5. Mono County's Solid Waste Program—Future Planning.

Hard copies of the Board of Supervisors workshop, scheduled for March 12, were distributed to the group. Dublino led a discussion of the individual slides, and the basic presentation that would be provided to the Board. Following this, the floor was open for comments and input from the group. Goetz commented that it looked good, nothing to discuss. Schnadt discussed the loss of Benton Crossing Landfill would probably increase costs to the District, at this time the District is not sure what the alternative would be. A long-term planning effort would be helpful to them to know where it is going. Currently the District is investigating ways to reduce sludge weight and deal with it in other ways than disposal at BCLF
