabilities for work and materials.

35.030 Reclamation Plan Requirements.

A. Filing:

1. Submittal: Reclamation plans shall be submitted to Economic Development Department (for energy-related projects) or to the Planning Division, on forms supplied by the applicable department. Reclamation plan submittals must be complete, containing all information required by the applicable department to justify findings for approval or disapproval, and for surface mining operations, all information required in conformance to applicable provisions of SMARA.
2. Acceptance: Reclamation plan submittals shall not be deemed complete or accepted for filing and processing time limits shall not begin to run until the Economic Development or Community Development director or his delegate accepts the submittal as complete.

B. Procedure:

1. Processing: Within 30 days after receipt of a reclamation plan submittal, the Economic Development or Community Development director or his delegate shall review the submittal and shall notify the applicant or his designated representative, in writing, concerning any deficiencies.
 - a. Reclamation plan submittals shall be deemed complete, unless the applicant or his designated representative has been notified in writing

that the submittal is incomplete prior to the expiration of the 30 day review period.

- b. Complete reclamation plan submittals shall be accepted and processed in accordance with applicable provisions of the County Code, CEQA and when applicable SMARA. Acceptance of a reclamation plan submittal by the Economic Development Department or Planning Division shall not constitute an indication of project approval.
2. Simultaneous Processing: In the event that an application for a use permit and a reclamation plan pertaining to the same project are submitted for approval at the same time, review and processing of the reclamation plan may occur simultaneously with that of the resource use permit application. The issuance of a use permit shall be predicated on the approval of a reclamation plan in conformance to this chapter.
 3. Approval: The Planning Commission may approve or conditionally approve a reclamation plan only when all of the following findings can be made:
 - a. That the reclamation plan complies with the provisions of CEQA;
 - b. That the reclamation plan is consistent with the objectives and policies set forth in this General Plan and any applicable area or specific plans
 - c. That appropriate conditions have been imposed to ensure and verify that the site during and after reclamation will not cause a public hazard, nor be detrimental to the public health, safety, or welfare;
 - d. That an approved end use has been identified and that the reclamation of the site shall be finally completed as soon as is feasible, considering the particular circumstances of the site to be reclaimed, and that the plan provides for concurrent reclamation, where appropriate and feasible;
 - e. That the reclamation plan conforms to minimum verifiable performance standards established in this chapter and, in the case of surface mining operations, meets or exceeds the minimum, verifiable statewide reclamation standards adopted by the state Mining and Geology Board, and in the case of geothermal well abandonment, conforms to the requirements and guidelines of the California Division of Oil and Gas on non-federal lands, and the Bureau of Land Management on federal lands;
 - f. That the estimated cost of the reclamation reasonably approximates the probable cost of performing the reclamation work as proposed in the plan and that adequate surety (consistent with applicable provisions of SMARA for surface mining operations) will be posted to ensure completion of the required reclamation; and
 - g. That the person or entity responsible for reclamation plan compliance has a public liability insurance policy in force for the duration of the

reclamation which provides for personal injury and property protection in an amount adequate to compensate all persons injured or for property damaged as a result of the proposed reclamation activities.

35.040 Amendments.

A. Minor Amendments to an Approved Reclamation Plan:

1. Minor amendment: Minor changes to an approved reclamation plan may be approved by the Economic Development Director or the Community Development Director, using the Director Review with Notice process, in accordance with the following provisions.
2. Processing: Requests for approval of a minor amendment shall be submitted on forms provided by the Economic Development or Planning Division, along with the applicable fees. Within 30 days of receipt of such a request, the applicable Director shall determine whether or not the application should be considered a minor amendment. The applicable Director shall approve or deny the request and notify the applicant in writing within 10 days of his decision. The decision of the Director as to whether or not the request should be approved or denied shall be final, unless an appeal is filed. If it is determined that the request is not a minor amendment, the request may be processed as a major amendment.
3. Requests for a minor amendment may be approved only if the applicable Director is able to make all of the following findings:
 - a. That the proposed change involves only minor changes in dimensions, volumes or timing of the reclamation plan and will not affect the basic character or implementation of the reclamation plan.
 - b. No substantial adverse environmental damage, either on-site or off-site, will result from the proposed change and the proposed change is consistent with adopted environmental determinations.
 - c. That the proposed change will not be detrimental to the public health, safety and welfare and is compatible with the objectives and policies of this General Plan, applicable area or specific plans or approved end land use of the site.

B. Major Amendments to an Approved Reclamation Plan:

1. Major amendment: Major amendments to approved reclamation plans may be approved by the Planning Commission subject to the following provisions.
2. Processing: Applications for proposed amendments shall be submitted on forms provided by the Economic Development or Planning Division and shall include such data as may be required to complete an environmental assessment. Applications shall include the required filing fee, and shall be noticed and scheduled for public hearing before the Planning Commission in the same manner as the original reclamation plan submittal.

3. Amendments may be approved by the Planning Commission only if all of the following findings can be made:
 - a. The proposed amendments are necessary or desirable to assure a more practical recovery of the resource or to avoid multiple future disturbances of surface land or waters.
 - b. No substantial adverse environmental damage, either on-site or off-site, will result from the proposed change and the proposed change is consistent with adopted environmental determinations.
 - c. The security required to be filed by the applicant with the County is adequate or additional security has been filed to guarantee compliance with the revised reclamation plan.
 - d. The reclamation plan, as amended, will continue to meet the requirements of this chapter and will be conducted in conformity with all applicable laws, ordinances, and regulations of all agencies with jurisdiction over the resource development project.
 - e. The approval of the amendment will not be detrimental to the public health, safety, or welfare and is compatible with the objectives and policies of this General Plan, applicable area or specific plans or approved end land use of the site.

35.050 Reclamation Standards.

- A. All reclamation plans must conform to all applicable provisions of the following minimum verifiable standards. The standards shall apply to each project to the extent that they are consistent with required mitigation for the project (as identified in the environmental documents for the project), provided that such mitigation is at least as stringent as the standards, and they are consistent with the approved or actual subsequent use or uses of the reclaimed site.
- B. Where an applicant demonstrates to the satisfaction of the County that an exception to the standards specified in this chapter is necessary based upon the approved end use, the Planning Commission may approve a different standard for inclusion in the approved reclamation plan. Where the County allows such an exception, the approved reclamation plan shall specify verifiable, site-specific standards for reclamation.
- C. When substantial amendments are proposed to reclamation plans which were approved prior to January 1, 1992, the standards set forth in this chapter shall be applied by the County in approving or denying the amended reclamation plan.
- D. The standards in this chapter shall not apply to projects:
 1. which completed reclamation prior to January 1, 1992, in conformance to an approved reclamation plan; or

2. for which a reclamation plan has been approved prior to January 1, 1992.
- E. The following definitions, in addition to those in Section 35.020 of this chapter, shall govern the interpretation of these standards:

"Arid" means landscapes with an average annual precipitation of five inches or less.

"Indigenous Plants" means plants occurring naturally in an area, not introduced.

"Native Species" means plant species indigenous to California, using pre-European as the historic time reference.

"Vegetative Cover" means the vertical projection of the crown or shoot area of a species to the ground surface expressed as a percentage of the reference area (percentage can be greater than 100%).

"Vegetative Density" means the number of individuals or stems of each species rooted within the given reference area.

"Vegetative Species-richness" means the number of different plant species within the given reference area.

"Wetlands" means lands transitional between terrestrial and aquatic systems where the water table is usually at or near the surface or the land is covered by shallow water. For purposes of these regulations, wetlands must have one or more of the following attributes: 1) at least periodically, the land supports predominantly hydrophytes; 2) the substrate is predominantly undrained hydric soil; and 3) the substrate is non-soil and is saturated with water or covered by shallow water at some time during the growing season of each year.

Wildlife Habitat.

Wildlife and wildlife habitat shall be protected in accordance with the following standards:

- A. Rare, threatened or endangered species or species of special concern, as defined by the California Department of Fish and Game, U.S. Forest Service (USFS), Bureau of Land Management (BLM), or the U.S. Fish and Wildlife Service, and their respective habitat shall be conserved as prescribed by the federal Endangered Species Act of 1973, 16 U.S.C. section 1531, and the California Endangered Species Act, Fish and Game Code section 1900, et seq. If avoidance cannot be achieved through the available alternatives, mitigation shall be proposed in accordance with the rules and regulations of the California Department of Fish and Game, USFS, BLM, the U.S. Fish and Wildlife Service, the U.S. Army Corps of Engineers and other applicable agencies.

- B. Wildlife habitat shall be established on disturbed lands in a condition similar to or better than that which existed before the lands were disturbed, unless the proposed end use precludes its use as wildlife habitat or the approved reclamation plan establishes a different habitat type than that which existed prior to disturbance.
- C. Wetland habitat shall be avoided. Any wetland habitat impacted as a consequence of resource development activities shall be mitigated at a minimum of a one to one ratio for wetland habitat acreage and wetland habitat value.

Backfilling, Regrading, Slope Stability, and Recontouring.

Backfilling, regrading, slope stabilization, and recontouring shall conform to the following standards:

- A. Where backfilling is proposed for urban uses (e.g., roads, building sites, or other improvements sensitive to settlement), the fill material shall be compacted in accordance with the Uniform Building Code, the Mono County Grading Ordinance, or other methods approved by the County as appropriate for the approved end use.
- B. Where backfilling is required for resource conservation purposes (e.g., agriculture, fish and wildlife habitat, and wild land conservation), fill material shall be backfilled to the standards required for the resource conservation use involved.
- C. Piles or dumps of waste material, such as mining waste, shall be stockpiled in such a manner as to facilitate phased reclamation. They shall be segregated from topsoil and topsoil substitutes or growth media salvaged for use in reclamation.
- D. Final reclaimed fill slopes, including permanent piles or dumps of mine waste rock and overburden, shall not exceed 2:1 (horizontal:vertical), except where site-specific geologic and engineering analyses demonstrate that the proposed final slope will have a minimum slope stability factor of safety that is suitable for the approved end use, and when the proposed final slope can be successfully revegetated.
- E. At closure, all fill slopes, including permanent piles or dumps of mine waste and overburden, shall conform to the surrounding topography and/or approved end use.
- F. Cut slopes, including final high walls and quarry faces, shall have a minimum slope stability factor of safety that is suitable for the proposed end use and that conforms to the surrounding topography and/or approved end use.
- G. Permanent placement of piles or dumps of waste material, such as mining waste and overburden, shall not occur within wetlands unless mitigation accepted by the lead agency has been approved to offset wetland impacts and/or losses.

Revegetation.

Revegetation shall be part of the approved plan, unless it is not consistent with the approved end use.

- A. A vegetative cover suitable for the approved end use and capable of self-regeneration without continued dependence on irrigation, soil amendments or fertilizer shall be established on disturbed lands unless an artificially maintained landscape is consistent with the approved reclamation plan. Vegetative cover-density and species-richness shall be, where appropriate, sufficient to stabilize the surface against effects of long-term erosion and shall be similar to naturally occurring habitats in the surrounding area. The vegetative density, cover and species-richness of naturally occurring habitats shall be documented in baseline studies carried out prior to the initiation of resource development activities.
- B. Test plots conducted simultaneously with resource development activities shall be required to determine the most appropriate planting procedures to be followed to ensure successful implementation of the proposed revegetation plan. The County may waive the requirement to conduct test plots when the success of the proposed revegetation plan can be documented from experience with similar species and conditions or by relying on competent professional advice based on experience with the species to be planted.
- C. Where resource development activities result in compaction of the soil, ripping, disking, or other means shall be used in areas to be revegetated to eliminate compaction and to establish a suitable root zone in preparation for planting.
- D. Prior to closure, all access roads, haul roads, and other traffic routes to be reclaimed shall be stripped of any remaining road base materials, prepared in accordance with section g below, covered with suitable growth media or topsoil, and revegetated.
- E. Soil analysis shall be required to determine the presence or absence of elements essential for plant growth and to determine those soluble elements that may be toxic to plants, if the soil has been chemically altered or if the growth media consists of other than the native topsoil. If soil analysis suggests that fertility levels or soil constituents are inadequate to successfully implement the revegetation program, fertilizer or other soil amendments may be incorporated into the soil. When native plant materials are used, preference shall be given to slow-release fertilizers, including mineral and organic materials that mimic natural sources, and shall be added in amounts similar to those found in reference soils under natural vegetation of the type being reclaimed.
- F. Temporary access for exploration or other short-term uses on arid lands shall not disrupt the soil surface except where necessary to gain safe access. Barriers shall be installed when necessary to prevent unauthorized vehicular traffic from interfering with the reclamation of temporary access routes.
- G. Indigenous plant species shall be used for revegetation, except when introduced species are necessary to meet the end uses specified in the approved reclamation plan. Areas to be developed for industrial, commercial or residential

uses shall be revegetated for the interim period, as necessary, to control erosion. In this circumstance, non-indigenous plant species may be used if they are not noxious weeds and if they are species known not to displace indigenous species in the area.

- H. Planting shall be conducted during the most favorable period of the year for plant establishment.
- I. Soil stabilizing practices shall be used where necessary to control erosion and for successful plant establishment. Irrigation may be used when necessary to establish vegetation.
- J. If irrigation is used, the operator must demonstrate that the vegetation has been self-sustaining without irrigation for up to five years prior to release of the financial assurances by the County, unless an artificially maintained landscape is consistent with the end use.
- K. Weeds, as defined by the Soil Conservation Service, or the county Agricultural Commissioner, or the California Native Plant Society, shall be managed: 1) when they threaten the success of the proposed revegetation; and 2) to prevent spreading to nearby areas; and 3) to eliminate fire hazard.
- L. Protection measures, such as fencing of revegetated areas and/or the placement of cages over individual plants, shall be used in areas where grazing, trampling, herbivory, or other causes threaten the success of the proposed revegetation. Fencing shall be maintained until revegetation efforts are successfully completed and the County authorizes removal.
- M. Success of revegetation shall be judged based upon the effectiveness of the vegetation for the approved end use, and by comparing the quantified measures of vegetative cover, density, and species-richness of the reclaimed lands to similar parameters of naturally occurring vegetation in the area. Either baseline data or data from nearby reference areas may be used as the standard for comparison. Quantitative standards for success and the location(s) of the reference area(s) shall be set forth in the approved reclamation plan. Comparisons shall be made until performance standards are met provided that, during the last two years, there has been no human intervention, including for example, irrigation, fertilization, or weeding. Standards for success shall be based on expected local recovery rates. Valid sampling techniques for measuring success shall be specified in the approved reclamation plan. Sample sizes must be sufficient to produce at least an 80% confidence level.

Drainage, Diversion Structures, Waterways, and Erosion Control.

- A. Reclamation activities shall be conducted to protect on-site and downstream beneficial uses of water in accordance with the Porter-Cologne Water Quality Control Act, Water Code Section 13000 et seq., and the Federal Clean Water Act, 33 U.S.C. Section 1251 et seq.

- B. The quality of water, recharge potential, and storage capacity of groundwater aquifers shall not be diminished, except as allowed in the approved reclamation plan.
- C. Erosion and sedimentation shall be controlled during all phases of construction, operation, reclamation, and closure of an operation to minimize siltation of lakes and watercourses, as required by the Regional Water Quality Control Board, the State Water Resources Control Board, and the Mono County Grading Ordinance.
- D. Surface runoff and drainage shall be controlled by berms, silt fences, sediment ponds, revegetation, hay bales, or other erosion control measures, to ensure that surrounding land and water resources are protected from erosion, gulying, sedimentation, and contamination. Erosion control methods shall be designed to handle runoff from not less than the 20-year/1-hour intensity storm event.
- E. Where natural drainages are covered, restricted, rerouted or otherwise impacted, mitigating alternatives shall be proposed and specifically approved in the reclamation plan to assure that runoff shall not cause increased erosion or sedimentation.
- F. When stream diversions are required, they shall be constructed in accordance with:
 - 1. applicable stream and lake alteration agreements between the operator and the California Department of Fish and Game; and
 - 2. the requirements of the Federal Clean Water Act, Sections 301 (33 U.S.C. Section 1311) and 404 (33 U.S.C. Section 1344) and/or section 10 of the Rivers and Harbors Act.
- G. When no longer needed to achieve the purpose for which they were authorized, all temporary stream channel diversions shall be removed and the affected land reclaimed.

Prime Agricultural Land Reclamation.

In addition to the standards for topsoil salvage, maintenance, and redistribution, the following standards shall apply to operations on prime agricultural lands where the approved end use is agriculture:

- A. Resource development activities which will operate on prime agricultural lands, as defined by the U.S. Soil Conservation Service, shall return all disturbed areas to a fertility level as specified in the approved reclamation plan.
- B. When distinct soil horizons are present, topsoil shall be salvaged and segregated by defined A, B and C soil horizons. Upon reconstruction of the soil, the sequence of horizons shall have the A atop the B, the B atop the C, and the C atop graded overburden.
- C. Reclamation shall be deemed complete when productive capability of the affected land is equivalent to or exceeds, for two consecutive crop years, that of the pre-

disturbance condition or similar crop production in the area. Productivity rates, based on reference areas described in the approved reclamation plan, shall be specified in the approved reclamation plan.

- D. Use of fertilizers or other soil amendments shall not cause contamination of surface or groundwater.

Other Agricultural Land.

The following standards shall apply to agricultural lands, other than prime agricultural lands, when the approved end use is agriculture.

- A. In addition to the standards for topsoil salvage, maintenance, and redistribution, non-prime agricultural lands shall be reclaimed so as to be capable of sustaining economically viable production of crops commonly grown in the surrounding areas.

Building, Structure and Equipment Removal.

- A. All equipment, supplies, and other materials shall be stored in designated areas (as shown in the approved reclamation plan). All waste shall be disposed of in accordance with state and local health and safety ordinances.
- B. All buildings, structures, and equipment shall be dismantled and removed prior to final site closure except those buildings, structures, and equipment approved in the reclamation plan as necessary for the end use.

Stream Protection, Including Surface and Groundwater.

- A. Surface and groundwater shall be protected from siltation and pollutants that may diminish water quality as required by the Federal Clean Water Act, sections 301 et seq. (33 U.S.C. section 1311), 404 et seq. (33 U.S.C. section 1344), the Porter-Cologne Act, section 13000 et seq., the county Grading Ordinance, the Regional Water Quality Control Board or the State Water Resources Control Board.
- B. In-stream surface mining operations shall be conducted in compliance with Section 1603 of the California Fish and Game Code, section 404 of the Clean Water Act, and section 10 of the Rivers and Harbors Act.
- C. Surface mining activities in stream or river channels shall be regulated to control channel degradation in order to prevent undermining of bridge supports, exposure of pipelines or other structures buried within the channel, loss of spawning habitat, lowering of groundwater levels, destruction of riparian vegetation, and increased stream bank erosion (exceptions may be specified in the approved reclamation plan). Changes in channel elevations and bank erosion shall be evaluated annually using records of annual extraction quantities and bench marked annual cross sections and/or sequential aerial photographs to determine appropriate extraction locations and rates.
- D. In accordance with requirements of the California Department of Fish and Game, in-stream mining activities shall not cause fish to become entrapped in

pools or in off-channel pits, nor shall they restrict spawning or migratory activities.

Topsoil Salvage, Maintenance and Redistribution.

When the approved reclamation plan calls for revegetation or cultivation of disturbed lands, the following performance standards shall apply to topsoil salvage, maintenance, and redistribution activities:

- A. All salvageable topsoil suitable for revegetation shall be removed as a separate layer from areas to be disturbed. Topsoil and vegetation removal shall not precede development activities by more than one year, unless a longer time period is approved by the County.
- B. Topsoil resources shall be mapped prior to stripping and the location of topsoil stockpiles shall be shown on a map in the reclamation plan. If the amount of topsoil needed to cover all surfaces to be revegetated is not available on-site, other suitable material capable of sustaining vegetation (such as subsoil) shall be removed as a separate layer for use as a suitable growth media. Topsoil and suitable growth media shall be maintained in separate stockpiles. Test plots may be required to determine the suitability of growth media for revegetation purposes.
- C. Soil salvage operations and phases of reclamation shall be carried out in accordance with a schedule that: 1) is set forth in the approved reclamation plan; 2) minimizes the area disturbed; and 3) is designed to achieve maximum revegetation success allowable under the mining plan.
- D. Topsoil and suitable growth media shall be used to phase reclamation as soon as can be accommodated by the operations schedule presented in the approved reclamation plan. Topsoil and suitable growth media that cannot be utilized immediately for reclamation shall be stockpiled in an area where it will not be disturbed until needed for reclamation. Topsoil and suitable growth media stockpiles shall be clearly identified to distinguish them from waste dumps. Topsoil and suitable growth media stockpiles shall be planted with a vegetative cover or shall be protected by other equally effective measures to prevent water and wind erosion and to discourage weeds. Relocation of topsoil or suitable growth media stockpiles for purposes other than reclamation shall require prior written approval from the County.
- D. Topsoil and suitable growth media shall be redistributed in a manner that results in a stable, uniform thickness consistent with the approved end use, site configuration, and drainage patterns.

Tailing and Waste Management.

- A. State Water Resources Control Board mine waste disposal regulations in Article 7 of Chapter 15 of Title 23, California Code of Regulations, shall govern mine waste and tailings, and mine waste disposal units shall be reclaimed in conformance to this article.

- B. Geothermal drilling waste and cuttings shall be disposed of in a manner approved by the Lahontan Regional Water Quality Control Board.

Closure of Surface Openings.

- A. Except those used solely for blasting or those that will be mined through within one year, all drill holes, water wells, and monitoring wells shall be completed or abandoned in accordance with each of the following:
 - 1. Water Code Sections 13700 et seq. and 13800 et seq.;
 - 2. The applicable local ordinance adopted pursuant to Water Code Section 13803;
 - 3. The applicable Department of Water Resources report issued pursuant to Water Code Section 13800; and
 - 4. Subdivisions (1) and (2) of Section 2511 (g) of Chapter 15 of Title 23 regarding discharge of waste to land.
- B. Prior to closure, all portals, shafts, tunnels, or other surface openings to underground workings shall be gated or otherwise protected from public entry in order to eliminate any threat to public safety and to preserve access for wildlife habitat.
- C. All geothermal wells shall be completed or abandoned in accordance with the California Division of Oil and Gas if located on non-federal land or with the Bureau of Land Management if located on federal land.

35.060 Vested Surface Mining Operations.

- A. Reclamation Plan:
 - 1. Reclamation Plan: The reclamation plan required pursuant to this chapter shall apply to "vested" surface mining operations conducted after January 1, 1976.
 - a. Where a person with a "vested" right has continued surface mining operations in the same area subsequent to January 1, 1976, he shall obtain approval of a reclamation plan, in conformance to applicable provisions of this chapter, covering the mined lands disturbed by such subsequent surface mining operations. In those cases where an overlap exists (in the horizontal or vertical sense) between pre and post January 1, 1976, surface mining operations, the reclamation plan shall call for reclamation proportional to that disturbance caused by the surface mining operation after January 1, 1976.

35.070 Idle Mine Status.

- A. Interim management plan:
 - 1. Filing: Unless specified in the use permit, within 90 days of a surface mining operation becoming idle, the operator shall submit to the Planning Division

for review and approval, an "interim management plan." The interim management plan shall describe, in detail, measures the operator will implement to maintain the site in compliance with conditions specified in the use permit and with standards specified in the approved reclamation plan.

2. Term of plan: The interim management plan may remain in effect for a period not to exceed five years, at which time the County shall do one of the following:
 - a. Renew the interim management plan for an additional period not to exceed five years, provided the County finds that the operator has complied fully with the interim management plan; or,
 - b. Require the operator to commence reclamation in accordance with the approved reclamation plan.
3. Financial assurances: Financial assurances required by this chapter shall remain in effect during the period the operation is idle.
4. Interim management plan approval: The receipt of an interim management plan shall be considered and processed as an amendment to the approved reclamation plan in accordance with applicable provisions of this chapter. As specified in SMARA, the review and approval of an interim management plan for a surface mining operation shall not be considered a project under CEQA.
5. The operator of a resource development activity which has been abandoned for a period of more than twelve (12) months shall be subject to revocation of the approved use permit and be required to commence reclamation in accordance with the approved plan.

35.080 Annual Inspections.

A. Inspections:

1. Inspections Required: Resource development activities shall comply with the following inspection and reporting requirements:
 - a. The operator shall file a request for annual inspection with the county Compliance Officer at least once in each calendar year. Requests for annual inspections shall be accompanied by the appropriate filing fee and, for surface mining operations, shall coincide with the dates for annual SMARA inspections. All such requests shall include a written report prepared by a qualified registered professional that identifies to what extent the reclamation at the site conforms or deviates from the approved reclamation plan.
 - b. The Compliance Officer shall inspect or cause to be inspected the site within 30 working days of receipt of the written report, filing fee, and application for inspection. Unless otherwise agreed, failure to inspect within 30 working days shall be deemed acceptance of the report and a

finding that the resource development operation is in compliance with the reclamation plan.

35.090 Administration.

A. Appeals:

Appeals of any decision pertaining to reclamation plans may be made in conformance to the provisions of Chapter 19.42 of the land development regulations.

B. Fees:

Fees required in conjunction with the provisions of this chapter shall be established from time to time by the Board of Supervisors.

C. Public Records and Proprietary Information:

Public record: Reclamation plan submittals, interim management plans and other documents submitted in support of this chapter are public records unless it is demonstrated to the satisfaction of the County that the release of such information, or part thereof, would reveal reserves, production, or rates of depletion entitled to protection as proprietary information. The operator shall identify such proprietary information as a separate part of the application, and such proprietary information shall be made available only to persons authorized in writing by the operator to receive such proprietary information, and for surface mining operations to the State Geologist.

D. Successor in Interest:

Whenever any resource development activity or portion of such an operation is sold, assigned, conveyed, ex-changed, or otherwise transferred, whether voluntarily or by operation of law, the original permittee as well as each successor in interest shall be bound by the provisions of any reclamation plan approved pursuant to the provision of this chapter, provided, however, that the original permittee or any successor in interest may be relieved from all liability for completing the reclamation by action of the Board of Supervisors if, after application to the Board, it is determined that the current owner has posted adequate security to ensure completion of all remaining reclamation.

35.100 Surety Requirements.

A. Surety:

1. Surety Required: The operator or person responsible for the reclamation plan submittal shall be required to execute an agreement and to provide adequate and acceptable surety, made payable to the County and (for surface mining operations) the State Geologist, guaranteeing compliance with the approved reclamation plan. This requirement shall be satisfied prior to commencing any on-site resource development activity and liability shall continue until all reclamation work required by the reclamation plan has been concluded and accepted by the County.

2. Continued liability: In addition, the operator or person responsible for final reclamation shall have a continued liability to guarantee the continued viability of the reclamation effort not to exceed five growing seasons following

the conclusion and acceptance of reclamation by the County. This liability shall begin anew whenever reclamation efforts fail to meet the reclamation plan performance standards and additional reclamation is required. The minimum security to be retained to guarantee the continued viability of the reclamation effort shall be as follows:

- a. If the security guarantees the cost of all reclamation, 10% of the aggregate cost of all reclamation; or
 - b. If the security was posted in conformance to a phased reclamation program any other method acceptable to the County that ensures the continued viability of the reclamation effort.
3. Insurance: The operator shall maintain, to the satisfaction of the County and for the life of the reclamation plan, liability insurance of not less than \$500,000 for one person and \$1 million for all persons and \$2 million for property damage, or other amounts adopted by the Board of Supervisors. This requirement would not preclude the operator from being self-insured.
 4. Form of Surety: The security required in conformance to the provisions of this chapter shall be made payable to the County and, in the case of surface mining operations, the State Geologist; shall be subject to review and approval by the County; and shall be in the form of one the following:
 - a. Surety Bonds,
 - b. Irrevocable Letters of Credit,
 - c. Trust Funds,
 - d. For surface mining operations, other forms of financial assurance as may be specified by the State Board of Mines and Geology.
 5. Surety Adjustments: The amount of financial assurances required by this chapter may be adjusted annually by the County in consideration of information provided in the annual report. Adjustments shall take into consideration, but not be limited to, new lands disturbed, inflation, prior compliance, and reclamation accomplished in accordance with the approved plan.
 6. Prior surety approvals: If a surface mining operation and/or reclamation plan has received approval of its financial assurances prior to January 1, 1991, from a public/federal agency other than Mono County, the County shall deem those financial assurances adequate for the purposes of this chapter, or shall credit them toward fulfillment of financial assurances required by this chapter.

B. Release of Surety:

1. Acceptance: The operator shall file a request for final inspection with the county Compliance Officer, accompanied by the appropriate filing fee. No reclamation or phase of reclamation shall be deemed accepted until the work has been inspected and approved and a certificate of acceptance has been executed by the county Compliance Officer and filed with the Board of Supervisors and, for surface mining operations, the State Geologist.
2. Inspection: Within sixty (60) days after the county Compliance Officer has received a request for final inspection for completion of reclamation, or any phase of reclamation; the county Compliance Officer shall inspect, or cause to be inspected, the subject area. The county Compliance Officer shall then file the certificate of acceptance or shall notify the operator, in writing, of any items that are found to be inconsistent with the approved reclamation plan.
3. Release of Bond: Thirty (30) days after the county Compliance Officer files the certificate of acceptance with the Board of Supervisors, unless otherwise directed by the Board of Supervisors, the County shall release the surety.

35.110 Enforcement.

A. Enforcement:

The provisions of this chapter shall be enforced by the Economic Development Department, the county Planning Division, and/or the county Compliance Officer or such other persons as may be designated by the Board of Supervisors. Enforcement of the provisions contained in this chapter shall be in accordance with applicable provisions of the Mono County Code.

B. Right of Entry:

Whenever it becomes necessary to inspect resource development activities as provided in this chapter or to investigate complaints associated with resource development activities or to monitor conditions of approval as may be imposed on resource development activities, reasonable access to the project site shall be afforded by the operator in conformance to Chapter 1.08 of the Mono County Code. Authorized representatives of the County, upon presentation of appropriate credentials, shall have access to the site without advance notice.

PROCESSING

CHAPTER 36 – SPECIFIC PLANS

Sections:

36.010	Intent.
36.020	Definitions.
36.030	Contents.
36.040	Environmental review requirements.
36.050	Land projects.
36.060	Amendments.

36.010 Intent.

Specific plans are intended to function as an implementation device for General Plans, and as a standard-setting mechanism for detailed land use, subdivisions, and use permits. Therefore, when it is determined that a Specific Plan is needed, County action on the Specific Plan will precede land use changes, subdivisions, or other related actions affecting the same property. Once adopted, a Specific Plan can be used to expedite other matters.

36.020 Definition.

A "Specific Plan" shall include "all detailed regulations, conditions, programs and proposed legislation" (Gov. Code Section 65451) regarding:

- A. The location of and standards for land uses and facilities;
- B. The location of and standards for streets, roads, and transportation facilities;
- C. Standards for population density and building intensity and provisions for supporting services;
- D. Standards for the conservation, development, and use of natural resources;
- E. Provisions for implementing the open space element.

A specific plan must be consistent with this general plan, and once adopted, can be used in lieu of other land development regulations, and shall effect the approval of subdivisions and capital facilities.

While the specific plan is normally optional, the Subdivision Map Act requires the adoption of a specific plan prior to approval of a land project which would place a residential subdivision of a 50 or more parcels in a sparsely populated area (see definition of "Land Project," contained in Title 17, Mono County Code).

36.030 Contents.

A specific plan must contain measures to implement all the policies required in the pertinent general plan, and may contain measures to implement policies in optional elements. It must also show existing and proposed land uses by parcel.

A specific plan includes:

- A. A written text describing the proposed project, standards for its development, and an analysis of its relationship to each element of the county General Plan and any area general plan adopted for the area;
- B. Mapped information clearly showing the pertinent features of the proposed development, as well as, conditions on and around the site affecting the overall design of the project.

36.040 Environmental review.

Adoption or amendment of a specific plan constitutes a project under the California Environmental Quality Act (CEQA) and the State Environmental Impact Report (EIR) guidelines. If the initial study shows that the proposed or amended specific plan could significantly affect the environment, the jurisdiction must prepare an EIR and submit it in draft form for public review. Although the need for an EIR will be determined on a case-by-case basis, EIRs are usually required because of the detailed development patterns and complex potential effects associated with a specific plan or major amendment.

A specific plan and an EIR on a specific plan overlap extensively; they must address many of the same concerns and the process for preparing them is nearly identical. Thus, environmental assessment should be an integral part of preparing or revising a specific plan.

When residential subdivisions and land use designation changes are consistent with the specific plan, permit processing can be speeded up since another EIR is not necessary as long as the specific plan EIR was certified after January 1, 1980 (Gov. Code Section 65453(b)). It will, however, be necessary to complete a supplemental EIR if, after adoption of the Specific Plan:

- A. Substantial changes are proposed in the project;
- B. Substantial changes occur in the reasons why a project is being undertaken; or,
- C. New information on the project becomes available.

36.050 Land projects.

As described under the specific plan definition, land projects require submittal of a specific plan before approval. Because many land projects are located in remote areas lacking public services, they are often speculative ventures. They may only involve one developer and are intended primarily for residential use. Consequently, particular attention shall be paid to the relationship of the land project to the surrounding area and the need for new community facilities.

A specific plan must include (in addition to those listed under 36.030 "Contents"), that land projects close to one another be considered jointly under a single plan so that cumulative effects can be assessed.

36.060 Amendments.

Amendments to a specific plan can be handled through the Director Review process if no change in density results and no change in conditions are necessary. All other amendments shall follow the procedures in Chapter 48, Amendments.

PROCESSING

CHAPTER 38 – DEVELOPMENT AGREEMENTS

Sections:

38.010	Intent.
38.020	Forms and fees.
38.030	Qualification as an applicant.
38.040	Review and application.
38.050	Transmittal to Planning Commission.
38.060	Planning Commission report.
38.070	Decision by Board of Supervisors.
38.080	Approval of development agreements.
38.090	Required notice.
38.100	Irregularity of proceedings.
38.110	Amendment and cancellation of agreement by mutual consent.
38.120	Recordation.
38.130	Periodic review.
38.140	Procedure for periodic review.
38.150	Proceedings upon modification or termination.
38.160	Hearing on modification or termination.

38.010 Intent.

The intent of this chapter is to provide both the applicant, as well as affected public entities, with an alternative mechanism to guarantee required public improvements and/or amenities associated with the approval of any project.

38.020 Forms and fees.

There are no separate application forms for development agreements; the application form used for the project requiring the development agreement will be utilized. There will be an additional fee attached to the processing of development agreements. A current fee schedule is available with the application forms. This fee shall reflect the actual cost of processing such agreement.

Each application shall be accompanied by the form of development agreement proposed by the applicant. The Board of Supervisors may adopt by resolution a standard form of development agreement. The applicant may choose to use the standard form and include specific proposals for changes in or additions to the language of the standard form. The proposed agreement shall contain all the elements required by Government Code Sections 65864 through 65869.5.

38.030 Qualification as an applicant.

Only a qualified applicant may file an application to enter into a development agreement. A qualified applicant is a person who has legal or equitable interest in the real property which is the subject of the development agreement. Applicant includes

authorized agent. The Community Development director may require an applicant to submit proof of his interest in the real property and of the authority of the agent to act for the applicant. Before processing the application, the Community Development director shall obtain the opinion of the County Counsel as to the sufficiency of the applicant's interest in the real property to enter into the agreement.

38.040 Review of application.

The Community Development director shall enter on the application the date it is received. He/she shall review the application and may reject it if it is incomplete or inaccurate for processing. If he/she finds that the application is complete, he/she shall accept it for filing. The Director shall review the application and determine the additional requirements necessary to complete the agreement. After receiving the required information, he/she shall prepare a staff report to the Planning Commission with a recommendation and shall state whether or not the agreement proposed or in an amended form would be consistent with this general plan and any applicable specific plan.

38.050 Transmittal to Planning Commission.

The Director shall transmit the application to the Commission for a public hearing when all the necessary reports and recommendations are completed. Notice of the public hearing shall be given as provided in Chapter 46, Noticing Requirements. The application for a development agreement may be considered concurrently with, but not before, other discretionary permits for the project.

38.060 Planning Commission report.

After a public hearing, the Commission shall consider the application and prepare a report and recommendation for the Board of Supervisors. The report and reasons for the recommendation shall include findings on the matters stated in Section 38.070. This report and the reasons for the recommendation shall be forwarded to the Board Clerk who shall set the matter for public hearing before the Board of Supervisors.

38.070 Decision by Board of Supervisors.

- A. After the Board of Supervisors completes the public hearing, it may approve, modify or disapprove the development agreement. It may refer matters not previously considered by the Commission during its hearing back to the Commission for report and recommendation if new information comes to light at the Board hearing.
- B. Board of Supervisors shall not approve the development agreement unless it finds that the agreement contains all of the following:
 1. Is consistent with the objectives, policies, general land uses and programs specified in this general plan and any applicable specific plan;
 2. Is compatible with the uses authorized in, and the regulations prescribed for, the land use district in which the real property is located;
 3. Is in conformity with public convenience, general welfare and good land use practices;

4. Will not be detrimental to the health, safety and general welfare;
5. Will not adversely affect the orderly development of property or the preservation of property values;
6. Is consistent with the provisions of Government Code Sections 65864 through 65869.5.

38.080 Approval of development agreements.

If the Board of Supervisors approves the development agreement, it shall adopt an ordinance approving the agreement and directing the Board Chairman to execute the agreement on behalf of the County after the effective date of the ordinance.

38.090 Required notice.

- A. Notice of public hearing required by this chapter shall be given as provided in Chapter 46, Noticing Requirements.
- B. The notice requirements referred to in subsection A is declaratory of existing law (Government Code Sections 65867, 65864, 65864.5 and 65856). If state law prescribes a different notice requirement, notice shall be given in that manner.

38.100 Irregularity of proceedings.

No action, inaction or recommendation regarding the proposed development agreement shall be held void or invalid or be set aside by a court by reason of an error, irregularity, informality, neglect or omission as to any matter pertaining to petition, application, notice, finding, record, hearing, report, recommendation, or any matters of procedure whatever unless after an examination of the entire case, including the evidence, the court is of the opinion that the error complained of was prejudicial and that by reason of the error the complaining party sustained and suffered substantial injury, and that a different result would have been probable if the error had not occurred or existed. There is no presumption that error is prejudicial or that injury was done if error is shown.

38.110 Amendment and cancellation of agreement by mutual consent.

Either party may propose an amendment to or cancellation in whole or in part of the development agreement previously entered into. The amendment or cancellation permitted by this section must be by mutual consent of the parties.

The procedure for proposing and adoption of an amendment to, or cancellation in whole or in part, of the development agreement is the same as the procedure for entering into an agreement in the first instance. However, where the County initiates the proposed amendment to or cancellation in whole or in part of the development agreement, it shall first give notice to the property owner of its intention to initiate such proceedings at least 30 days in advance of public notice of the hearing to consider the amendment or cancellation.

38.120 Recordation.

Within 10 days after the County enters into the development agreement, the Board Clerk shall have the agreement recorded with the county recorder.

If the parties to the agreement or their successors in interest amend or cancel the agreement as provided in Government Code Section 65868, or if the County terminates or modifies the agreement as provided in Government Code Section 65865.1 for failure of the applicant to comply in good faith with the terms or conditions of the agreement, the board clerk shall have notice of such action recorded with the county recorder.

38.130 Periodic review.

- A. The Director shall review the development agreement every 12 months from the date the agreement is entered into.
- B. The time for review may be shortened either by agreement between the parties, or by initiation in one or more of the following ways:
 - 1. Recommendation of the Director;
 - 2. Resolution of intention by the Commission;
 - 3. Resolution of intention of the Board of Supervisors.
- C. The Director shall begin the review proceeding by giving written notice that he/she intends to undertake a periodic review of the development agreement to the property owner. He/she shall give the notice at least 10 days in advance of the time at which the matter will be considered by the Planning Division.

38.140 Procedure for periodic review.

- A. The Director, or the Commission if the matter has been referred, shall conduct a public review hearing at which time the property owner must demonstrate good faith compliance with the terms of the agreement. The burden of proof on this issue is upon the property owner.
- B. The Director shall determine upon the basis of substantial evidence whether or not the property owner has, for the period under review, complied in good faith with the terms and conditions of the agreement.
- C. If the Director finds and determines on the basis of substantial evidence that the property owner has complied in good faith with the terms and conditions of the agreement during the period under review, the review for that period is concluded.
- D. If the Director finds and determines on the basis of substantial evidence that the property owner has not complied in good faith with the terms and conditions of the agreement during the period under review, the Director may initiate proceedings to modify or terminate the agreement.

38.150 Proceedings upon modification or termination.

If, upon a finding under Section 38.140(D), the Director determines to proceed with modification or termination of the agreement, the Director shall give notice to the property owner of his/her intention to do so. The notice shall contain:

- A. The time and place of the hearing;

- B. A statement as to whether or not the Director proposes to terminate or to modify the development agreement;
- C. Other information which the Director considers necessary to inform the property owner of the nature of the proceeding.

38.160 Hearing on modification or termination.

At the time and place set for the hearing on modification or termination, the property owner shall be given an opportunity to be heard. The Board of Supervisors may refer the matter back to the Planning Commission for further proceedings or for report and recommendation. The Board of Supervisors may impose those conditions it considers necessary to the action it takes to protect the interests of the Planning Division. The decision of the Board of Supervisors is final.

PROCESSING**CHAPTER 39 – TIME-SHARE PROJECTS****Sections:**

39.010	Designations in which permitted.
39.020	Application for time-share project approval.
39.030	Time-share conditional use permit.
39.040	Transient occupancy tax applicable.

39.010 Designations in which permitted.

A time-share project shall be permissible, subject to a use permit, only in such land use designations in which commercial transient rental operations would otherwise be permitted. The land use designations in which time-share projects are permissible are the MFR-H and commercial districts. Time-share projects shall also be permitted in the SP district only if such project is shown or described as a time-share on the original approved specific plan.

39.020 Application for time-share project approval.

The applicant for approval of a proposed time-share project shall submit a completed application for a use permit, in addition to any other applications or forms that may be necessary in the particular case. The applicant shall accompany such application with the following documentation and information:

- A. Identification by name of the time-sharing project and street address where the time-share project is situated, including the legal description;
- B. Any restrictions on the use, occupancy, alteration or alienation of time-share estates or uses, contained in conditions, covenants and restrictions or elsewhere;
- C. Any other matters the time-share developer or the County deems reasonably necessary to consider the project, including the required environmental documents.

39.030 Time-share conditional use permit.

In addition to the use permit requirements set forth in Chapter 32, the following shall apply:

- A. In the event an existing condominium project is proposed to be converted to a whole or partial time-share project, evidence must be submitted showing that at least 66-2/3% of the current condominium owners consent to the proposed conversion. Also in such instances, there shall be submitted a verified statement of the number and percentage of owners who have received notification, either personally (proof by signature of the recipient or witness) or by receipted

certified U.S. mail, that application to so convert the project would be submitted to the Commission.

- B. The Commission may impose such conditions as it determines are necessary to protect the public safety, health, peace and welfare. Each conditional use permit shall be issued with a condition attached that no time-share rights or entitlements shall be issued by the Department of Real Estate of the State of California. In determining whether, and under what conditions, to issue any such conditional use permit, the Commission, among other things, may consider:
1. The impact of the time-sharing project on transient or permanent rental stock;
 2. The fiscal impact of the time-sharing project upon the entire range of all services provided to the public upon the County, and reasonable conditions to be imposed by the Commission to mitigate same, including but not limited to the payment of mitigation fees;
 3. The fiscal impact of the time-sharing project upon the various departments of county government in respect to staff time, paperwork and related costs created by the time-sharing project, said county departments to include, but not limited to Assessor, Auditor/Controller, Board of Supervisors, Building, Clerk/Recorder, Planning, Public Works, and Treasurer/Tax Collector. There shall be adopted by the Board of Supervisors by resolution on an annual basis the fee schedule to cover the actual costs to the County in respect to said time-sharing projects;
 4. Nonconformity with current land development regulations and this general plan, and reasonable conditions to eliminate same;
 5. Nonconformity with existing uniform building and fire codes and reasonable conditions to eliminate same;
 6. The sign program proposed for the project;
 7. The landscaping proposed for the project;
 8. Traffic circulation and parking;
 9. The applicant's description of the methods proposed to be employed to guarantee the future adequacy, stability and continuity of a satisfactory level of management and maintenance of the time-share project;
 10. The desirability of requiring an office of the managing agent or agency be located locally or on site, as appropriate;
 11. Consistency with the design standards duly adopted by any design review district under the authority of Chapter 9;

12. With respect to time-share projects involving time-share estates, the time-share developer shall designate an agent to accept service on behalf of all time-share owners of legal notices and secured real property tax bills;
13. Any other factors deemed relevant and any other information which the Commission or the applicant considers necessary or desirable to an appropriate and proper consideration of the application.

39.040 Transient occupancy tax applicable.

All time-share projects shall be subject to the provisions of the transient occupancy tax as set forth in Chapter 3.28 of the Mono County Code.

PROCESSING

**CHAPTER 40 – CONVERSION OF EXISTING
MOBILE-HOME PARK FACILITIES TO OTHER USES**

Sections:

40.010	Intent.
40.020	Requirements generally.
40.030	Conversion standards.

40.010 Intent.

It is the intent of this chapter to regulate the conversion of mobile-home parks to other uses in order to protect mobile-home spaces in that they provide a valuable supply of rental and affordable housing opportunities within the county.

40.020 Requirements generally.

A use permit must be obtained prior to the conversion of a mobile-home park to another use, or prior to closure of a mobile-home park or cessation of use of the land as a mobile-home park. Conditions required to obtain a use permit shall include, and not be limited to, a requirement that the person or entity proposing the change in use shall file a report on the impact of the conversion, closure, or cessation of use upon the displaced residents of the mobile-home park as provided for in Government Code Section 65863.7, and as that section may from time to time be amended. The use permit and required report shall be required in addition to any other required permits or approvals, including subdivision map approval.

40.030. Conversion standards.

- A. Application for a use permit to convert an existing mobile-home park to another use, and/or an application for the filing of a tentative or parcel map for a subdivision to be created from the conversion of a mobile-home park to another use, shall be accompanied by a conversion impact statement report setting forth the impacts of the proposed conversion upon (1) displaced residents of the mobile-home park, (2) availability of adequate replacement housing in mobile-home parks or other affordable housing units, (3) relocation costs, and (4) recommendations or measures to be taken to mitigate the identified impacts.
- B. The applicant proposing the change in use shall provide a copy of the report to a resident of each mobile home in the mobile-home park at least 15 days prior to the hearing on the impact report and by the Planning Commission. An applicant filing a tentative or parcel map for a subdivision to be created from the conversion of a mobile-home park shall make a copy of the report available to each resident of the mobile-home park at least 15 days prior to the hearing on the impact report and use permit by the Planning Commission.
- C. The Planning Commission shall review the report prior to any change of use, and may require, as a condition of the change, the person or entity to take steps to

mitigate any adverse impact of the conversion, closure, or cessation of use on the ability of displaced mobile-home park residents to find adequate housing in a mobile-home park or within other affordable housing. The steps required to be taken to mitigate shall not exceed the costs of relocation.

- D. The Planning Commission may require a subdivider who has applied for a tentative or parcel map for a subdivision to be created from the conversion of a mobile-home park to take steps to mitigate any adverse impact of the conversion on the ability of displaced mobile-home park residents to find adequate space in a mobile-home park or within other affordable housing. This section will not apply to a subdivision that is created from the conversion of a rental mobile-home park to resident ownership. (Government Code §66427.4)

PROCEDURES

CHAPTER 46 – NOTICING REQUIREMENTS

Sections:

46.010	Cause for notice.
46.020	Notice requirements.
46.030	Notice contents.
46.040	Notice definitions.

46.010 Cause for notice.

Upon receipt of a request for a land use decision which utilizes a public hearing or Director Review with notice, the Planning Division shall cause notice to be given.

46.020 Notice requirements.

- A. Notice shall be published once in a newspaper of general circulation for the following land use decisions:
 - 1. Subdivisions (refer to Title 17, Mono County Code, for specific processing requirements).
 - 2. Land use designation amendments.
 - 3. General plan amendments.
 - 4. Amendments to the text of the General Plan, Area Plans, Land Development Regulations, or Specific Plans.
 - 5. Use permits.
 - 6. Variances.
- B. Notice shall be given by first-class mail to any person who has filed a written request.
- C. Notice shall be given by first-class mail or delivery to all surrounding property owners for land use decisions utilizing Public hearing procedures.
- D. Notice shall be given by first-class mail or delivery to all contiguous property owners for land use decisions utilizing Community Development Director Review with Notice procedures.
- E. An eighth-page advertisement in a newspaper of general circulation may be substituted for individual property owner notice whenever the individual notice would require notification of one thousand (1,000) or more property owners.

This alternative is often applicable to large general plan or land use redesignations.

- F. Notice shall be given to each local agency expected to provide water, sewage, streets, roads, schools, or other essential facilities or services to the project, whose ability to provide those facilities and services may be significantly affected.
- G. Notice shall be given in such other manner as is deemed necessary or desirable.

46.030 Notice Contents.

Notice of Public Hearing shall contain the time and place of the hearing, a general description of the request, the location of the site, and any additional information the Director may deem appropriate.

Notice of Director Review shall contain the same information as that for Public Hearing except that the date of the Director decision shall be substituted for time and place of the hearing.

Errors in the giving of notice or of the failure of any person to receive notice shall not invalidate the proceeding.

46.040 Notice Definitions.

- A. "Surrounding property," for the purposes of this general plan, shall be defined as those properties that fall within a 300-foot radius drawn from the nearest limits of the parcel that is subject of the land use application. If a property is located more than 300 feet from the boundary of the parcel, but will be directly affected by any land use application on the subject parcel, then that property owner should also be noticed. Further, any property owner, regardless of their location or proximity to the parcel subject to a land use application, may receive notice as long as they submit their request in writing to the Planning Division more than 10 days in advance of the hearing. Such notice shall be given to those properties at least 10 days in advance of the hearing by mail to all persons whose names and addresses appear on the latest adopted tax roll of the county.
- B. "Contiguous property," for the purposes of this general plan, shall be the same as that found in definitions, Chapter 02. Such notice shall be given to these properties at least 10 days before the Director decision by mail to all persons whose names and addresses appear on the latest adopted tax roll of the county.

PROCEDURES

CHAPTER 47 – APPEALS

Sections:

47.010	General provisions.
47.020	Procedures & fees.
47.030	Public notice of appeal.
47.040	Appeal hearing.
47.050	Action of appeal.
47.060	Withdrawal of appeal.
47.070	Reinitiation of project.
47.080	Finality of appeal.

47.010 General provisions.

Appeals of any action of the Planning Division or Planning Commission may be made by a party adversely affected by the action. Appeals shall be made in accordance with this chapter. The taking of any appeal stays proceedings in the matter appealed until a decision is rendered on the appeal. For purposes of this section, a party adversely affected by the action shall mean any party who, upon exhaustion of administrative remedies, would have standing to challenge the action in court.

47.020 Procedures & fees.

Appeals shall be filed in the manner specified below and shall be accompanied by the appropriate filing fee set by the Board of Supervisors:

- A. **Planning Division Determinations.** Appeals of a Planning Division determination or interpretation of the provisions of this general plan, including consistency with the Land Use Element, shall be made by filing a written notice of appeal on a form provided by the division with the Secretary of the Planning Commission within 10 calendar days following the division’s action.
- B. **Planning Commission Determinations.** Appeals of any decision of the Planning Commission may be made to the Board of Supervisors by filing a written notice of appeal, on a form provided by the division, with the Community Development Director within 10 calendar days following the Commission action. The Director will determine if the notice is timely and if so, will transmit it to the Clerk of the Board of Supervisors to be set for public hearing as specified in Section 47.030.

47.030 Public Notice of appeal.

Within 30 days of the acceptance of a Notice of Appeal, the Community Development Director, in the case of an appeal of a Planning Division determination, or Clerk of the Board of Supervisors, in the case of an appeal of a Planning Commission determination, shall set the matter for hearing and shall give notice of the date, time and place of the hearing to the appellant, the applicant, and to any other party who has requested in

writing to be so notified. All appeals shall be scheduled for a hearing, which shall commence within 60 days of the date of filing the appeal.

47.040 Appeal hearing.

Appeals shall be de novo (i.e., the appeal body is not limited to a review of the record before the decision maker and the entire case may be repeated), except that the scope of the appeal shall be limited to those matters from which an appeal is taken. In hearing any such appeal, the appeal body may affirm, affirm in part, or reverse the previous determination which is the subject of appeal, provided that an appeal is not to be granted when the relief sought should be granted through a variance or amendment.

The hearing may be continued from time to time by the appeal body.

47.050 Decision.

The appeal body may render its decision at the conclusion of the hearing or at any time within 30 days following the hearing.

47.060 Withdrawal of appeal.

Any person who files an appeal of any decision rendered under any of the procedures included in the chapter may withdraw that appeal in accordance with the following:

- A. All withdrawals shall be in writing and signed by all persons who signed the appeal.
- B. Any appeal may be withdrawn by the appellant prior to the giving of the Notice of Hearing on appeal with the consent of the Director, who shall have the discretion to withhold such consent if he/she is of the opinion that such withdrawal might act to deprive other interested persons of an opportunity to oppose the action appealed from.

Any withdrawal effectively made pursuant to the above rules shall be an abandonment of the appeal and the decision appealed from shall be reinstated as though no appeal had been made.

47.070 Reinitiation of project.

No matter appealed from and denied/disapproved by the Board of Supervisors or Planning Commission may be reconsidered for a period of one year from the date of final action unless such action was specifically stated to be without prejudice.

47.080 Finality of appeal.

The appeal of any decision to the Board of Supervisors, pursuant to the provisions of this chapter, constitutes the administrative appeal and remedy procedure for all land use decisions of the County. The decision of the appeal body, pursuant to 47.050, shall be final for all purposes unless a judicial action challenging the same is commenced within the time provided by law. Failure to make timely utilization of the administrative remedies of this chapter and the exhaustion of same shall bar further review.

PROCEDURES

CHAPTER 48 – AMENDMENTS

I. General Plan Map/Land Use Designation

II. Text Amendments

**General Policies,
Land Development Regulations,
Land Use Designations**

Sections:

I. GENERAL PLAN MAP/LAND USE DESIGNATION AMENDMENTS

- 48.010 Initiation.**
- 48.020 Planning Commission action.**
- 48.030 Board action.**
- 48.040 Covenants.**
- 48.050 Reinitiation.**

II. TEXT AMENDMENTS – GENERAL PLAN POLICIES, LAND DEVELOPMENT REGULATIONS

- 48.060 Initiation.**
- 48.070 Planning Commission action.**
- 48.080 Board action.**
- 48.090 Reinitiation.**

I. GENERAL PLAN MAP/LAND USE DESIGNATION AMENDMENTS

48.010 Initiation.

The provisions of this section, or portion thereof, to the extent that the same may be referred to in any specific procedure, shall govern in the initiation of proceedings. Initiation may be by:

- A. The adoption of a resolution of initiation by the Board of Supervisors;
- B. The adoption of a resolution of initiation by the Commission;
- C. Filing with the Director an application signed by one or more of the record owners of the parcel of property which is the subject of the application or by an agent of the owner, authorized in writing, or by a public utility company or other agency with the powers of eminent domain. In the event that more than one parcel is submitted for district amendment, owners of parcels representing at least 60% of the area involved must sign the application. The names of all record owners of all land involved must be stated. A petition for amendment shall be on a form designated by the Commission, and shall be accompanied by the

required application, environmental forms, and fee. In addition, the applicant shall also be assured that the proposed district amendment is consistent with this general plan before his application is deemed accepted.

48.020 Planning Commission action.

Decisions to change the classification of land from one adopted land use designation to another shall be the subject of a public hearing and noticed according to the requirements of Chapter 46, Noticing Requirements. The application shall be heard first before the Commission.

Prior to taking an action to approve or recommend approval of a change in district designation classification, the Commission shall find as follows:

- A. The proposed change in land use designation is consistent with the text and maps of this General Plan.
- B. The proposed change in land use designation is consistent with the goals and policies contained within any applicable area plan.
- C. The site of the proposed change in land use designation is suitable for any of the land uses permitted within that proposed land use designation.
- D. The proposed change in land use designation is reasonable and beneficial at this time.
- E. The proposed change in land use designation will not have a substantial adverse effect on surrounding properties.

The Commission recommendation shall then be acted upon by the Board, excepting, however, that a recommendation for denial shall terminate any application for a change in land district classification unless it is appealed in accordance with the provisions of Chapter 47, Appeals. Excepting, however, an application for a change in land use designation, when accompanied by a land use application that requires an action by the Board of Supervisors, shall be referred without appeal to the Board of Supervisors.

48.030 Board action.

The Board of Supervisors shall act on the recommendation for the land use redesignation from the Commission at a public hearing noticed according to the requirements of Chapter 46, Noticing Requirements.

The Board may approve, modify or disapprove the recommendation of the Commission. If new information regarding the application is presented at the Board hearing which may have influenced the Commission recommendation, the Board may refer it back to the Commission for report and recommendation before taking action, but the Commission shall not be required to hold a public hearing thereon.

The action of the Board shall be the final administrative action.

48.040 Covenants.

Whenever performance of any condition or accomplishment of any development is required by the grant of a special permit or in connection with the redesignation of property, and the performance or accomplishment is to occur at or after a specified time, the Director may require the record owner of the land involved to execute a covenant running with the land in a form approved by the County Counsel, which shall contain the requirements imposed and it shall be recorded in the office of the county recorder. The Director may issue releases from such covenants when they are no longer applicable (snow storage and joint parking agreements are common applications of this provision).

48.050 Reinitiation.

No matter initiated pursuant to Section 48.010C (Initiation), may be reinitiated for a period of one year from the date of final action denying or disapproving such matter, unless such action was specifically stated to be without prejudice.

II. TEXT AMENDMENTS – GENERAL PLAN POLICIES, LAND DEVELOPMENT REGULATIONS

48.060 Initiation.

A. Amendments to the text of the General Plan or the Land Development Regulations may be initiated by:

1. The adoption of a resolution of initiation by the Board of Supervisors;
2. The adoption of a resolution of initiation by the Commission.

B. General plan text amendments may be initiated by either 1 or 2 delineated in A. above except that the processing of amendments to the text of this general plan are limited by state law to four cycles per year, unless the amendment will qualify as an affordable housing project. There is also a one-year moratorium on general plan amendments following the adoption of a newly prepared plan.

48.070 Planning Commission action.

Action to change the text of the Land Development Regulations, or the text of any area plan or countywide general plan element, shall be the subject of a public hearing and noticed according to the requirements of Chapter 46.020, Noticing Requirements.

After the hearing, the Commission shall render its decision in the form of a written recommendation to the Board. If it is a land development regulation amendment, the recommendation for approval shall include a finding that the proposed change to the text is consistent with this General Plan as well as any applicable area plans. Prior to making a recommendation to amend an area plan, the Commission shall find that the proposed adoption or amendment is consistent with the countywide general plan.

A land development text amendment which imposes any regulation listed in Government Code Section 65860 (Adoption of Regulations), not theretofore imposed; or removes or modifies any such regulations theretofore imposed, shall be adopted as provided in this section.

48.080 Board action.

MONO COUNTY GENERAL PLAN

The Board of Supervisors shall act on the recommendation for the text amendment from the Commission at a public hearing and noticed according to the requirements of Chapter 46.020, Noticing Requirements.

The Board may approve, modify or disapprove the recommendation of the Commission. If new information regarding the application is presented at the Board hearing which may have influenced the Commission recommendation, the Board may refer it back to the Commission for report and recommendation before taking action, but the Commission shall not be required to hold a public hearing thereon.

The action of the Board shall be the final administrative action.

48.090 Reinitiation.

No matter indicated pursuant to Section 48.060(2) can be reinitiated for a period of one year, unless Board action was specifically stated to be without prejudice.

PROCEDURES**CHAPTER 49 – ENFORCEMENT****Sections:**

- | | |
|---------------|------------------------------------|
| 49.010 | Interpretation – Generally. |
| 49.020 | Enforcement – Duties. |
| 49.030 | Enforcement procedures. |

49.010 Interpretation – Generally.

Except as specifically provided herein, the land use designations and the land development regulations shall not be interpreted to repeal, abrogate, annul or in any way affect any existing provision of law or ordinance, or regulations or permits previously adopted or issued relating to the erection, construction, moving, alteration or the enlargement of any building or improvement. Except that where the Land Use Element of this General Plan imposes greater restrictions than is imposed or required by an existing law, ordinance or regulation; the provisions of this General Plan shall control. Consult Section 04.030 B for "Interpretation of Similar Uses."

The remedies provided for in this chapter shall be in addition to any other remedies or penalties provided in Land Use Element or any other law or ordinance.

49.020 Enforcement – Duties.

- A. Chief Building Inspector: The chief building inspector or his/her authorized representative shall enforce the provisions pertaining to building height and minimum setbacks.
- B. Health Officer: The health officer or his/her authorized representative shall enforce the provisions pertaining to maintenance and use of property, structures and buildings so far as matters of health are concerned on a complaint basis.
- C. Community Development Director: The Community Development Director or his/her authorized representative shall enforce provisions pertaining to use of land and structures.

49.030 Enforcement procedures.

- A. Any person, company or corporation that causes any use to be established, any structure to be altered, converted, moved or commenced contrary to the provisions of land use designations and the land development regulations shall be notified by the Community Development Director to correct all violations through the issuance of a Notice of Violation.

The notice shall be served upon the owner of the property by registered or certified mail and shall be sent to the persons shown on the latest equalized County tax roll to be the owners of the property.

Such notice shall contain the following information: location of the property, name of the property owner(s), nature of the violation, an order to correct the violation/completion of abatement within 30 days, and a statement that if the nuisance is not corrected as specified, the violation will be referred immediately to the District Attorney or Director of Public Works for enforcement proceedings.

- B. If, upon the expiration of the period specified in the Notice of Violation, action to abate the nuisance has not been commenced, or, if it has been commenced, it has not been pursued with due diligence nor completed within the time specified, the Director shall effect enforcement by the following:
1. Transmit a copy of the Notice of Violation to the Office of the District Attorney along with notification that the violation has not been corrected. The District Attorney shall commence the necessary action or proceedings for the abatement, removal and enjoinder thereof in the manner prescribed by law, in a court which may have jurisdiction to grant such relief that will accomplish such abatement and restraint; or
 2. Transmit the Notice of Violation along with a request to commence nuisance abatement proceedings to the Director of Public Works as permitted in Chapter 7.20 of the Mono County Code.

VII. LAND USE MAPS

This section presents land use maps which were developed by applying the criteria discussed in the land use designation section of this document. Each area was assessed using the following criteria:

- Does the area include natural hazards that limit development, such as flood zones, Alquist-Priolo zones, unstable soils or steep slopes, etc.?
- Does the area include natural resources that limit development; e.g., wetlands, significant habitat, deer migration routes, etc.?
- What are the existing uses in the area?
- Is infrastructure available for development (i.e., sewer, water, roads, fire protection)?
- What is the existing land division pattern in the area and what are the lot sizes?
- Does the area have open space value (e.g., visuals, wildlife habitat, agricultural preservation)?
- What is the community vision for the future of the area?

Three sets of land use maps are presented here. The first set, "Planning Areas," shows the boundaries of the planning areas in the county. The second set, "Countywide Land Use Maps," shows land use designations for all private lands in the county. The third set, "Community Land Use Designation Maps," shows land use designations for each parcel in community areas.
